FLORISTS' CLUB MEETING.

The April meeting of the club was most interesting. The feature was a paper on advertising by Robert Pyle of the Conard & Jones Co. This was full of bright ideas and suggestions and showed the author to be an expert in this very necessary art. A. Farenwald gave his impressions of the recent rose show at Chicago and the large rose growing establishments which supply that market. He instanced the Poehlmann Bros. Co.'s place in particular as being the acme of perfection and very far ahead of anything in the east. It was voted to have a smoker in the near future. Israel Rosnosky, with the H. F. Michell Co., will read a paper at the next meeting on the Formosa lily.

NOTES.

At Myers & Samtman's, Chestnut Hill, their new pink rose, Wyndmoor, is blooming away at a great rate; several times this season the house devoted to this variety has presented wonderful masses of blooms. For the Christmas trade alone, over 6,000 blooms were cut. A great crop certainly, as the house is not a large one. Many rose growers say this should prove a great addition to the list of forcing roses. American Beauty is the specialty here, there being something over 35,000 plants under cultivation. A change in the angle of the roofs of two of the large houses has proved very beneficial, the growth being much more sturdy under the new conditions. The old rise was 13 inches to the foot, even span; this was cut down and altered to a short north span, a long span to the south with a rise of only 5½ inches to the foot and while it looks flat it has had a marked effect for the better on the plants. Mr. Samtman said that it seemed to be a universal custom with the western growers to pinch all the stronger stemmed stock and thus get long stems on all their roses. Bridesmaid, Liberty, Richmond, Bride and all sorts, were treated alike and the effect was seen in all their flowers, most of them getting into the special stock.

We had a look last week at the two new roses from this city that are bidding for the public favor, Mrs. Jardine and Wyndmoor. Mrs. Jardine with Robt. Scott & Son, is certainly a worker, the request to "see it growing" is worth attention, as it surely appears to be doing overtime. Great shoots are coming up from the bottom and from where buds have been taken and the branch cut back to a strong eye a very vigorous shoot comes up, stronger, apparently, than the original. It certainly is a free blooming variety. A number of new ones are being tried, mostly from the Dickson nurseries. White Killarney is seen here having sported on the place. A stock of some 1,500 has been worked up and those

planted side by side, with the pink, surely seem stronger growers, the foliage being of a darker shade. Houses of Kaiserin are now in full flower and will continue to bloom until fall. A large stock of lilies, rambler roses, spireas and rhododendrons are coming on for Easter, all in good condition. K.

Pennsylvania Horticultural Society.

Supplementary to our telegraphic report of the spring show of the Pennsylvania Horticultural Society in last week's issue we give below the principal awards. The illustration on page 553 is of part of this excellent show:

PLANTS.

Rhododendrons, three plants.—J. W. Paul, Jr., first; Mrs. F. C. Penfield, second.

Azalea mollis, three plants.—J. W. Paul, Jr., first.

Callas, three in bloom.—C. B. Newbold, first; Mrs. F. C. Penfield, second.

Azaleas, three specimens.—C. B. Newbold, first; J. W. Paul, Jr., second.

Nephrolepis Amerpohli.—J. W. Pepper, first.

Twelve plants of Primula obconica.—J. W. Pepper, first; C. B. Newbold, second.

Twelve roses, tea or hybrid tea, not American Beauty.—P. A. B. Widener, first; Mrs. W. L. Elkins, second.

Callas Rossi and Devoniensis.—Mrs. F. C. Penfield, first; C. B. Newbold, second.

Twenty-four hyacinths in pots.—P. A. B. Widener, first; F. C. Penfield, second.

Six spireas, Gladstone.—Mrs. Chas. Wheeler, first; John W. Pepper, second.

Six pots of Lilium multiflorum.—James W. Paul, Jr., first; John W. Pepper, second.

Rose Annie Mueller, best plant.—C. B. Newbold, first; James W. Paul, Jr., second.

Rose Betty, best plant.—C. B. Newbold, first; James W. Paul, Jr., second.

Rose Katherine Zeimet, best plant.—John W. Pepper, first; James W. Paul, Jr., second.

Pittsburg.

CARNATIONS CLEANED UP.

The first half of the past week gave everyone the blues as business was at its very lowest ebb, but the last two days of the week were very active and by Saturday evening, carnations were actually scarce. Roses are still a glut, also lilies. Many of the latter intended for Easter are coming in now with very little demand. There is still an uncertainty regarding the supply for Easter.

F. Ueberle has purchased the stand of D. A. Mailey, Allegheny market, Chas.

Columbus, O.

BUSY DAYS IN TRADE CIRCLES.

Trade still continues very brisk in this city. The spring plant trade is beginning to assume fairly large proportions, giving promise of one of the best seasons ever known. Stock everywhere is looking fine, and the quantity denotes better than words can tell the expectations of a large spring trade by all the florists. Azaleas are very popular this year, especially in the lighter colors. Rhododendrons are moving very slowly, but it looks as if they would sell to good advantage a little later. Pot plants of all kinds are in good demand although prices are somewhat low, compared with former years.

NOTES.

The Fifth Avenue Floral Co., is showing some fine Enchantress and Richmond in its new range. The firm has all the facilities for growing fine stock and is certainly "making good."

The Livingston Seed Co. is having a splendid seed trade this spring, its store being a veritable beehive of industry.

The Columbus Floral Co. had a fine display of carnations this week.

CARL.

WASHINGTON, D. C.—F. H. Kramer is pushing things along with a full page advertisement of his Easter lilies in the Washington Times, illustrated with two large cuts, one on each side, the full length of the page.

MARION, O.—As a result of the efforts of 12-year-old Blanche Bain, this city will again be beautified this spring and summer by 1,000 or more flower beds. Little Miss Bain, who is one of the youngest philanthropists in the world, has for three years presented thousands of packages of flower seed to the Sunday-school children of the city, and in doing so has launched a movement which promises to be permanent.

NOTHING DOING.

The market the past week was dull; "nothing doing" one hears on all sides. Wholesalers and retailers complain of the dullness of trade and even funeral work is scarce. Carnations have been very plentiful; fancy stock is selling at two cents while the poorer grades were hard to move at any price. Roses, especially short American Beauty, were plentiful, also Richmond. Lilium Harrisii and callas were sold from 6 to 10 cents. Violets are still with us; some outdoor ones are in which arrive with short stems. Sweet peas, especially pink, are plentiful, lavender is scarce and selling well. Narcissus Poeticus from southern Illinois is coming in large quantities and must be sold cheap in order to move it. Thursday a change in the weather came and Friday morning freezing weather was with us. During the week the pleasant weather brought out the plant dealers to the down town market and plants were moving nicely; the cold snap, however, set them back, but it is expected it will soon warm up again. All the west end stores have their windows full of flowering plants, azaleas, lilies, hydrangeas, tulips, jonquils, etc., some of the displays being very elaborate.

NOTES.

Young & Sons' stores are filled with the choicest of everything. Their greenhouses are a sight worth seeing. A house of hydrangeas is very fine, many of the plants having 25 blooms, also a house of Harrisii lilies just coming into bloom, a fine lot of gloxinas in 6 and 8-inch pots and a large lot of Baby Rambler roses. Jim Young, who has charge of the Olive street store, is very proud of his stock of plants and says they will have the finest in years. He is afraid, however, if the warm weather which has just started should continue, that tulips, jonquils, etc., will not last to Easter. His lilies will just be right.

Grimm & Gorley lately purchased Van Campenhoudt Floral Co.'s four large greenhouses, Taylor and St. Louis avenues. They are 20x70 feet and are filled with all varieties of plants. They also intend to cultivate orchids and expect to erect another house this summer for smilax for store use.

Geo. Waldbart had the decoration of the high school at the funeral of the late F. Louis Soldan, superintendent of the public schools. This firm had the family order for the funeral of Byron Nugent, head of the Nugent dry goods emporium.

A lily, to be kept constantly flowering in the club room to be occupied by the Carondelet Woman's Club, is the memorial decided upon in honor of Mrs. Lily Evans, wife of Wm. P. Evans, principal of the Chouteau school.

F. H. Weber is stocking up with a fine supply of lilies, hydrangeas, and other

Baltimore.

BUSINESS DULL.

Trade continues inactive and but for one or two large funerals it could be truthfully designated the past week as stagnant. The approach of Easter gives animation to the hope that, for that festival at least, there will be some revival of activity. Even the merchants of the curbstone find times very dolorous, and they are unhappy over the disappointments brought to them by the southern bulbous stock which neither sells nor stands up. It was the expected that happened with the weather. All too suddenly the wind which had been blowing from the south veered around and old Boreas gave us some blasts from his arctic domains, which chilled things so that ice of half an inch thickness formed several mornings and the talk of early spring was postponed indefinitely. As retarding the blossoming of fruit trees and the putting back of tender foliage it was a great success. There were flurries of snow, and overcoats were again in request. Easter stock seems to be in good shape and there is no likelihood of any shortage, unless it be in Lilium Harrisii. Great complaint is heard on every side of the quantity of diseased bulbs which had to be thrown out, the losses meaning from 30 to 80 per cent, it is said, in some extreme cases.

NOTES.

Our local growers are all going to plant My Maryland, John Cook's new rose. Stevenson Bros., of Govanstown, have their stock grafted and say it looks vigorous and promising. This firm has an entire house this season to its seedling carnation and is more gratified than ever with its behavior. Killarney has not quite kept up to its earlier reputation here, and the firm will probably discard it next season.

The exhibition of the National Society of American Sculptors has proven a great success, and the decoration of the Fifth Regiment armory with evergreen and foliage plants set off the statuary to great advantage. Edwin A. Seidewitz and Chas. L. Seibold were in charge of the decorations and labored hard to make an effective scene of the large hall and the display it contained. S. B.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres,; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

W. ATLEE BURPEE will soon make a California trip.

CONGRESSMAN TIM SULLIVAN, of New York, distributes shoes and stockings instead of seeds to his constituents.

NEW ORLEANS, LA.—The J. Steckler Seed Co. reports a fine trade in seeds through the surrounding country.—D.

CINCINNATI, O.—The fine weather has been good for counter trade and some houses are working overtime to fill orders.—S.

THE California Vegetable Union at Los Angeles is reported to have made contracts in Teneriffe, Canary Islands, for their supply of Bermuda onion seeds.

PRESIDENT GREEN, of the American Seed Trade Association, has appointed the following committee on proprietary rights in names of seeds and plants: Alex. Forbes, chairman; Wm. Henry Maule and the third member from the house of James Vicks' Sons, Rochester, N. Y.

A CLAUSE like the following should be added to all contracts: "Not agreeing to execute this contract if prevented or stopped by any so-called pure seed laws which may be enacted by the U. S. government, which may contain conditions which the growing season make it impossible to meet in this year's crop of seeds or bulbs."

ONION SEED dealers are now-a-days verifying their blotter germination tests by weighing half bushel lots of the seed. It is surprising how readily the weights verify the blotter test. Some stocks which weigh 17 to 18 pounds to the half bushel will test 85 to 90 per cent, while stocks testing 50 or 60 per cent weigh only from 13 to 14 pounds to the half bushel.

BINGHAMTON, N. Y.—E. W. Conklin & Son have reincorporated their business with an increased capitalization of $300,000. There will be no change in the conduct of the business. Beside the $290,000 stock held by Horace E. Conklin, M. N. Rogers has $3,000; P. J. Quilter, $3,000; C. P. Woodward, $2,000, and J. C. Hillis, $2,000. These are Mr. Conklin's fellow directors.

REPRESENTATIVE MANN having written President Green of The American Seed Trade Association that the seedsmen would be heard in Washington on April 21 on his Bill H. R. 13835, President Green has called a meeting of members of the association and other seedsmen at Chicago, Friday, April 10, to consider this bill. A full attendance is already promised.

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

TOLEDO, O.—The seed stores have been rushed with business of late; the splendid weather brought out buyers. Clover seed is still climbing and reached up to $12.90 per bushel and the chances are still for a rise.—SCH.

FLORISTS in eastern cities who have forced Dutch and French stock, as well as lily of the valley, complain seriously that they will not receive over 80 per cent of their investment, leaving nothing for labor or fuel. Just at this time there is quite a disposition to let most of this stock alone the coming season, but, of course, some of them may change their minds before planting time.

A San Antonio Seedsman at the Entrance to His Adobe Store.

"THROW dust in their eyes," is evidently the motto of the free seed congressmen; let no seedsman who has fought this outrageous distribution be deceived; the same men whom public opinion regarding this farce is driving to the wall are the ones who are behind the so-called pure seed bill, with its harsh burdens of class legislation, and stand prepared to do the voting when the time comes.

WHY did the Bureau of Plant Industry spend so much time and public money comparing the government free seeds with the commission box commercial seeds, when they knew that this class of seed represented the lowest grades offered by commercial seedsmen? Why did they not, as a matter of fairness to the seed trade, select packages from leading reliable houses in the trade, obtained from them direct, and thus make the comparison a fair and honest one?

Chicago.

The seed dealers are using the commission houses here to some extent in disposing of onion sets—the voice is the voice of Jacob but the hand is the hand of Esau. Yellows now about $2.25, whites $2.75 to $3 according to quality.

Grass seed contract prices on the board of trade March 31 were noted as follows: Prime timothy, $4.65 (fillers); medium red clover, $22; choice white clover, $15.

Red clover is selling at record price now at $25 per 100 pounds.

When Doctors Disagree.

The botanist of the Bureau of Plant Industry says, Bulletin 131, March 8, '08, referring to "commission" seeds,

> That many firms are selling vegetable seeds not only of a low average quality but often entirely worthless makes it evident that some sort of protection should be afforded the purchaser by a guaranty of quality given by the seedsman.

Mr. Mann says in his report of March 20, 1908,

> It probably would not be wise or safe to require seedsmen to warrant seed sold by them, owing to the fact that they have no way of following the seed from the time it leaves their hands until the crop is produced.

Dutch Bulb Report.

Dutch growers report as follows regarding the past season's business: "Hyacinth bulbs have forced poorly everywhere. Most people lost money on them. The seedsmen, however, have done a good business. The bulb acreage this spring is about as usual, but the demand will probably be rather smaller than larger; therefore, higher prices cannot be expected.

"Tulips have forced fairly well. The acreage will be about the same, but growers on clay soil complain that a good many bulbs are missing. It is hardly thought there will be much decline in the market price of tulips, except possibly on the higher priced sorts. All late varieties and Darwins will be cheaper. Daffodils in general will probably carry about the same prices, but some varieties will be cheaper. Spirea of the newer kinds will be lower in price."

With Clean Hands.

It is an old principle of law that the plaintiff shall come into court with clean hands. If the Bureau of Plant Industry, backed by Secretary Wilson and the law makers in congress propose to prosecute and hamper the seed trade under a law with notably harsh conditions, how can the law makers come into court as plaintiffs while they are spending $300,000 of the public money belonging in part to these same seedsmen tax-payers, as well as burdening the U. S. mails? This free seed distribution can only be looked upon as a personal bid for votes, to which end these law makers give away at public expense the same merchandise which the seedsmen are selling for a livelihood. In other words, the seedsmen today pay heavy customs duties and large sums in postage to aid competition with themselves. This does not seem to comply with the old-time rule of "coming into court with clean hands."

Simon Guggenheim, Seedsman Too.

There will be seeds for 1,000 different people throughout Colorado as soon as the State Horticultural Society can distribute a shipment which was received recently from Senator Simon Guggenheim. Peas, carrots, parsley, muskmelons and lettuce are the products which will be raised from the seeds distributed.—Denver Republican.

Rogers Brothers,

SPECIALTY GROWERS.

Purest Strains GARDEN PEA and BEAN SEED.

For the Wholesale Trade. ALPENA, MICH.

Now for Pure Hen Fruit.

Washington, D. C., April 6.—It is reported that friends of poultry fanciers will endeavor to amend the Mann pure seed bill to include eggs. These, the buyers hold, should be guaranteed 98 per cent fertile and if found adulterated, the seller shall be subject to the fines and imprisonment provided in the bill.

Open Letter From James R. Mann.

March 25, 1908.

MY DEAR SIR:—

Some time ago I wrote you that I would, during the course of the winter or spring, send you some of the flower or vegetable seeds which it is the policy of the government to distribute. The demand upon me for seed has been very great and I find that I do not have seed enough to send to everyone to whom I wrote in the fall. I will be able, however, to supply those who ask for seed, and if you will indicate that you desire flower or vegetable seed, I will promptly send them to you.

Yours sincerely,

JAMES R. MANN.

Member of Congress, Second District Illinois.

Imports.

During the week ending April 5, imports were received at New York as follows:

Frank H. Darrow, 154 cases plants.

J. Roehrs & Co., 36 cases trees and shrubs.

A. Rolker & Sons; 27 cases plants.

Vaughan's Seed Store, 24 cases plants. One bdle. plants.

McHutchison & Co.; 22 bdls. eight pkgs. trees.

C. C. Abel, 21 cases plants; 36 cases bulbs.

Wm. Elliott & Son; 20 cases plants.

C. F. Meyer; one case plants.

Henry & Lee; one case lily bulbs.

MARKET GARDENS.

MOIST, black sandy loam is, without doubt, the best for celery culture.

BRUSSELS SPROUTS are a paying crop when a suitable market can be found for them.

ECLIPSE is one of the best of the early beets, far better in quality than the Egyptian turnip rooted varieties.

NEWLY broken land is not as suitable for onions and potatoes as soil that has been longer under cultivation.

A SAFE and effective dressing of muriate of potash for potatoes is 250 pounds to the acre. Wood ashes sown evenly, broadcast, at the rate of one ton to the acre, is also an excellent and safe fertilizer.

OLATHE, KANS.—L. G. McKenzie and C. A. Willis from Fullerton, Ill., have built a fine house for cucumbers 50x200 feet at a cost of over $7,000 including boiler house, etc. This glass will be added to later.

Cucumbers and Tomatoes.

At this writing lettuce is selling at good prices and the indications are that many growers have also planted cucumbers; to prevent a glut of cucumbers later on it would be well to devote at least part of the glass to tomatoes. In the forcing of cucumbers and tomatoes there are different problems to meet than in lettuce growing. The latter is producing leaves, the former flowers and fruit. And very often one can see a magnificent mass of foliage in cucumbers and tomatoes and little fruit. The causes are several—wrong feeding, wrong watering and lack of pollination. With most soils, manure is all that is needed to produce leaves, hence we find lettuce growers rely on manure entirely.

Where plenty of manure has been used in growing lettuce, there is plenty of nitrogen and potash for the immediate wants of the cucumber and tomato crop, and what is needed in addition is phosphates. If this is applied in the shape of bone, it takes some time to dissolve, so it is clear it should be applied in time to be of benefit to the crop. Under average conditions, it will be advisable to use plenty of bone for tomatoes or cucumbers and to apply it at planting time and work in or soon after as top dressing.

MARKETMAN.

Forcing Rhubarb with Ether.

Rhubarb is a plant that is being forced for winter use more and more every year. The method of forcing is very simple. Good, strong, thoroughly established, three or four-year-old clumps are dug in the fall. These are stored in boxes or cold frames until required for use. They are then taken into the forcing house and placed close together in boxes or in beds underneath the benches. Soil is thoroughly packed between the clumps and a covering of from two to six inches of soil placed over them. The temperature of the house is kept between 50° and 60° and water applied when necessary. In about four or five weeks' time the rhubarb is ready to cut.

In the experiments at Cornell on the forcing of rhubarb by the use of ether, the usual methods of culture were practiced. The experiment was started on December 26, when three clumps of etherized and three clumps of unetherized rhubarb were placed in boxes in a dark mushroom house. Care was taken to have both lots as nearly the same weight as possible. The effect of the ether was very pronounced, the shoots of the etherized clumps being ready to cut fully five days before those of the unetherized clumps. Not only were the shoots of the etherized clumps earlier than those of the unetherized, but there were also a great many more of them. Four cuttings were taken from these two lots of rhubarb, and a comparison made between the weight of the edible stalks produced by the etherized and unetherized lots. The results were decidedly in favor of the etherized lots. The first cutting was made on January 20, when the etherized clumps yielded three pounds, one ounce of edible stalks and the unetherized clumps one pound, six ounces. At the second cutting, which was made on January 26, the etherized lot yielded two pounds, nine ounces, and the unetherized two pounds, two and a half ounces. The third cutting, made on February 3, showed no gain in favor of the etherized lot, as both lots yielded one pound, thirteen ounces. In the fourth cutting, made on February 10, there was once more a slight increase in yield in favor of the etherized lot, it yielding one pound, ten ounces, and the unetherized lot one pound, seven and a half ounces. There was, therefore, from the four cuttings a total gain of two pounds, four ounces in favor of the etherized lot, which is equal to an increase of about 33 per cent due to etherization.

COST OF ETHERIZATION.

The expense of etherization is not as much as might be expected. The initial cost for a thoroughly air-tight box need not be great. Any well-made box may be used if the cracks are covered over with felt paper and the cover made to fit as closely as possible. Such a box can be made by any handy man at a very slight cost. Commercial sulphuric ether such as is required for etherization, costs about 75 cents a pound, which quantity is sufficient to etherize 30 good-sized clumps of rhubarb. Thus the cost of the process is so little that it is more than covered by the five days' gain in time, which means a considerable saving of labor and often a better price for the rhubarb. The extra quantity of rhubarb produced by etherization is clear gain.—Canadian Florist.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points April 4 were as follows: New York, cucumbers, No. 1, 75 cents to $1 per dozen; No. 2, $2.50 to $4 per box; lettuce, 25 cents to 75 cents per dozen; mushrooms, 25 cents to 50 cents per pound; mint, 25 cents to 40 cents per dozen bunches; radishes, $2 to $2.50 per 100 bunches; rhubarb, 40 cents to 60 cents per dozen bunches; tomatoes, 15 cents to 25 cents per pound. Cincinnati, cucumbers, $1.25 per dozen; mushrooms, 40 cents to 50 cents per pound. Chicago, cucumbers, 90 cents to $1.25 per dozen; radishes, 50 cents to 60 cents per dozen bunches. Boston, cucumbers, $6.50 to $7 per box; tomatoes, 30 cents to 40 cents per pound. Pittsburg, cucumbers, $8 to $9 per box.

Pollinating Tomatoes.

To get good tomatoes under glass it is necessary to give pollination proper attention. Without it, either no fruit at all is formed, or what does set is one-sided, irregular or small. Remember, it is the seed that causes the fruit to develop—hence no seed means, as a rule, no fruit, and no pollen means no seed. Neglect of pollination does not necessarily mean no fruit at all, as, in warmer months, pollination is naturally effected; it generally delays the crop, and sometimes makes it unprofitable on that account.

The subject may be divided into three

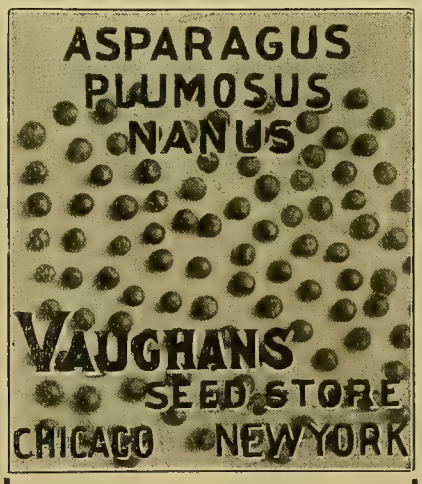
O. V. ZANGEN, Seedsman, Hoboken, N. J.

periods, namely: Winter, spring and summer pollination. To begin with, the operator should understand that all tomatoes (to my knowledge) are perfect flowered—the pistils and stamens are found in the same flower. Next there is no insect that seems to make a business of visiting tomato flowers. Hence tomatoes nearly always are self-fertilized and crosses by nature are not common. When conditions are favorable the pollen shakes out readily, by the slightest motion. Thus in the winter months, it is best to collect pollen from those flowers that yield some, and apply to all the flowers. In the spring, a sharp snap with the finger will do the trick for a whole cluster; and towards summer to shake the whole plant is sufficient. All these methods should only be tried when the sun is shining and the air dry, preferably around the noon hour. For winter pollination some use a fine brush and others a little wooden spoon.

MARKETMAN.

BUFFALO, N. Y.—Wm. Starke was brought back here from New York March 30. He is wanted here on the charge of grand larceny, second degree, preferred against him by Wm. F. Kasting, who says that Starke bought $200 worth of flowers from him recently and left town before he settled the account.



We handle this Asparagus both in seeds and plants of all sizes, in very large quantities and make very close prices on larger amounts on application. The Nursery Trade

American Association of Nurserymen

J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport, Ind., Vice-President; George C. Seager, Rochester, N. Y., Sec'y.

Thirty-third annual convention to be held at Milwaukee, Wis., June 10-12, 1908.

NURSERYMEN should be on the lookout for a pure tree agents' bill before congress in the near future.

EDGELEY, N. D.—C. C. Snyder is about to open a nursery here for the growth of hardy stock suitable for local conditions.

WYOMISSING, PA.—The Wyomissing Nursery has recently closed several contracts for beautifying home grounds in Reading.

DES MOINES, IA.—The Grand View Nursery Co. reports a fine season's business and is contemplating considerable additions to its plant this spring.

IT is reported that a species of locust, discovered in Louisiana by Prof. R. S. Cocks, of Tulane University, has been pronounced new by Prof. C. S. Sargent, of Harvard University.

THE authorities at Wabash, Ind., now require property owners to plant trees in front of their property and in case of neglect will do the work and charge the property with it. No Carolina poplars is the order.

OLNEY, ILL.—The nineteenth annual meeting of the Horticultural Society of Richland County was held at the court house March 11. Several excellent papers on fruit growing, care of orchards and spraying were read.

BOSTON, MASS.—Jefferson Coolidge, Jr., is having some improvements made at his new summer home at Coolidge Point, and Eben D. Jordan is laying out the grounds of the estate in Wenham, recently purchased for his daughter, Miss Dorothy Jordan. A range of greenhouses will be constructed and a large garden is a part of the plan.

GEORGE C. PERKINS, of Jackson & Perkins Co., Newark, N. Y., sails for Europe, April 15, on the steamer Majestic. He goes upon a business trip in the interests of his house and will visit the leading places of horticultural interest in Great Britain and on the continent. His itinerary will include Ghent, Boskoop, Haarlem, Hamburg, Erfurt, Quedlinburg, Trier, Luxemburg, Nancy, Lyons, Orleans, Angers, Paris, London, etc.; also a dozen or more small places in England where Jackson & Perkins Co. have business connection.

RIVERSIDE, CALIF.—Horticultural Commissioners Cundiff and Holmes left recently for a tour of Los Angeles and Orange counties, to inspect the nurseries. There is a great scarcity of citrus nursery stock in southern California, and there is a constant demand that stock be admitted to Riverside county from nurseries in Los Angeles and Orange counties. It is known that purple scale infest some of these nurseries, but the commissioners deem it unfair to quarantine against all of them without an investigation. They will therefore make a thorough examination of stock in the various nurseries and determine for themselves what stock is safe to be admitted.

J. BLAAUW & Co., Boskoop, Holland, inform us that Queen Wilhelmina and Prince Henry of Holland visited their nursery March 20, and expressed themselves as highly interested in the fine collections of various plants and buildings. Her Majesty was especially pleased with the large flowering hybrid rhododendrons.

THE city of Toledo, O., has a new park donated by Geo. Bayer, the florist and former councilman. The park is located on the boulevard, near Franklin avenue and Blanchard street. It is an ideal little natural park, being filled with large elm trees and having a nice lawn. The city sought one corner of the park for the boulevard right of way and instead of giving just a corner Mr. Bayer executed a deed for the whole.

Bobbink & Atkins, Rutherford, N. J.

Bobbink & Atkins, of Rutherford, N. J., are sending out great quantities of nursery stock and their greenhouses show a very interesting collection of fine Easter plants. The blue spruce and other conifers grown by this firm are among the finest of this year's offerings. English ivy is another stock of which they handle an immense quantity. A very important feature at present is the immense stock of hardy herbaceous plants, hardy roses and flowering shrubs. There is a great demand for the quality of bay trees and boxwood that they handle and that is not surprising as, particularly in bay trees, they seem to carry stock that is faultless.

WALK IN THE NURSERY OF BOBBINK & ATKINS, RUTHERFORD, N. J.

American Association of Nurserymen.

The thirty-third annual meeting of the American Association of Nurserymen will be held in Milwaukee June 10-12. In a communication received from President J. W. Hill he says that the committees are doing good work and he expects a good and profitable meeting which it will be to the advantage of all nurserymen, florists and manufacturers of nurserymen's supplies to attend. The headquarters for the convention will be at the Hotel Plankington and members who attended the convention in Milwaukee in 1902 will recall the excellent accommodation and courteous treatment received on that occasion. In a special circular issued by Secretary Seager the advantages of membership in this important association are pointed out. The annual membership fee is $5 and the use of the association's telegraphic code will save more than this in a short time. Any nurseryman is eligible to membership.

The programme committee, R. C. Berckmans, chairman, is busy arranging its end of the meeting which will occupy about three and one-half hours daily, the remaining time to be spent in social features and sight-seeing. There is every prospect that the large exhibition room will be completely filled with exhibits and this is becoming an increasingly interesting and important feature annually. The legislation committee will have many interesting reports. A special train will be run from Chicago over the C. M. & St. P. railway on the morning of June 9 for the accommodation of delegates and special cars are to be attached bearing delegations from the east and south.

MOLINE, ILL.—Work has been resumed at Sylvan park under the direction of W. H. Klehm, landscape gardener, looking toward its completion at as early a date as possible—probably June 1. A force of men is now engaged in setting out a carload of young elm trees which Mr. Klehm received this week from his nurseries at Arlington Heights. Another force of men and teams is engaged in hauling soil from Sixth avenue, where grading preparatory to paving is going on.

Trimming Privet.

ED. AMERICAN FLORIST:—

Is it necessary to trim privets just planted? If so, what would be the proper height to trim? A. S.

A little trimming will be advisable as it will ease the roots. The height, of course, will depend upon the size of the plants. Cut back to wood that is fairly well ripened. G.

Whirlwind.	Large semi-double white	.85	6.00	50.00

Hardy Aster Grandiflorus. This is not only the largest flowered but one of the latest flowering of the Michaelmas Daisies; its deep violet blue flowers are the last thing to bloom in our perennial grounds. $2.00 per dozen; $15.00 per 100.

Campanula Persicifolia Gigantea Moerheimi. The most beautiful of the Peach-leaved Campanulas, producing 3 feet high stems of pure white, double, Camellia-like flowers 2 to 2½ inches in diameter; a fine cut flower. $1.25 per dozen; $8.00 per 100.

Burbank's Shasta Daisy Alaska. Undoubtedly the best not only of the Burbank varieties, but also superior to any of the foreign varieties, flowers 4 to 5 inches in diameter and of a pure glistening white. $1.50 per dozen; $10.00 per 100.

Helenium Riverton Gem. A new variety that originated on our trial grounds two years ago. Of strong growth, 2½ to 3 feet high. Covered from the middle of August to the end of October with brilliant flowers, which on opening are old gold suffused with bright terra cotta, changing as they mature to a wallflower-red. $1.50 per dozen; $10.00 per 100.

Helenium Riverton Beauty. Another new variety which originated with us, quite distinct in color, which is lemon-yellow with a large disc of purplish-black, the two colors forming a striking combination. Of strong growth, 3 to 4 feet high and blooming from early in August until October. 30 cts. each; $3.00 per dozen.

Japanese Iris. An unsurpassed collection of twenty distinct varieties, $1.50 per dozen; $10.00 per 100. Set of 20 varieties for $2.00.

Lupinus Polyphyllus Moerheimi. No new perennial in our trial grounds pleased us as much as did this new Lupine during the past season. It forms symmetrical bushes three feet high, with spikes of flowers a foot long, a beautiful combination of light and dark pink. 60 cts. each; $6.00 per dozen.

Hardy Perennial Phlox. We are headquarters for these. We have over 200,000 one-year-old field grown plants now in stock in all the leading varieties. All the standard sorts, 75 cts. per dozen; $5.00 per 100; $40.00 per 1000.

Rudbeckia Rays of Gold. An improved, or rather, a refined form of the popular Golden Glow, having narrower petals and forming a full double flower. $1.50 per dozen; $10.00 per 100.

Stokesia Cyanea Alba. Identical in every way with the popular blue Stokesia except in color, which is white; very desirable. $1.50 per dozen; $10.00 per 100.

Tritoma Pfitzeri. We have a large stock this season of this most popular of the Tritomas. $1.00 per dozen; $7.00 per 100; $60.00 per 1000.

For the most complete list of Hardy Perennials, see our current Wholesale List.

Announcement.

Our **W. VAN KLEEF, JR.,** is again in America calling on the trade. Please ask for catalogue—free for the asking. Address during April and May care of **Maltus & Ware, 14 Stone St., New York.** Yours truly,

W. van Kleef & Sons, Wholesale Growers of Nursery Stock. **Boskoop, Holland.**

Rose Conrad F. Meyer,

It is difficult to understand why this hybrid rugosa rose is not more popular, says The Garden. Grown as a hedge it made a splendid picture in my garden last June. The great silvery rose, very sweet-scented flowers are produced in wonderful profusion. This rose can be trained on a pillar or over an arch, but is seen at its best when allowed to form a free bush. If planted as a hedge it must be given plenty of room; to try and keep it within bounds by interfering with its great prickly shoots would take away half its charm. A few old growths should be removed each year; beyond this little pruning is needed. When visiting a nursery 18 months ago I saw a row of Conrad F. Meyer 20 yards long in full bloom. The plants had been growing in an unpruned state for two years, and the effect of their long shoots bent to the ground by the weight of countless flowers was extremely fine.

"AN Architect's Views on The Use of Plants in Tying the House to the Landscape," was the title of H. H. Saylor's lecture, illustrated with lantern slides, given before the Horticultural Society of New York April 8.

BOX TREES.

We have just received a car load of beautiful, shapely Box Trees, the best we ever had, in all sizes and shapes.

The GEO. WITTBOLD CO., 1657 Buckingham Place, Chicago

Stands by the Mistletoe.

Washington, D. C., March 30.—An amendment to the agricultural appropriation bill offered by Mr. Burleson of Texas, providing means for exterminating the mistletoe as a parasite harmful to trees, provoked much heated discussion in the house to-day.

No sooner had the unromantic amendment been read than a storm of protest arose.

"I should like to ask if the gentleman is single?" put in Mr. Douglas.

"And I should like to know," said Mr. Olmsted, "whether the gentleman means this cruel measure to go into effect in leap year?"

"And does the gentleman value the forests of the future more than the poetic associations of the past?" asked John Wesley Gaines.

Mr. Burleson tried to explain the necessities of the case, but Mr. Gaines had started on the subject of sentiment and could not be stopped.

"I call up to your memory," he said, "all the glowing thoughts that ever came to you under the mistletoe. I call upon the gentleman who has just left the chair, Mr. Nicholas Longworth, to tell you his experiences, and I call upon the whole house to remember similar experiences and vote down this amendment."

The amendment was killed amid shouts of laughter.—New York Times.

THE National Nut Growers' Association, through its offices and members, has begun a series of uniform observations, to be taken in all parts of the country, with a view to accumulating data showing the adaptability of varieties to the different sections. The initial work will be confined largely to the pecan, but other nuts will be taken up in the same way if the expectations regarding the pecan are realized.

Hardy Roses

American Grown—Superior to Imported

We have unsold at the present time the following varieties—**all field grown plants,** grown in our nurseries at Rochester, N. Y.:

Anne de Diesbach	**Prince Camille**
Ollo	**Ulrich Brunner**

Detroit.

CLUB MEETING.

The Florists' Club meeting, April 1, brought out an unusually large attendance. A trade exhibit of Easter stock, chiefly in plants, was scheduled and nearly every grower in the city was represented with elegant stock and used the occasion to book many orders for Easter delivery. The meeting itself was most interesting, Geo. Browne entertained the boys with an original poem calculated to spur up the delinquent members of which there are quite a few as developed by Treasurer Walter Taepke's annual report, which was read. Ex-President George A. Rackham was present and introduced his successor in business, Michael Bloy, whose application for membership was received. As Mr. Rackham is retiring from the florist business, he was made an honorary member instead of active. He gratefully acknowledged the compliment and assured the club he had always appreciated the many honors it had conferred upon him in the past. Philip Breitmeyer spoke interestingly of his recent trip south, and also of his trip to Chicago, where he attended the meeting and exhibition of the American Rose Society. J. F. Sullivan also gave his impressions of the great rose show. The entertainment committee of the club provided refreshments which were much relished after the long evening session.

Visitors: Paul Berkowitz, Philadelphia; R. J. Irwin, New York.

ELMER D. SMITH & CO.,

Successors to Nathan Smith & Son, **ADRIAN, MICH.**

New Orleans.

BRIGHT PROSPECTS FOR EASTER TRADE.

Every indication proves that the trade for Easter will far surpass that of years back, both in the cut flower and plant line. The church decorations this year will be very elaborate and the florists are busy booking orders for same. The weather has been very favorable and the gardens of the city are one mass of bloom. The growers are now busy preparing their chrysanthemums for the fall show, which from present indications will be much superior to anything we have had in the past, and we hope the growers from the north will exhibit and show what section can produce the best flowers.

NOTES.

Jos. and Leon Chopin have formed a partnership, under the name of Chopin Bros., for general garden work.

J. H. Menard, Richard Ory, Abele Bros., and M. Lapouyade, are doing a good business at the markets.

E. Baker, late of Audubon park, has taken a position in a commercial house.

M. Cook's Sons are doing a rushing business in the plant and shrub line.

P. A. Chopin is kept busy with floral work for weddings and funerals.

R. Reinecke is progressing nicely with his new fish-tail fern.

John Rinck has the I. C. R. R. park in the pink of condition. D.

LYNN, MASS.—Ephraim E. Smith, a gardener, residing at 122 South street, was knocked from his bicycle by a passing automobile on South Common street March 28.

At Helena, Mont.

A rifle club has been formed by the boys at the State Nursery Co. J. M. Mills, brother of the president, won the last two weekly shoots. A baseball club is talked of and a survey has been made by another section for a good site for a tennis court.

W. J. H.

AURORA, ILL.—J. M. Smely, South Fourth street, has come to the rescue of the city and has presented the city hall custodian with a number of fine plants which will be used in the parks this summer. The plants will replace the hundreds which were frozen in the municipal greenhouse when the fireman allowed the steam to run down one night several weeks ago.

THE NEW .. CARNATION **AFTERGLOW**

WAS AWARDED A

Gold Medal by the Rhode Island Horticultural Society, at Providence, Nov., 1907. (Exhibited by Wm. Nicholson)

Craig Silver Cup by the Penn. Horticultural Society at Philadelphia Nov., 1907. (Exhibited by Dailledouze Bros.)

First Prize by the St. Louis Horticultural Society at St Louis, Mo., Nov., 1907. Exhibited by The E. G. Hill Co.)

First Prize by the State Florists' Association of Indiana at Indianapolis, Nov., 1907. (Exhibited by the Originator.)

Scored the highest number of points of any seedling exhibited at the Toronto Exhibition of the A. C. S. Jan., 1907, after arriving 24 hours late from Framingham, Mass.

Aside from these honors, the fact that it has been grown successfully wherever it has been tried is the best proof of its commercial value. Orders now booked by the undersigned, to be filled in rotation for well grown, well rooted cuttings at

$2.00 per doz.; $12.00 per 100; $100.00 per 1000.

WILLIAM NICHOLSON, Framingham, Mass. | THE E. G. HILL CO., Richmond, Ind. | DAILLEDOUZE BROS., Flatbush, Brooklyn, N. Y. | R. WITTERSTAETTER Originator, Sta. F., Cincinnati, Ohio.

The Salvia Zurich was first introduced by us.

PERENNIAL GARDENS CO., Toledo, Ohio.

Lynn, Mass.

Better prizes for competitors at the annual exhibition in September, and economy in every department where expense can be reduced, will be the policy of the Houghton Horticultural Society during the coming year, under the administration of the recently elected president, Philip Emerson. This attitude of the board of officers was thoroughly discussed at a meeting of the Houghtons at the home of Mrs. W. W. Butman, Beacon Hill avenue, April 1.

It was decided that business sessions in the future shall be held at the residence of different members, instead of at Lynn Historical hall, the rental of which was increased a short time ago. The lectures given under the auspices of the Houghtons will be given henceforth in the lecture room at the Lynn public library.

Plans were completed for the framing of a calendar for the coming season. The first outing will be April 20, when members will make a tour of the Boston greenhouses. On May 23, there will be an excursion to Marblehead. The Ross farm will be visited and it is expected that about 300 varieties of tulips will be in flower at that time. At the regular meeting, April 29, a stereopticon lecture will be given. Suggestions concerning joint meetings with organizations engaged in a similar work were made by different members, and discussed at some length. A special effort is going to be made to increase the number of amateur entries at the September show this year.

WOOD BROTHERS
FISHKILL, N. Y.

Toronto.

STOCK PLENTIFUL AND GOOD.

Stock plentiful and of the very best quality, and business only ordinary with little activity, excepting in funeral work, are the conditions, and these are not over joyous for either the grower or the storemen. The roses are a pleasure to behold, good strong stems and of very good color; carnations are more than plentiful and all good. Violets are getting smaller but sweet peas and lilies are becoming more plentiful. The price list for Easter, taking effect April 14, has just been issued. American Beauty roses are quoted at $15 to $40 per 100; Richmond $10 to $20; Killarney, Bridesmaid and Bride $10 to $15; Carnations $2 to $6; lily of the valley $2 to $4; bulbous stock $1.50 to $3; Callas $6 to $10; Violets 75 cents to $1. and Easter lilies $8 to $12. The outlook is for a good supply of stock in all varieties excepting violets; lilies will be plentiful and some very good stock is promised. In flowering plants there will be a good assortment.

NOTES.

The Horticultural Society was the guest of and welcomed by Sir Henry and Lady Pellat on Saturday, and the members received quite a surprise at the magnitude of excellent stock the conservatories contained. W. McVittie, the gardener, deserves credit for his excellent display of well grown stock; refreshments were served and it proved a very enjoyable afternoon.

The retailers are making great strides for Easter business and are showing good stock. The Floral Supply has opened a new branch on Queen street E., and Thos. Plumb will be open on Yonge street in a few days. H. G. D.

PINE BLUFF, ARK.—During the recent storm the greenhouses of A. A. Harper and Mrs. C. A. Starr were perforated until they resembled immense sieves.

THE LEEDLE FLORAL COMPANY SPRINGFIELD-OHIO

Eat Thornless Cactus.

Luther Burbank, the wizard of California, was the theme of all remarks and nearly every toast at a banquet which demonstrated some of the marvels of the thornless cactus, given at the Butler Hotel, Seattle, Wash., March 25, by R. P. Probasco, Mr. Burbank's representative in the propagation of the new cactus on a business basis. Mr. Probasco's guests included representative business men of Seattle, who tasted for the first time cactus served in every form imaginable.

From cactus fruit "Guayaquil" to cactus tartlets "Chico," the menu demonstrated what a chef can do with the Burbank evolution of the desert growth. Incidentally the plans of Mr. Probasco for the propagation of the thornless cactus in the arid regions of eastern Washington were briefly outlined.

Specimens of the thorny and thornless cactus had were sent from Santa Rosa by Mr. Burbank for the information of the guests. Mr. Probasco, who acted as chairman of the evening, explained how the growth of the thornless cactus in arid regions would support thousands of cattle on hitherto waste land, and act as an economic factor in reducing the price of meat throughout the country.

RUDOLPH BLASCHKA, is still turning out his famous glass models of flowers for the Agassiz museum of Harvard University at the rate of 25 specimens per annum. The secret process by which these exquisite models are made is known only to Blaschka since his father, Leopold Blaschka, died in 1895, and he works solely for Harvard. This is known as the Ware collection of flower models.

FLOWERS OVER PLENTIFUL.

The conditions of the market are, if anything, worse than at the last writing. Flowers of all kinds are a drug on the market and prices have been considerably lowered. The violet season is about over, but they are not missed very much as quite a variety of early garden flowers are coming in bloom. The weather during March has been quite warm and bright, which has had a tendency to bring everything forward. Lilies in many places will have to be kept cool, otherwise they will be in too early for Easter.

NOTES.

March 29 was Blossom day at Saratoga in the Santa Clara valley. Thousands of people availed themselves of the opportunity of cheap excursions from this city, to have an outing among the prune orchards which are now full of blossoms. Anyone who has never seen the Santa Clara valley cannot imagine the beautiful sight from the surrounding hills over the miles and miles of fruit trees as far as the eye can see, amongst which are scattered the handsome and prosperous looking residences of the owners.

T. Munroe has taken a five years' lease on the nursery of P. Cauhape, who is retiring from business on account of ill-health. Everybody is wishing Mr. Munroe much success in his new venture; he intends erecting some new greenhouses in the near future.

NEW CANNAS 1908

Rosea Gigantea. This beautiful variety has extra large flowers which are borne in such abundance that the mass of color on each plant is amazing. Single petals are 2½ inches across; color, a deep rich rose, almost a coral carmine. Plants make a vigorous growth, producing unusually fine clumps of green foliage. Height, 4 feet. (A great favorite with visitors to our trial grounds.) Strong plants, **$2.00** each, prepaid; **$18.00** per doz., by express, not prepaid.

Gladio-Flora. Remarkable for the unusual shape of the flowers which look like large Gladiolus. Petals are not long, but short and rounded and so wide they overlap each other, thus giving a very attractive appearance to the flowers. Color is crimson changing to carmine rose with an uneven edge of gold to each petal. Height, 3½ feet. Price, strong plants, **$2.00** each, prepaid; **$18.00** per doz., by express, not prepaid.

Meteor. Meteor is a vigorous grower with healthy green foliage. It is highly valued because of its magnificent flowers, fully four inches across, and abundance of bloom. Color is a deep crimson, very rich; each plant usually throws up five to six trusses of buds which continue blooming luxuriantly all summer through. Price, plants of dormant roots, **75c** each, postpaid; **$6.00** per doz., by express, not prepaid.

NEW CANNAS OF SPECIAL MERIT.

William Saunders. (1907) The flowers are large, of splendid form and are borne very freely in immense clusters. The color is a deep rich shining scarlet lightly dappled with crimson. Foliage is a rich bronze. Height, 3½ to 4 feet. We believe that Wm. Saunders is decidedly the most perfect Canna of this type that has been introduced. Those who tried Wm. Saunders in 1907 say it cannot be excelled. We offer plants only: **60c** each, postpaid; **$5.00** per doz., **$35.00** per 100, by express, not prepaid.

60 other varieties. Send for our list and prices.

PREPARE FOR EASTER

Have **Lilies** to burn, the best in the land, the best in the land, the best in the land. **Azaleas,** in finest colors, to beat the band, to beat the band, to beat the band.

Our immense stock of choice Easter plants, blooming Easter week or earlier if desired are now ready for immediate shipment.

No dull times at Aschmann's. Come and see our BIG RUSH in shipping **Azalea Indica, etc** Why? No wonder! Our **Azaleas** are of first-class No. 1 stock.

We make a specialty of importing every year an immense choice stock of this so well favored Easter plant.

Azalea Indica. We make a specialty of importing every year an immense stock of the choicest varieties popular in America, grown under contract for us by an Azalea specialist in Ghent, Belgium. If you need Azaleas, don't look around in vain all over the country for bargains, but come or write direct to us. We will be able to supply you with the best obtainable in the American market; full of buds; in good, healthy condition, right for Easter; all planted in October or November in 6 to 7 in. pots.

☞ **Take Notice.** We do not sell Azaleas in the fall, having the best picked out (and having the rubbish left for Easter), but we keep them all full of buds for our customers for Easter. Mme. Van der Cruyssen (2,500 of them), this is the best double pink variety known to the market, round as an apple, covered with buds; Bernard Andreas Alba (dbl. white), $1.00, $1.25, $1.50 to $2.00; Simon Mardner (dbl. pink), Vervæneana (variegated dbl. rose), Niobe (dbl. white), Deutsche Perle (dbl. white), Empress of India (dbl. variegated), Apollo (beautiful red), Professor Wolters, and about six more varieties. Price: 6-7-in. pots 60c, 75c, $1.00, $1.25, $1.50, $1.75 to $2.00 each.

Come on! Mail your orders direct to headquarters. Our reputation over the entire country, from the Atlantic to the Pacific, in growing Easter plants for the wholesale market, for the last fifteen years, ought to be sufficient guarantee as to the truth of what we say and advertise. Be wise. Never mind about that nonsense—hard times talk! ☞ Look for a big Easter trade, which is sure to come. ☜ Secure your orders in time while we have plenty of stock. All our houses are full to their utmost capacity with the choicest plants in bud and bloom, just right for Easter or earlier if wanted.

Araucarias Robusta Compacta and **Glauca,** a perfect marvel and wonder of nature. We are one of the heaviest importers and cultivators of this beautiful decorative plant. Our plants are about the same in height as in width.

Robusta Compacta, 7 in. pots, specimen plants, 6-year-old, 5 tiers, 27 to 30 in. high, $2.00 to $2.50 each.

Excelsa Glauca, specimen 7-in. pots, 6-year-old (the fine bluish-green color makes or gives this variety a fine, striking appearance—sells at sight), 30 to 40 in. high, 4, 5 and 6 tiers, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa, 6-in. pots, 4 to 5 years old, 20 to 25 in. high, 4,5 and 6 tiers. $1.00 each.

Choice Nephrolepis, all pot-grown.

Boston Ferns, 8-in., as big as a washtub. $1.25 to $1,50 each; 7-in., $1.00; 6-in., 50c; 5 to 5½-in., 35c to 40c.

Scotti Ferns, 7-in., $1.00 to $1.25; 6-in., 50c; 5½-in., 40c.

Whitmani Ferns, 4-in., 25c.

Piersoni Ferns, 5, 5½ to 6-in., 30c, 40c to 50c.

Neph. Amerpohli, the new lace fern, 5¼-in. pots, 50c to 60c.

Ferns for Dishes, 3-in., large, 7c,

Primula Obconica, 5¼-in., in bloom, $2.00 to $2.50 per doz,

Hyacinths, raised from first-class bulbs of our own importation. These hyacinths cannot be compared with the ordinary stock raised from cheap bulbs flooding the market. King of the Blues (dark), Grand Maitre (lavender blue), Gertrude (pink), La Grandesse (white), 4-in. pots, $12.00 per 100.

Tournesol Tulips, red and yellow variegated. This is the best selling double tulip on the market; it will stay in bloom and in good condition for ten days. Price: 3 bulbs planted in 4-in. pot, $1.50 per doz. pots, or $12.00 per 100.

Double Von Sion Daffodils, the best selling double yellow narcissus on the market; sells at sight; 3 double nosed bulbs planted in one pot. 5, 5½ to 6-in. pots, $2.00 to $2.50 per doz. pots. 10,000 now ready.

Ipomea Noctiflora, or pure white Moonflower, very fragrant, and big as a saucer. On this variety we have a world-wide reputation as a grower and shipper for the last twenty years. Price; 2½-in. pots, $5.00 per 100.

Begonia Improved Erfordii, 4-in pots, very large, $2.00 per doz.; 5¼-in., in bloom and bud, 25c each, or $3.00 per doz. **Begonia Flambeau,** 5½-in. pots, sells on sight, 25c.

If you would know the fairest sight your eyes can ever see,
Where the most perfect plants are grown, to Aschmann's come with me.
Why, ne'er since flowers began to bloom was such a glorious show
Of all the best that florists need found in one place to grow.
The Lilies are the very best yet seen on Easter day;
Azaleas are whole sheets of flowers, perfect in every way;
The Araucarias matchless are, so are the Ferns all green,
With Bulbs and Plumed Spirea, the best you've ever seen.
And Aschmann gives a challenge, let every florist hear;
For flowers, or prices either, no rival does he fear.
If you wish to gather dollars like violets in the spring,
Then send your largest order, his plants the cash will bring.

Ficus Elastica or **Rubber Plant,** home grown and Belgium stock, 5, 5½, 6 and 7 in. pots, 30c, 35c, 50c, 60c and 75c each.

Hydrangea Otaksa, 6 to 7 in pots, in bud, 35c, 50c, 75c and $1.00 each; right for Easter.

Spirea Gladstone. 6 to 7-in. pots, large stock, right for Easter in bud now, 50c to 75c; specimen, $1.00.

Dracena Bruanti, from Belgium, full of green foliage from bottom to top, 6-in. pots, 22 to 25 in. high, 40c each

Cineraria Hyb., finest strain in the market, 5-in., 20c each; 6-in., $3.00, $4 00 to $5.00 per doz.

Kentia Belmoreana and **Forsteriana,** Belgium and home-grown stock, 4-in. pots, 18 to 20 in. high, 35c; 5¼, 5½ and 6 in. pots, bushy plants, 50c and 60c each.

Hybrid Roses (budded European stock), 6-in. pots, 3 ft. high and over, such as Paul Neyron, Ulrich Brunner and Mrs. John Laing, 50c to 75c each.

Hermosa and **Baby Rambler Roses,** 5½ in. pots, 40c to 50c each.

White Daisies (or Marguerites). 5½-in. pots, 25c.

EASTER LILIES. Japan Multiflorum, of our own importation, raised from special 10-in. bulbs, 6-in. pots, right for Easter. This year I can say we have the finest lot we ever had. Have about 5,000 to offer. Please send your order in time this year, as we have such a big demand every year for Lilies that some cannot be supplied. They are 15 to 40 inches in height, and we can meet all wants if ordered before supply runs out. Prices as usual. Plants above 5 buds, 10c; plants under 5 buds, 12c per bud. (Medium height).

On account of the cultivation of lilies being no more profitable, kindly order some other plants also in connection with lilies.

Have **Azaleas** White Deutsche Perle and Vervæneana now in bloom if wanted, 60c, 75c to $1.00 each.

We Print No Catalogue. These are our lowest prices to all. Strictly no references will be investigated in busy season.

All goods must travel at purchaser's risk only. Cash with order, please. To save express charges, please mention if in or out of pots.

GODFREY ASCHMANN, 1012 West Ontario Street, **Philadelphia**
Importer, Wholesale Grower and Shipper of Pot Plants.

Minneapolis.

STOCK PLENTIFUL AND GOOD.

The weather turned out warm the past week, and stock is marching along pretty swiftly toward perfection for Easter. Everything in the line of cut flowers is plentiful, and first class. One of the department stores has been buying up carnations at low rates, and sending them out at a close margin on Saturday afternoons. It is to be hoped that the high prices around Easter will put a stop to this. The Greeks still hold their stock of roses and carnations and manage to move them at low prices.

NOTES.

The city workhouse is planning on building two greenhouses this summer 22x100 feet for the purpose of growing plants and early vegetables.

O. C. Swanson's customers have returned to the city, but aside from a few dinners, there is not much doing in the line of entertaining.

The Minneapolis Floral Co. is packing orders for country shipment. The azaleas here are particularly worthy of mention.

Jas. Souden Co. reports business very good and expects a good Easter trade.

Miss Whitted had a good week of funeral work.

Visitors: Miss L. O. Sullivan, Superior, Wis.; H. E. Philpott, Winnipeg, Man.; F. Kindler, St. Cloud; T. Kloss, and J. S. Jacobson, St. Peter. M.

For Best Results

Advertisers should mail new advertisemrts and changes so as to reach us on Mondays.

HANCOCK, MICH.—A. M. Yorks' daughter, who was operated on for hip disease in Toronto, is doing well now. Business is good, with an abundant supply. The cheap price of glass tempted Mr. York to build another house.

QUINCY, MASS.—James W. Rideout died, March 30, at his home, 65 Payne street, aged 74 years. Mr. Rideout had a florist's business in Boston, but was burnt out in the big fire of 1872 when he went into the shoe trade and retired some 15 years ago.

UTICA, N. Y.—The annual meeting of the Florists' Club was held at the greenhouses of Dr. W. A. Rowlands in Whitesboro. The officers of the club were renominated. The annual clambake was much enjoyed, followed by a paper on carnation culture read by A. J. Watkins. An orchestra furnished music.

FROM THE BRITISH TRADE PAPERS.

SINGLE CHRYSANTHEMUMS. — Wherever chrysanthemums are grown with a view to providing flowers for cutting, no one can afford to altogether ignore the single varieties. I know that in some quarters, immediately single chrysanthemums are mentioned comparisons are made between them and the Japanese or incurved sorts, but it is unfair to make comparisons between blossoms so entirely different in character, all of which have special claims to beauty. Of all the sections, however, the singles are the daintiest, and whether they are grown with eight or ten blooms in a cluster, or as some do (which, I think, is a mistake), disbudded to two or three, they are very elegant when cut and arranged with foliage in a basket or vase. Some of the colors are pronounced, whilst others possess soft shades. Especially is this so in the pinks and sulphurs, which harmonize so well with the decorations of many rooms. Some fail to appreciate the single sorts at all; others have not given them a fair trial, but I venture to think that many who have become somewhat tired of growing sorts for the sake of just a few blooms will be more than compensated by the beauty of these moderately-sized flowers.

ARABIS ALBIDA COMPACTA.—Much more compact in its growth than any of the other varieties of either Arabis albida or A. alpina, this variety will be found exceedingly helpful in all places where spring flowers are in request, and where sheets or lines of white flowers are desired. It comes remarkably true from seed, which can be obtained from some of the seedsmen, and it can thus soon be raised in quantity. As already said, it is more compact than the other varieties, and this neatness is not gained at the sacrifice of its flowering properties, for it is, in reality, more free in flower than any other varjety that I know. Its dwarf, densely foliaged clumps are entirely covered with its single white flowers, and a little group or a good sized individual plant is of great beauty. As an edging for a large bed or border it is excellent, but it is even more suitable for the center of a bed, edged with an early aubrietia or with such flowers as muscaris, Chionodoxa Sardensis, or Scilla bifolia.

NITRATE OF SODA ON WET SOILS.—We are so apt to regard nitrate of soda as one of the finest manures for increasing the bulk of a crop that we are apt to forget it has an opposite effect under certain conditions. In Japan it has been found that the use of nitrate of soda in swampy soils reduces the yield of rice; this is due to denitrification, which process gives rise to poisonous nitrates, and thus the crop is harmed instead of being benefited.

Lager & Hurrell, Summit, N. J

Orange, N. J.

The regular monthly meeting of the New Jersey Floricultural Society was held at the society's room April 3. A cash prize offered by W. A. Manda at the last meeting for the best flowering plant and divided into three by the committee attracted a display of seasonable flowers at this meeting. The awards were to Wm. Reid, gardener to Sydney and Arthur Colgate, first, for a specimen anthurium of large size and finished culture. Popkin and Collins, second, for a standard white lilac; John Derwin, gardener to A. C. Van Gaasbeck, third, for specimen Cineraria stellata. Lager & Hurrell, of Summit, contributed a table of orchids and Thomas Jones of Short Hills one of hyacinths in pots, to the miscellaneous display. Upon an intelligent demonstration and invitation to the new American Orchid Society by Henry Hurrell, a unanimous resolution of good wishes was passed for the success of the undertaking. George Johnston was elected to membership. J. B. D.

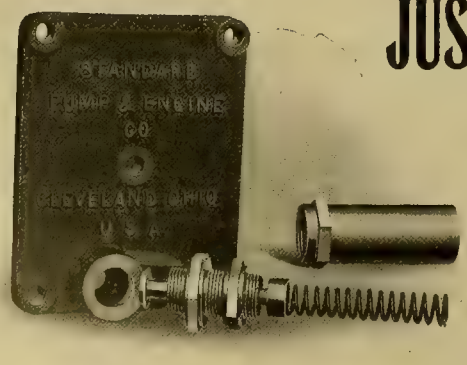
JUST LIKE A CITY WATER WORKS



This cut shows the **AUTOMATIC BY-PASS** of a **STANDARD PUMPING ENGINE.** which allows you to get any pressure from 10 to 90 pounds per square inch and not waste a drop of water. You can turn off the faucets and change hose, open your faucets and get a full stream. No expensive tower and tank are necessary when you have a **STANDARD PUMPING ENGINE.** You don't have to pay extra for this; it's part of the machine.

Send for catalogue now, you will need a machine very soon.

The Standard Pump and Engine Co., 15 Michigan Ave., CLEVELAND, OHIO.

Ready Reference Section.

10 CENTS PER LINE, NET.

AGERATUMS.

Ageratums, Stella Gurney, Princess Pauline, R. C., 75c per 100; $6 per 1,000. A. N. Pierson, Cromwell, Conn.

SCHENECTADY, N. Y.—Chas. Limmer has leased the store at 328 State street and will take possession on May 1 after making considerable improvements.

DETROIT, MICH.—That George Leadley perpetrated a deliberate swindle on Louis M. Knauss, when Knauss traded the Ivanhoe flats on Jefferson avenue for Leadley's floral business, is the opinion of Judge Murphy, given in a decision handed down March 25, in which he orders that Leadley turn the flats back to Knauss and that Knauss give the floral business back to Leadley. On October 2, 1906, Knauss gave Leadley the flats, worth $10,000, and $1,500 in cash for the floral business. Leadley had shown books to Knauss to prove that the floral business averaged a profit of $6,500 a year. The judge says that the books were fixed, that expenses were understated and profits overstated. He points out that since Knauss took hold of the floral business it has improved and that in the trade back Leadley will get a much better business than he had before.

TRADE GOOD.

Business for the past two weeks has been good, while this week Lent seems considerably in evidence. The weather has been fair comparing it with last year. Gardenias and flowers of all kinds are plentiful.

David McIntosh, who has been head gardener at the Bell estate for 20 years, left here March 25, to take charge of the estate of Mrs. C. M. Bell at Tuxedo Park, N. Y. Mr. McIntosh has been secretary of the Horticultural Society for many years. The society regretted his departure very much as he was the best secretary we ever had. The day before his departure at the regular meeting the society presented him with a fine gold watch, besides many appreciative words and good wishes for the future.

A seedsman in this city dressed a doll and covered the same with garden cress. By moistening, the seed, which will stick anywhere, sprouted in a few days, and after two weeks' time the entire dress was green.

F. L. Ziegler has opened his Bellevue avenue store. A grand opening will take place on April 9, when he will receive his many friends and customers.

Robert Hunick, head gardener for F. W. Vanderbilt for the last 20 years, has resigned his position, and will take a well earned rest in Europe.

The seed business is starting up well. Although the nights are still cold, one can see people digging, and sowing early seeds.

Oscar Schultz has a good general line of Easter plants. It's a boy at Oscar's home.

Stewart Ritchie is building another carnation house.

M. Butler & Son have a fine line of Easter lilies.

Visitor: Arthur Zirkman of M. Rice & Co., Philadelphia.

Rutherford, N. J.

A very remarkable exhibit of Easter stock is now to be seen at the range of the Julius Roehrs Co., comprising lilies, roses in tubs and pots, azaleas, spireas, hydrangeas and all other requisites of the Easter trade. A noteworthy feature is a large plant of the new rose Newport Fairy, which made the round trip to and from the Chicago show and is still in good condition. The stock of Dorothy Perkins and other pot roses is very fine, a collection grown as standards, being very noticeable. Such a happy combination of fine flowers and clean glossy foliage as prevails throughout this range, cannot be excelled. It is unnecessary to dilate on the orchids and foliage plants, for in these as in other things, the firm are always in the front rank.

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty, Lasts longer than putty. Easy to apply.

Why? Because many debtors will pay the Board, fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.

WASHINGTON, D. C.—The District superintendent of parking will plant about 600 young trees in the various portions of the city during the next three months, and requests have been piling in to the district commissioners from citizens for shade trees to be planted near their homes. Some of these trees will take the place of old ones which have either died or have been pronounced unsightly by the parking commission. Last year more than 2,500 trees were planted and 1,111 old ones removed. It is expected that at least 2,000 new trees will have been set out during the present year. The commissioners have announced that they will assist in the movement for more artistic and better kept lawns in front of residences.

Louisville.

CARNATIONS SELLING WELL.

Business conditions the past week have been very poor. Roses of good quality are plentiful, and find a fair demand. Carnations of good quality sell well, but seconds generally find a sad outlet. Violets are scarcely seen, and the demand is very poor. Lily of the valley has a slow demand, far from being equal to the supply. The warm weather has brought the bulbous stock out very rapidly, and at present there is a glut. From the present outlook there will not be much in this line for Easter. Other plants such as spireas, azaleas, rhododendrons, bougainvilleas, lilacs, etc., will be in very good supply. Green goods are very scarce. A big Easter is looked for.

NOTES.

P. A. Reynolds and M. H. Struck have engaged in the flower business under the firm name of Reynolds & Struck. Six acres of ground have been bought at Buechel, a short distance from the city. There will be three houses 22x100 feet devoted to roses, carnations, lilies and other stock. They will also grow peonies, dahlias, and other stock. Work has already commenced, and when completed the place will be an ideal one. Mr. Reynolds will have charge. He was formerly with the late C. H. Kunzman, and until recently with Geo. T. Hodges. The crop will be handled by Fred L. Schulz, the wholesale florist. The new firm is wished much success.

Owing to the building of a new hotel, Wm. Walker will be compelled to move, and has selected a store on Jefferson street between Third and Fourth, which should prove a very good location. He will run both stores for Easter.

F. L. S.

EL PASO, TEX.—At the regular semi-monthly meeting of the El Paso County Horticultural Society, held at the court house March 24, a paper on "What Shrubs to Plant and When," by Wm. Dunman, head gardener at the Union Printers' home, was read by Edward Johnson. The paper, which was very appropriate for the time of year, contained many valuable suggestions on the planting of shrubs, both native and foreign, and instructions for their care throughout the summer months. The paper was followed by an interesting discussion. On April 7 an interesting paper on "Children's Gardens; Their Value as Educators" was read by Miss Van Pelt, principal of the Helen Hunt school.

Louisiana Red Cypress

SAYS BOBBINK & ATKINS, of Rutherford, N. J., "Lasts with us from two to three years longer than any other wood for table purposes, and its life seems to be endless when used in ordinary greenhouse construction. We use cypress solely in our Plant Tub Department and manufacture tubs of all sizes from the smallest to the largest, of cypress."

It Is Best for Greenhouse Building.

It is the only wood that successfully withstands the almost intolerable alternate wet and dry conditions incident to this work.

IT IS THE MOST DURABLE WOOD KNOWN. Ask about it at your local lumber yard or write

LOUISIANA RED CYPRESS CO. HIBERNIA BUILDING, **New Orleans, La.**

The Allied Trades

Descriptive particulars—with drawings or photographs, if possible—of any new apparatus or device which may prove helpful to the trade are solicited for this department.

THE Bureau of Manufactures is in receipt of a communication from a New York export house which is desirous of hearing from manufacturers of American cement who wish to introduce their goods into Cuba and all the South American countries. Spanish-speaking representatives of the firm in question are shortly to leave for extended trips through the above-mentioned territory, and manufacturers who are prepared to go into the export business and compete for this trade should furnish full details as soon as practicable.

A New Shafting Coupling.

The Advance Co., Richmond, Ind., is putting on the market a new coupling for line shafting in greenhouses to take the place of the old screw couplings and has applied for a patent on same. This makes it possible to couple the line shafting in a very substantial manner by the aid of a monkey wrench only, thus doing away with a very disagreeable job of screwing the pipe together by means of pipe wrenches up under the glass. The firm purposes equipping its shafting pipe with this new coupling and selling the pipe at regular rates.

Big Boilers in Demand.

The Kroeschell Bros. Co. reports that while the trade outlook was not favorable a short time ago, it now looks as if the hard times were over. Already this firm notes a larger number of orders booked than a year ago, and a peculiar feature of the business is the demand for boilers of the larger sizes. Two of the largest boilers have been sold to one firm of vegetable growers in Mississippi. A number of others has been sold in practically every state since January 1. Mr. Kroeschell states that he is now negotiating with one concern which will shortly install three No. 15 boilers, each of which will heat 50,000 square feet of glass, and he adds that it is noticeable that hot water heating is daily increasing in popularity, referring to very large ranges as well as to those of smaller size. If present indications materialize the firm claims this will be the banner year as far as business in greenhouse boilers is concerned. Mr. Kroeschell has remarked an increased interest in vegetable growing in the south.

THE FOLEY MFG. CO.

CHICAGO.

Completely Equipped with Up-To-Date Machinery for the MAKING OF MATERIAL FOR

GREENHOUSE CONSTRUCTION

FROM A FULL SUPPLY OF THOROUGHLY SEASONED LUMBER.

Send your sketches to our draughtsmen for completion and suggestion. Permit us to figure your proposed work large or small. **We Guarantee Our Prices Will Save You Money.**

Foley Ventilating Apparatus is the Best.

Is simple in erecting. Is easiest of operation. It will last a life-time. Its price is the lowest. Will ventilate any size house. Prices and circulars on application.

Our 1908 Catalogue Greenhouse Material sent postpaid on request.

LUMBER

BARGAIN PRICES.

A wonderful opportunity is offered you to buy lumber and building supplies of every kind at ***Prices that will save you big money.*** Such a chance seldom occurs. Lumber for your house, church, barn, meeting house, crib, store, factory, and in fact, buildings of every kind. We can furnish absolutely everything needed in construction material. Have your carpenter or builder make a complete list of everything you require, including Lumber, Sash Doors, Nails, Roofing, Siding, Ceiling, in fact, anything you may need in building material or merchandise of any kind.

Send us your Lumber Bill for Our Estimate.

We bought at Manufacturers' Sale over 50,000,000 Feet of all kinds of Lumber and Finishing Material. We are making special concessions, to those who buy at once. Even if you have no use for this lumber at once, it will pay you to buy now. Our prices will save you 30 to 50 per cent.

We cheerfully invite inspection of our Lumber stock and will be glad to have you come to our warehouse and yards at Chicago, see the lumber we are offering, and you will recognize that it is all what we say of it; make your own selection and see it loaded. It is not necessary to come to Chicago; we can easily sell you by mail. We can quickly convince you of the wisdom of placing an order with us. Just send us your lumber bill, and we will easily ***"Show You."*** On application we will send copies of letters from customers who have bought. They saved money why can't you? Write us to-day. ***WE PURCHASED EVERY EXPOSITION, INCLUDING THE $90,000,000 ST. LOUIS WORLDS' FAIR*** ASK FOR OUR FREE 500 PAGE CATALOG, No. C. H. 47. IT QUOTES LOW PRICES ON BUILDING MATERIAL, MACHINERY AND FURNITURE.

CHICAGO HOUSE WRECKING COMPANY, 35th and Iron Sts., CHICAGO.

HAZLEWOOD, N. J.—Fire destroyed the greenhouses owned by E. C. Regman of Jersey City, located near here, March 29. The total loss is estimated at $3,000, upon which there is an insurance of $1,500 only.

Rice and Flowers.

In the neighborhood of Shanghai an English sailor on his way to the foreigners' burial ground to lay a wreath on the grave of a former comrade, met an intelligent looking native carrying a pot of rice.

"Hello, John!" he hailed, "where are you goin' with that 'ere?"

"I takee put on glave—glave of my fiend," said the Chinaman.

"Ho! Ho!" laughed the sailor, "and when do you expect your friend to come up and eat it?"

John was silent a moment and then replied, "All time samee your fiend come up and smellee your flowers."

SUGGESTIONS FOR PLANT GROWERS.

Coleuses.

So easily and cheaply grown and showy a plant as the coleus should be freely propagated and grown, not only for baskets and window boxes, but for sale all through the summer. Cuttings may be inserted at any time and anywhere and if kept fairly warm and moist will root very rapidly. Pinch them as soon as rooted; pot the plants in the 2-inch size and when feeling the sides of the pots pinch the shoots again and repot into 4½-inch. At each potting use a light soil composed of nearly two-thirds light, well decayed manure and sand and pot only moderately firm. On a bench in a light, moist house, and kept moist at the roots, the plants will make a very rapid growth and take on a very bright color. They may not bring a very high price but if properly managed they are grown, sold and out of the way in a couple of months and this, too, at a time when space is not so valuable inside as it is earlier in the year.

Left Over Easter Plants.

There is always a certain number of plants left over, no matter how good the trade has been, and these should not be allowed to lie about but given whatever attention is needed. Azalea Indica and its varieties, after the flowers are past, make a new growth and should go into a house where they can be kept growing and where there is plenty of moisture in the air until it is time to place them outside for the summer. An ideal place for the purpose is under the partial shade of trees where the pots containing them may be plunged in coal ashes or some similar material to keep the sun from the roots. No plant ought to be exposed to the full summer sun without some protection. Heaths, genistas, azaleas, boronias and many other hard wooded plants delight in sun. They can hardly have too much of it in fact, but their roots must be in a cool, moist, medium not subject to violent alternations of drought and moisture. And they may just as well be given this attention at once. It is useless to allow them to get into a bad way first and then endeavor to put them right. Let them get right away into a natural growth, first clipping them into shape a little, if this attention is needed, and they will be nice stock to house in fall that will turn in good money, instead of being a disgrace to the place. Whatever attention is necessary in the way of repotting should be given; nearly all this class of stock likes a solid root run, composed of sound loam, enriched with decayed manure and lightened with sand. Firm potting leads to solid growth and vice versa and the growth of hard wooded plants must be solid to be of any value. Frequent spraying and keeping the roots moist is the principal attention needed after the plants are outside.

Cyclamens.

It is customary to sow cyclamen seed well apart in order that the seedlings may not be disturbed until they have attained considerable strength. The earlier, fall sown plants will have been potted before this but the later ones are just pushing up the second leaves from the little bulblets and are just in the right condition for a shift. Whether they are potted now or placed farther apart in flats is immaterial if they are well looked after. Inexperienced growers will probably be safer with their plants in flats, but whichever way they are grown they must be kept well up to the light in a position where they can be shaded from bright sunlight when necessary. Growers of cyclamens are often afraid of burying the corms but they need not be. It is wrong to bury them deeply, but, just covered with soil, they are protected from sun and air, keep soft and throw up foliage freely. As the season advances they will gradually work up, or the soil sinks away from them. The failures to grow good cyclamens are difficult to account for. Their culture may be summed up in very few words. A constantly moist and genial temperature, with all the light possible in winter and sufficient shade in summer will prevent injury to the foliage. The roots must be given new compost before they get potbound so that they are never checked and, after they have filled the flowering pots, they must be fed regularly until finished. Never hurry, or attempt to hurry, the plants by applying strong heat, but, on the other hand, never let them be checked and always

keep them free of insects. This is all there is to it, yet how frequently we see miserable, stunted looking and insect infested plants that are anything but a credit to the grower.

Azalea Mollis.

The mollis and Ghent azaleas are a long suffering race and come up smiling each year even after very bad treatment at the hands of growers. It is folly to expect them to do their best if kept about in pots exposed to the sun all summer and the roots half starved. Where there is a deep black soil, free from lime, these azaleas may be planted out in as moist a position as possible and will make a fine healthy growth. Where the soil is unsuitable the plants, after flowering, should be repotted and plunged outside. They like peat, but will grow in a good loam and the flower buds are often stronger and more numerous from a loam soil than from the peat in which the plants grow so rapidly. In either case, see that the plants are firmly potted and remove any seedpods that may be left on. Cut the plants into shape a little and keep the hose going about them freely, to induce a good break. They like a cool, partially shaded position, and the nearer this can be approached in their summer quarters the better.

Pelargoniums.

Many growers do their plants well up to the time they begin to flower and then they check, the flowers coming thin in texture and the plants suffering in the foliage. Too many people have the idea that as soon as a plant reaches the flowering stage feeding has to stop or at least be greatly curtailed. Pelargoniums make a rapid growth all the time they are flowering and, being strong feeders, have used up the nutriment in the soil before flowering commences. Consequently plenty of feeding is necessary right up to the time the plants are finished. But stock for next season has to be considered, and it is well known that plants highly fed are not the best stock producers. If possible save a few plants for stock and feed them only very moderately, pinching out the flowers and keeping them growing so long as possible. When these plants are cut back they should, of course, be dried off a little and, in addition to the number of cuttings they produce, they will be fine stock for potting on for another season. Referring back to feeding the flowering plants, never keep going on one kind of food too long. Change from the ordinary manure water to chemicals and occasional doses of soot water. Nitrate of soda helps later on when the ordinary manures are losing their effect. Insects, especially green fly, are troublesome to these plants and should be kept under. There is nothing so good, as a preventive, as tobacco stems around the pots, and these should be frequently changed, but occasional fumigations are also necessary.

Croton Sunshine.

This is a sport from that meritorious and useful variety, Queen Victoria. It differs therefrom in the leaves being irregularly marked with yellow, which becomes intensified, if the plant is not given too much pot room, and is exposed to the full sun. These markings, which may readily be observed in the illustration, give this variety a most striking appearance, and, in consequence, increase its decorative value. Queen Victoria and its sport, Sunshine, are among the very best crotons ever sent out, whether for bedding in summer or for home adornment in warm rooms in winter. We find there is quite a difference in crotons when lifting them in the autumn after being bedded out all summer, Fasciatus being one of the very worst in this connection, losing lots of its leaves and some plants dying outright, whereas, Sunshine and Queen Victoria are among the very best, scarcely losing a leaf and recuperating quickly. The plant from which the photograph was taken was grown by Wm. Robertson, gardener for John W. Pepper, and exhibited at the Philadelphia fall show.

E. L.

ORCHID NOTES.

At Lager & Hurrell's, Summit, N. J.

From being, but a comparatively short time ago, novelties in horticulture, orchids are now looked upon as necessities and are each year being more generally used by the masses of the flower buying public. While they are subjects of general admiration in the show windows of the retail florists' at weddings and other social functions, probably the most interesting views and sidelights may be obtained by visiting a range where their culture is made a specialty.

At the range of Lager & Hurrell, Summit, N. J., orchids are made a specialty in the strictest sense of the word, and a few hours spent with these amiable and energetic collectors and growers are well repaid, by the sight of a remarkable collection of all the varieties now in commerce and many others that, if not commercially so important, are very interesting from the view point of the fancier. The many varieties of cattleya deserve more than passing notice, not only for their great beauty, but from the fact, that it is the commercial importance of the cattleya that has made the orchid trade what it is today. The exhibits by Lager & Hurrell, of these flowers, have been prominent features of many horticultural exhibitions of the past and the blooms which they send annually to the New York market, would, in round numbers, make interesting statistics.

The dendrobium and its hybrids are now attracting much attention from all branches of the trade. While the cattleya seems secure in its supremacy, it may here be noted, that dendrobiums have fine qualities that appeal to both the grower and the decorator. One of these is the fine flowers that are cut from very small plants. It is not unusual to find plants of these varieties in 2-inch pots blooming profusely. On one plant of this small size, 12 good blooms were counted. As blooming plants or cut flowers, the dendrobiums serve admirably for window decoration.

Phalænopsis amabilis, one of the species that comes from the Philippine islands, is remarkably beautiful, as well as a very useful member of the orchid family. Its decorative effects are very striking, as may readily be seen from the accompanying illustration.

The cypripediums are now grown in such variety that nothing short of a catalogue can convey an idea of their importance in the trade. Among the many

CROTON SUNSHINE.

varieties now grown, both novelty and beauty are combined to a marked degree. In the illustration here shown of a vase of cypripediums, grown at this place, there are over a dozen different varieties. C. Leeanum and C. insigne Lageræ are kinds that are now attracting much attention.

Cymbidium eburneum, which comes from China and Burmah, produces beautiful white flowers, and, while not so generally known as many other varieties, it is well worthy of the attention of fanciers. There are many other varieties of the orchid, impossible to note in this brief sketch, that are beautiful and interesting, and a visit to such a range as this will repay anyone interested in the many rare and curious varieties of this most notable plant.

THE ROSE.

BE sure every bit of mildew is killed before the fires are dispensed with and start the summer clean at any rate.

KATE MOULTON, pink, and Cardinal, red, are becoming well known among retailers in the west. Both are well worth growing if their behavior in the Chicago growing plants is a criterion.

NEVER wait until the weeds get "big enough" before weeding the benches devoted to young roses. Clean them off when small, as much for the sake of keeping down green fly as for tidiness.

ROSE GROWERS will do well to keep in mind the next few months that there is an optimum degree of sun that roses can stand and do well under. When this point is reached shading is necessary as shown by experiments and tests carried out with rose foliage.

Care of Grafted Stock.

Experienced growers of own-root stock sometimes find a difficulty in handling that grafted on the manetti in the earlier stages. In the former they are used to watching the roots very carefully, knowing that if these are kept right not much can happen to the tops. But when grafted stock is first taken out of the cases the tops or scions are the most likely to go wrong. The roots had got a fairly good hold already before the stocks were placed in for grafting and have been improving on this while in the cases, and with anything like care are well able to look after themselves; but the proper flow of sap between stock and scion is only beginning, though while in the moist cases the leaf has held up all right, and it is here that care and watchfulness are needed.

The change from the moist grafting cases to the drier air of the growing quarters must be brought about gradually. A sudden change from one to the other will cause many of the young growing shoots to wilt and then the plants may as well be thrown away for all the good they will do. Give them a stand on a light bench, but before arranging them there have the shading arrangements made. A strip of muslin the width of the bench and of suitable length should be tacked to a roller or otherwise conveniently arranged so that it may be quickly applied. It is best arranged about one foot above the heads of the plants. The first day they are out the roots will probably dry out very rapidly and a thorough soaking of water must be given; the roots must be freely watered until they have become inured to the change. Spray the heads lightly about two or three times daily when the weather is bright, the last spraying being given so that the foliage will be dry by the evening. Just at first close shading will be necessary, for the least sun is dangerous. But as the union between stock and scion becomes more perfect and it is apparent that the latter is drawing its sustenance from the roots rather than from the moisture in the atmosphere, then reduce the shading by degrees until it can be dispensed with entirely and spray less frequently.

By the time the plants are ready to go to the full sunlight they will also be ready for repotting and another batch will probably be ready to come out of the cases. In handling the stock, whether for potting or giving a new stand, much care is necessary. Careless help will do more mischief in snapping out the heads of the plants than their wages amount to, if not constantly watched, and it pays to put the best and most careful hands that can be spared to the work. Let the potting be moderately firm. Loose potting leads to a quicker growth at first, but it soon runs out and the growth is not as satisfactory. Give a thorough watering after repotting and shade the plants from bright sunshine for a few days. They will soon take hold and may then be treated exactly as established stock. The only other attention necessary from this time on is to give the plants ample room, as they need it, to see that the watering is kept regular and even, not allowing blocks of plants to dry out or get extremely wet, and to pick off all flower buds as they appear and thus throw the whole of the energy of the plant into good wood and foliage. Overcrowding, careless handling and sudden changes of temperature and atmospheric conditions in the earliest stages are the three worst stumbling blocks to the inexperienced grower.

CYPRIPEDIUMS IN VARIETY.

Roses in Colorado.

A paper read by J. A. Valentine, Denver, Colo., at the ninth annual meeting of the American Rose Society, held at Chicago, March 25-27, 1908.

The state of Colorado, situated a little to the west of the geographical center of the United States, is about 375 miles long from east to west, about 275 miles wide, and has a total population of about 650,000. Denver, the principal city and capital of Colorado, with a population of about 200,000, is situated a little to the east and north of the center of the state. In traveling from Chicago to Denver, your journey would be a little longer than from Chicago to New York.

In going west from here by rail, you reach the Missouri river at Omaha in about 500 miles. From there for more than 500 miles you cross an immense plain, with an average rise of about seven feet to the mile, so that by the time you reach Denver you will be a mile above sea level.

You will have traversed the state of Nebraska from east to west, and a large part of this state is now fertile and productive farms, although within the memory of some of those here today it was a portion of the Great American Desert, and considered sterile and unproductive. My own personal knowledge of this region only extends back about 25 years, but I can very well remember when the meridian of 100° was spoken of as a dead line, beyond which it was absolutely impossible to conduct any farming enterprise without irrigation. Today the situation is so far changed that a great many people are contending that profitable farming without irrigation is possible even as far west as Denver, and more than that they are showing a good many substantial results to justify the faith within them.

EASTERN COLORADO.

The eastern half of Colorado is part of the immense plain already mentioned, and the western half is mountainous. The main range of the Rockies lies directly west of Denver, with the crest of the range only about 50 miles away, with numerous peaks reaching an elevation of 14,000 feet, and the gaps or passes ranging from 10,000 to 12,000 feet. Westward from here the whole state is mountainous, with many fertile valleys between the ranges, some of them narrow and some of them wide; but from the eastern to the western boundary of the state the whole region is arid, with a very light rainfall, which averages about 14 inches per annum in the vicinity of Denver; and farming by ordinary methods is not possible without irrigation. Evaporation is at all times very rapid, and dews almost unknown.

Recently a great many experiments have been conducted under what is known as the "Campbell System," which briefly means intensive cultivation and a retention of the moisture in the soil by continually keeping the surface in a pulverized condition, and thereby preventing evaporation. It is too early to speak with entire confidence as to results, though success has been achieved in many cases, and the striking results obtained may well carry a lesson for florists whose carnations are suffering from drought in the field.

The whole state is blessed with abundant sunshine both in summer and in winter, and except in the mountainous portions, the winter climate is mild with but little snow. There is a wide daily range of temperature, nights being cool in summer and cold in winter. There is also a great difference between the temperature in the sun and in the shade, largely due to the absence of moisture in the atmosphere. Naturally in a climate so widely different from the climate of the eastern states, problems arise peculiar to this locality.

In any arid region the vegetation is scanty, and this same condition has existed back during the countless years in which the surface soil was being formed. Consequently the soil contains very little fiber and very little decayed vegetable matter, but the soluble salts are apt to be present in large quantities, because there has been little water to dissolve them and wash them away. Some of these salts are beneficial and some of them are harmful. In many localities alkaline salts are present in such quantities as to make the soil utterly useless, and the water of the streams naturally partakes of the chemical qualities of the soil so that in a great many cases the water is so badly impregnated as to be utterly unfit for use. Many florists in the arid region have failed because they neglected to investigate the quality of their water supply before deciding upon a location.

ROSE SOILS.

It is generally possible to find soil which will produce good roses in the field, but it is difficult to find it heavy enough to be satisfactory and at the same time porous enough to permit of heavy watering, in the benches. Our heaviest soil, called adobe, formed from decomposed shale, is certain to contain alkali, and cracks very badly when dry; but by a careful selection of soil most growers are meeting with fairly satisfactory results, although there is still much to be desired and the ideal soil has not yet been obtained.

It is not an expensive or a difficult matter to secure a determination of the soluble salts in a sample of water, and the Department of Agriculture will furnish valuable advice in such cases if requested. When it comes to an analysis of the soil, the situation is very different, for then the problem becomes very complex, and what with soluble and insoluble food, moisture content, mechanical condition, and nitrifying and denitrifying bacteria in numerous varieties, the layman searching for information becomes confused and is quite ready to agree with a recently published statement of Prof. Corbett to the effect that the plant itself must tell you by its action whether the soil is suitable. Yet even the soil sharps quarrel among themselves, and many of them claim that soil analysis is a safe guide. Your Illinois Experiment Station seems to be among the latter, and more than that, they support their claims by results which lead us to hope that the present confusion will some day crystallize into tested and accepted methods whereby the man in the laboratory may give wise counsel to both the man with the hoe and the one with the hose.

Owing to the exceedingly dry atmosphere and the light rainfall, it is very difficult to get good results from the composting of soil in Colorado. If sod is piled up it does not rot but dries out. If manure is mixed with the soil its chemical condition remains unaltered for a long time. Some of our rose growers have on that account absolutely abandoned the use of manure in soil put into the benches, and all growers use it with great caution. When used as a top dressing it should be mixed with about an equal quantity of soil. It is safe to say that if a rose grower in Denver were to top-dress his benches with such quantities of green manure as is used in the vicinity of Chicago, he would hardly have a leaf left on any of his plants at the end of a week. We Denver growers are simply amazed at the impunity with which manure is used in this vicinity.

ROSE ENEMIES.

Among the ordinary evils which rose growers have to contend with there are none of them which we do not have. The dry air seems to suit the red spider to perfection, but with our continual sunshine we are able to syringe the roses freely without any bad effect. Blackspot attacks American Beauty and the hybrid teas to some extent, but is not nearly the scourge that it is in the east. Thrips, like the poor, are always with us, though the green fly propagates as freely with us as elsewhere, but is eradicated long before we get rid of the thrip.

Mildew has been quite a problem with us in August and September. In the summer time our houses not infrequently show a temperature of 110° when they are not shaded, although it is very rare indeed that the weather bureau reports any temperature above 95°, and some of our September days are nearly as hot as midsummer. We frequently get a night temperature in June, July and August of 45°, with 6° or 7° lower than that on rare occasions, and we expect a severe frost about the middle of September. At

PHALÆNOPSIS AMABILIS.

MEMBERS OF THE COLUMBUS, O., FLORISTS' CLUB.

the place where I have charge, we keep steam in the boilers all through the summer, believing that it pays to do this as a protection against mildew; and yet, last summer we had a great deal of mildew, while one of our neighbors did not fire at all and his stock was perfectly clean. Owing to the dry air one would naturally expect us to be free from this trouble, and I am not competent to say why we are not.

OWNROOT VS. GRAFTED ROSES.

A number of years ago our tea roses were not producing well, and were not making a good growth. Investigation disclosed the presence of immense numbers of eel worms. Our dry climate and our mild winters seem to be just suited to the production of nematodes in the open ground. After a very thorough comparative test, we abandoned the growing of tea roses on their own roots, and have now for a number of years grown them only on manetti. For a considerable time we sterilized the soil that we put in the benches, but this process has been abandoned as the manetti stocks have seemed to be perfectly immune. I believe that a large proportion of the tea roses grown in Colorado are now grown on manetti stocks.

The growing of American Beauty on manetti has been quite extensively tried, but the results have not seemed to be decisive either for or against this method, and the gain, if any, was so slight that all American Beauty is now grown on its own roots.

So far as I know, none of our native roses have ever been used as stocks upon which to graft or bud roses for forcing or for garden use, and I presume the probabilities are against securing any good results, but the experiment ought to be worth trying. We have one or two native roses that are quite vigorous in their growth, and they are doubtless resistent to the evil effects of the alkaline salts so generally prevalent in the soil. Probably nothing but an actual test could determine how well they would respond to winter forcing, though the chances are that they would prove rebellious.

Dormant roses of all kinds are hard for us to handle. They are slow in making roots, and it requires careful handling to keep the wood from shriveling. Such roses as Crimson Rambler are always in evidence in the stores at Easter but plants that are really well done are always scarce, and no grower can be absolutely certain of his results.

Our people as a rule are but just beginning to show a proper appreciation of garden roses and shrubbery, and within the last few years business in these lines has largely increased.

OUTDOOR ROSES.

Owing to the peculiar climatic conditions already outlined, the growing of roses in the garden presents a great many problems, and it is a difficult matter to get the average householder to understand just what is required in the way of care, so that repeated failures have discouraged a great many. Dormant roses shipped in from the east generally arrive with the roots badly dried, and a large percentage of them die. Reputable concerns should for their own sakes, use more care in packing shipments for the arid states so as to prevent this drying out. Shipments are also made by the itinerant peddlers, who care nothing for the interests of their customers, and the buyer is not entitled to much sympathy when he finds his investment a total loss. But such transactions are an injury to the business, for a man is loth to try again if his first purchase proves a failure.

Roses which are hardy in regions where the temperature goes very much lower than it does in Denver, often winter-kill with us, but it is not the severe cold that kills them. A plant suffering from drought will not endure the same degree of cold that it would if the soil were in a reasonably moist condition. Since November 1 we have had a total rainfall of less than 1½ inches up to March 15, and during that time we have only had three storms where the precipitation was one-quarter inch. Then again we have a great many warm winter days, and especially warm days in February, March and April, which make the buds swell, only to be severely frozen later on.

During this same period the nights are generally about 25° colder than the days, but this difference sometimes reaches to more than 50°, and on rare occasions to nearly 60°. It is obvious that a day temperature of 70°, followed by a night temperature of 20° in April, is more than any rose plant can well withstand.

The drying winds and the bright sunshine also work a great deal of harm, and with us it is more essential to provide protection from the sun than it is from the cold. We find that plants on the north side of a tight board fence generally come through the winter in pretty good shape, while those on the south side of the same fence are very apt to die. Tea roses do not seem to have vitality enough to withstand our winters even when protected, but the hybrid teas do very nicely and are planted quite largely. Climbing roses are apt to have the wood badly killed back unless they are in a position where they are sheltered from the sun.

Owing to our dry winters, few hardy roses are planted in the fall, and spring planting of field grown stock often meets with failure unless the planting is done very early. In our establishment we have advocated the planting of young roses from 4-inch pots in preference to field grown stock, the results being much more satisfactory. By fall these roses are vigorous bushes and in good condition to endure the hardships of winter. Roses on their own roots are much to be preferred to budded stock for the garden, because if the tops are badly killed back they are likely to make good growth again from the bottom.

ADVICE TO NEWCOMERS.

I find that in many quarters the idea prevails that an apprentice who has served a year or two in the east can come to Colorado and rank as a first-class florist. In other words it is thought that our methods are crude; our growers ignorant and unskilful, and our structures of an obsolete type. We are apt to be a little resentful of such an

assumption, for it is erroneous, and while I do not wish to appear boastful, it is due the florists of our section to say that they are an intelligent lot of men, whose character and methods will not suffer by comparison with the florists of any other section. While our houses are not as expensive or as extensive as some in other parts of the country, they are in the main well suited to the purposes for which they are intended. Our rose growers do not cut a large number of flowers on extra long stems that would grade as "specials" in this market, because our market does not demand much stock of that grade, and also because our climate tends to produce a more slender growth and a more early setting of the buds; but the stock averages well, is well colored unless faded by too much sun, and would sell well in any market.

Nothing which I have said should be construed as intimating that the problems with which we contend are more difficult than those encountered in the eastern states, but they are different. Our ranks are constantly being augmented by accessions from the east, and any florist who has succeeded there may confidently expect to succeed anywhere; but he will make a great mistake if he allows his previous success to blind him to the fact that a strange country means strange conditions, and that those who have gone before him are in all probability able to aid him by a recital of their own mistakes. Whether they will aid him will depend largely upon his own attitude.

The people of the west speak of a newcomer as a "tenderfoot," and until he has become acclimated he will find it politic to assume a meek and lowly demeanor. If he does he will receive a cordial welcome and find his fellow florists a lot of good fellows; but if he begins by commenting adversely on what he sees, and sins still further by predicting the things he proposes to accomplish, he cannot wonder if the natives stand back and prepare to laugh, when he proves the truth of the adage that "Pride goeth before a fall."

Most rose growers who come to our climate from the east come with a feeling that the dry air and continual sunshine are all they need to insure success, and there is no disguising the fact that we are free from troubles that are so serious a matter to our eastern brethren during the dark days of winter; but dry air and sunshine are not the only essentials. The regions where vegetation grows luxuriantly are regions that have a humid atmosphere and the cloudy days which necessarily come with such an atmosphere. Many a rose grower has come to Colorado, and scorning advice has attempted to dry off his roses in the summer for the purpose of starting them up later, as he had been accustomed to do. The drying is easy, but the subsequent starting is a problem. We frequently carry over roses to the second and even the third year, but we do not attempt to stop them, and we keep them practically in full growth, even if we propose to transfer the bushes from one house to another.

SUPPLY AND DEMAND.

Just at present in Denver the supply of cut flowers is decidedly in excess of the demand. This is apt to be true with us for a short time in the fall and again in the spring, but during the rest of the year the supply and demand seem pretty well balanced. There was a time when a great many roses were shipped to Colorado by eastern growers, but I believe that practically none are shipped in now.

The people of Colorado as a class are what would be termed "good spenders," but not in the way that seems to be generally imagined. There are very few instances of the lucky miner with more money than he knows what to do with. They generally buy what they have use for, and are willing to pay a fair price for it, but it is a mistake to suppose that they are disposed to throw their money away. On the other hand what is commonly known as "shopping" or "haggling" for the sake of getting a small reduction in the price is not very much practiced.

The prices which are obtainable in the Denver market are never as high as the highest prices obtainable in the Chicago market, especially at Christmas, but prices are more even the year through, and a considerable part of the retail trade is supplied under contract, where the prices are fixed in advance. No one has ever made a success of a wholesale commission house in Denver, and it looks as though such an enterprise could not be a success until there is room for two such concerns, for it is hard to get the growers to place confidence in a man who has no competition.

As nearly as I can determine, the forcing of roses in Colorado only dates back to 1873, when Gus Opitz grew a dozen plants or so. The following year Rushmore & Son planted Hermosa, Isabella Sprunt, Safrano and Lamarque, all in a house about 50 feet long.

I have sent out numerous inquiries, and using the replies received as a basis, I estimate that the florists of the state are at present forcing about 35,000 Beauties, 30,000 Brides, 20,000 each of Bridesmaid, Chatenay and Richmond, and 10,000 other roses, including Roosevelt, Killarney, Perle, Kaiserin and Moulton. It is interesting to note that not a single concern reported any Liberty, and that rose seems to have been completely supplanted by Richmond.

RETAIL BUSINESS.

The retail business in the state probably approximates $650,000 per annum, or $1 for each inhabitant. I would not like to venture an estimate of the amount of wholesale business done with adjoining states, but it is considerable. These figures must seem absurdly small to Chicago florists who are accustomed to places with a million feet of glass under one management; but some day the men who have grown rich in Chicago will make their homes in Colorado, where summer and winter are alike delightful, and we in our turn will build large places and get rich catering to their wants.

Just at present there does not seem to be any opening for increased areas of glass in the vicinity of Denver, but there are doubtless a number of small towns in the state where a florist could start in a modest way and gradually build up a business which would be fairly remunerative. Such a man would do well to work a year for some established concern where he could observe the methods practiced, and he could then start for himself with less risk of costly mistakes. If success came slowly he would find some compensation in the joy of living among a warm hearted and generous people, in a glorious climate with noble mountains in view, whose charm would ever increase. What better can any country offer than moderate financial success in such an environment?

This paper would not be complete without some reference to the present financial condition, and I am glad to be able to say that in Colorado the recent depression has not made any appreciable difference in the business. It may be that it is yet too early for us to feel the bad effects from the late panic, and there may still be for us a day of reckoning, but like all others, we are glad to put off the evil day as long as possible.

Advertising.

A paper by Robt. Pyle, of the Conard & Jones Co., West Grove, Pa., read before the Florists' Club of Philadelphia, April 6, 1908.

Philadelphia is the home of one of the largest if not the largest advertising agency in the world. Some 25 years ago one of the leading men of that firm and easily one of the most prominent advertising men in the country today, used to say after laying out an advertising campaign with one of their clients, "Well now, as to results you know and I know that neither one of us know anything about it."

But in spite of the chances they found they were taking as to the outcome Mr. McKinney and the man with whom he

EASTER PLANTS.

Yellow Azalea Mollis Arranged with Ferns.

was working continued year after year to turn over to the printer and publisher in hard cold cash approximately three times the amount of the net profits of the preceding year of that particular firm, and gradually and steadily built up a business reputation and confidence in the name of that firm which is now known in every flower growing country on earth. It is the printing press and the post office that has made such conquest possible.

HEINZ AND BARNUM.

For our purpose tonight advertising may be said to be "applied salesmanship" with the possibility of sales multiplied to the "Nth" power, but the printed sheet is by no means the only medium. Heinz with his 57 varieties built a big pier at Atlantic City and I have no doubt as an advertising move it pays him well. P. T. Barnum during the height of his fame as a circus manager upon coming to one of the largest cities is said to have rented a small plot of ground adjoining the tracks of a leading railroad which carried thousands of passengers every day to and from the city. He set an elephant to work ploughing that field with a man from Ceylon as a driver. You can readily imagine the interest that such a spectacle would create. People talk about and papers print the novel things that interest them, and the amount of free publicity that Mr. Barnum obtained would be difficult to estimate.

Looking at it broadly, advertising is publicity, telling other people something about which you want them to know, influencing them to think of you and to desire the thing you have to sell, whether it be pickles or seats at the circus, professional services or Easter lilies. But, tonight, of course, we are most interested in floricultural and horticultural advertising.

THINGS WE HAVE TO SELL.

Flowers, trees, seeds and bulbs are the things we have to sell and right here comes a distinction, at least I would like to make the following perhaps arbitrary distinction for the more convenient handling of my subject. Some of us are growers, some are commission men, and some cater to the general public and naturally we have a different selling proposition in each case. To the former the trade papers are the mediums of vital interest (more about them later). The rest of us including we'll say the seedsmen, nurserymen and general catalogue-men have learned that we must depend upon advertising for our bread and butter.

Because of the very nature of the case the advertising carried on by these men is perhaps as broad and general as that done by any class of men in the plant business. Perhaps, therefore, it would be worth our while to go into the office of one of these firms and watch them laying plans for next season's campaign.

The conditions which the advertising man has to face are these: As buyers he has all sorts and conditions of men and women; they are located all over the country; the product which he has to sell includes all kinds of plants, trees, etc., used to beautify the surroundings of the average American home. Please note here the use of the word "average," cutting out that class of homes which look to the landscape architect for their advice. The average American, we believe, depends upon the florist's catalogue as a rule and upon the magazines which he gets treating of this subject to give him the information necessary for the decorating of his grounds.

SALESMAN AND CATALOGUE.

The first and indispensable thing for a salesman to consider is his catalogue or primarily a list of the things he has for sale with the prices thereof. But the successful catalogue man knows that bare lists and prices themselves will bring very little business, therefore, he devotes time and earnest effort and spares no expense to arrange, amplify, and beautify his catalogue. He will take care to have the plants properly classified, to have them carefully and accurately described, and also to include if possible directions for their culture, until it becomes a veritable encyclopedia of the things listed. He also engages the services of the best artists, will have his own photographic department or go where he can to get illustrations that will speak louder than words and make his catalogue to vie with the modern magazine in rare attractiveness.

In making up a catalogue we think it is always well to bear in mind the attitude of the men or the women who will read it. Amateurs as a rule who want to know and are glad to be shown, of course, and there are some women who will read a catalogue from cover to cover no matter how long the descriptions; but the general tendency and a good one is to cut down these long descriptions and to insert in a clear, readable, well arranged manner only such things as would stand the test of actual usefulness and give an accurate picture to the prospective purchaser of the thing he is asked to buy. There are many other details that might be treated of, for which there is not room here, as regards the size of the catalogue page, the number and kind of illustrations, special offers, bargains, etc.

ENGLISH AND AMERICAN CATALOGUES.

Before leaving the subject we would like to call attention to the fact that the English florists of today are ahead of their American brother as evidenced by the splendid specimens of catalogue making which they furnish patrons, not only as regards fine paper, beautiful illustrations, but the comprehensive text-book-like treatment of the subjects listed make them really delightfully entertaining in every way, and if the high prices which they seem able to get is any criterion, we believe they must be good pieces of advertising. We have here a sample of one of the English catalogues, nearly 400 pages—heavy plate paper, exquisitely executed color work—weight 2½ pounds, in the mails. They must cost more than $1 apiece.

The catalogues issued in our country average in price from one cent to 35 cents each in the mail bag. There are a great many houses publishing about 100,000 books; very few approach the million per year edition. The number needed depends, of course, upon the number of regular customers, as we call those who order year after year, plus the number of new names that may be obtained in one way or another, so that right here comes the next point for the advertising man to consider in laying out his campaign: How many new names will he get?

NEW CUSTOMERS.

The answer which almost immediately follows is, how much money have you got to spend? This question is more easily answered when some plan of operation has been arrived at. How shall we go about it to get new customers, a problem more fascinating than a game of chess, most uncertain as regards the outcome but often bringing rich rewards. How shall we reach the general public? To a man with a small place doing a local business that problem would be a comparatively simple one. He would probably put up a sign, make his place look as attractive as possible, using the local papers and sending out to his list

PAN OF LILY OF THE VALLEY BY H. N. BRUNS, CHICAGO.

of customers attractive bits of advertising literature at proper intervals. Of course, this is but a mere outline of what he might do. But our general catalogue man is catering to a very scattered public with wonderfully diversified interests. Living under multifarious conditions of climate and environment he must catch their eye and gain their attention long enough to impress them.

One of the first things to consider, therefore, is what mediums shall he use, and the second thing is what kind of a proposition will he circulate through these mediums. It is very much like sowing seed, good seed in poor ground is not much better than poor seed in good ground, both must be good to form a successful combination. Let us, therefore, first consider the soil, or the mediums.

ADVERTISING MEDIUMS.

Judging from the way he spends his advertising appropriation the average seed and plant advertiser has in the past plainly found it most profitable to use the magazines and some other periodicals, giving little attention to either bill-board, street car or other such forms of advertising. First in the list are the papers which hold for him somewhat the same place as the trade papers do for the wholesaler and the commission man. I refer to the garden magazines with which you are all familiar. Next after this class we would name the women's publications, and of course there is another long list, important among which are the farm publications, and this leads us to another very important matter, that of tracing results.

TRACING RESULTS.

We understand that Burpee depends upon a certain proportion of the people answering his advertisements stating in what periodical they saw the advertisement, and in that way learns which ones pay best. Where possible we believe it pays to key every advertisement and check the returns. We have here a schedule showing the number of orders received and the cost per order and cost per reply to a certain list of papers from a certain proposition for a certain period of years, and you can readily understand how helpful is this schedule in selecting mediums for future advertising.

SPACE.

The next question perhaps will be, how much space shall we use? Does it pay to use a large space in a few mediums or a small space in a great many? Will it pay better to spend $4,000 for putting an advertisement on the back cover of the Ladies' Home Journal for example or to use the same amount of money in buying full page space in four of the leading monthly magazines. Of course, these are extreme cases, but the same principle applies, and it is no easy matter to decide questions of this kind. We believe it pays to take sufficient space to very certainly catch the attention of the woman who is not likely to be interested, and to take that space in the magazines of good standing and large known circulation, which you know reach the class of people for whom you are making a bid.

COPY.

The question of copy is perhaps the most fascinating of all. We know of no easier way to waste money than to buy space and to fill it but poorly. The first question to consider may be, will you advertise directly for orders or advertise for names, or in other words get people to send for your catalogue, which can be depended upon to make the sales? Look through the advertising pages of any current magazine and we will find samples of every type. Templin, for example, offers a beautiful lace fern, free, tacking on the provision that 4 cents must be sent to pay cost of packing and postage; that four cents is a good foil to keep off mere curiosity seekers. It appeals to the people who want much for little but the advertisement is well handled and also ought to appeal to the very best names. An advertisement of this kind will undoubtedly get circulation for the catalogue.

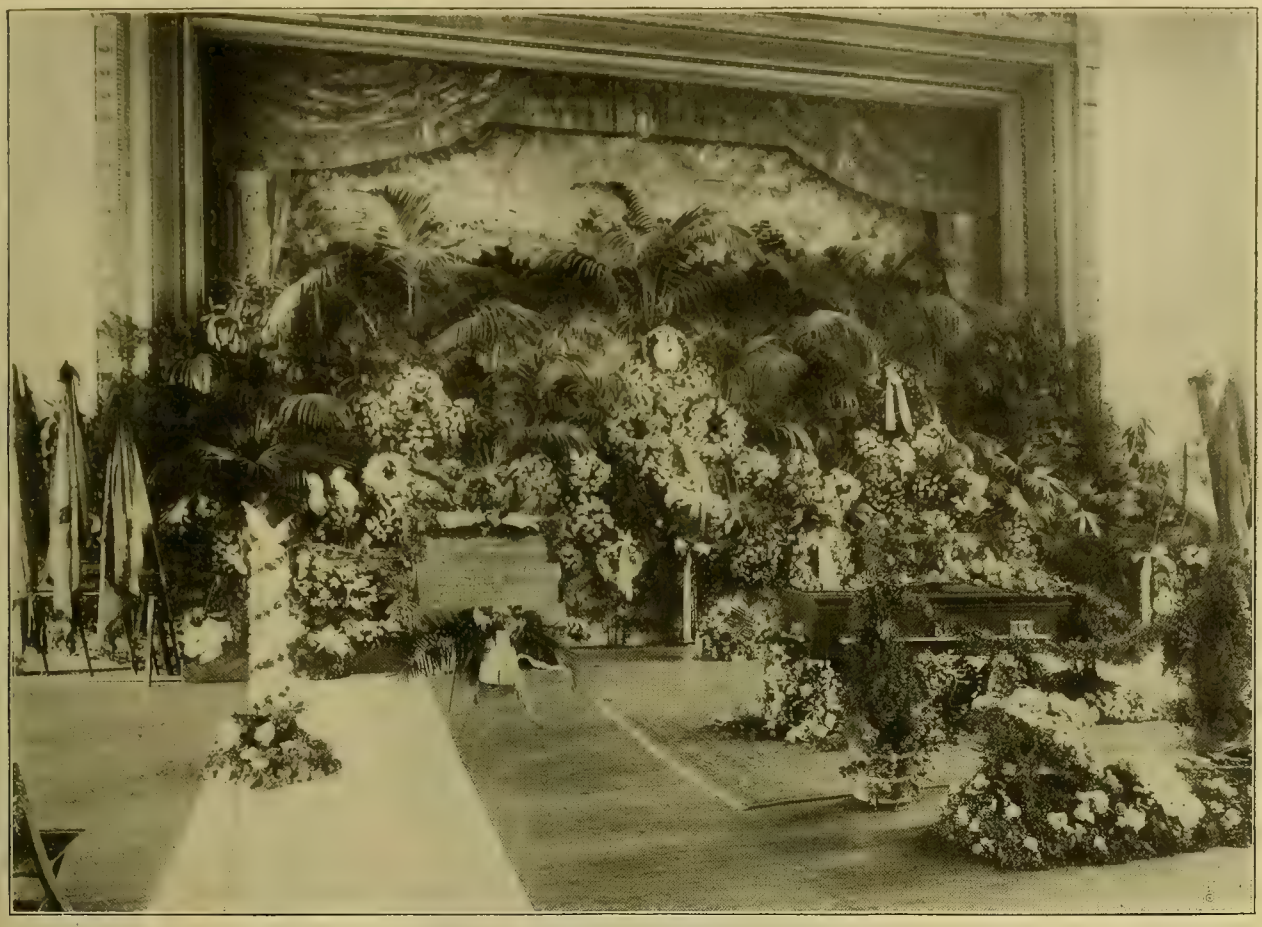
Another type you are sure to note is that of making a definite offer of a collection or a novelty. There is some risk as to whether or not such offers will pull and this is the test for the man who writes the advertisement. Personally we have tried the free offer plan, and have secured thousands of names that have cost not more than a penny apiece; we have tried the second plan above referred to and have got some orders to cost us not less than $4 apiece, but after we had counted up the cost of the catalogue sent on each particular proposition, and considered the returns from all the sales made there was very little difference in the net result. Countless examples of this kind might be related but all go to show that it is as important to consider the quality of the names thus secured as it is the cost to get them. Cyrus Curtis, head of the Ladies' Home Journal Co., once said that if he got back one quarter of what he put into his advertisements he considered it was paying him very well indeed, and it took six figures to show the amount he was then expending each year.

DISPLAY.

There are a few things that may be worth mentioning in connection with display in advertising. Some artists or some advertisers seem to have the knack of getting up an advertisement that will stand out strongly on the page. Some years back white on black advertisements were very much in evidence and still are distinctive when well done. You will remember the excellent advertising done by the greenhouse construction companies in the trade papers, what splendid taste is displayed, an attractive illustration, strong borders, white space and well selected and well arranged type, and best of all good, straight from the shoulder talk.

There is a characteristic style in the clean appearance of Burpee's advertising, from which for the most part illustrations are eliminated, except in the way of their trade mark or their green label. When the term "uneeda biscuit" was coined for the National Biscuit Co., there

FINE FLORAL PIECE BY McALLISTER, PASSAIC, N. J.



FLOWERS AT AN INDIANAPOLIS FUNERAL.

was also adopted a particular style of letter and from that day to this whether on billboard, box, or magazine, we think we are right in saying, that that particular style of lettering has always been retained.

Advertisers have learned the value of repetition. "Water dropping day by day wears the hardest rock away." Repeated taps of the hammer will finally break the stone. There is a little "ad" that appears in the trade papers most pleasingly distinctive, and I daresay there is hardly a man in this room who is not perfectly familiar with the little label pictured in the firm name of the Leedle Floral Co. It is impossible for one to think of the advertisement of that firm without picturing in his mind the form of that little signature, which shines out boldly on the most crowded page.

A good trade mark can be hammered into the consciousness of the people you are trying to reach. With it, if it be strong enough, you can count upon gaining the attention of every passerby every time he comes along, and very much oftener, and very much more surely, than if your "ad" was dressed up in the common garb of ordinary type.

TESTIMONIALS.

Testimonials, it seems to us, are worthy of mention, as being strong arguments in advertising. They are recovering from the violence done them by the patent medicine man. In the first place they come from disinterested, at least unprejudiced persons, and in connection with catalogue work especially, if not with advertisements, they add conviction as to the pulling power of the thing advertised.

FREE READING NOTICES.

Many of you probably remember how at a large reception given to President Roosevelt, in course of the naval review in New York harbor, there was a certain flower that figured conspicuously in the decorations. Just how much John Lewis Childs is responsible for the Gladiolus America being used for the president's reception we know not, but it is very certain that the amount of free publicity gained through the press, as the result of this gladiolus being used, would have cost Mr. Childs many thousands of dollars if paid for at regular advertising rates.

Any one who has been reading the trade papers for the past few months has surely had impressed upon his mind the fact that there was a new hydrangea on the market. Because of the discussion over a name, that hydrangea has been advertised so widely that it is almost as famous as old H. paniculata grandiflora, yet our genial friend from Indiana, the famous introducer, we suppose has not been charged a cent.

Some people are trying to believe that they are reducing the profession of advertising to a science. They claim certain conditions produce certain results, just as life insurance men have their mortality tables. The most successful advertisers, or the man entrusted with the expenditure of the largest sums of money, still advise, and wisely practice what they preach, as follows: "Try out every scheme (no matter how promising it may appear on its face) thoroughly on a small scale. First tabulate results, carefully watch results and your correspondence, then shape your course accordingly.

Just one more thought I wish to leave with you. When you advertise, be ready to "deliver the goods." Do not disappoint or your advertising campaign might just as well not have been. Good stock, right prices, with prompt, courteous attention to customers will win trade and create a confidence that will be hard to shake. This is by no means the least important.

Again we repeat hold your customers by good service, because after all a satisfied customer is your best advertisement.

To the Salesman.

Anything but a salesman coming into your store puffing a cigarette! What a poor impression he makes on the man he is trying to sell goods to. The other day a salesman came into the store with a cigarette in his mouth; he stood around waiting for the proprietor and after a while, when he was at liberty, the young man displayed his goods and again lit another cigarette. The consequence was he did not get an order, partly because we did not need much of anything he had, but mostly because we had no use for cigarette fiends. T.

A Scented Dahlia.

T. C. Schmidt, of Erfurt, has introduced a dahlia which is characterized by a sweet scent recalling that of honey. The plant originated in Mexico, and is said to be of good habit. Planted out in May, it flowers in July and August, the blooms being of a shade of orange-scarlet, and borne on long stems, thus rendering them very suitable for use as cut flowers. The plant reaches a height of four to five feet.—Gardeners' Chronicle.

MADISON WIS.—The new greenhouse which F. Rentschler is building at Baldwin and Jenifer streets is rapidly assuming shape. It is of modern design, steel and glass entering almost wholly into its construction, and will be devoted to roses.

THE RETAIL TRADE

ALL surplus stock should be shown as much as possible. It will not sell if packed away on shelves.

IN a recent issue of the American Business Man there is an interesting article on "Profit and Pleasure in the Florist's Shop."

NEATNESS in packing, in the deliverer and promptness are very desirable. They do not make up for poor flowers but they are a great aid to business.

THE "Shopping List," a memorandum book issued by Rock's Flower Store, Kansas City, Mo., is the neatest thing we have seen this year in Easter booklets.

THE Easter invitation of the Saltford Flower Shop, Poughkeepsie, N. Y., has been mailed to customers in a little white rabbit, enclosed in a neat cardboard box. Bunny, in this attractive form, finds much favor with the ladies.

Funeral Flowers.

The fine display of flowers and plants depicted in the accompanying illustration were used at the funeral of a prominent citizen of Indianapolis, Ind., recently. The flowers were furnished by the various florists of the city and the whole arranged by Bertermann Bros. Co. J.

Fine Floral Piece.

The floral piece here illustrated was made by W. L. Hundertmark, manager for Mrs. M. McAllister, Passaic, N. J., and is of a design specially made for the firm. In the crescent, lily of the valley and white lilac are used at the center; the points on each side are of violets, white carnations form the star and the base is a bold arrangement of Easter lilies. Mr. Hundertmark has evidently a light touch with his work, a very important aid in making up effective designs without crowding.

Easter Business at Chicago Stores

Probably there was never a holiday looked forward to with more optimistic feelings than the present Easter. Coming late, there is every probability of good weather and, as stock is of good quality and moderate in price, the retailers should have a busy and profitable time. Bookings in the best stores are away ahead of any previous Easter and at Fleischman's, Geo. Wienhober says they have taken more money during March than last year, when there were no money troubles and when Easter was included in the month's sales.

Roses are possibly the most interesting flowers. They are excellent in color and substance and very plentiful. Carnations are not so plentiful, but there is no difficulty in filling orders and there are still a few good violets and plenty of orchids. Plants are plentiful and good. One of the finest displays made is at the Eaton Flower Shop on Jackson boulevard. Chas. Baluff has just returned from an eastern trip and has a lot of fine stock and sundries. We noted here a remarkably fine specimen hydrangea over a yard across and carrying magnificent flowers, besides a number of smaller but perfect plants. Mr. Baluff is loud in his praises of the New York stores and speaks very highly of the window displays there.

At John Mangel's preparations are being made for a record breaking Easter, and the stock of plants is fine. Very fresh and well colored azaleas and good lilies, palms, ficus, Baby Rambler roses and genistas were noted and the pretty specimen cupressus around the outside of the store give it a bright appearance. We noted the Japanese air plant in pretty little chip baskets but Mr. Mangel wisely prefers the real and fresh flowers to anything of this class. Harry Rowe has some extremely fine pyramid and other box trees, grand specimens that should sell well. The windows here are always attractive and contain excellent stock in all leading varieties.

Bride's Bouquet of Kaiserin Roses and Lily of the Valley.

By the Late Col. F. P. Davis, Mobile, Ala.

At Hauswirth's at the time of writing the Easter stock proper had not been displayed, Mrs. Hauswirth preferring to wait until later in the week so that patrons can see the plants all fresh at the time they want them. But some remarkably good cut flowers are shown, notably in roses. Gardenias are favorites here and there is a number of fine healthy looking specimens bearing numbers of the chaste, white, sweetly scented flowers. Not only the down-town stores but those on the north, south and west sides all are looking forward to good business and stocking heavily of good plants and flowers.

One of the prettiest things we have seen in a long time is the charming violet box by Fleischman. The cover is a hand painted figure of a lady in summer garb with a parasol and large bunch of violets. It is exquisitely got up and should prove a good seller. Here are noted some beautiful, small, bright yellow Japanese chrysanthemums and we had to look twice at them to be sure we were not mistaken. Good yellow chrysanthemums in April are, to say the least, unusual. Yellow marguerites and some excellent English irises were also noted. Easter orders began to come much earlier than usual here and much heavier in number and there is no question but that a very heavy trade will be done.

Time would not permit of our visiting many of the principal stores but all are showing good stock and plenty of it. At the Alpha Floral Co.'s store we found everyone busy and a great stock of cut flowers and plants on hand. This firm turns over a great quantity of stock and we noted Cardinal and Killarney roses in excellent shape. Plants, such as primulas, hydrangeas, lily of the valley, ferns and all the popular and showy Easter kinds are well displayed and we noted quite a number of orchids, including cattleyas, cypripediums and the bright and effective old Dendrobium nobile.

London.

When calling at the Dyson Lane Nurseries, Edmonton, H. B. May & Sons, I was somewhat surprised to find cement benches in general use; they have been here for many years. For fern growing, they well serve their purpose, and while being economical, are unfavorable to the harboring of insects. They are lasting and cleanly in use, two very strong points which find favor with the growers.

WINTER FLOWERING CARNATION SOCIETY.

The fourth exhibition of the Winter Flowering Carnation Society was held in the Royal Horticultural Society's hall, April 1, in fine, bright weather so that the merits of each variety could be seen. It is to the credit of Sussex growers that they kept level with those in more favored sunny Guernsey. C. L. Waters, Balcombe, was awarded a gold medal for 24 varieties, Rose Pink Enchantress, Beacon and Winsor being his leaders. Princess of Wales (Malmaison) and Pride of Exmouth, a pale salmon pink for which the grower claims a large sale, were also fine. N. H. Page, Hampton, also had a gold medal for a very fine group, his most prominent varieties being Mrs. Lawson, My Maryland, Queen Louise and Beacon. H. Burnett's gold medal group contained Marmion, Mikado, The President and Mrs. H. Burnett. A gold medal was also awarded Hugh Low & Co., Aristocrat and Beacon being their best.

Silver gilt medals went to A. F. Dutton, for 19 vases, Bell & Sheldon and Morres & Co., of Guernsey, while G. Lange, of Hampton, and C. Engelmann both had silver medals for fine groups. The following were the principal awards in the competitive classes.

Thirty-six blooms, any white variety.—W. H. Lancashire, first, with White Perfection.

Thirty-six blush.—W. H. Page, first, with very fine Enchantress.

Eighteen any white.—Bell & Sheldon, first, with Lady Bountiful.

Eighteen blush.—Bell & Sheldon, first, with Enchantress.

Eighteen light pink.—A. F. Dutton, first, with Winsor.

Eighteen deep pink or rose.—W. E. Wallace, first, with Nelson Fisher.

Eighteen crimson.—Bell & Sheldon, first, with The President.

Eighteen scarlet.—A. F. Dutton, first, with Beacon.

Eighteen any other color.—C. Engelmann, first, with Imperial.

Twelve blooms of any variety not in commerce.—W. H. Lancashire, with Ivanhoe.

W. Haymond, of Kingston, took all the principal prizes in the decorative classes, showing excellent flowers well arranged.

S.

"Window Gardening." *

Books treating in a simple and easily understood manner of the plants that may be grown in a window and their culture are not too plentiful and we welcome this useful and practical little work of about 150 pages by Herman B. Dorner. In his introduction the author treats of the causes of failure and selection of plants for the purpose, and his advice is concise and to the point. He gives an excellent list of receptacles for use in windows and the illustrations in this connection are appropriate and practical and not merely cuts thrown in to fill up. Under potting, 13 pages and several illustrations are devoted to practical and excellent methods suitable for this kind of gardening, and this is followed by chapters on soils, watering, fertilizers, light, heat and ventilation.

Insects are treated on in a comprehensive manner and the methods of destroying them fully discussed. Propagation comes next and is considered under the heads of seed and cuttings. Bulbs, the great standby of the window gardener, have 16 pages devoted to them, the book finishing with notes on foliage and flowering plants, in which the most suitable kinds are discussed. As hinted above, the cultural and other details are given in language easily understood and as the author is a skilled grower himself and, moreover, comes of a family of distinguished florists, the advice given is thoroughly reliable. The book is neatly bound in a green cloth cover, with gilt lettering. It has 43 illustrations and is just the handy little book that amateurs and plant lovers like to have ready to use when any little matter crops up on which they require information. Retail florists should keep this book in stock for their customers. The price is $1.20.

To Be Done Now.

IN THE GREENHOUSES.

A night temperature of 50° is ample to keep young cyclamens growing well but there must be a nice growing atmosphere always.

Continue to root the young green shoots of the aloysia or lemon verbena.

Keep a watch on the pelargoniums as the flowers advance and fumigate at the first sign of green fly.

Otherwise healthy plants of carnations will grow out of an attack of rust but those badly affected and weak should be thrown out.

Pinch the young bouvardias regularly until the requisite number of shoots is obtained.

Many incipient green fly attacks may be checked by sprinkling a little tobacco powder in the points of plants likely to be affected.

A light shading must be put on palm houses that are not provided with blinds.

Continue to bed out nephrolepis runners as they are fit to take off. Shade and water carefully at first.

IN THE STORE.

A little nitrate of soda sprinkled on the surface of the soil of the store palms occasionally will help the color of the foliage.

Pansies never seem to be in the wrong place. They associate well with almost every other flower.

Keep spireas in pot saucers of water or they will not last long, and advise customers to do the same.

There is no other rose that improves in color on opening so much as Killarney.

A thorough clean up all around will be in order as soon as the Easter rush is over.

Dull green pot ware, or bright green ribbons are far more effective than other colors of either.

*We can supply any of the above books when price is quoted.

OUTDOORS.

Rose pruning must be finished up now. The stronger the grower the longer the shoots may be left.

Start in early with the hoe; it gives the weeds no chance and helps to warm up the soil.

Push on with the herbaceous stock planting before the plants make too much growth.

Remove any winter killed wood from tree peonies and also shoots not strong enough to flower.

When cleaning the herbaceous borders, carefully avoid the young shoots, which are sometimes very near the surface even if not actually showing.

The Late Col. F. P. Davis.

Soil preparation for carnations, asters or other outdoor flowers must be pushed as soon as possible.

See that newly planted trees do not suffer for want of water. The drying winds and sun soon search out the moisture in the newly moved soil. Frequent hoeing of the surface is a great help along this line.

When digging plots in the garden see that all paths are cleaned first. Throw the rubbish on the plot, to be dug in as the work proceeds.

A Frost Alarm Clock.

An inventor at Kennewick, Wash., has produced what is termed a "frost killer" for orchardists. The device is a combination of an alarm clock and a thermometer. On the approach of frost the thermometer registers and sets off the alarm, which is placed in the house. Tanks of crude oil are kept in the orchard, 40 to 60 small cans being required to the acre. When the alarm is given the orchardist goes to his oil cans and starts them burning and the temperature of the atmosphere surrounding the trees is raised from two to six degrees, making the threatened danger nothing to be feared.

HIGHLAND PARK, ILL.—Geo. Brown, an aged gardener who for many years had been employed in various local places, was found dead near a clump of maple trees, a favorite spot of his, April 12.

BUSHNELL, ILL.—The remains of Wm. Clossom, 30 years ago owner of the Prairie City nurseries, were buried at that village April 2. He expired at the home of his son, G. W. Clossom, in Kansas City, Mo., at the age of 92 years.

OBITUARY.

Col. F. P. Davis.

Col. Franklin Pierce Davis, Mobile, Ala., died suddenly at his home April 6. Col. Davis suffered considerably from indigestion during the year, but was not considered seriously ill. He did not get up on the day of his death, saying he felt pain in his body and wanted the doctor to examine him. This was done, with reassuring remarks by the doctor. In the afternoon, having been busy all day with his mail and other business concerns, he complained that he felt a sudden pain and called Mrs. Davis to his side. With her hand on his forehead he experienced a seizure, his head fell back and he was dead without struggle or pain.

Col. Davis for many years was manager of the Cotton Press Association, and was born in Mobile June 18, 1852. He was educated at Barton Academy After leaving school he took a clerkship with an insurance company and subsequently was clerk for a commission house for one year. In 1872 he took a position as clerk for one of Mobile's cotton compresses, and after three years' time he engaged in the compress business, which he continued until five years ago, when he moved to Summerville and went largely into the flower and nursery business, in which he was very successful, growing high grade stock which was shipped all over the south. He was very successful with roses and chrysanthemums, and at the time of his death was planning to grow carnations extensively the coming season. He had also planned considerable additions to his already large greenhouse plant, and recently embarked in the retail end of the business, in which he was a highly proficient artist, one of his latest efforts, a bride's bouquet, being reproduced in this issue. He was a member of the Society of American Florists and President Traendly appointed him state vice-president last January.

Col. Davis organized the present Mobile joint committee on rivers and harbors and was chairman of that committee during a period of great usefulness to his city. For quite a number of years he had been conspicuously connected with the militia of the state. He organized the famous Lomax Rifles and was the first captain of the company, which won first honor with prize of $5,000 at the great national drill in Washington, D. C., in 1887. He was many years connected with the Infant Mystics, contributing much time and labor towards the grand displays made by them in years past. He was an ornithologist with considerable knowledge of the birds of Alabama, and an accomplished artist. He was a generous patron of all that was beautiful, loved flowers and music, and did all possible to promote the pleasure and welfare of those around him. In public affairs, while never seeking office, he was of value and help in every cause that promoted the betterment of Mobile.

Col. Davis' first wife, who died in 1887, was Miss Corrine Cluis, daughter of the late Frederick Cluis of Mobile. By this union were three daughters, Mrs. Wallace Frazer of Knoxville, Tenn.; Mrs. Wm. Douglas and Mrs. Jesse Burke of Mobile, and one son, Percy Davis. Col. Davis' second wife, who survives him, was Miss Corrine Irwin, daughter of Col. Lee F. Irwin, by this marriage there being one son, Lee Irwin Davis.

In his stately southern home, surrounded by wide spreading grounds and ancient trees, Col. Davis was the soul of hospitality and many horticulturists will recall the delightful hours spent there with him and Mrs. Davis. May the magnolia blossoms rest gently on him.

THE action of the Canadian Pacific Railway, in endeavoring to beautify the yards and country generally through which its lines run, is commendable and might well be followed by other lines.

IN an interesting address, given before the Massachusetts Horticultural Society, March 7, Kenyon L. Butterfield, president of the Massachusetts Agricultural College, had strong arguments in favor of "Agricultural Education in the Schools."

No room for an orchid society yet, says New York.

EVERY day sees increasing numbers of visitors to the parks.

RARELY has Easter been approached with more optimistic feelings.

VIOLETS are getting over and the propagator must get busy for next season.

THE Britishers seem to be quite awake now as to the merits of American carnations.

SIMPLE methods of soil sterilization by steam can be carried on at almost any plant where this is used for heating.

THE glass market continues rather weak with little or no change in prices although several factories have already gone out of blast.

AN account of the exhibition of the English Winter Flowering Carnation Society, held April 1, will be found elsewhere in this issue.

THE Florists' Hail Association is paying losses at Iola, Kans., and Carthage, Mo., where about one-half the glass surface was broken by hail.

GATHERING galax leaves is a profitable industry for women and children in the mountainous districts of Maryland, where they often make $1 to $1.50 per day.

REPORTS continue to arrive telling of great damage done by the recent hailstorm showing how necessary it is that greenhouse owners are protected from loss by hail insurance.

THE paper on advertising read by Robt. Pyle, of the Conard & Jones Co., at the Florists' Club of Philadelphia, April 6, is quite an education along this line. It is reproduced in this issue.

IT is a good policy to stick to old and tried varieties, but a live grower will not fail to take advantage of new ones when these are likely to be money makers. And one year's trial is not always conclusive.

THE endeavors of the authorities at the Massachusetts Agricultural College, as outlined on page 629, are in the right direction and growers should do all they can to help in the work by sending representative flowers in as great variety as possible.

BENJ. HAMMOND, of Fishkill, N. Y., in a recent circular gives an illustrated account of successful school gardening at Riverview school, Barrytown, N. Y., W. D. Wildey, principal. The school gardening movement grows apace and should be aided by florists everywhere.

"FLOWER BEDS along the walls of schools are the main cause of damp basements and unhealthy conditions," is the conclusion that a Washington engineer has come to. The worst of it is he is allowed to make such erroneous statements through the medium of the press and that there are people who will believe them.

WM. ROBINSON, the famous English authority on landscape and wild gardening, in reply to a friend who sent him clippings from the Washington Star, sends a long and interesting letter in his own unique style, condemning, as he always does, the formal and unnatural in gardening and the "butcher gardening," as the above paper styles it.

Society of American Florists.

CHANGE OF REGISTERED NAME OF ROSE.

The Waban Rose Conservatories, Natick, Mass., make application to have the name of their rose, previously registered as White Killarney, changed to Mavourneen. Public notice is hereby given of this application and any persons objecting to this proposed change of name or knowing of any reasons why the name should not be changed as above, are requested to forward a statement of their objections to the undersigned at once.

No objection being received within 20 days of this date, a change in registry will be made.

W. N. RUDD, Sec'y.
Morgan Park, Ill., March 30, 1908.

Starting Florist's Business.

ED. AMERICAN FLORIST:

I am about to start two greenhouses, 20x105 feet, with stock to care for a town of 8,000 population, these being the only greenhouses here. What stock do you think I shall want and how much to start with? H. R.

This question is rather complicated, because there are several points to consider. The first is, if the populace of said town are mostly composed of people of very moderate means, then the class of flowers and plants should be of a corresponding nature, namely, such as can be sold with profit at moderate prices. On the other hand, if the populace are largely people in prosperous circumstances, then a better grade of flowers, plants, etc., will be the best to produce, for, although these people may not have been much in the habit of buying flowers, etc., yet they will soon demand as good flowers from those producing them in their own town as can be procured from other and larger towns.

For the first season, that is, if "H. R." is now building his houses, it might be best to confine himself principally to producing cut flowers, and that two classes, namely, roses and carnations. A house of 20x105 feet for roses will take 1,000 plants of such varieties as Bride, Bridesmaid, Killarney, Richmond and similar varieties of that class, and for a house of same size in carnations, it will take about 2,200 plants to fill it to best advantage, which means that the roses can be planted about 13 to 14 inches apart each way, and the carnations in rows across the benches at 12 inches apart and about six inches apart in the rows. "H. R." may find it desirable to have a few miscellaneous things growing besides the two named above; in that case, one bench or part of one may be devoted to such other things as may be likely to be in demand. Usually people buying flowers want some green foliage with them, such as asparagus, fern, etc., and it might be advisable to have a small supply of this. After a season's experience it will be much easier to cater to the wants of the customers.

If, during the coming season, "H. R." finds a demand for pot plants, and often in such communities there is considerable demand for bedding plants, such as geraniums, salvia, coleus, etc., such stock can be grown in limited numbers on the edges of the benches without materially affecting the main stock growing for cut flowers. For coleus and plants of that class the rose house temperature will produce them best. There are many other varieties of plants and flowers which the florist catering to the general public may find it desirable to grow, but for the first season I should advise "H. R." to confine himself in the main to roses and carnations, for the varieties of the last named most suitable for him to grow.

I would advise him to find out from the growers in the nearest locality what sort succeed best and plant those which

succeed best with others in somewhat the same class of soil as his own, as carnations are very varied in their productions in different localities, and the profit in growing them entirely depends upon the amount of blooms they will produce. Of course, the better the class of flowers the better the price they will realize, and the same rule applies to all the produce of a greenhouse.

JOHN N. MAY.

Illinois State Florists' Association.

The following officers and committees have been appointed by President Hey since last meeting: E. W. Guy, vice-president, succeeding A. S. Halstead, both of Belleville; A. C. Brown, Springfield, vice-president, to succeed August Poehlmann, Morton Grove; A. R. Knowles, Bloomington, vice-president, to succeed F. L. Washburn (treasurer-elect), also of Bloomington, who resigned. The advisory board consists of J. C. Vaughan, Chicago, two years; W. N. Rudd, Morgan Park, two years; F. J. Heinl, Jacksonville, one year; C. D. Gallentine, Morrison, one year; J. F. Ammann, Edwardsville, two years. The membership committee consists of A. F. Longren, Des Plaines (chairman); J. B. O'Neil, Chicago and F. A. Friedly, Springfield.

J. F. AMMANN, Sec'y.

Meetings Next Week.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Advs., See Ready Reference Section.

Every paid subscriber to the AMERICAN FLORIST for the year 1908 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—As rose grower in good establishment by experienced grower: German, age 42. Address, E. R., Fairhaven, Pa. R. F. D. Route 1, Box 150.

Situation Wanted—Young American would like a position in first-class store: long experience no objection to Pacific coast. Address Key 502, care American Florist.

Situation Wanted—By experienced grower of cut flowers, roses, carnations, 'mums, etc. and general stock: life experience; German, age 42. Key S.S. care American Florist.

Situation Wanted—A thoroughly practical man is open to position as head gardener: highest references as to ability and character. Address Key 513, care American Florist.

Situation Wanted—As working foreman by good practical, experienced grower of roses, carnations, 'mums, cut flowers and pot plants; designer, landscape gardening, etc.: sober, steady, not afraid to work; 29 years' experience: German, 43 years of age, married; best of references. Address Key 509, care American Florist.

Situation Wanted—Head gardener on a private place; first-class references; single, German; reliable, strictly sober, intelligent, of good education; 22 years' practical experience in all kinds of indoor cut flowers, palms, ferns, fancy pot plants, decorating, landscape, carpet bedding, fruit and vegetables; disengaged April 15; good wages expected. Key 507, care American Florist.

Help Wanted—A man to work in rose sections; state wages without board. Apply COLE BROS., Peoria, Ill.

Help Wanted—A single man for carnations and 'mums; also to help with roses. Send references. Box 32, Montclair, Colo.

Help Wanted—Good man to run small place himself. Steady position: German preferred. With full particulars, address Key 491, care American Florist.

Help Wanted—Single all around man at once for private place; must understand vegetables also help in greenhouses; steady place; $35.00 per month, room and board. C. J. REARDON, Box 498, Hinsdale, Ill.

Help Wanted—By May 1st, florist to take charge of grounds and small greenhouse; room attached; wages $40.00 month, board and washing. Address with references. DR. J. W. STEPHENS, Supt. W. Ky. Asylum, Hopkinsville, Ky.

Help Wanted—Assistant in retail place of 10,000 ft. of glass; must be a good worker and sober; state age and references; wages $15.00 per week, steady place for a good man. Address SEATTLE FLORAL CO., 4th and Denny Way, Seattle, Wash.

Help Wanted—Reliable florist with 20,000 carnations, good varieties, little cash and capable of erecting greenhouses—material now at greenhouses, near Chicago, can become part owner of established modern greenhouse business. C. F. MORRIS, 420 Ashland Blk., Chicago.

Catalogues Wanted—I desire late catalogues from firms handling seeds, bulbs and florists' supplies. W. W. WESTON, Manila, P. I.

For Rent—A new greenhouse on west side; 125 boxes glass sq. ft. Key 511, care American Florist.

For Rent—One of the finest greenhouse and flower businesses in the city; old established business. CUTHBERT D. POTTS, 79 Dearborn St., Chicago.

For Sale—At Madison N. J. Greenhouses 1500 running feet in all; barn, dwelling, all improvements; also 6 acres of land; ¾ of mile from depot. Key 510, care American Florist.

For Sale—A retail florist business, 5 greenhouses, about 5000 feet of glass, store, barn, 8 room house, lot 100 feet front, over 200 feet deep, located in fine neighborhood; a good opportunity for two young men who understand the business, with small capital to start; good reason for selling; party must have $5 000, balance to suit purchaser. G. F. THRUN, 8707 Cedar Ave., Cleveland, O.

For Sale—Greenhouses in good condition; 10,000 ft of glass, also double house, all modern, good location, 210-ft. front; or will sell greenhouses alone. HENRY EICHOFF, 2863 E. 75 St. Cleveland, Ohio.

For Sale—Greenhouses and stock; about 20,000 feet of glass, well stocked with all kinds of bedding plants, ferns, palms and cut flowers; for terms inquire of Mrs. Hugo Book, College street, Worcester, Mass., or L. Midgley, Worcester Conservatories, Worcester, Mass.

For Sale—5 greenhouses, about 20,000 feet of glass, well stocked; 4 acres best kind of soil; 5-room and attic house; good well and windmill; barn, horse, wagon, tools and stock; everything goes with the plant; good trade, can sell all the stock you can grow; located near city of about 400,000 inhabitants, accessible to steam and electric lines. WISCONSIN NATIONAL LOAN AND BUILDING ASSOCIATION, Room 22, Mitchell bldg., East Water and Michigan Sts., Milwaukee, Wis.

For Sale—At a sacrifice; a model floral establishment in the city of Youngstown, Ohio. This is the oldest floral establishment in the city, and has a trade that is desirable in every way. In order to close out an estate, this establishment will be sold at a price that will be an inducement. This is an excellent opening for some one desirous of engaging in the floral business. For further particulars call on or address, C. EDWIN OYSTER, Receiver, 507-508 Dollar Bank Bldg., Youngstown, O.

For Sale—One of the largest and best known mail order seed, bulb, plant and nursery establishments in the United States. This business was established in 1860, and is known by all seed people the country over, and many abroad, and has an enviable reputation for quality in seeds, plants, etc. This is an excellent opportunity for an individual or corporation desirous of entering into this line of business which is a very profitable one to engage in. To an ambitious young man, or several of them associated together, it offers a rare opportunity to step into and take up the management of a business that is so thoroughly established and as well known as this one is. In order to close out an estate, the entire establishment, including 52 acres of testing gardens, office buildings, greenhouses containing 45,000 feet of glass, barns, seven dwellings, a complete and up-to-date printing establishment, in which is turned out all printed matter used, including catalogs; horses, wagons, and entire equipment necessary to carry on this business successfully, will be sold at a sacrifice. Any one interested can have full particulars by addressing or calling upon the undersigned. C. EDWIN OYSTER, Receiver, 507-508 Dollar Bank Bldg., Youngstown, O.

...WANTED...

All Florists using steam heat to send for our latest catalogue, which contains some very valuable information.

Address Key 512, care of American Florist.

WANTED.

A competent man for designing and packing room to take full charge. Must be a first-class workman on funeral work and be thoroughly experienced in the retail cut flower line. Also one experienced on pot plants and design work; good situation for the right men; apply with references

In and Around Boston.

Perhaps there is no place in the country where the culture of cut flowers for market has reached the perfection that it has in and around Boston. When roses were first forced for winter cutting it was here that the country looked for its Bon Silene and Safrano and now, after a lapse of some 30 odd years, we find the rose growers of this market still in the front rank and carrying off some of the honors whenever in competition with the best produced in the various flower growing centers of the country. Messrs. Elliott and Montgomery are certainly experts in their line, always on the lookout for something new, and the visitor to their places is sure to see the very latest and best methods in greenhouse rose culture. The home of Fisher's Lawson and Enchantress, two of the most widely grown and popular carnations, is in this district. Wm. Sim clearly leads with his sweet peas which are a revelation to all outside growers who see them, and his single violets also appear to be in a class by themselves. The growers of choice flowering plants are also leaders in many lines, cyclamens, begonias and Easter stock being done as well here as anywhere in the country.

T. ROLAND, NAHANT.

A visit to Thos. Roland at Nahant is a great treat at this time to the lover of well grown plants, as here is to be seen the very pick of the Easter stock, such things as find their way into the best stores for the finest retail trade where the discriminating buyers are always found willing to pay a good price. For this year Mr. Roland's specialties are roses, hydrangeas, lilies, genistas and bougainvilleas. The roses are of the rambler type, with Dorothy Perkins, Lady Gay and Hiawatha as leaders. These are done exceptionally well. They are for the most part in 6-7-inch pots in which the dormant canes were tied down low to short stakes. The plants as finished are beautiful specimens about 24 inches to 30 inches in diameter, both ways, and covered with trusses of bright colored flowers. Some grown on pedestals have pendant sprays of bloom extending below the bottom of the pot. Dorothy Perkins is thought to be the best for forcing as it makes a more compact plant, the flower shoots being shorter than those of Lady Gay. Hiawatha is very striking, its brilliant flowers with large white centers making it especially attractive, and it is sure to become a standard for Easter forcing. Dorothy Perkins and Lady Gay, trained into gypsy basket form, with a high handle, were very stunning and when decorated in the stores should command top prices. Genistas were also treated in this manner, the body of the basket and high handle being full of bloom. They certainly looked worth the trouble. Hydrangeas of the Hortensis type in the three colors were well done, the bulk of the stock being white. The plants carried quantities of bloom but the heads were not as large as the Otaksa, which is so generally grown for the Philadelphia market. A large house of lilies, about 7,000 pots, looked good. Considerable loss had been experienced from diseased bulbs such as is general all over the country. Campanulas were also seen in limited quantities, very pretty, but Mr. Roland says he finds them not profitable for forcing. Bougainvilleas are done well, the plants being low and bushy and very full of bloom of a good color. Acacias are a hobby with Mr. Roland. A few specimens of choice varieties were well flowered but not offered for sale. A large collection of different varieties had been imported recently, mostly for private use. Begonia Gloire de Lorraine is a specialty here and quantities of young plants are seen. Mr. Roland prefers the plants from sucker cuttings to those grown from leaves, as he thinks they grow into better specimens. A large new house is filled with candytuft to be ready for Decoration day, which in Boston is very generally observed, an immense business being done,

WABAN ROSE CONSERVATORIES.

The Waban Rose Conservatories at Natick, with Alex. Montgomery in charge, seem ideal for the production of cut roses. The houses are large, commodious structures; the largest now 60x 700 feet, filled with American Beauty roses, is just having a 300-foot addition put to it, making it 1,000 feet long over all and the coming summer another 60x

Bassett & Washburn,

GREENHOUSES, HINSDALE, ILL.

Store, 76 Wabash Ave., CHICAGO.

600 is to be erected. All the stock is in the pink of condition, there not being a speck of mildew to be seen anywhere. Mr. Montgomery thinks that with the modern houses and heating and ventilating appliances there should never be any mildew. The particular feature here at present is the Mavourneen or white Killarney. It is truly a beautiful flower, apparently a counterpart of its parent in everything but color, with the possible exception that it seems a trifle more double. It is pure white and has the beautiful long bud that is so attractive in the pink variety. It will certainly give Bride a great run for first place. Killarney is grown here to perfection. Bridesmaid is to be dropped and when I suggested that if all adopted Killarney it might become too plentiful Mr. Montgomery said that Killarney could not be done as easily as Bridesmaid and it would be quite some time before growers generally would be successful. Houses of Richmond, with crops ready for Easter cutting, were a great sight, looking like beds of Ulrich Brunner from the great quantity of buds carried and all on long stout stems. A feature of the watering was a hose attachment, a water spreader, in the form of a shovel made of zinc. This is about six to eight inches in diameter, with a wooden handle to which the hose is attached; the water striking the center of the spreader from one side and spreading out on three sides falls gently yet rapidly on the bed and does not displace the surface of the soil as does the stream when directed by the finger. Agreeable information was that the season had been very satisfactory from a financial standpoint, as while prices were not so high as last year, still the quantity of the output was so large that returns were more satisfactory.

RETAILERS.

Wm. E. Doyle's window was attractive with a dark blue velvet spread over the bottom, which seemed to set off the vases of flowers and plants admirably. The feature was a gilt frame, with black velvet recess, illuminated with concealed electric lights, which showed to advantage a nicely arranged vase of roses or other flowers.

The stores of the retail florists are kept in up-to-date style. Thos. F. Galvin, with his two stores, does an immense business. His Back Bay establishment is an ideal place, so light and roomy. The flower case is very large and roomy, the attendants going inside when flowers are wanted.

Julius A. Zinn's store was made attractive with large signs. Design work for funerals is a specialty here, a large business being done in the city and with surrounding towns. A number of other stores all presented a prosperous appearance, their windows being well trimmed.

S. Hoffman, of Massachusetts avenue and Commonwealth, is very well located for family trade. He has a beautiful store, well stocked. Prominent signs announce the delivery of flowers in all large cities of the country.

P. L. Carbone has a unique store, his display of statuary and imported garden vases being very complete. All sorts of flower receivers, little odd conceits that please the particular buyers, are displayed in quantities.

At Houghton & Clark's, clever conceits in made-up baskets were being offered for Easter. Pans of bulbous stock were made more inviting by the addition of small sprays of box around the edge in the soil.

E. MacMulkin, with his large store, fronting on two streets, looks to be right in it. Something very pretty in Easter baskets was to be seen here.

Penn's store is a compact, business looking shop, where flowers are no doubt handled in quantity.

ROBERT KIFT.

Southampton, N. Y.

The regular bi-monthly meeting of the Horticultural Society was held April 2, President Clark in the chair. After the election of members and other routine business was disposed of, W. L. Jagger read a very interesting paper on "Agricultural Education." After interesting discussions on various subjects, the meeting adjourned, to meet again May 7.

U. G. A.

NATICK, MASS.—Chas. Ingram was found dead in his bed April 5 at the home of Mrs. J. Macdonald, with whom he boarded. Heart failure was the cause of death.

CHARLESTON, S. C.—The Order of the Cincinnati had a pleasant excursion April 10 to Magnolia Gardens and enjoyed a picnic at Drayton Hall, an old Colonial mansion. The gardens were much admired, the azaleas being in full beauty, and a most enjoyable day was spent.

MERIDEN, CONN.—J. W. Davis, of the well-known Davis Market Garden Co., formerly of West Hartford, has purchased the McKenzie place, formerly known as the Hall farm, and will at once put it into gardens. He will make an up-to-date place of it in every respect. Three or four large greenhouses will be built during the coming summer in which vegetables will be raised. Plans have already been completed for two of them, one 90 and the other 120 feet long. The other two will probably be built later in the year. Mr. Davis already has men at work and he will be ready to supply the local market this summer. In the greenhouses he will raise cucumbers, lettuce, radishes, tomatoes and other vegetables for winter use. One of the greenhouses will also be used for growing violets and carnations.

"THE BUSIEST HOUSE IN CHICAGO."

J. B. DEAMUD CO.

If you have been disappointed on any stock it is not too late to wire Deamud. You will be supplied.

Long Distance Phone Central 3155.

51 Wabash Ave., Chicago.

Chicago.

TRADE GOOD.

The wholesale cut flower market took on decided signs of life on Friday last and the unwonted activity continued Saturday and Sunday, the last named day seeing the best Sunday trade of several months. Not only was the shipping trade good but the city buyers took hold well, the general demand resulting in an advance in the price of carnations. Early this week the features of the market were a continuation of the general activity and in particular a large shipping demand for Easter lilies, both cut and in pots. There has been a good supply of these, although perhaps an unusual proportion of short stemmed stock is seen. Roses, at present, are in very good supply, some especially good crops of American Beauty being on. Bride, Bridesmaid and Richmond are good in quality and supply. Kaiserin Augusta Victoria roses are now coming in, also a few Pres. Carnot. The carnation crop seems to have its limits this week, with signs that really good stock will be somewhat scarce. There is any quantity of medium grade and poor stock. Bulbous flowers are plentiful and prices are still low.

April 15.—The market is very active with all kinds of stock in good demand. Potted lilies are moving well and there seems not to be any too much other bulbous stock in pots on hand.

THE HORTICULTURAL SOCIETY.

The regular quarterly meeting of the Horticultural Society was held in the club rooms of the Art Institute, April 14. Vice-president Carpenter presiding in the absence of President Kelley, who was detained at home by illness in his family. The records of the previous meeting having been read and confirmed, a resolution was adopted recommending that the executive committee offer a silver medal for the best garden of the five divisions in the competition inaugurated by the Daily Tribune.

Another resolution recommending the appointment of a committee to draw up a course of lectures for the season of 1908-09 for the benefit of the members and to interest non-members in the work of the society was also adopted.

Mayor Busse, it was announced, has promised to appoint J. H. Burdett a member of the small parks commission, representing the society.

GARFIELD PARK GREENHOUSES.

The immense new greenhouses at Garfield park are now practically complete and the work of removing the plants from the old houses is being rapidly pushed. The weather is ideal for the work and even tender plants are being transferred without any covering. The show house is gay with a grand showy lot of bulbous and other timely stock making a most bright and lively display. Besides the usual class of stock, such as tulips, hyacinths, azaleas and others, we noted a collection of hippeastrums that do much to brighten the house. The pretty old mosquito plant, Asparagus plumosus and many others are shown on pillars and the house is well worth a visit. In the propagating houses Gardener Sells was busy unpacking a large shipment of various temperate plants from Florida. There is quite a display in the orchid house and the young stock of all kinds looks well. The advantage of this fine range of propagating and plant houses is very apparent now.

NOTES.

The secret has just been allowed to leak out to the trade that L. Baumann & Co., dealers in florists' supplies, at 76-78 Wabash avenue, have in course of construction a new building at 118 E. Chicago avenue, the whole of which the firm intends to occupy on completion. It will consist of three stories and basement and cover a ground area of 27x140 feet.

Frank Oechslin's flowering plants for Easter have been in big demand and he could have sold more of them. Easter lilies sold out early and the way the rose plants have gone has been a big surprise, being more in demand than usual. Hydrangeas and azaleas, too, have been good sellers.

The Geo. Wittbold Co. was early sold out of bulbous plants. Other stock also moved well. Louis Wittbold says plants have been in better shape this year than they were last, which accounts for the good demand existing.

We have just been informed of the death on March 30 of Mrs. Geo. H. Froboese, the mother of Mrs. C. Frauenfelder. She would have been just 51 years of age had she lived until Easter Sunday.

Bassett & Washburn have begun to cut from their summer flowering roses, such as Kaiserin Augusta Victoria and Pres. Carnot.

H. N. Bruns' establishment at Madison street is well figured, with accompanying notes in the West Side Review.

John Kruchten is the happy father of a 10-pound baby boy, which arrived in good order on Sunday afternoon.

E. H. Hunt is now showing a stock of new inexpensive fern dishes, in 4 to 7-inch sizes, made of white metal.

PETER REINBERG, 51 Wabash Ave., Chicago.

Chicago Notes.

Continued from page 622.

Weiland & Risch report having begun grading for their new addition of six 30x350-foot houses and one 30x250-foot house. This coming season they will plant much more largely of Killarney and add American Beauty, Mrs. Jardine and several of their own seedling roses. Their roses are at present in excellent crop, Bride, Bridesmaid, Richmond and Killarney all showing up exceptionally well.

Miss Mabel Eaton of the Eaton Flower Shop, was in New York all last week looking into eastern methods of conducting the florists' business. While there she was joined by Chas. Balluff, who has lately acquired an interest in the business. Both returned Monday morning. The feature of the store this week is a very effective window of potted hydrangeas of immense size.

John J. Davis, of the entomological department of the experiment station at Urbana, Ill., is in this city and vicinity investigating greenhouse insect pests and insects injurious to truck crops. He will be pleased to learn of any such matter that needs investigation and letters giving particulars should be addressed John J. Davis, care of State Entomologist, Urbana.

Wietor Bros. are planting their second lot of young American Beauty roses, also carnation plants will be set in the field if present fine weather conditions prevail a few days longer. Kaiserin roses are now coming into good crop.

The flower mission of the W. C. T. U. is planning to wage war on unsightly vacant lots by substituting flowers for the weeds generally found thereon. Mrs. L. A. Wyle, of Waverly, is in charge of this work.

The Daily Tribune is offering three prizes, $75, $50 and $25, respectively, for the best small garden in the city this season, and three prizes, $25, $15 and $10, respectively, for the best window box or porch display.

Friday, usually thought an unlucky day, was last week one of the best days the market has seen in some time. The J. B. Deamud Co. reports having shipped over 25,000 carnations on that day alone.

Wm. Winkleman, father of Louis Winkleman who has long been an employe of Bassett & Washburn, died at his home in Hinsdale, last Saturday, aged 75.

Frank Farney, of the A. L. Randall Co., returned to the city Saturday and reports trade in Easter supplies better than ever this year.

H. P. Crane, St. Charles, has offered prizes amounting to $100 to be competed for by school children August and September next.

The trustees of the Florists' Club held a meeting at the Union restaurant April 14 regarding the disposition of the Hartshorne fund.

O. P. Bassett, of Bassett & Washburn, and wife returned Sunday from their winter's sojourn at Pasadena, Calif.

Jensen & Dekema report that this season they have had the best sale for carnation cuttings in their experience.

Bassett & Washburn cut as many as 1,000 long stemmed American Beauty roses on a single day recently.

H. N. Bruns has just issued a very attractive Easter booklet.

Visitors: H. L. Ide and A. B. MacPherson of the Springfield park board, and A. T. Hey, president State Florists' Association; Camiel Sierens, Everghem, Belgium; R. W. Peterson, Cincinnati, O.; Wm. Feniger, of Feniger & Spanner, Toledo, O.

FREEPORT, ME.—The greenhouse at Casco Castle park is in fine condition, J. J. Turner having a splendid lot of flowering plants to show visitors.

Toledo.

TRADE FAIR.

Business was fair last week with considerable funeral work. There has been big lots of carnations in the local market, but florists have managed to take care of them. Local retailers report prospects good for Easter.

NOTES.

The Krueger Bros. Co. has done well this season with Easter plants, lilies and azaleas moving especially well.

Wm. Fenniger, of Fenniger & Spanner, is in Chicago this week buying Easter stock.

San Francisco.

A floral contest will take place in the near future, probably at the spring flower show, May 15-16, between Prof. E. Matraia, with Matraia & Dovincenzi; and S. Lundy with Pelicano, Rossi & Co., for a cash prize of $1,000. Pelicano, Rossi & Co. backing Mr. Lundy and V. Matraia of the Art Floral Co., backing his cousin E. Matraia. A forfeit of $100 has been put up by each side. Each of the contestants will be furnished with an equal amount of flowers, green, etc., all of like quality, out of which they will have to design each one mantel decoration, three to four funeral designs and three to four baskets or other receptacles to hold flowers. The prize will be awarded on points, the one scoring the most will receive the $1,000. The judges will be elected one from each side, the two then choosing a third. This contest will be especially interesting as one of the contestants represents eastern ideas, having spent most of his time in eastern establishments, the other one representing the west, being a resident of this city.

Chas. Fick, of San Mateo, has had a very prosperous season. With the profits he is building himself a new dwelling house.

All other stock at lowest market rates. No charge for packing. Prices subject to change without notice.

New York.

CONDITIONS FAVORABLE.

Conditions thus far with regard to Easter have been favorable. As previously noted, the weather has continued cool and present indications are promising for the plant trade. While it is hoped that the cut flower situation will greatly improve, top-notch prices seem out of the question. A good cleanup at reasonable figures is the best that can be hoped for, and "picklers" may as well note that their wares will not be in demand. There is an abundance of good stock now in sight and the best policy for all concerned is to try and keep trade in its natural channels. Cut flower men are between the devil, of a great supply of good stock in a dull season, and the deep sea, of a great stock of good flowering plants that must be sold or lost.

April 13.—There was a slight advance in prices of American Beauty roses and carnations, also a slight decrease in the quantity of stock arriving. The wholesale stores are filling up with plants, lilies, daisies, hyacinths in pans and pot roses being prominent.

FLORISTS' CLUB MEETING.

The regular monthly meeting of the club was held in the Grand Opera house, its old home, on the night of April 13, President Weathered in the chair. The attendance was good and there seemed to be general appreciation of the return to old quarters. President Traendly of the S. A. F. and President Simpson of the American Rose Society were present and made interesting addresses on recent and future events connected with their respective societies. Secretary Young and W. A. Manda also spoke entertainingly. Alex. Wallace brought up the question of misleading statements that are constantly appearing in the daily papers with reference to the flower trade, and several other members took part in the discussion. A committee was appointed by the chair to draft resolutions that will be submitted to the managers of the associated and city press, the object being to pave the way to remedial action. The following names were proposed for membership in the club: W. G. Badgley, Murray Hill, N. J.; Chas. M. Lind, Stamford, Conn.; Fred W. Lentz, Anton Schultheis, Jr., and E. Howard Smith, New York.

The exhibits were fully up to the forecast of Secretary Young in his announcement for the meeting. The Julius Roehrs Co. exhibited its everblooming rambler, Newport Fairy, which was awarded a first-class certificate. Anton Schultheis exhibited his sport of Crimson Rambler, which made an excellent impression. Robert Scott & Son's rose Mrs. Jardine was again exhibited. John Cook, of Baltimore, Md., exhibited My Maryland and seedling No. 267; the latter is a very promising production. W. A. Manda exhibited Rosa Sinica or Cherokee rose, and a new hardy pink. Robert M. Schultz exhibited fine blooms of Richmond roses. H. A. Jahn, New Bedford, Mass., exhibited white carnation, Lloyd, and Jahn's Crimson.

Much credit is due Chairman Rickards of the house committee for his clever and able management of the social features of the meeting. Vice-president Marshall spoke for the bowlers and it was announced that practice will be discontinued at the Albion alleys on Twenty-third street, the next meet being at the alleys located at Thirty-first street and Broadway. It was regretted that Secretary Hammond of the American Rose Society, who was present at the opening of the meeting, was compelled to leave early in order to catch a train.

NOTES.

In society circles there is much comment on the large number of weddings scheduled for the period intervening between Easter and the departure of the society folk for the summer resorts, usually late in June. It seems that the June monopoly on weddings has been broken, May being just as fashionable, and there will be so many this year that they could not all be crowded into one month. Such a prospect should be encouraging to the decorators and shatter that hoary yarn of nothing doing after Easter.

Considerable window-box and outdoor vase work is already being done. Recently at Myer's, Fifty-eighth street and Madison avenue, we noticed a number of very handsome boxes made up with pansies and English ivy. This recalls the fact that the ivy is now the most popular vine for this purpose. The vincas, under favorable conditions, are very suitable for window boxes, but there does not seem to be a disposition to push them here. This is probably because the ivy stands the heat and dust of summer much better.

Traendly & Schenck's Easter specialties will consist of 3,000 cattleyas; a big stock of roses from the range of Robt. Simpson, Clifton, N. J.; the product in Bride and Bridesmaid of Dean & Co.'s 100,000 square feet of glass at Little Silver, N. J., and a great crop of sweet peas from Komitsch & Junge, Secaucaus, N. J. Several of the leading carnation growers of Long Island will add to the supply, so all in all, they will be well prepared to care for the trade that comes their way.

The dock reporters for the daily papers are always seeing things in the horticultural line. So few of these screaming novelties ever get into actual commerce that suspicious people intimate that Ninth avenue third-rail moisture has something to do with it. Last week they saw a steamer coming through the narrows carrying so many tall palms that it looked like a "tropical island."

Chas. Thorley's fine stores are all dressed in Easter garb and the big automobile is kept busy taking the boss around from one to the other, and with additional side trips among the growers. Since the opening of the New Plaza hotel a prominent feature of Mr. Thorley's large business has been the many fine decorations for social events held there.

H. E. Froment is well prepared to handle a big Easter trade. The great rose cut from L. B. Coddington's range at Murray Hill, N. J., comes to him and he has numbers of other good growers. He will have American Beauty roses by the thousand, lilies, both potted and cut, and all other flowers, and plenty of them, that the trade demands.

M. A. Bowe, whose store is in that part of the city where there is something doing every minute, has the happy faculty of keeping a handsome show window every day in the year. Last week he had purple wistarias as a centerpiece, with hanging baskets of lily of the valley and pansies, the trimmings being cattleyas and strings of smilax.

Fleischman's Fifth avenue store has fine show windows and last week was showing very handsome decorations of Dorothy Perkins roses, grown to standards. Around the tubs, as a base, pots of Easter lilies were grouped, with a border of Adiantum Farleyense. The decoration was very striking and beautiful.

Siebrecht & Son are now unusually busy with their nursery and greenhouses at New Rochelle and the large amount of planting and landscape work which they are doing. At their main store, Fifth avenue and Thirty-eighth street, there is a very striking exhibit of well flowered Lilium rubrum.

Alfred Van Praag is now settled in his new store, 4 West Fortieth street, just around the corner from Fifth avenue and directly opposite the new public library, now nearing completion. The location and surroundings are excellent.

Greenhouses owned by James Weir & Son, at Sixty-eighth street and Fifth avenue, were set on fire April 13 by some person unknown to the proprietors or the police. Damage amounting to $50 resulted from the flames.

Branch Easter stores are blossoming out all over the city. One of the first to open a branch was Chas. Austin, who secured a very fine store at 259 Sixth avenue as a branch of his Seventeenth street store.

Joe Levy of John Seligman & Co. is delving into the Easter trade with great energy and vim. He always does this, but this year he has one more reason—and it's a boy.

The death is announced of Miss Dean, daughter of James Dean, Freeport.

NEWARK, N. J.—E. C. Ryman's greenhouses were destroyed by fire March 29. The loss was $2,500 and the insurance carried was $1,500 only.

QUEENS, N. Y.—Attacked and robbed of his week's salary by two highwaymen while on his way home late March 28, Gustav Blier, a working florist, of 64 Weston avenue, was found unconscious on the Long Island Railroad at Metropolitan avenue, the next morning. The police believe his assailants placed him on the tracks hoping he would be killed by a train and thus hide their crime.

PROVIDENCE, R. I.—A fire was discovered in the Park greenhouse April 5 by a policeman. The blaze spread rapidly through the building occupied as an office and the firemen had hard work in gaining control over the blaze because of the high wind which blew over the river. E. D. Clark, the owner of the place, stated that he had no idea as to the origin of the blaze. All of the greenhouses were damaged badly and his stock of plants and flowers was ruined. He could not estimate the damage, but said that it is only partially covered by insurance.

THE LEO NIESSEN CO., Wholesale Florists, **1209 Arch St., Philadelphia, Pa.**

Philadelphia.

LIVELY TIMES FOR TRADERS.

At this writing all is bustle and confusion, the growers working to the limit, getting their last out-of-town orders off by freight and express and the first lots into the stores. From the advance orders it looks as if all would be sold, in fact, several growers are all ordered up. Carnations are easing up a bit, probably due to the near approach of the holiday. Very choice stock sold last week for $2. Prices for Easter delivery are not sure at this time. Local violets are about done and it is hardly likely that there will be any for Saturday. Up-the-Hudson doubles are said, however, to be depended on with $10 per 1,000 as the price. Southern daffodils are done and this will give the locals a chance at something like paying figures. Quantities of flowers are coming in to the wholesalers, who say that out-of-town customers are ordering as usual and some increasing over last season. It is said by some that there will still be a few local violets but that this demand will surely clean them out.

NOTES.

Harry Faust, who had 10,000 pots of lilies, is sold out. In other seasons he has had a variety of stock, but this year made a specialty of lilies alone, and says he finds it much easier, as having only the one thing to care for, he has had but little trouble, having almost the entire crop in fine shape for delivery. It is the same with the large stocks of the Craig Co. and W. K. Harris, many lines being sold out by Monday of this week. The general price of lilies has been 10 cents per flower and bud; this is for the local market, out-of-town shipments being made generally at 12 cents.

Pennock Bros. made an early display of very pretty compact plants of Dorothy Perkins and Hiawatha roses, full of flowers. Nothing just like them has been seen in this market before. The pots were placed in square terra-cotta jardinieres and a blue ribbon bow adds a touch to the pink ones.

The Leo Niessen Co. say, "We are much pleased with the outlook. We will have lots of all the popular flowers and orders are coming in that will use them all up."

The Joseph Heacock Co. finds palms moving lively just at this time, the store men saying they find a few choice palms in good demand along with the flowering plants.

Wm. McKissick will have a large quantity of bulbous stock, which, with the southern stock out of the market, should sell well. He expects a very busy time.

Geo. Anderson's hydrangeas developed into great plants, bearing immense heads of well colored flowers, and sold out clean.

John McIntyre says he expects large quantities of single violets and sweet peas, which are staples with him. K.

Pittsburg.

EASTER LILES POOR.

The week preceding Easter, is as usual, short of stock, and good prices, very noticeable in carnations. Up to Wednesday the roses did not diminish in quantity, but tightened up considerably thereafter. The lily situation is worse than ever, so many flowering prematurely. The plant market is quite active, although not just what is desired.

NOTES.

The Florists' Club met April 7 to discuss Easter plants and flowers.

H. L. Blind & Bros. had an exhibition of azaleas and other plants which brought a great amount of praise for their growers. N. C. Madson, gardener to R. H. Boggs, Sewickley, had the finest specimen of salpiglossis ever shown here. The Pittsburg Cut Flower Co. had a nice assortment of different plants from their growers. J. W. Jones, Schenley park, had some fine specimens of calceolarias, box elder, Calla Elliottiana and hybrid roses.

A visit to the Phipps conservatories in Schenley park shows that Superintendent Jones has everything that could be desired for his big Easter show. Every visitor's attention is immediately taken by a house of azaleas and genistas, which are exceptionally well done. Another house of hybrid roses in pots also shows to a great advantage. There are also good displays of calceolarias and gloxinias. The Dutch bulbs are noteworthy, although Mr. Jones complains of the bulbs. Tulips include Proserpine, Coleur Cardinal, Vermillion Brilliant, Kaiserkron, Cottage Maid, Prince of Austria, Goldfinch, Mon Tresor, Rose Louisante, Albian, Joost von Vondell, Murillo, Imperator Rubrorum and Couronne d'Or. Narcissus Von Sion, Sir Watkin, Trumpet Major, Ajax Princeps, Victoria, Emperor, Empress, Henry Irving Jonquils and Poeticus Ornatus are also shown. The collections of crown imperials, Fritillaria Meleagris, Grape hyacinths, Scilla Siberica, hydrangeas, Cineraria stellata, lilacs, wisterias, Lilium longiflorum, L. candidum and L. tenuifolium, amaryllis, rhododendrons, spireas and bleeding hearts are also worthy of notice.

The Botanical Society of Western Pennsylvania held its monthly meeting April 9, the meeting being devoted largely to an informal series of talks on local botany. Speaking of Trilliums, it was noted that T. nivale was found in flower at Wildwood March 29, 1908. H. H. Negley showed several hybrid orchids and remarked upon the influence of their parents in the plants shown. The herbarium room was prettily decorated for the occasion. The next meeting will be held May 14. J.

FALL RIVER, MASS.—Business is very quiet here owing to dullness in the cotton trade.

WALTHAM, MASS.—This city is in the lead as regards the interest which the pupils of the public schools take in the preliminary work of the year outlined by the Home Garden Association. Already 14,700 packages of seed have been applied for. The treasurer has just sent a check for $147, covering the amount of the order, to the Cleveland Home Garden Association of Cleveland, O. Fifteen prizes will be offered for the best gardens. Cameras will be given for the three best pictures of gardens before planting and at the close of the season. The first general prize will be valued at $2, while the next three will amount to $1. In addition to the prizes, all winners will be given a trip to the Arnold Arboretum at Jamaica Plain at the close of the season.

ROSES THE BEST STOCK.

Retailers are anxiously awaiting the results of Easter, the second greatest period of importance to the trade. While hoping that the holiday will be a general revival of business, existing circumstances in all industries point to only a mild celebration of the day. The past week was the dullest of the same period in the year ever remembered by the present generation, so we are entering this week a very much discouraged and alarmed class of tradesmen. The market is in an heretofore unequaled position to transact the greatest business of the past decade; cut flowers and flowering plants were never displayed in such quantities and of such rare quality as the present stock. With the exception of violets, the collection of flowers is complete and should inspire eager purchasing. A more complete line of flowering plants is seldom shown. For the past few years a remarkable interest has gradually grown in these specialties and this year the results are most gratifying. A full line of roses is available at prices a trifle below the average Easter list, and no doubt will remain so throughout the week. American Beauty is excellent and for the best grade $4 is asked. Killarney is by far the most popular rose on the market and sells in all grades from $1 to $4 per dozen. At the latter figure selected stock well worth the price is meeting with great approval. Richmond is not up to the mark, but a high scale of prices is maintained which will be likely to lessen the desire for this favorite. Bridesmaid is in first class shape. Mme. Chatenay is not so plentiful as usual. Bride, the only white, has improved considerably during the last few weeks and is now in superb form. Carnations still display the weakness which has characterized them all through the year, and no surprise will be felt if they are lacking in their usual favor. English violets have now an opportunity to re-establish themselves with their former admirers who have turned to the single varieties. Cutting has been very light, due to the efforts to place a sufficient supply on the holiday market. One or two of the largest growers are carefully guarding their Princess, which seems to be the only apparent scarcity of the whole list. An abundance of good lily of the valley is at hand and the same may be said of gardenias. Orchids, however, are scarce in the local market. The worst feature of the Easter lily plants so far seen is their dwarfness. The blooms are excellent, but the great bulk of the stock seems to be not more than two feet high. It has been a disastrous season for the growers of this line of stock.

F. E. Hanna of Holbrook is cutting the first of the season's gladioli and is distributing a crop of excellent specimens of this desirable flower. B.

W. E. McKissick

WHOLESALE FLORIST,

Business Hours 7 a.m. to 8 p.m. 1619-1621 Ranstead St., PHILADELPHIA, PA.

Massachusetts Agricultural College.

The department of floriculture is arranging for a carnation and rose exhibition to be held in Wilder hall in the evenings of April 24-25. It is felt that the students at the college should receive a better training in varieties of commercial crops than they can get from materials now grown in the vicinity. The students feel that they cannot afford to travel for this study, therefore this exhibition has been arranged. Professor E. A. White has written many of the most prominent rose and carnation growers asking if they would send one or two dozen blooms of their standard varieties for exhibition at this time, and has received many cordial replies. The New Hampshire Agricultural College will show six or eight of their best seedlings; Peter Fisher, Ellis, Mass., will send several of his unnamed seedlings and some of his standard varieties; C. W. Ward, The Cottage Gardens, Queens, N. Y., will show the following varieties: Creole Beauty, Alma Ward, Mrs. Harvey, Beacon and Mrs. C. W. Ward. Among others who have signified their intention to send material for exhibition are Alexander Montgomery, Waban Rose Conservatories, Natick; J. W. Adams & Co., Springfield; H. W. Field, Northampton; Peirce Bros., Waltham; William Sim, Cliftondale; F. R. Pierson Co.; S. J. Goddard and H. H. Rogers. This exhibit will be open to students and townspeople and should have considerable educational value. It has not been possible to write each individual grower asking for contributions and if there are others who care to contribute to this show their material will be heartily appreciated. The college will pay all express charges.

The trustees of the college are asking for a legislative appropriation of $34,000 for a new range of greenhouses of modern commercial type, with an attached teaching building for use of the floricultural department. It is not the intention of the college to engage in commercial floriculture, but a new range adapted to giving the students up-to-date instruction in methods of growing cut flowers for the trade, is badly needed. It is expected to build an instruction building costing about $15,000. This will contain a large laboratory and work room to accommodate at least 50 men at one time, a class room for 100 men, smaller class rooms, office, and a room for the exhibition of material used in greenhouse construction. The basement will contain a soil and fertilizer room, a cool room for bulbs and rooms for storage of pots and implements.

The greenhouse range as now planned will consist of a palm house 30x40 feet on the east end of the general work room. From the south side of this work room a house 12 feet wide and about 180 feet long will run directly south. This will be used for propagating and for general plants. On the east and west sides of this the special houses of the range will be built. This will provide for a full southern exposure for each house. The range as planned includes a students' house for special student work, 30x50 feet; violet house, 24x50 feet; chrysanthemum and bedding plant house, 24x50 feet; lettuce house, 24x50 feet. These will be even span houses. The range will also include a rose house 24x50 feet, a carnation house, cucumber house and tomato house each of the same dimensions. These will be three-quarter span houses. This range will be built as durable as possible with iron frame and cement foundation and benches.

JOHN W. McINTYRE,

1601 Ranstead St., PHILADELPHIA.

LOUISVILLE, KY.—After an arrest on the charge of drunkenness, Henry Dietrich, a florist in the employ of Walker & Co., died at the City hospital April 3. A wife and two children survive Dietrich. He quit work and informed his family that he was going to Eighteenth and Southgate to visit a friend.

NORTHAMPTON, MASS. — Thomas Foulds, who for the last two years has been gardener for the Home Culture clubs has resigned his position and will soon move to Amherst where he will have charge of the extensive estate of E. F. Leonard. Since coming to this city Mr. Foulds has been very successful and has brought the flower growing operations of the Home Culture clubs to a high condition of efficiency. In the past he has filled very responsible positions. He was for a number of years head gardener on the estate of Wm. M. Singerly of the Philadelphia Record and also of the Mount Airy Nurseries of Germantown. Later he started in business on his own account and was successful in growing roses for the Philadelphia market. For years his 18 acres of gardens and his houses under 22,000 square feet of glass were show places along the line of the Philadelphia & Reading railroad. Mr. Foulds leased his property in order that he might retire from mercantile life. He now returns to his old position of private gardener.

1725 Chestnut Street.

Prompt and Careful Attention given to all Mail and Telegraph orders.

St. Louis.

WHITE ROSES SCARCE.

The inclement weather experienced during the past week helped materially to increase the supply and the continuous rainy spell cut off what little transient trade was doing. This was noticeable in the downtown retail district especially, and caused the wholesale houses to be badly stocked up with everything with the exception perhaps of white roses, which became, and are at the time of writing, very scarce and bringing stiff prices. White carnations have been very plentiful, especially of the poorer grades. Roses in colored stock were in big supply, but Saturday and Sunday prices stiffened all around. From the present outlook it seems, with favorable weather, that the supply at Easter will be enough to go around. Sweet peas are coming on fine, long stems and are now selling better, as violets are about over, although some growers will furnish a few for Easter. Some fine Asparagus Sprengeri and A. plumosus in bunches are coming in and find good sales.

NOTES.

There are to be erected at the cost of $500,000 seven buildings on the Missouri Botanical Garden property and the establishment of the finest herbarium in the world has been announced by the trustees of the Shaw estate. The idea of establishing the largest herbarium in the world originated with Dr. Trelease, director of the botanical garden. There will be a spring flower show at the garden this week. It is hoped that the late freeze did not hurt sufficiently to mar the beauty of the show.

The Florists' Club met at its new hall on Locust street, a few members being present, with Will Young in the chair. The trustees are considering the arrangements for the annual picnic. The nines of both sides, wholesale and retail, have gone into training. The retailers are still sore over the drubbing given them last year by the wholesalers, and intend to turn the tables this year if possible.

At the parks preparations for spring are being daily carried on and Geo. Ostertag, park superintendent, has his hands full. Last year his work gave general satisfaction.

Mrs. Theodore Richter of Kirkwood is cutting some really good violets for this time of year. She has them well taken care of and expects to bring them in up to Easter.

A department store advertised Dutch hyacinths in pots at five cents. This is very embarrassing to those who are trying to wholesale them at six to eight cents.

J. W. Dunford is doing a first class trade at his west end shop. He has a fine crop of lilies for Easter. He is cutting from 2,000-3,000 carnations daily.

The Ellison Floral Co. was very busy last week with the funeral of Byron Nugent and furnished some most elaborate designs.

There will be a beautiful floral booth erected at the charity carnival to take place May 16 at Forest Park Highlands.

August Hartman and his brother are cutting some fine long-stemmed sweet peas.

GOOD EASTER PROSPECTS.

Since last report business, as a rule, has been very quiet; here and there we have a day when stock cleaned up pretty well, but the majority of days the wholesaler has to sacrifice stock to move it. The market continues to be glutted with bulbous stock and the barrel seems to be the only outlet for this line of goods. At no time in the last 20 years, to the writer's recollection, have the prices of daffodils, tulips and hyacinths been slaughtered as this year. There does not seem to be any values, the question being—"How much will you give?" Good carnations are a little less plentiful, but this no doubt can be attributed to the grower not cutting as closely as formerly, holding the houses as cool as possible and hoping for a better market at Easter. Roses are certainly fine and clean, and it is a pleasure to handle them. Lilies, both callas and Harrisii, are plentiful and the outlook for Easter is very encouraging. We have any number of inquiries from out-of-town buyers for pot plants, but the growers hesitate before filling these orders. As a rule, they are too busy with other work to bother with packing plants for shipping Easter week. The market is well supplied with green goods of all kinds, especially asparagus, both plumosus and Sprengeri.

NOTES.

Julius Baer had a window decorated with Merry Widow hats trimmed with natural flowers last Saturday which created quite a lot of favorable comment from the passersby and secured him a notice from the press. His decorator is certainly an artist.

Geo. Huntsman's manager uses a great deal of taste and is original in his ideas. He decorated a window with callas and white gauze ribbon the past week which was a dream and gave the public an idea of what could be done with these flowers if properly used.

J. A. Petersen has the finest lot of hydrangeas in bloom and one would have to go a good distance to beat them. His Nephrolepis Piersoni are a grand lot; in fact, his entire stock was never in better condition.

On upper Vine street there is a quiet, unassuming lady, Mrs. Mary Thomas, who has a neat little store and does a nice business. She always buys the best of stock and turns out some very nice work.

Frank Benson of Newport returned from Oklahoma last Wednesday. He says that is the country to go to if you want to make money, as there are all kinds of chances for a young man.

Tom Windram's grower, from his farm in Florida, writes that his plants are growing fine and he can take care of any order, the larger the better.

Along Vine street we notice Tromey's new electric sign which is kept decorated with fresh wild smilax, and at night attracts attention a square distant.

Geo. Corbett of College Hill will have a fine lot of Crimson Rambler roses, Lilium Harrisii and callas in pots for Easter, besides his regular cut. S.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

AND the free seed competition is slated for continuation. Shall the congressman be equally amenable to the law when he distributes adulterated seed? Why not?

FRENCH BULB prices are quoted at first hand by French exporters about as follows April 1: White Roman hyacinths, 12 to 15 ctm., 70 francs; Paper White Narcissus grandiflora, 20 to 25 francs, according to size.

SINCE the germinating power of seeds depends greatly on the prevailing weather and climatic conditions from the blooming period to the time the seed ripens, no general germinating percentage is practicable. In dull and wet seasons the seeds mature imperfectly. This is particularly the case in composites.

IT is understood that the so-called pure food law, for which the law makers have taken considerable credit, was practically inoperative in some respects and would have put a lot of the canners out of business had not President Roosevelt stepped in and stopped operations completely pending the report of the commission regarding sodium benzoate.

FRESH LETTUCE SEED frequently will not germinate well under ordinary conditions until three months old. Who shall prove in January whether certain lettuce seeds are dead or alive when they will not sprout, and if the seedsman be imprisoned in that month because the lettuce seed fails to sprout will they let him out in April when the same seed does grow?

GROWERS of onions for pickles, of whom there are many in the suburbs of Chicago, have figured it out that they could not buy from a seed importer or dealer (who was not criminally liable under the proposed act), the variety of Italian grown onion seed known as New Queen, for it is well known among both dealers in and users of this variety of onion seed that its normal average germination is 65 to 75 per cent, and this seed will seldom if ever germinate over 80 per cent.

REPRESENTATIVES MANN of Illinois and Hepburn of Iowa are both reported to have bought seeds which not only failed to grow, but were not true to name, hence the framing of this law which they found the need of. Question—Did they both know how to plant and care for the seeds in question and were the soil and weather conditions suitable? Was the seed smilax which will germinate only in the dark or was it seed of chervil which will lie in the ground a year before sprouting? Let us have the facts.

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

CHICAGO.—A number of seedsmen were in the city during the past week and there has been considerable discussion of the proposed seed bill. Opinion seems divided between those who believe in ignoring the bill, thinking it entirely too impractical to be operative, and others who deplore the difficulties that such law may create, legal entanglements which might be avoided were a reasonable law enacted.—Prices of onion sets rule a little stronger, being quoted April 14 at $2.25 for yellow; $3 for white and $2.50 for red.—Grass seed contract prices on the board of trade April 14 were noted as follows: Prime Timothy, $4.25 (fillers); choice white clover, $15.

Part of the Trade Out of Business.

Under the proposed seed bill H. R. 13835 if any of the following imported seeds contain dead seeds materially reducing their value, the dealer in same would be criminally liable. Since it would require with some varieties below named too much time to make practical tests and since, with many, the seedsman could not possibly know nor any individual or official inform him, it may be promptly conceded that, should the law pass, only seed dealers willing to assume great risk of prosecution will deal in the following:

Seeds requiring a long time to germinate:

Angelica	Chervil, Spanish
Anise	Chervil, tuberous
Hop	Rosemary
Capers	Asparagus
Woodruff	Rose seed

Seeds which cannot well be tested:

Phlox decussata	Palm seeds
Edelweiss	Funkia
Aconitum	Primula Auricula
Clematis	Lathyrus latifolius
Convallaria	Pæonia
Dielytra	Viola odorata

Seeds which must be cut and soaked before vitality can be ascertained:

Moonflower	Canna seed
Acacia	

Was Good Faith Shown?

If the proposed seed bill was conceived and carried through the committee on interstate and foreign commerce in good faith toward the seedsmen why were not the officials of the national seed trade organizations given a hearing before the bill was passed on by the committee? The only inference is a reflection on the seedsmen. The result of reporting this bill to the house without consultation has caused the publication in leading newspapers of large circulation of statements attacking the seedsmen as a class, assuming that they were so habitually adulterating and misbranding their seeds that there was crying necessity for restraining laws against all of them. Such unfortunate, uncalled-for and untrue accusations would never have been given circulation had the seedsmen been given a hearing with government employes who were heard February 8 last.

Here is one sample, from scores, of this unrighteous work:

FOR PURE SEEDS.

Having legislated for pure food, pure drink and pure drugs, congress is now asked to pass an act prescribing penalties for the misbranding or misnaming of seeds sold to farmers and gardeners. The purpose of the law is to compel dealers to sell seed that is true to name, and that is fertile as well.—Seattle, Wash., Post-Intel., April 4, 1908.

F. W. Bruggerhof in New York Tribune.

That the adulteration of seeds has attracted attention, though chiefly concerning the lower grades of grass seeds for farmers, is suggested by the proposed pure seed bill introduced by Representative Mann "to regulate commerce in adulterated and misbranded seed and to prevent the sale or transportation thereof, and for other purposes." His bill proposes to make the adulteration or misbranding of seeds a misdemeanor, punishable by fine and imprisonment.

In order to secure the views of some authoritative dealer in seeds concerning the charges above mentioned the writer called on F. W. Bruggerhof, president of J. M. Thorburn & Co., an historic seed house in Barclay street. Mr. Bruggerhof, who is also president of the Wholesale Seedsmen's League, said: "I raise no question as to sincerity and the good intention of Representative Mann concerning the proposed pure seed bill, but there are special and unique conditions which govern the seed business. The practicability of regulating sporadic cases of fraud, or fraud in some branch of the trade, without seriously injuring those who have built up a reputable business, is a mooted question. To attempt to determine the degree of purity and germination legally necessary of the odd four or five thousand varieties which J. M. Thorburn & Co. handle every year, for instance, is an impossible task. It would require months before the results of tests could be obtained, and would involve endless disputes over questions of more or less personal opinion and practice. The chief complaint comes from the poor quality of grasses used by farmers and sold at every crossroads store. It may be possible to regulate the sale of these seeds because there is a relatively smaller number of varieties. Furthermore, in vegetable seeds it is not always the highest percentage of vitality which gives the best results as to the quality of the vegetable resulting therefrom. There are instances of some strains of cabbage, lettuce, beets and others which, notwithstanding their lower degree of vitality, frequently result in a much superior type, and there can be no fixed rule to govern the products of the earth, which are determined by soil and weather conditions. No sane man can believe that a concern with capital invested in a legitimate enterprise could be so short-sighted as to believe that it could deceive the public all the time. A great man said something on that score.

"I wish, however, emphatically to note that the unfairness of the Mann bill lies in the desire to avoid the question of intent and the seeming determination, even in face of the peculiar difficulties of the situation, to place the burden of proof on the seedsmen and make them criminals through the carelessness or error of some of the many persons through whose hands the seeds pass. Personally, and I think I voice the sentiments of the trade, there is need of some regulation, particularly concerning cheap seeds for the farmer, but the matter should be carefully gone into, not only from the scientific but also from the practical and feasible aspect."

J. E. Northrup in Northwest Agriculturist.

"The great difficulty with this bill as it now stands is that in some of its provisions it exacts what apparently are impossibilities. Seed is not made, it is grown, and there are many imperfections in seeds which cannot be remedied by the hand of man. The bill overlooks that fact, but doubtless in the course of time this will be recognized and remedied."

Seedsmen Meet at Chicago.

In response to the call of President Geo. S. Green of the American Seed Trade Association, a meeting of seedsmen was held at the Auditorium Annex, Chicago, April 10. The Mann Pure Seed Bill was the subject under discussion.

It was the sense of the meeting that important changes in the bill were needed to avoid great injustice to seedsmen and serious damage to important agricultural interests. A committee representing this meeting and the American Seed Trade Association will be sent to Washington to attend the hearing before the committee on interstate and foreign commerce, April 21. It is hoped that amendments in the bill may be secured which will avoid injury to legitimate seed business.

The members of the committee, headed by Geo. S. Green, Pres., thus far appointed are:

Chas. Dickinson, Chicago.
Chas. N. Page, Des Moines, Ia.
J. C. Vaughan, Chicago.

Among those in attendance at the meeting were:

E. M. Parmalee. J. H. Allan Seed Co.
W. W. Barnard, W. W. Barnard Co.
A. J. Brown, A. J. Brown Seed Co.
N. J. Burt, N. J. Burt & Co., Burlington, Ia.

Wm. F. Nichol, St. Louis Seed Co., St. Louis.

Experts' Hearing on Seed Bill.

SOME QUESTIONS AND ANSWERS.

Mr. Mann. Do you find that there is any variation in the variety of seeds as to names. Are they true to name?

Mr. Tracy. They are not always true to name. Often there is a wide difference in the cost of growing seed of different varieties, and a more easily grown seed is supposed to be harder to produce.

Mr. Bartlett. Speaking of the adulteration of seed, is it not a fact that the very best seed obtainable will not result as to the character of production, but will depend a good deal upon the soil, the manner of cultivating the seed, and things of that sort? One man on one side of the road will have the same seed as another man on the other side, but one man will have a different method of cultivation from the other and will get a better result. You cannot always expect the result from the seeds?

Mr. Tracy. Cultivation is quite as important as the seed. Some seed growers arrange with farmers to plant a certain area with a certain kind of seed, and they pay the farmer a prescribed price per pound or per bushel for all the seed raised. The reason for that is that, in certain varieties of peas and beans and in cases of other seed, the seed constitutes an important part of the cost of producing the crop, and many of the poorer farmers do not have the seed on hand, and so they are compelled to deal with the grower. Again, many farmers till farms on share leases and the owner of the farm insists upon a seed crop, because a seed crop is not sold in the market promiscuously, but is delivered to the seedsman, and consequently the owner of the farm can be sure of getting his full share of the product. The farmer grower does not as a rule receive for the growing of these seeds quite as much as he would receive for the ordinary crop, and the seedsman controls, or tries to control, the entire crop.

[Seedsmen will be much interested in the pertinent and definite information supplied to the makers of the new law as shown in the extracts given above from records of this hearing which was held February 4. No commercial seedsmen were present.—ED.]

Comments on Seed Bill H. R. 13835.

First.—This bill is impractical and should be remodeled from the ground up.

Second.—The trade is prepared to accept a grass and clover seed bill covering imported adulterants such as have been admittedly dumped into this country by certain unscrupulous foreign dealers.

Third.—If legislation is needed in garden and flower seeds as sold in commission boxes, let it be done by a practical commission of seedsmen and experts who know what is required; but we do not admit that the garden and flower seed trade as carried on aside from the commission box trade needs legislative action.

Fourth.—Bulbs are not adulterated to any extent nor are dead bulbs sold, because, if so, the fact may readily be seen and no one can be deceived, hence bulbs can be omitted from the bill.

TO THE TRADE
HENRY METTE QUEDLINBURG, GERMANY.

WHITE MARSH, MD.

FLORISTS have a splendid opportunity of raising Musnrooms by utilizing the waste space under the benches, and then utilizing the waste material of expended mushroom beds in growing flowers. Lambert's Pure Culture MUSHROOM SPAWN, the best spawn in the market, is sold by all leading seedsmen. A fresh sample brick, enough for a trial bed, together with illustrated book on "Mushroom Culture" will be mailed postpaid upon receipt of 40c in postage stamps. Address American Spawn Company, St. Paul, Minn.

AT a recent meeting of the Dutch Bulb Growers' Society (Holland) single early tulip Brilliant Star, orange scarlet with black base; Tulipa Fosteriana, a species with enormous scarlet flowers with yellow or black base, and Hippeastrum procenum, a rare mauve colored species, received first class certificates. Awards of merit were given Tulip La Reine des Reines and T. Primrose Queen, early singles. Some new seedlings of Freesia Tubergeni were awarded a gold medal.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points April 11 were as follows: New York, cucumbers, No. 1, 50 cents to 75 cents per dozen; No. 2, $2 to $2.50 per box; cauliflowers, $8 to $10 per barrel; lettuce, 25 cents to $1 per dozen; mushrooms, 25 cents to 60 cents per pound; mint, 40 cents to 50 cents per dozen bunches; radishes, $1.50 to $2.50 per 100 bunches; rhubarb, 40 cents to 60 cents per 100 bunches; tomatoes, 15

Pittsburg, cucumbers, $8 to $8.50 per box.

NEW CANNAS 1908

Rosea Gigantea. This beautiful variety has extra large flowers which are borne in such abundance that the mass of color on each plant is amazing. Single petals are 2½ inches across; color, a deep rich rose, almost a coral carmine. Plants make a vigorous growth, producing unusually fine clumps of green foliage. Height, 4 feet. (A great favorite with visitors to our trial grounds.) Strong plants, **$2.00** each, prepaid; **$18.00** per doz., by express, not prepaid.

Gladio-Flora. Remarkable for the unusual shape of the flowers which look like large Gladiolus. Petals are not long, but short and rounded and so wide they overlap each other, thus giving a very attractive appearance to the flowers. Color is crimson changing to carmine rose with an uneven edge of gold to each petal. Height, 3½ feet. Price, strong plants, **$2.00** each, prepaid; **$18.00** per doz., by express, not prepaid.

Meteor. Meteor is a vigorous grower with healthy green foliage. It is highly valued because of its magnificent flowers, fully four inches across, and abundance of bloom. Color is a deep crimson, very rich; each plant usually throws up five to six trusses of buds which continue blooming luxuriantly all summer through. Price, plants of dormant roots, **75c** each, postpaid; **$6.00** per doz., by express, not prepaid.

NEW CANNAS OF SPECIAL MERIT.

William Saunders. (1907) The flowers are large, of splendid form and are borne very freely in immense clusters. The color is a deep rich shining scarlet lightly dappled with crimson. Foliage is a rich bronze. Height, 3½ to 4 feet. We believe that Wm. Saunders is decidedly the most perfect Canna of this type that has been introduced. Those who tried Wm. Saunders in 1907 say it cannot be excelled. We offer plants only: **60c** each, postpaid; **$5.00** per doz., **$35.00** per 100, by express, not prepaid.

60 other varieties. Send for our list and prices.

The Nursery Trade

American Association of Nurserymen.

J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport, Ind., Vice-President; George C. Seager, Rochester, N. Y., Sec'y.

Thirty-third annual convention to be held at Milwaukee, Wis., June 10-12, 1908.

THE fine weather is likely to shorten the planting season.

CONSIDERABLE frost damage to fruit crops is reported from Green county and other districts in Missouri.

AT the Masschusetts Agricultural College, Amherst, the landscape gardening department is giving its annual exhibition of Corot pictures.

THE opening buds of the forsythias tell the tale of the season. There is no more pleasing early flowering shrub than a good form of the vigorous F. intermedia.

REPORTS from Washington, Oregon and other western points indicate great activity in the nursery business and preparations for an increased call next season.

MCHUTCHISON & Co., New York, have been appointed sole agents of the Royal Tottenham Nurseries, Deedemsvaart, Holland, in the United States and Canada.

AN occasional plant of some good hardy rambling rose in an evergreen hedge is a pretty feature. The plant is protected and runs all through the hedge flowering freely and brightening it in summer.

ROY D. UNDERWOOD, secretary of the Jewell Nursery Co., Lake City, Minn., was elected mayor of that city April 9. Mr. Underwood will have the distinction of being the youngest citizen ever elected to this position.

SUCH a fine hardy tree as the Ginkgo or maidenhair tree (Salisburia adiantifolia) should be much more freely planted. It is certainly one of the best conifers and its distinct habit makes it singularly attractive.

THE normal and seasonable weather has caused the fruit buds all through Illinois, and probably a good deal of the rest of the country, to develop in the most natural way, and the prospects now are for a grand crop of fruit of all kinds.

BATTLE CREEK, MICH.—The Postum Cereal Co. is considering the project of beautifying its grounds, and Chas. Greening of Monroe has been in conference with the firm and other large real estate holders here who are planning improvements.

THE Oklahoma Fruit Growers' Association closed a two days' meeting at Oklahoma City April 3, and elected the following officers for the next year: C. G. Jones, Oklahoma City, president; R. L. Peebley, Oklahoma City, vice-president; E. E. Blake, El Reno, secretary; A. L. Luke, Wynnewood, treasurer. The executive committee is composed of Frank Ross, Atoka; John Furrow, Guthrie, and C. C. Olsen, Perkins. The orchard and nursery inspection bill pending before the legislature was indorsed. Reports from the fruit growers in attendance show the crop is in the best possible condition.

THE shearing of Japan cypress is a barbarous practice where nice specimens are wanted. The beauty of these trees lies, in most cases, in the feathery effect of the leaves and the graceful natural outline, which is spoiled when they are butchered into stiff pyramids. The only reasonable excuse ever heard for the practice is that the color of the foliage is improved but this is more fanciful than real.

Geo. J. Kellogg, Lake Mills, Wis.

Geo. J. Kellogg, the retired nurseryman and founder of the firm of Geo. J. Kellogg & Sons of Janesville, Wis., has an interesting note on his career in the

George J. Kellogg.

Janesville Recorder. "Talking of the past," he says, "I may as well go back to March 20, 1828, when a little bawling brat came in with the equinox and he has been making some noise ever since." Among the many things he has done in his career he notes having spent two years in Wisconsin's pinery, driven five yoke of oxen across the plains to California in 1849, spent three years in the gold mines and came home by the Isthmus in 1852 right in the cholera time. In 1852 he made Janesville his home. He landed at Kenosha, or on the beach where Kenosha now is, Aug. 2nd, 1835; there being at the time only one whisky trading post for the Indians, kept by Reseque on the island.

He goes on to tell of his visit to Minneapolis last Thanksgiving when he stayed for the meeting of the State Horticultural Society and saw what, he said, "made a Wisconsin man feel good"—2,000 plates of apples on exhibition, many of the varieties being of Wisconsin origin. Wolf River, Northwestern Greening, Wealthy of Minn., Patten's Greening of Iowa and others he was interested in, and he gave some particulars respecting the annual meeting at Madison. He speaks highly of the value of the "Transactions" of this society and says every volume is worth a dollar to a fruit man. He instanced Pewaukee, Newell, Tallman, Minkler, Mann, Scott's Winter, Windsor, N. W. Greening, Ben Davis, Gano and Walbridge as all suitable to conditions in Wisconsin and advised that all buy their trees from home nurseries where they have become acclimated. We were much interested in this note and tender this veteran grower our best wishes.

"Landscape Gardening for Amateurs."

"Landscape Gardening for Amateurs," is the title of a book of over 60 pages, finely illustrated, published by Wagner Park Conservatories, Sidney, O. Besides a mass of useful and practical information to planters there are many plans for laying out artistically home, school, sanitarium, factory and small park grounds, and the book is suitably dedicated to "those who love beautiful grounds." The author, B. P. Wagner, points out how the fundamental principles of this work apply just as much to the small and modest home grounds as to those of greater pretensions and in describing natural gardening he warns the planter against straight lines and points out, both in the text and by illustrations, the advantages of grouping over dot planting.

Back yards, treated as Mr. Wagner advises, cease to be ugly and objectionable and become pleasant places for the family to withdraw to in summer as well as beautiful. In this connection he has lists of tall, medium and dwarf shrubs and hardy plants, also vines which must be of great assistance to the amateur and beginner. One of the most encouraging signs of the times is the interest that large employers of labor are taking in making their factories externally attractive and there are many good suggestions and illustrations along this line. Some of the latter pictures show grounds that would do credit to a fine private or park estate and the suggestive notes and pictures of park entrances and landscapes could not fail to be of interest to park superintendents. Beautiful groups and individual specimens of plants and trees are also shown with accompanying reading matter. The book in short is greatly above the average in this line and we can conscientiously advise all interested in this class of work to obtain a copy and keep it for reference.

The Nation's Natural Resources.

President Roosevelt, in inviting the governors of all the states and territories to meet with him at the White House May 13-15 to discuss the question of the conservation of the nation's natural resources among other things said:

Recently I declared there is no other question now before the nation of equal gravity with the question of the conservation of our natural resources, and I added that it is the plain duty of us, who for the moment are responsible, to take inventory of the natural resources which have been handed down to us, to forecast the needs of the future and so handle the great sources of our prosperity as not to destroy in advance all hope of prosperity to our descendants. It is evident that the abundant natural resources on which the welfare of this nation rests are becoming depleted and in not a few cases are already exhausted. This is true of all portions of the United States, and it is especially true of the longer settled communities of the east.

Facts which I cannot gainsay, force me to believe that the conservation of our natural resources is the most weighty question now before the people of the United States. If this is so, the proposed conference, which is the first of its kind, will be among the most important gathering in our history in its effect upon the welfare of all our people.

BOXWOOD.

BOXWOOD.

The plants imported this season are the handsomest ever brought to this country. Prospective purchasers will do well to visit our nurseries and inspect the stock before buying.

Standard Boxwood. 3 ft. diameter, fine specimens, $7.50 each. 2½-ft. diameter, fine specimens, $4.50 each; 2-ft. diameter, fine specimens, $3 each; 18 to 20-in. diameter, fine specimens, $2; 15 to 18-in. diameter, fine specimens, $1.50. Buxus, round shape (perfectly round), 2-ft., $2.50; for hedging, 8-in., $25, $30 and $35 per 1,000; for hedging, 10-in., variegated, $30 per 1,000.

Globe Boxwood. Fine specimens from $2, $3, $4, $5, $10 to $15 each.

Pyramid Boxwood. 5 ft., $4 each; 4 ft., $3.50 each; 3½ ft., $2.50 each; 3 ft., $2 each; 2½ ft., $1.50 each; 2 ft., $1 each; 18 to 24 in., 75 cts. each; 15 to 18 in., 50 cts. each. Pyramids, 5 to 6 ft. high, nicely shaped, per pair, $10 to $15. Special prices on larger sizes.

Bush Boxwood. These are all handsome bushy specimens, adapted for hedges.

Moving Historic Trees at Washington.

Despite protests the historic elms and Crittenden peace oak are being removed in the government botanic garden at Washington, D. C., though according to illustrations and an interesting article in the Washington Star every care is being taken to ensure, as far as possible, their safety. But there is grave risk in moving trees of this size and age and Superintendent Smith is probably a very disappointed man in that his suggestions were not carried out.

"No explanation has been offered," Mr. Smith said, "as to why the statue of Gen. Grant should not be placed in the most honored place at the capital—the ellipse opposite the White House. Not even the secretary of state has offered a plausible excuse for not giving the Grant statue the best position possible. Gen. Grant was never connected with the legislative branch of the government, then why place his statue so near the Capitol, where it will be almost obscured from view by the shadow of its great dome? All future visitors to Washington will at once see the absurdity of placing Grant's statue in an obscure hole at the foot of Capitol hill, and I make the prediction that in time to come the memorial will be taken from the site in the botanic garden and erected in some more suitable locality. The good sense of the American people will bring this about."

The Oriental Plane.

"The oriental plane is found all over Asia Minor," says Consul Harris of Smyrna, "but seldom in groves. They usually stand alone along the roadways and serve the traveler as halfway stations, where he finds some protection from the summer sun and a fountain. These trees also add considerably to the scenery of the country. They grow to be several hundred years old, and often attain such size that shepherds have been known to cut huts in the trunks of the standing trees; and their vitality is so great that they continue to live for years thereafter. The plane is also a favorite shade tree. Smyrna has none, but Constantinople and the little valleys leading away from the Bosphorus, as well as most cities and villages in the interior, have large numbers of them. The Turks are fond of having them in front of their cafes and in the yards of their mosques."

BOX TREES.

We have just received a car load of beautiful, shapely Box Trees, the best we ever had, in all sizes and shapes.

HENRY A. DREER, —714— Chestnut St., **Philadelphia, Pa.**

Grouping Alpine Plants.

The practice of planting alpine plants on the mixed system means monotony and indifferent effect, says G. A. in Journal of Horticulture, and it follows that nothing is gained by having an extensive collection, for there is a sameness throughout, while the stronger or freer growing species take possession of considerable areas. In the alpine regions and on the mountain rocks, there is never seen a mixture of species as in the general mixture of them in the garden rockery. In nature, one plant charms us by its massiveness, or the group may be inlaid by one or two other plants, but, as a rule, each bank or ledge and crevice of rock has a particular character in result of the individuality of the one or more allied plants that grow on it, and give the peculiar and special adornment.

The grouping of the plants applies more particularly when duplicates of a certain species or variety are employed, it being best to make one or more groups of them rather than scatter them one by one all over the rockwork. This particularly applies to the dwarfer species, such as the drabas and the dwarf gentianas, also Ameria alpina, Arenaria Balearica, etc. Even the aubrietias, though spreading far and wide, are seen to best advantage in masses. The grouping is also desirable for the slow growing and dwarfer kinds, as they are not thus liable to be overgrown and exterminated by rapid growing neighbors. Besides, good preparation of soil, drainage, and position is more likely to be secured for a group than is the case in planting in several places, while weeds and encroaching plants are readily seen and may be speedily removed. The groups, of course, should bear some relation to the proportions of rockwork, even though there may only be room for a few species.

In this grouping and massing there is need of appropriateness to position avoiding formality, and acting on a free and natural principle. This limits alike the coarser varieties to a clearly defined space. It also gives advantage to lesser species on equally legitimate limits. The natural grouping or massing system does not admit of the planting of clematises, ivies or periwinkles, as sometimes done to hide the apparent bareness of the ground, for this means the over-running of the rock or alpine plants, and the very idea of a rock garden is speedily obliterated. Bare ground should be covered by true alpines, which signifies some rock visible, and the carpeting implies a bloom that may be fairly seen, and its character impressed upon all who see it; whereas a little flower hidden among other plants escapes notice. Arrangement in natural groups thus secures distinct and definite aspects of vegetation, as each portion of the rockery has a character of its own. The observer sees new features in passing from one point to another. Indeed, the glory of rockwork is to secure effects of color and brilliancy. The hard lines of the parterre are entirely absent, the groups of alpine flowers fading away in nature's indefinite and charming way. If climbers and trailers are introduced, as is desirable in some cases as a background, or for breaking the view at particular points, positions should be selected where they may luxuriate without interfering with the other subjects, either by their top or root growths.

Stock YOU NEED NOW.

BEGONIAS.

Marjorie Daw, Thurstoni, Metallica, Rubra and Argentea Guttata.....$4.00 per 100

Vaughan's Seed Store,
CHICAGO.

Denver.

GOOD EASTER PROSPECTS.

Business for Easter looks very encouraging, unless we get some very bad weather between now and then. We have had very nice weather for the past two months, and the apple and cherry trees are in full bloom. Easter stock looks fine. Hydrangeas are especially good, and everything in the way of pot plants appears to be plentiful. The carnation market during the past month has been very poor and these flowers have certainly been a glut on the market. Roses are breaking about even.

The Daniels & Fisher Co. has been awarded the contract for the decoration of the Auditorium for the democratic convention July 7, in competition with both eastern and western firms.

PLATTE.

HUTCHINSON, MINN.—The Litchfield greenhouse, owned by Allen Wheeler, was almost totally destroyed by fire March 25. What plants were not killed by fire were frozen.

JOSEPH HEACOCK CO., Wyncote, Pa.

Fredericton, N. B.

The hopes for an early spring were dashed recently by a return to wintry conditions, black, frosty nights and westerly gales, besides an inch or two of snow. These thawing and freezing spells are anything but beneficial to vegetation. Prospects for Easter business are bright. Carnations, roses, lilies, callas and lily of the valley are all in excellent order, while of plants, azaleas, pelargoniums, cyclamens, cinerarias, primulas and bulbous stock are abundant. Our leading supply house reports the Easter lilies scarce; that it had to throw out 60 per cent. With us the bulbs have been particularly good, and we have only discarded about five or six per cent. We are egotistical enough to think there is a good deal in the way they are handled.

POEHLMANN BROS. CO., Morton Grove, Ill.

Worcester, Mass.

Lilies are the center of attraction just now and indications point to a plentiful supply. Though not as tall as in former years, they are carrying a large number of flowers to the stalk and these are large. The red stemmed giganteum seems to be the best type. Rambler roses, azaleas, lilacs, rhododendrons, acacias and bulb stock will be very plentiful.

The April exhibition of the Horticultural Society brought out a fine display of flowers and spring flowering plants. H. F. A. Lange and E. W. Breed took the bulk of the premiums, Lange winning first in every class. The awards were:

Cut flowers.—H. F. A. Lange, first; E. W. Breed, second; A. W. Hixon, third.

Basket.—H. F. A. Lange, first; Mrs. A. E. Underwood, second.

Narcissus.—H. F. A. Lange, first; Mrs. Percy G. Forbes, third.

Hyacinths.—H. F. A. Lange, first; E. W. Breed, second.

Tulips.—H. F. A. Lange, first; E. W. Breed, second.

SHIPPENSBURG FLORAL CO. Shippensburg, Pa

NEW YORK.—Caroline E. Scallen, a florist of 1242 Broadway, has filed a petition in bankruptcy, with liabilities of $8,303, and assets of $4,531, consisting of stock, $200; three delivery wagons, $750; fixtures, $1,000, and accounts, $2,581. Among the creditors are Mrs. Robert Stafford, $1,635; George Schlegel, $1,098; John J. Rayner, $575; A. J. Guttman, $531; Julius Roehrs Co., $460, and Walter F. Sheridan, $349. The business was started many years ago by her husband, who died in February, 1903, and she has carried it on since. The bankruptcy is attributed to trade going farther uptown and inability to collect accounts.

TOLEDO, O.—Krueger Bros. have begun making extensive improvements on 26 acres recently purchased out Woodville road, and will this summer increase their capacity by one-half. They have begun building two greenhouses, 30x250 and 36 x250 feet, and will erect a boiler house. The firm now has 50,000 square feet of glass at its present location at Nevada and Clark streets, and will have 25,000 square feet more upon the completion of the work this summer. For the first year the two new houses will be used exclusively for carnations.

SOUTH ORANGE, N. J.—Sparks from a passing locomotive are said to have set fire to the Cedar nurseries of Wm. A. Manda, opposite Fourth street, April 5. A gang of men from the greenhouses, using brooms, extinguished the blaze before much damage was done.

Hartford, Conn.

The regular meeting of the Connecticut Horticultural Society was held in County building April 10. It was carnation night, and, as is the rule on such an occasion, there was a large attendance of members. The quality of the exhibits, as a whole, was of a high order and the awards made in each case were entirely merited. The judging committee, Messrs. Zuger, Roulier and Chambers, went over the exhibits carefully and the findings were as follows:

John Coombs, diploma for vase of White Perfection.

Carl Peterson, certificate of merit for collection of carnations.

W. N. Shumway, honorable mention for new seedling carnation.

Carl Peterson, honorable mention for vase of Kaiserin roses.

H. A. Pinney, carnation grower for John Coombs, read an able and instructive paper on the "History of the Carnation," for which he received a hearty vote of thanks. President Huss specially complimented Mr. Pinney by saying that the paper was one of the most interesting he ever had the pleasure of listening to. Geo. W. Smith, delegate of this society to the annual meeting of the Massachusetts Fruit Growers' Association at Worcester March 11-12, gave an interesting account of his visit to that society.

The society will hold a pansy exhibiton May 27, and a paper on the "Evolution of the Pansy" will be read by John Gerard. The special committee reported having engaged Unity hall for the dahlia show September 23. A committee was also appointed to secure a hall for the chrysanthemum show for November 5-6. There will be rose exhibits at the next meeting, April 24.

A. C.

PITTSBURG, PA.—At all the parks and public conservatories the spring display is finer this year than ever.

GEO. A. KUHL,
Wholesale Grower. PEKIN, ILL.

McKEESPORT, PA.—Several thousand people attended the opening at the establishment of John H. Orth, Sinclair street April 4, where about 3,000 carnations were presented as favors to visitors. All day and evening there was a steady stream in and out of the store, which had been prettily decorated with fragrant flowers. The presence of ladies was conspicuous, although there was also a large number of men in the throng. Mr. Orth personally conducted the opening and received many hearty congratulations.

WESTERLY, R. I.—Halbert G. York, who for 15 years has conducted the floral business at 36 Beach street, has sold out the same to Conrad Schultz. For many years Mr. Schultz has been in charge of the shipping department and floral design work at the plant of S. J. Reuter on Beach street. Mr. Schultz intends to put the greenhouses in better condition and to build up the business. Mr. York has been in poor health for the past two years, and at times has been unable to attend to his duties. Mr. Schultz has many friends who wish him success in his venture into business.

CARRILLO & BALDWIN,

Orchid Growers and Importers.

SECAUCUS, NEW JERSEY.

Indianapolis.

BULBOUS STOCK OVER.

Easter prospects are good. Roses and violets will be scarce, carnations plentiful. Pot plants generally plentiful and fine except bulbous stock, which, like the two preceding Easters, came too early. Lilies also will be scarce, many coming with crippled flowers. Bedding stock is coming on nicely, salvias and vinca vines scarce; geraniums plentiful.

NOTES.

Hail damage has all been reported. Hail reminiscences and observations are still in evidence. Here are a few:

John Heidenreich, one of the heaviest losers, is full of gratitude towards his florist friends and wishes to extend his most sincere thanks, especially to Bertermann Bros. Co., Smith & Young Co., E. A. Nelson and Baur & Smith.

Double strength glass, 16x24, suffered least; the single strength and smaller sizes suffered most.

For glazing greenhouses painters are first for big wages, incompetency and short hours only.

It is more profitable to insure between now and the next hail than afterwards.

The numerous friends of W. W. Coles were grieved to learn that he lost his baby daughter.

J.

GERANIUMS.

Novelties, 1907 introductions from Bruant, Lemoine, Boucharlat and Cannnell, one each of 50 varieties, our selection, including singles and doubles, for $5.00.

ANDERSON, IND.—Mrs. J. L. Kilgore has engaged J. C. Grossman, the landscape artist who is to do the work on Maplewood and West Maplewood cemeteries, to make a few improvements in her lawn at her home on Jackson street.

RICHMOND, VA.—Mrs. Maria E. Amory, widow of E. S. Amory and mother of Wm. L. Amory, 510 North avenue, died March 27. Her son has for a number of years been engaged in the florist business in Barton Heights and Brookland Park.

—— STEEL RETURN TUBULAR ——

Steam **BOILERS** Water

WHAT F. R. PIERSON SAYS:

JOHNSTON HEATING CO., New York City.
Gentlemen—The internally fired steel boilers which you installed last fall are giving us great satisfaction. They heat very quickly and are very economical. We are exceedingly well pleased with them and they have more than met our expectations. Very truly yours, F. R. PIERSON CO.

Montreal.

ROSES WILL BE SHORT.

The preparations for Easter trade are in full swing and everyone expects business to be as good as last year. Stock of all sorts will be plentiful except lilies, which on some places are a total failure and are not really good anywhere. Hydrangeas will be very good; owing to Easter being so late very little forcing is necessary for them. The same holds good for roses in pots, spireas and lilacs—the later Easter is, the better the supply. The supply in cut roses will be somewhat short; they have been in good demand and at good prices all winter. Carnations are plentiful and of good quality.

NOTES.

The Gardeners and Florists' Club, at its new rooms, Sherbrooke street, held a reunion of the old boys, April 6, when a number of the oldtimers turned up, who showed surprise at the progress made by the club. The new quarters were especially admired. Wm. C. Hall furnished the refreshments, H. Eddy the entertainment.

James McKenna has been a week in Quebec, busy in the legislature, looking after the municipality of Cote des Neiges' reannexation to this city, which he carried through successfully.

A. C. Legare will be able to cut 50,000 carnations for Easter. His place looks a fine sight—a mass of bloom with no trace of disease visible.

Michael O'Reagan entered an engagement with the Knights of Columbus as manager of their estate on Mountain street.

The south shore florists suffered some loss through floods caused by an ice jam in the St. Lawrence river.

LUCK.

HOLLIS, N. H.—Geo. F. Hills has recently completed greenhouses at the Goodwin farm, where he intends raising early vegetable plants.

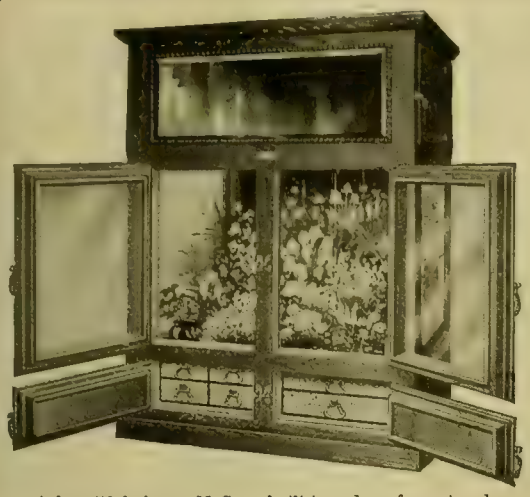
Always mention The American Florist when you order stock.



A beautiful showy McCray built-to-order of quartered oak with beveled mirror and galvanized iron drawers beneath for mosses, etc.

A Successful Florist

whose stock is always fresh, fragrant and attractive, always uses a McCray Refrigerator. McCray Refrigerators have the proper system of cold air circulation, which is so strong and steady that **there can be no stagnant air** or dampness in a McCray Refrigerator. Less ice is used than in any other kind of refrigerator, and this results in a saving which pays for the McCray itself.

McCray Refrigerators

give your shop a look of elegance. They are made and finished in the most beautiful manner, and are lined with white enamel, opal glass, tile, mirrors or white marble, as you desire.

McCray Refrigerators are guaranteed to give satisfaction, and are made in regular sizes for immediate shipment, or are built to order for any requirement.

Send today for Catalog No. 71, which will show the beauty of the full line of McCray Refrigerators for flowers.

E. C. Brown Co., 74 Jay St. Rochester, N. Y.

ATLANTIC CITY, N. J.—John Stevens, an employe of Louis Nagy, was found in an unconscious condition in a gas filled room at the rear of the latter's store recently. The affair was purely accidental and the injured man lies in a serious condition at the City hospital.

PHILADELPHIA, PA.—A permit was issued April 7, to Myers & Co. to build an iron and frame greenhouse, 83x116 feet, on the grounds of Ravenswood, the country home of Mrs. Frederick C. Penfield, formerly Miss Anne W. Walker, on School lane, Germantown. The cost will be $15,000.

SOUTH MANCHESTER, CONN. — Seth Leslie Cheney is preparing plans for the construction of a greenhouse, 10x200 feet. The house will be erected near Mr. Cheney's other greenhouses and he has also decided to enter into field work extensively this summer. He intends to do a large wholesale tomato and potato business. He has secured the services of Thomas L. Brown, of Grand Rapids, Mich, to manage the farm.

Washington, D. C., Florists' Club Meeting.

Flowers of speech vied with rare and fragrant blossoms at the annual dinner of the Florists' Club in Freund's banquet hall April 7. The horticulturists dined amid a bower of roses of every variety, lily of the valley, violets, ferns and palms. Good fellowship permeated the atmosphere, and all enjoyed themselves to full measure, the dinner being the most successful in the history of the club. The speechmaking and dining was interspersed with vaudeville, which contributed liberally to the enjoyment.

President Peter Bissett introduced the popular new incumbent of his office, F. H. Kramer. Mr. Kramer was given an ovation. He said the club has made giant strides during the past year, but, through the medium of banquets and dinners, he hoped to promote an even better spirit of good will, and increase the membership to twice the present number.

An orchestra played throughout the evening, and E. Lawrence Philips sang several popular songs. Prof. Charlamaigne Keehler, who was elected to honorary membership to the club, entertained the banqueters with a rose poem, burlesque on an Italian opera and other character work.

J. R. Freeman, the genial toastmaster, presided. He is one of the oldest and most popular members of the trade in the city and because of the fact that he is ever bubbling with wit and is a clever speaker, he can never escape the toastmaster's chair.. Wm. Gude, who presented Prof. Keehler with the certificate of honorary membership, spoke feelingly of the good fellowship prevalent in the club and heartily congratulated retiring President Bissett and Secretary Charles McCauley for their earnest and untiring efforts during their terms of office.

In presenting Mr. Bissett with a handsome monogramed silver dish, Mr. Gude said: "You will notice it is for fruit and sweet things. May it ever be filled to overflowing with the sweet things of life, which you so well deserve because of the living kindness of your life and the fruits of your labors so admirably performed. You will notice further that it is sterling. That is emblematic of the sterling thought you have given this organization and its members, the sterling good wishes, the sterling appreciation, and the undying good will of your fellow-florists." Mr. Bissett thanked the donors and wished the club continued success. Among others who spoke were Mrs. William Gude, Vice President Robertson, Z. D. Blackistone, George Shaffer, Adolph Gude, George Cook and Charles McCauley.

Syracuse, N. Y.

All are anticipating a big Easter trade and they have plenty of stock to take care of all purchasers. The usual price of 25 cents for each lily flower prevails, which makes the lilies range from 50 cents to $2.50. Hydrangeas are from $1 up, azaleas $1, daffodils, hyacinths and primroses 25 cents to 35 cents. Violets are selling from $2.50 to $3 per 100. A popular innovation is the small lilac bush in full bloom, which ranges in price from $2.50 up. Roses sell from $1.50 up.

NOTES.

Henry Morris says that his Easter stock was never better than at present. The weather has been such as to keep back the plants for Easter. Mr. Morris had a number of unusual designs for the funeral of A. K. Hiscock. Mr. Morris has just put into operation a new delivery wagon of the latest type.

At the stores of P. R. Quinlan in South Salina and East Washington streets is a splendid display of flowering plants. There are plenty of lilies, Scotch heather, roses, azaleas, hydrangeas, violets, carnations, lily of the valley and sweet peas.

Bard & Davis are doing a splendid business in the west end. A. J. B.

OUTDOOR FLOWERS SHORT.

Easter week finds the growers in this city ready with an abundant and beautiful supply of flowers for the trade. The late Easter has made it very difficult in this climate to hold back any bulbous stock, but by using the cold storage there will be tulips, hyacinths and any quantity of lilies, which after all are the greatest of Easter flowers, and the most in demand. Flowers, except those grown under glass, will be scarce. The early spring blossoms are all done, the lilacs were killed and others are not in flower yet, so the florists will have very little to fear from this source. Orders are being booked in large numbers and promise a liberal trade with very good prices. Roses and carnations will be plentiful. There will be a good cut of American Beauty, Bride, Bridesmaid, Kaiserin, Killarney and other varieties. The Joy Floral Co. is bringing in potted Crimson Rambler roses, which proved very popular and profitable last year. Azaleas are done, but the firm will have a fine lot of rhododendrons. Joy has had great success with forced lilacs, especially the white variety. An untimely frost nipped the outdoor flowers, of which vast quanties are grown hereabouts—the white as well as the purple. The flowers were all ready to open when the frost killed the entire crop.

NOTES.

A new enterprise is being started here by a man from Chicago.. He is having fitted up in handsome style a storehouse on Fifth Ave. for soda water, confections and ice cream parlors. He is going to add a floral department, procuring his flowers by shipment and by purchase from local florists who have not uptown stores.

Geny Bros. have 3,000 lilies for Easter.

Louisiana Red Cypress

SAYS BOBBINK & ATKINS, of Rutherford, N. J., "Lasts with us from two to three years longer than any other wood for table purposes, and its life seems to be endless when used in ordinary greenhouse construction. We use cypress solely in our Plant Tub Department and manufacture tubs of all sizes from the smallest to the largest, of cypress."

It Is Best for Greenhouse Building.

It is the only wood that successfully withstands the almost intolerable alternate wet and dry conditions incident to this work.

IT IS THE MOST DURABLE WOOD KNOWN. Ask about it at your local lumber yard or write

The Allied Trades

Descriptive particulars—with drawings or photographs, if possible—of any new apparatus or device which may prove helpful to the trade are solicited for this department.

Cement Concrete Pipes.

Cement concrete as a material for pipes for irrigation and other purposes is strongly advised by G. E. P. Smith in a bulletin of the Arizona Experiment Station. The water supply is a very important point in this state and Professor Smith points out that wooden pipes are unsatisfactory in every way, tile or clay pipes are not sufficiently strong and a long haul is necessary to get them on the ground, while the cement concrete can be made by using a "lean" mixture of cement, lime paste and sand, the paste being thinned to a consistency that permits it to mix thoroughly with the sand, for the body of the pipes, and a mixture of one part cement and three parts sand for the bell ends. The comparative merits of such pipe, clay tile, and concrete, crude oil, asphaltum, and puddled clay are discussed, the cement pipe being considered to possess decided superiority in many respects, particularly for the local conditions.

Heating Carnation House.

ED. AMERICAN FLORIST:

I intend to build three greenhouses, one 28x100 and two 22x100 feet, to be used for carnations. How many feet of pipe are needed to heat the houses, and does it make much difference whether they are built from north to south or east and west? BEGINNER.

The question does not state whether hot water or steam will be used. Either would give good results, but while hot water is generally preferred for a small range, it might be better to put in steam if other houses are to be added. For the wide house, with hot water, three 2½-inch flows and ten 2-inch returns should be used, or if 2-inch flows are put in the same results can be secured with 15 2-inch pipes, of which five should be flows. In the narrow houses use three 2½-inch flows and eight returns, or using all 2-inch pipe put in four flows and eight returns.

If steam is employed take one 2½-inch flow and ten 1¼-inch returns for the wide house, and one flow and eight returns for the others. With even span houses they can run in either direction. L. R. T.

ALBIA, IA.—The shortage of water is causing serious trouble and the failure of the city to extend its mains to the Albia Greenhouses (Richey Floral Co.) is causing the firm some anxiety.

THEY ARE ENDURING

Every part protected from decay — every iron part galvanized against rust — no points where condensation settles — expansion and contraction perfectly adjusted. To their endurance, add attractiveness, great strength, lightness, increased productiveness, simplicity and low cost of maintenance.

The uncertain glory of an April day,
Which now shows all the beauty of the sun,
And by and by a cloud takes all away.

Rondeau—Violet.

Violet, delicate, sweet,
Down in the deep of the wood,
Hid in thy still retreat,
Far from the sound of the street,
Man and his merciless mood:—
Safe from the storm and the heat,
Breathing of beauty and good
Fragrantly under thy hood,
Violet.

Beautiful maid, discreet,
Where is the mate that is meet,
Meet for thee—strive as he could!
Yet will I kneel at thy feet,
Fearing another one should,
Violet!
—COSMO MONKHOUSE.

SUGGESTIONS FOR CUT FLOWER GROWERS.

Sweet Peas.

As the season advances it becomes increasingly difficult to keep the vines of sweet peas in good condition, especially if they have been flowering for some time. Where late batches were sown as recently advised the young plants will be now in good order and beginning to flower freely. These will be little trouble if the house is kept cool with plenty of air and the roots are not over-watered. Where the older vines are getting up close to the glass the strings may be lengthened and the plants given a slant, beginning at one end and tying them securely. Avoid injuring the vines lower down or the plants will be ruined. Continue to sow for succession outside on well prepared quarters and give the plants the best of attention from the first. Hoe frequently and if there is any doubt as to the soil being in good heart sow a little superphosphate of lime and soot along the rows before hoeing.

Annuals for Cutting.

Whether grown inside or out annuals for cutting must have proper care from the earliest stages and never allowed to become crowded in flats or pots. Asters must be kept quite cool now in frames where they will make stocky plants ready to go in the benches cleared of violets, carnations or other plants. The later ones intended for outside planting may be pricked off in frames or flats and well looked after. Zinnias are more tender than asters and must not be subjected to the least frost or they will be killed. Sweet sultan and scabious are excellent hardy subjects, producing long stemmed and showy flowers. Prick off the early plants and sow again for later work. Iceland poppies, though not strictly annuals, may now be lifted from the seed pans in small patches of a few plants and pricked into flats, where they will lift next month with nice balls for planting out. Sow cornflowers again, both outdoors and inside, as the flowers are always finer and of better color from young plants and the old ones can be thrown away when the flowers begin to get smaller. Hard growth caused by exposure to all the air possible and ample room are the principal requisites for all these plants now.

Stevia.

Keep the young plants perfectly cool but see that no frost reaches them. There is plenty of time to root more cuttings of this useful plant if sufficient stock is not already worked up. As the plants are ready they may be put into deep, narrow flats and these placed on a light bench in a cool greenhouse or in a frame and kept gently moving. When all danger of frost is over they can be taken outside and laid in lines about six inches apart, the spaces being filled with soil. This will save a good deal of work in watering during summer and the flats may be raised and placed on the benches in the greenhouse before there is any danger of frost in fall, covering the roots again with well decayed manure or soil to conserve moisture. The number of plants grown must, of course, be governed by the demand, but it is so little trouble to grow and so useful that it should not be forgotten now.

After Easter Work.

Now that the Easter cut is over, growers will have to decide which benches they will throw out and which will be retained up to and including Memorial day. With roses the condition of the plants will have to be considered. In most cases they will be in full crop, and will go on producing good flowers for another six weeks at least. Few of these can be spared, as the flowers will be in good demand right up to the end of June. Should there be any old benches that have ceased to be profitable, throw them out and they will come in for the first batch of young plants. Where carnations are grown inside during the summer some of the older benches will have to be thrown out shortly and young plants put out at about six inches apart, to grow into good stock for planting later. Begin at one end of the bench to dig the plants and throw them upon the surface to dry a little, when most of the soil can be shaken off. The plants can then be taken off and burned, and the soil removed. It is bad practice to leave the plants on the benches to dry out be-

fore digging, as is sometimes done, as this tends to the propagation of insects and creates a bad atmosphere in the houses. All benches, whether solid, concrete or of wood, should be thoroughly cleaned after the soil is removed. Have two men, one with a hose, with a good force of water, the other with a scrubber, to clean out all corners, and the work can be rapidly done. After they are dry, apply a good coat of hot lime-wash, to finish off any chance insects that may remain, and allow this also to dry before wheeling in new soil. All young stock of chrysanthemums, roses and carnations should be well spread out now, so that plenty of light and air reaches every part of each plant. The removal of Easter lilies and other holiday stock will have made the necessary room. When giving the plants a new stand clean over the ashes, level it and sprinkle a little soot and lime on the surface. Especial care is necessary with grafted rose stock. If the plants are placed too close they soon grow into a tangled mass, making it very difficult to pull them apart without snapping out the heads. Take advantage of the cool nights to destroy all traces of green fly and mildew, by fumigating or sulphuring, and side up things generally for a clean start for the summer.

Tuberoses.

To be successful with these fragrant flowers it is necessary to secure solid, well ripened bulbs, and they make a very useful catch crop for summer. They are grown in pots, in flats, and planted out on benches. Generally the flats are preferable, as when planted on the benches the bulbs often commence to grow before they are properly rooted, and the spikes are not satisfactory. If they are to be grown on benches it is better to pot the bulbs and place them in a cool position similar to that recommended for hyacinths and other bulb stock, planting them on the benches when then have made some root. Before potting or placing the bulbs in flats chip off all the side shoots that can be seen, as these grow later and weaken the center shoot without any corresponding advantage. The bulbs should not be buried, at least two inches of the top of small bulbs being left out of the ground and more of the larger ones. Under the benches of a cool greenhouse, where there is not likely to be a heavy drip from the plants above, is a good place to start the bulbs. Give one thorough soaking of water after potting to settle the soil about the bulbs and probably no more will be needed until they are ready to come out. A thin coating of ashes or other loose material over the soil is an advantage, but is not absolutely necessary. It keeps the soil in a more regular condition as regards moisture, preventing the surface from becoming dust dry. When the green shoots are seen starting from the top of the bulbs they are ready to be introduced to the greenhouse, giving them a low temperature at first and increasing the heat as the spikes develop. Tuberoses are not particular as to soil, a medium sandy loam, fairly well enriched with manure, being about the best for them. The foliage is very apt to be attacked by red spider and a moist atmosphere and frequent sprayings, up to the time flowers show white, are necessary to keep this in check.

ORCHID NOTES.

LAELIA MAJALIS, now flowering, is certainly the prettiest of all the Mexican lælias.

COELOGYNE CRISTATA must be kept cool and moist in a shady well ventilated house or frame. This orchid dislikes disturbance at the roots.

KEEP the dendrobiums right up to the light. The deciduous kinds, like D. Wardianum and D. crassinode, do best in very small pots or pans.

AN atmosphere well impregnated with ammonia caused by damping with manure water or sprinkling soil and lime around under the stages is fine now for cattleyas.

KEEP Cypripedium insigne growing freely now in a nice moist atmosphere

M. A. Ordonez.

but not too much heat. When the growth is finished a cool frame is the best position for the plants.

THE old method of feeling the leaves with the hand is still the best to decide when to lower the shades on cattleyas in houses where these are provided. Where no blinds are used some shade must now be put on the glass.

Two Useful Cattleyas.

Two of the most useful cattleyas of the labiata group are those illustrated herewith, C. Gaskelliana and C. Mossiæ. The illustrations were prepared from photographs sent by Ordonez Bros., Madison, N. J., and are from semi-established plants. C. Gaskelliana comes in flower at a time when cattleyas are not too plentiful, after C. Mossiæ is getting over and before C. labiata begins to flower. The plants flower upon the new growth, often twice in a season, and as it takes a good rest in winter it is usually found easy to grow. In shape and color the flowers are a good deal like those of the autumn flowering C. labiata. In fact when this old species was rediscovered some years ago, many people said it was simply a local form of C. Gaskelliana, but this has been long since disproved.

C. Mossiæ is well known as perhaps the finest and certainly the most variable cattleya in this group. Hundreds of different forms of it exist; some good, others poor, but probably there is not a variety so poor that one would think of throwing it away. C. Mossiæ flowers naturally upon the growth made the year before, though often there are two crops of flowers produced, one on the old growth that has rested in sheath during the winter and another on a new shoot produced from the base of this. It is necessary to give C. Mossiæ a light and warm position in fall to consolidate and finish up the young growth, making it hard and plump and well able to stand any slight check that may be unavoidable under winter conditions. Both these fine species do well in a temperature of 55° at night in summer rising by day with sun heat, and 50° in winter. The usual treatment recommended for the genus is suitable.

Cattleya Percivaliana Alba.

Albinos of all cattleyas are interesting and beautiful orchids and the fine white form of C. Percivaliana illustrated herewith is no exception to the rule. The plant from which the illustration was taken was found by Manuel A. Ordonez, of the firm of Ordonez Bros., Madison, N. J., about 18 miles from Carache in Venezuela. The flower is large for Percivaliana, viz., six inches across; the sepals and petals are pearly white while the lip has the usual dark markings so that, strictly speaking, it is not a true albino, though a very lovely form.

Mr. Ordonez says he found it growing where the temperature in the evening was often down to 40° and even at noon was only around 70°. This proves that cattleyas do not need the heat often given them, and, as we have frequently pointed out in this column, they do far better in a house where there is abundance of air moving night and day. Unless the writer is mistaken it was the late Dr. Percival, of Bridge of Allan, in Scotland, that this beautiful cattleya was named after, and many years ago this then famous orchidist was preaching the doctrine of cool airy conditions for orchids, and practicing what he preached in his own collection. At that time every orchid, whether from the low sweltering valleys or from high mountainous regions, were all consigned on arrival to the hot moist houses then thought necessary for orchids and hundreds of choice odontoglossums and other lovely cool species were sent to this country and to Europe only to be roasted or parboiled to death.

But these conditions have long since been improved upon and in the large well ventilated houses, such as are used for roses and other commercial flowers, the South American cattleyas and lælias find a far more congenial home. C. Percivaliana is unrivaled in the beautiful lip markings. It flowers in winter, before the bulk of C. Trianæ is in and is an excellent commercial species. If grown in pots or baskets the roots should not be overloaded with compost, and the pots or baskets should not be much larger than to take the plants comfortably and leave about an inch margin for peat and moss. The other picture is interesting as showing this plant being lowered from the tree by the collector who climbs the tree, armed with a cutlass and removes the plants.

Cattleya Mossiæ.

Orchid Collecting.

The richest orchid region on the Andean, Orinocan and Amazonian territory is practically unexplored. The expense, hardships and risks incidental to an excursion through uninhabited mountains and woods where guides are scarce, unwilling and at best unsafe, does not tempt the average collector. The exploration is therefore limited to short journeys of not more than three days and in most cases less, through the forest on either side of the generally primitive, commercial routes followed by rubber gatherers and miners.

During my 15 years' experience through the tropical solitudes from the Amazon to the Caribbean sea, I have seen less wonders than certain gifted stay-at-home explorers to whom I sent or brought thousands of orchids taken by my own hands from Brazilian, Venezuelan and Colombian trees and ledges. Although a good part of my observations are lost, because at the time I was unfamiliar with the botanical names of many of the plants collected, and could not classify them, some of my observations may prove of value to collectors.

At the beginning of May, 1892, after having waited three weeks for the complete inundation of the banks of the Rio Negro, I started from Manaos (Brazil) in quest of Cattleya Eldorado, which I found at Mucuras, near Airon, about 150 miles from Manaos. In some cases I was able to take the specimens by simply reaching from our canoe to the trees in the almost submerged forest. Some 150 miles upstream, at Prosperanza, in the neighborhood of Mora, on the mouths of the Cachoeira and Paunini I made a rich harvest of C. superba. Returning to Manaos, I ascended the Amazon to Iquitos (Peru) and from there a steam launch brought me to the Putumayo, where the 14 days' journey on muleback begins through the Caqueta region and wonderful valleys to Pasto. The Caqueta offers an abundant variety of oncidiums and epidendrums, but in the mountains of Quindio, almost unexplored, is one of the most opulent reserves of orchids. There, and not elsewhere in Tolima, as has been vaguely stated, is found Odontoglossum crispum, O. Pescatorei and many others. From the Quindio to Ibague we meet again Cattleya Trianæ and many others. C. Triane is found again at Organos, Pacarni and Carnicerias, near Neiva. From Pacarni the plants are transported to the last named town, on muleback, and then in champanes to Arrance-Plumas, near Honda, thence by rail and river boat to the coast.

From Honda I started on the long tour to the Orinoco river, two and a half days from Honda being the habitat of C. gigas Sanderiana, and Oncidium Kramerianum comes La Palma to Los Hoyos—and Los Llanos—and, with the Lælia Bogotensis from La Sauncha to San Pedro. O. crispum occurs again, although very rarely, from Zupaza to San Cayetano, at Monte Dulce. Souson today is not headquarters of the miltonias, but four journeys from that place, where a veritable garden of orchids, the greatest in Colombia, extends from Santa Rita to Yarumal and Ituango, the three bases of exploration. M. Roezlii, a number of varieties of masdevallias, Cattleya aurea, C. gigas, and Miltonia vexillaria, are there in abundance, while the high slopes of Espiritu Santo, the best port for shipment from this region to the coast, abound in C. Chocoensis.

Cattleya Percivaliana Alba.

O. Pescatorei, which I gathered many years ago, and which still grows at Fusagasuga, occurs in Valle de Jesus and Bolivar; finally at Pie de Cuesta we meet C. Mendelii. Masdevallia coccinea is to be found at a great height from Chita, through Sierra Nevada to La Uvita. On the plains of Casanaro, between Moreno and Pore, C. Schroederiana awaits the patient wanderer. My brother Miguel, who had joined me at Honda, remained at San Nicolas, the head of navigation of the river Casanare to attend to the shipping of the plants gathered after our departure from Pore. With two companions I started down the Casanare, on either bank of which flowers C. superba and others. A raft took us to Buena Vista and Guanabano on the Meta. From Guanabano we started for Cariben, where there is a basaltic rock, emerging like a huge black dome about 15 feet above the highest level of the river, and around which the waters whirl with awe inspiring force. The remainder of the trip to Bolivar, where we arrived in June, 1893, is made on river steamboats.

My wanderings in the center of Venezuela began at La Guayra. There, not far from Macuto, I found three varieties of cattleya with very long bulbs. The flower of one of them was deep violet, not unlike C. superba. C. speciossisima assigned in a recent article to the Cuspenera cordillera I did not find until Chichiriviche, at the cocoa plantation of C. Ponte and from there up to the surroundings of Valencia through the Sierra Costanera a name not easily misspelled by the collector who ever crossed those mountains. From Valencia to Tocuyito reigns C. Mossiae, and I found a specimen weighing about 300 pounds near Bocono, in the Trugillar Andes. From Tocuyito to Timotes C. Percivaliana can be gathered in great quantities. This region, as far as the frontier, is rich in oncidiums. A revolution was going on at the time and not only interfered with my visit to that interesting section, but caused the loss of a good part of my collection. In the eastern region the long trip across the plains was well repaid by the sight of that earthly paradise known as the valley of San Antonio. Between Cumanacoa and that beautiful and bountiful valley Clivell, C. Gaskelliana, Chysis maculata and some natural hybrids are obtained.

MANUEL A. ORDONEZ.

Oncidium Sphacelatum.

This is an old and half forgotten orchid, but we recently noted some fine old specimens in flower and the grower said he found the flowers most useful for cutting. It produces long stiff stems of yellow flowers that last well in good condition for quite a long time. It is of the easiest culture and the plants noted were growing in an ordinary greenhouse. It likes plenty of moisture while growing but a good rest after the bulbs are complete is necessary. O. altissimum is a similar plant and the two are sometimes confused though quite distinct.

Collecting Orchids in Venezuela.

THE ROSE.

THE pretty rambler, Tausendschon, does not relish hard forcing.

LADY GAY is a beauty and has now an assured position as a first class forcing rambler.

EXPERIMENTS with hydrocyanic-acid gas for fumigating roses have not been so successful as with other plants, the tender young foliage being injured in most of them.

CULTURAL NOTE.—Keep greenfly in check from now on, or it will be almost impossible to destroy it. Also, under the present early warm weather conditions, fight red spider good and strong and do not let the soil in the benches get dry on the bottom. Have a good force of water on and syringe without getting too much water on the soil unless it is in condition to stand it. The plants from now on will stand a large quantity of feed, if in the health they ought to be. Give all the air possible every day and do not sap the strength out by too much heat.

Preparing the Compost.

Very often when the grower has a comparatively small range of glass he prefers handling his soil for indoor planting in spring. Although we are, as a rule, busier at this time than at any other season, the preparation of the soil in the spring has its advantages, for the soil is fresh and the manure full strength, and owing to this we can rest assured that our plants are going to derive full benefit of a proper starting condition after planting. The proper soil for the rose house compost, has often been noted in these columns, but for the inexperienced grower it may be advisable to go over the ground again.

In the first place, the soil for roses in general should be of a clay nature, and should be taken from ground that has held a heavy set of grass for several years; a good sod is what is needed to add fiber to the soil. American Beauty being grown principally on own roots will require a strictly stiff clay soil. The same soil will do equally as well for any of the standard novelties, such as Bride, Bridesmaid, Killarney, Mme. Chatenay, etc., our indoor forcing sorts.

Choose a convenient location for ricking up the soil near the houses to be filled; and see that there is fall enough to the ground to carry off any water that would otherwise soak into the compost after stacking it. Use the manure from grain fed cattle, if possible, and, for rose soil, no horse manure should be used at all. Sheep manure is good and can be used in connection with the cow manure, but stick to the cow manure for results. The manure should be turned several times before using and left piled up parallel to where the soil is to be stacked. When taking the sod, the ground should be plowed about six or eight inches deep, according to the depth of the soil, and at a time when the ground is wet enough to keep the sod from breaking up. Soil in this condition can be loaded quickly and there will be very little shoveling to do. Haul the sod immediately after plowing, and employ enough help at the compost end to stack the soil as fast as it is being hauled. To start the compost place a layer of sod grass side down, making the rick a convenient width to work at, say 12 or 14 feet wide; use the best sod at the edges and build up, say a six or eight-inch layer of soil. On top of this sow some good ground bone, about a 3-inch pot full to two square yards. On top of the bone a little of the loose soil should be put; just enough to cover the bone lightly. Now put a layer of manure, about the same thickness as the layer of soil, or to be more exact, the soil should be mixed three parts soil and one part cow manure, if the manure is extra strong. If swill manure is used (a very poor article) use one-third manure, two-thirds soil with the addition of the ground bone in either case, as stated above.

Pile the soil so that it will come to a point at the top and it can be piled six to eight feet high if necessary; the rounded top and sides will carry off much of the rain, if piled outdoors. A temporary shed or cover of some kind arranged to keep the soil dry will more than repay the trouble and expense of building same, for there is nothing more detrimental to the plants than to plunge them into wet soil in the houses. After the soil has been stacked for two or three weeks it should be chopped down and turned, fining it as much as possible, and again ricking it up. It should be turned as frequently as possible before carrying it in the houses, or at least three times. One should use considerable judgment in mixing the soil from start to finish, and have the mixing done as uniformly as possible, using the same quantity of ground bone, etc., on each layer. Now, the soil I have described here, the heavy clay variety, is particularly adapted to plants grown on own roots. When grafted plants are used, the soil should contain some grit or sand in its composition. At least we have found this desirable for plants grafted on manetti, and to test this, one can try some grafted stock potted in the extra heavy soil and some in the same soil to which has been added some sharp sand. The grafted plants are free feeders usually, and manetti roots freely and seem to like a rich open soil requiring plenty of water. It is now time to get at this work and wind it up before the full rush of the spring work strikes us.

E.

Insects in Rose House.

ED. AMERICAN FLORIST:—

Under separate cover we are mailing you a sample rose plant and some soil in which the stock is planted. You will notice that the soil is filled with a sort of small white ant; these ants seem to eat the plants off at the base, and cause them to die. We have just planted a house with these for fall flowering and the ants already have taken about one-fourth of them. Can you suggest any means by which we can kill them? An early reply will be appreciated.

L.

The soil, as your correspondent "L.," Iowa, has noted, contains specimens of the common white ant (Termes flavipes). The roots and the base show considerable girdling. It is an unusually interesting occurrence as, although reports of injuries to greenhouse plants, trees and bushes, are not rare, this is the first instance of such injury to a rose to my knowledge. The writer has had considerable success in the treatment of white ants by puffing buhach, or pyrethrum insect powder, into the holes from which the insects were issuing when the winged forms appeared for flight. This powder benumbs the insects so that they can easily be destroyed by trampling or can be brushed up and burned or thrown into hot water. Where it is possible to pour hot water into the galleries of this pest without injury to plants this is a good remedy. I would be glad to hear from your correspondent as to whether the insects have not bred from decaying wood of the benches or other material in the greenhouse and of the success of the remedies which he employs.

While confining their work almost solely to moistened or decaying timbers or vegetable material of any sort, and books and papers that are somewhat moist, termites are known to work also in living trees, carrying their mines through the moist and nearly dead heartwood. In this way some valuable trees in Boston were so injured as to make their removal necessary. In Florida these insects have been the cause of considerable damage to newly planted groves of orange trees, working around the crowns and in the roots. The damage has been chiefly noted in recent clearings where a good deal of rotten wood still remained in the soil, this accounting for their presence. These insects are sometimes also the occasion

CATTLEYA GASKELLIANA.
Newly Imported Plant Carrying 15 Flowers.

of considerable injury to other trees; and quite recently the writer received information of injurious attacks on pecan, chestnut, and walnut trees at Augusta, Ga. They also cause loss in conservatories, attacking cuttings and the roots of plants. Such injuries have been brought to our notice several times by florists, and D. Chittenden, of this office, informs me that white ants are apt to attack the large stems of herbaceous plants like geraniums. In greenhouses the termites usually originate in the more or less decayed woodwork of the building itself or the plant benches, and they have even been found working in label sticks, the removal of which gave relief from the damage done to plants. In one instance, also, the termites, coming from the wooden benches, entered potted plants through the drain hole of the pots. In prairie regions their work is necessarily on the roots and tubers of plants or the stems of grasses or other low-growing plants.

The presence of flying termites in a building at any time in the spring or summer should be followed immediately by a prompt investigation to determine the extent of the infestation and the possibilities of further damage. The point of emergence of winged individuals may approximately, though not always, indicate the location of the infested timbers, and if these can be replaced injury may be checked, or, under favorable circumstances, stopped. In some cases thorough and repeated drenching of infested timbers, where accessible, with kerosene or some other petroleum oil will afford relief, but probably will not stop entirely the work of the termites, which are constantly recruited from some central colony probably distant from the building. The destruction of winged individuals as they emerge is of no value whatever.

C.

THE VIOLET.

MARIE LOUISE under some one or other of its various names is the most popular double violet in the world.

NEW and improved varieties and cultural methods will do much to reinstate the white violet to some measure of popularity but the purple will always be the standby in this flower.

SPOTTING of the leaves arises from various causes such as sunburn, fungus troubles and others. Don't lump them all under "spot" and seek a panacea. Find out where the trouble lies in each individual case and try to remedy it.

Notes in Season.

Where Marie Louise and similar varieties have been grown indoors for years and their constitutions have become weakened it may be well to try the effects of outdoor summer culture. To ensure success the soil must be good, the position open and the plot used will have to be near the water supply so that the hose can be freely used in summer. It is useless to expect results from planting in rough soil in the field where little attention is given but there is no good reason why outdoor culture should not succeed in many localities where it is not practiced. If proper care is taken in dividing up the old plants the strongest divisions need not go to the propagating bench, but be planted right out at once. As room is likely to be scarce in these beds near the water supply let the plants be set out nine inches apart. This will leave room for cultivation; the plants will have room to spread sufficiently and yet allow a good circulation of air between them.

SWEET PEA FLORENCE DENZER.

For planting outside the divisions should be a little larger than for inside planting—that is only the strongest should be planted out direct, the weaker ones being used inside or at least grown inside for a time until they gain sufficient strength to go to the open. For this purpose they may be planted on benches at about four inches apart and, when well rooted and growing freely, carefully lifted and taken to their outdoor quarters. We noted some time ago a lot of choice young plants that had been raised from cuttings made of the runners pulled off in autumn and these would make perfect stock for the purpose indicated. Should the soil be heavy or close a little gritty material should be worked in as the preparation proceeds and some arrangement must be made for protection until all danger of severe frost is past.

For growing under glass, propagation should now be in full swing. Dig the plants and shake the most of the soil from them; then lay them on the surface of the beds or take them to the shed for division. The old hard center of the plant can, in most instances, be thrown away and there will be plenty of vigorous young shoots all around it. The more the plants can be kept to single crowns the better, all runners starting being pinched out from the divisions. Where fresh young roots are seen starting directly under the crowns most of the older roots can be dispensed with as these are slower in getting down to work than the fresh, growing points. Do not allow the divisions to lie about in a draughty shed or on the benches but let them be planted at once and watered in as soon as planted. A light shade will be necessary to keep the house cool until the full air can be admitted as a closer atmosphere is advisable for the first two weeks after planting.

It has become too much the custom to say that violets cannot be grown in certain localities simply because some one has tried and failed. Disease, as often as not, is the outcome of careless, ill-considered methods of culture, dirty houses and overwatering. The violet is practically a hardy plant and will not be forced. It must have ample light and air at all times and seasons and, to obtain best results, should be so propagated that practically a new plant is produced annually. The plants must be kept absolutely free of insects at all times. Red spider will, in a short time, ruin the most promising crop while a damp, close atmosphere at any time, excepting as noted above for a week or two at the start, leads to thin enfeebled foliage that falls a prey to the first insect or fungoid pest that happens around. Keep the plants hard and clean

constantly by admitting all the air possible and giving them practically outdoor conditions all the year around and there need be no fear as to results. The single varieties are not particular as to soil but Marie Louise, Farquhar and doubles generally like a good holding loam.

Sweet Peas.

A paper read by Wm. Sim, Cliftondale, Lynn, Mass., before the Gardeners' and Florists' Club of Boston, April 21.

The sweet pea, which is the subject I am going to say a few words on to-night, is one of the staples in cut flowers, ranking in this respect next to the violet. I will not go into the ancient history of the sweet pea, but confine my remarks as much as possible to the winter or early flowering section, the advent of which I think is within the memory of the youngest member here. It is only within the past 10 or 12 years that the sweet pea has been placed before the people in the winter months. By growing the old varieties under glass it was only possible to have them at the most five months of the year. With the advent of the early flowering section it was made possible to cut flowers all the year. The first sweet peas I grew under glass were such varieties as Blanche Ferry, Emily Henderson, Katherine Tracy, Countess of Radnor and Emily Eckford. These are of the late or summer flowering section. These varieties when sown under glass in August would not come into bloom until the end of the following April, and seed sown in January would flower as early as that sown in August. They have a season of flowering and will not flower before that time no matter when the seed is sown. The early flowering sweet peas are just the opposite in this respect, for in many cases they commence to flower when only a few inches above the soil, and, if sown in July, they will flower in August. They make a very poor growth in summer and do not do so well as the late varieties. In the winter months, however, they make a very strong growth, and while making this growth they flower, and I feel safe to say that the flower produced then is far superior to the late flowering varieties.

ORIGIN.

The origin of the winter flowering sweet pea is something that seems to be a mystery. There are several who claim this distinction. A. C. Zvolanek of Bound Brook, N. J., is one who claims to be the originator. He claims that he made his first experiments 25 years ago, but did not succeed until he made a cross with the European vetch. In January, 1892 he found some of the plants producing flowers which were small in size, and the plants only attained the height of two feet, but by crossing and recrossing, a strain producing large flowers on long stems, and growing six feet in height, was secured. At this time Mr. Zvolanek was not in business for himself, and raised them mainly for pleasure, and gave seed to any of his friends who wanted some. While in the employment of Thomas Young of New York 1895-6 he had two houses of Christmas Pink. If this story is correct it shows that he must have had them about the time he states in order to get seed enough to plant two houses in 1895. This was three years before it was put into commerce by Burpee.

The origin is also claimed by Thos. Gould of Ventura, Calif. This is the variety sent out by Burpee as Earliest of All in 1898. If I am right I think this strain of Mr. Gould's was first seen in flower among plants of Blanche Ferry. In 1898 Mr. Zvolanek started with Emil Leuly of West Hoboken, N. J., and had at that time six houses of Christmas Pink and Florence Denzer. Now there is no difference between Florence Denzer and Mont Blanc. They are the same in every respect. Benary, of Erfurt, Germany, sent out Mont Blanc, I think in 1902, or four years after Mr. Zvolanek was raising it in Hoboken. No doubt if Mr. Zvolanek would again cross with the vetch the old varieties, and secure an early flowering strain, his claim would be substantiated. He has promised to do this.

SPORTS.

Many claim these varieties are habit sports, that they produce flowers identical to the late varieties that they sported from. I do not believe they do sport myself, for I have grown a great many both inside and out, and have never had one sport with me. Mr. Zvolanek, who has raised practically all the winter flowering varieties, says he has never had one sport with him. Mr. Zvolanek raised Christmas Captain as a result of a cross between Captain of the Blues and Christmas Pink. A grower in England claims Captain of the Blues sported with him from the late to the early type, but I believe this was only a stray seed of Christmas Captain which had in some way got among his Captain of the Blues, for he was growing seed of Mr. Zvolanek's at the time. I think the cause is apparent. It is also possible that if he were growing the two types side by side cross fertilization may have taken place, and the early flowering one may have been the result. It is claimed by some that sweet peas do not mix, but the more I grow of them the more convinced I am that they do mix more or less. There is not one variety I grow but what quite frequently exposes its pollen and pistil, so in this case what is there to prevent insects or flies from carrying the pollen? Some claim these are deformed flowers and would not go to seed anyhow, but this is not the case, for if they are left on the plants they go to seed every time and produce fine seed. I am told this is far more marked on the seed farms in California than in a greenhouse. I believe the early sweet pea is the result of a cross between the old type and some other species. I do not believe the late sweet pea can sport from the late to the early flowering, and will only believe so when I have conclusive proof that this is the case. Many growers, seeing some variety they imagined they sowed without examination, immediately call it a sport. They do not stop to consider that there are many ways of that seed getting there. The seedsman and seed grower cannot always prevent the seed getting mixed.

TYPES.

There are three types of the early sweet pea, the wavy or Spencer type, the common type with the broad straight standard, and the incurved or hooded type. As yet the Spencer type seems to me a little soft for commercial purposes, but this fault may be remedied in new varieties. The standards which are wavy, have not got the strength of the common type, and fold together when the flowers are bunched, in such a way as to make them look small, although the flowers are larger than the common type. The common type although not so large as the Spencer is the best for commercial purposes; their stiff straight standards do not fold together, and the flowers remain open. The incurved or hooded are the least desirable; their flowers look small beside the ordinary type. They, however, have very long, wiry stems, and some of the best fancy varieties are of this type. They are also very strong growers.

HYBRIDIZATION.

Most of the varieties with the exception of the ones sent out first are the results of crossing the early and late varieties together. This is done at the time the two types are in bloom together. Mrs. Charles Totty, Mrs. Alexander Wallace, Mrs. George Lewis, Christmas Captain, W. W. Smally and a number more are the results of crossing the two types. Varieties raised by crossing the early type with the same type are usually weak growers. It seems to take the blood of the late varieties to give them constitution. I noticed this the past winter on a batch of recrossed Christmas; this was Christmas crossed on the late flowering Blanche Ferry. There was about 50 per cent of the old type among them, but the early flowering ones were very much stronger and produced stronger flowers on longer stems than Christmas and grew three feet higher.

STRAINS.

There are now strains of these peas in England, Germany and Algeria. I am unable to give much information about these as I have never managed to get any of the seed. I have seen the Algerian strain growing at Mr. Zvolanek's; they were not in flower then, but the growth and habit was identical to what we have here. He later sent me some of the flowers. They were of very poor color and variety, in fact they were certainly 10 years behind what we have here now. Flowers of the English strain resembled the Algerian strain and Mr. Zvolanek says they are the same varieties or mixture he sold five years ago to the firms who are selling the seed. It is very hard to hold the stock of any one variety by the raiser, because it is sent to California to be grown along for seed, and while there the seed can be carried from one place to another.

SWEET PEA SOCIETY.

What we need here now is an American Sweet Pea Society, for, at the present time, there is nothing to prevent any one from selling sweet peas under any name he pleases. We have Earliest of All, Christmas Pink and Xmas Pink. These three varieties are the same in every particular. The selected Earliest of All is earlier than the others, but the flowers of all three are identical. There

SWEET PEA LA MARQUIS (PURPLE).

is Mont Blanc and Florence Denzer; these two are identical. There is also Zvolanek's Watching, Burpee's Earliest White and White Bird; these are all identical. We have Flamingo and Christmas Red, these are identical, and Sunbeams and Canary Bird are identical. Aside from keeping the names straight it would stimulate the growing of sweet peas, and no doubt many would go into the improving of them in the way the carnation men have done with the carnation. If a number would get together with this in view it would be hard to predict what the sweet pea would be like 10 years from now. Just fancy what an exhibition you could have if a number got together and did as the carnation men have done. The sweet pea is everybody's flower, being within the reach of all. Thus far Mr. Zvolanek seems to be about the only one to improve this class. Only a few years ago the first of this type was seen; now he has practically all the colors seen in the late varieties. I think great credit is due him for what he has accomplished. Putting aside Christmas Pink, Mont Blanc and Sunbeams he has raised practically all the other varieties now in cultivation. He is doing for this type of peas what Henry Eckford, in England, did for the late flowering section.

CULTIVATION.

To grow the sweet pea to perfection under glass you must have a greenhouse suitable for the purpose. It should be at least eight feet high on the sides, four and a half feet being glass. Mine are seven feet and I find the side rows strike the glass when the vines are about half grown, thereby giving me half a crop. My center rows are about right, they are 12 to 15 feet high. The higher they grow the more and better flowers you get. We plant the rows five feet apart and in a line with the supports of the greenhouse. The uprights are 12 feet apart, so in supporting we run twine from one support to the other on each side of the row. This I have found the best method of supporting. I have tried wire netting. This is only a nuisance as the vines do not cling to the wire, which causes just as much tieing as if it were not there. It often causes injury to the vines as a sweet pea stretches many times more than a foot in developing; if held back by anything in growing the growth looks like a spiral spring, and picking the flowers is made very difficult. The side rows are planted five feet from the sides of the house, and all the heating pipes are on the sides. They are very susceptible to red spider, and, as they will not stand syringing, the further you can afford economically to have them from the pipes the better. We have not changed the soil in the houses since they were built four and five years ago, and we find the vines are getting more vigorous each year. In the same soil a crop of tomatoes and violets are harvested each year. The soil was originally 18 inches deep, but by the application of manure each year the depth is now two and a half feet. The tomato crop is on the wane the middle of August. When these are cleaned out we trench the house over as deep as the soil, bringing the bottom soil to the surface. In the bottom of the trench we put three inches of decomposed cow manure; one foot from the surface we put on three inches more of the same material. The house is allowed to remain in this state until near time for sowing the seed. The soil is then usually very dry so we ram it down enough to cling together while the house gets another fork over. This time we go down one foot and mix the top layer of manure with the surface soil. We then make the surface as near level as possible, and thoroughly water the soil, giving enough to penetrate the entire mass with a strong dose of liquid horse manure. In about three days, depending on the weather, the house will be ready to plant.

SOWING THE SEED.

We sow the seeds about one and a half inches apart. We make the drills one inch deep and do not allow more than one inch of soil over them. We do not pull any more soil towards the root as is often recommended, but let it remain level. If more soil is pulled around the base of the plant, stem rot is sure to follow. We do not water the plants again until they are up about three inches. Of course, they can be grown on a bench with a few inches of soil but the results will be just what you make them: a weak growth and a crop of short stemmed flowers. These soon play out as there is not enough soil or food for the vines to live on. They may be made to flower any time you wish by increasing the temperature, but the best results are obtained by growing at a temperature just above freezing until the buds can be felt in the crowns of the plants. Then the temperature should be gradually increased, say one degree a night, until you reach 48°. This, I think, is about right although in midwinter I think they move a little better at 50°.

SWEET PEA MRS. ALEX. WALLACE (LAVENDER).

As the days lengthen a little cooler temperature seems to suit better. A rise of 10 to 15 degrees should be given during the day in sunny weather. In spells of cloudy weather 55° is high enough during the day. If a high temperature is given in dark weather the growth gets soft and wilts when the sun comes out bright again. While the plants are young they should be regularly fumigated so that there will not be a sign of lice when they commence to flower. If they are clean at this stage it will not be necessary to fumigate while they are in bloom. It is impossible to sell sweet peas that smell of tobacco. Tobacco also bleaches the flowers of some varieties, and makes them look like some other variety. We sometimes hear of trouble from buds dropping. This is more the case in midwinter than at any other time and is

caused by too cool a temperature or a sudden chill, or too much water. Should a house be allowed to go near the freezing point in midwinter the wholesale dropping of buds will be sure to follow. Diseases have not shown themselves with us. Sometimes we see a plant that looks stunted with yellow streaks in the foliage. This we have attributed to too rich soil or the roots striking manure that was not thoroughly decomposed. They take an abundance of water in the flowering season but require very little in the early stages of growth. They should be provided with proper drainage so that if too much water is given it will settle into the subsoil, and no bad results will follow.

TIME OF FLOWERING.

I find in experimenting with the newer varieties of peas that some come into bloom ahead of the others. Take reselected Earliest of All and Watchung for instance. These two will come into flower fully two weeks ahead of the other varieties, and for early purposes they are a fine pair to grow together. They are both black seeded. These will flower in October if sown in August and will be in full crop for Thanksgiving. For a later crop I prefer Christmas Pink and Florence Denzer. These are the peers among sweet peas at the present time. Denzer is two weeks later than Christmas Pink and is white seeded. It should be sown in sand and transplanted into flowering quarters at the time the seed of Christmas Pink is sown. They will then commence to flower together. There is now quite a demand for some of the fancy varieties. These sell best in the spring, but will soon get into demand all winter. They are something new and the people are a little sceptical about buying them. They will, however, find a ready sale once there is enough of them around to attract attention. Among the new varieties I think Mrs. Charles Totty the best. It is the same shade as Countess of Radnor, and is a very strong grower, having two foot stems. W. W. Smalley comes next. This is a shade of satin pink. It is a fine seller but a trifle short in stem. Mrs. Alexander Wallace is a good one. The color is dark lavender and sells well. Mrs. Wm. Sim sells well; the color is salmon pink. It produces very long stems, many being two feet in length. The improved Mrs. F. Dolansky I have great hopes in. It is the color of an Enchantress carnation. A limited quantity of Le Marquis and Christmas Captain can be sold. Both are purple shades. The same may be said of Blue Bird, Mrs. Eddy Wild, deep crimson, but the flowers are small in size and the stems rather short.

A WARNING.

To those who are contemplating growing sweet peas the one important thing is to have the right seed. You may get your house in the best possible condition, yet, without the right seed, failure is sure to follow. Many seedsmen are selling seed of the early varieties, which is not true. Very few seedsmen know that there is any difference between the two, and substitute with the late varieties. Not a winter passes but what some poor grower gets hit hard in this way. He sows his seeds. They start fine and grow well, but he gets no flowers. He is paying high for his experience. I will tell you an experience of my own to show what harm can be done in not knowing what you are planting: A few years ago I planted a house with Earliest of All. I bought my seed from a reputable seed house. This turned out to be the best house of peas I had ever sown.

The seed was all true and to be sure of seed for the following year I bought seed again from this same firm with the assurance that it was the same as I had bought the preceding August. My intentions were to build another greenhouse and raise two crops, one for early, the other for late cutting. The house was built and put into the best possible condition. The seed was sown in August and all came up in fine shape. They grew lovely, but somehow or other they did not look right to me. The vines looked too heavy and strong. I, however, did not like to disturb them and I let them grow. The other house was planted the middle of November after a crop of mid-season chrysanthemums. I procured the seed for this house from another source. The beginning of March they commenced to bloom and by April 1, $2,000 worth of peas had been sold from this house. The other house did not commence to flower at the beginning of April. The vines had reached the glass and were pulled down several times. It was then deemed advisable to clear the house out and consign the vines to the rubbish heap. This was done after keeping the house, which was 30x360 feet, at a temperature of 50° all winter long. I was out by this deal $6,000, this being based on the product sold from a house of similar size the year before. I mention this to show the seedsman what a great injury can be done by selling something that is not true to name, and to the grower to be doubly sure before he risks too much space in something he is in doubt about. The safest way is to procure your seed in advance and test it yourself. Sow some of it, and if the plants grow strong and stocky and bush round the base of the plant you have the wrong sort for winter flowering, but if the plant runs up to a single stem and does not bush you have the right kind. The early types very seldom break near the ground. The one shoot forms practically the whole plant. Some side shoots are made but these never attain the strength of the main shoot.

CHRISTMAS PINK, FLORENCE DENZER AND THE ZVOLANEK CUP.

THE RETAIL TRADE

THE trailing arbutus is a good seller.

WHITE VIOLETS have been very popular for ladies' wear in New York.

YELLOW CHRYSANTHEMUMS were among the Easter flowers in Chicago.

A LARGE healthy palm is one of the most attractive plants for a good store.

SOME New York retailers now employ sandwich men in advertising their business.

THE bamboo folding canopies are very useful for wedding decorations, saving a great deal of time and labor.

THE very pale tinted and white mats should not be exposed too freely as they soon get soiled. The darker colored ones are less easily damaged.

THERE is a big profit in the many little nick nacks of baskets, filled with ferns, especially where there is a greenhouse in connection with the store.

Decorated Azaleas.

A little time and money spent on decorating azaleas pays well. A customer will often pass by well grown and well flowered plants, and pay little attention to them, but the same party will take an interest in plants such as shown in the illustration when colored mat, chiffon, ribbon or sprays of Asparagus Sprengeri are tastefully associated with them. In the matter of blending or contrasting the colors of ribbons and flowers there is scope for much originality and taste. The photograph here reproduced is of a plant decorated by John Mangel, Chicago, and illustrates how plants may be improved with very little trouble or expense.

Easter Business in Chicago.

With plenty of good stock, both in cut flowers and pot plants and delightful weather, excepting in the forenoon on Saturday, the Easter trade, looked forward to hopefully by retailers, was probably the best on record. "More like Christmas than Easter," said one prominent retailer and in every case the returns were greater than those of last year. Unfortunately, the growers still persist in holding back stock and in several instances the cut flowers sent out quite late in the week bore evident traces of having been kept much longer than was desirable. Probably never in the history of the city's trade were more baskets of plants sold. Hundreds of these were disposed of from the small made-up fern or bulb basket at a dollar or so up to splendid arrangements at $50.

The most prominent Easter plant this year was certainly that lovely rambler rose, Lady Gay. It was seen everywhere from small plants in 4-inch or 5-inch pots up to large handsome specimens like those used by Samuelson in his unique window display. It is certainly a great acquisition for the retailer who

AT WILLIAM SIM'S, CLIFTONDALE, MASS.
House of Winter Flowering Sweet Peas,

has much make-up work to do and it was taken full advantage of in the excellent baskets put up by such artists in their line as Wienhober of Elm street, Wm. J. Smythe, Samuelson, Harry Rowe, Fleischman, John Mangel and others. Its delightful soft coloring contrasts well with nearly every other flower while its great freedom of flowering and graceful habit make it possible to put it quite alone and yet give a perfect picture. Hydrangeas were plentiful and good. Easter lilies were plentiful and, though generally shorter in the stem than usual, the plants were clean and healthy and abundantly flowered.

Bulb stock was plentiful; tulips were exceptionally good but hyacinths, as far as we could see, were away below the average in quality though plentiful. Azaleas were fine and plentiful both the ordinary Indian varieties and the newer dwarf varieties, such as Hexe and others that come in so well for making up small baskets. Andrew McAdams of Fifty-third street was well to the front with flowering plants of all kinds. His large house, filled with stock just in the pink of condition, was a grand sight early in the week, but at the end he was pretty well sold out after an extremely busy time. The azaleas were exceptionally fine, all the popular varieties, such as Vervæneana, Professor Wolters, Van der Cruyssen and others being supplemented by a fine stock of the dwarf varieties noted above also Novelty, an excellent double red that is very promising. His tulips were very good indeed, including such fine varieties as Goldfinch, Chrysolora, Couronne d'Or, Vuurbaak and the lovely pink Salvator Rosa. Spirea astilboides was well done here also S. Gladstone, which Mr. McAdams finds sells better than the older variety owing to its closer, fuller habit.

As noted elsewhere in this issue, Wm. J. Smythe had his troubles this Easter. First Michigan avenue was torn up in front of his window and to make matters worse an automobile crashed through it after much of his choice Easter stock was displayed. But with commendable pluck and energy things were straightened out and we were glad to note that a very fine business was done. Certainly it was deserved as Mr. Smythe had some splendid work in baskets and other choice arrangements. A very pretty foliage begonia was used with excellent effect by Mr. Smythe's decorator among other plants. Large baskets of Boston ferns and English ivy were very noticeable and he had fine hydrangeas. The north window was laid out as a garden with miniature paths, box hedges and flower beds. Samuelson's Michigan avenue window was treated in a novel and effective manner. In the background was a white garden seat very plain in design draped with superb plants of Lady Gay, La Fiamme and other rambler roses. White doves were placed in natural positions and in the front was a flower bed done in dwarf Baby Rambler and other roses. We are not usually impressed with these methods of window decoration; they savor too much of the department store; but when carried out so well and so naturally as in this instance they command admiration. Grand pot plants, cut flowers and baskets were well displayed and an excellent business was done.

The Ernst Wienhober Floral Co., had most effective displays of everything in season. The baskets were perfect and here again we noted Lady Gay delightfully displayed. Everything here was in the highest order and the firm well deserved the fine business done. Down town all the principal retailers did well. Fleischman's business was 50 per cent higher than that of last year and on Sunday morning when the last of the delivery vans had left the store it was practically empty. On Thursday and Friday an immense stock was displayed, plants, baskets and all of the charming devices which Geo. Weinhober, the capable manager here, knows so well how to arrange; but all were cleared out and the fine store looked deserted. The same may be said of Harry Rowe, who this year excelled himself in the art for which he is noted. There were a few plants and small baskets left in the store early on Sunday morning, but the large room at the rear, which the day before was full to repletion with grand specimens of the best class of work, was empty and forlorn looking. John Mangel and his capable decorators were cheerful and busy right along and did a splendid business in all lines. Hauswirth, The Eaton Flower Shop, A. Lange and, in short, all others in the city, tell the same tale. There was a tired bunch of men and women connected with the retail trade on Sunday afternoon, but all were "weary with well doing" if we may be allowed so to twist the meaning of a phrase.

Fleischman's Easter Delivery.

The accompanying illustration was prepared from a photograph taken on Easter morning at Fleischman's Chicago store at Van Buren street and Michigan avenue. In order to take care of the special Easter trade in plants, cut flowers and baskets, 10 delivery vans, besides numerous boys, were needed, and, as no plants were handled under $5 and ranging up to $25 for good hydrangeas and similar stock, one can get an idea of the bulk and importance of the trade done here. Baskets in all conceivable shape and all of high quality were sent out in great numbers and the amount of business done was greatly in excess of that of any previous Easter. Over 35,000

SWEET PEA RE-CROSSED CHRISTMAS PINK.
Two Feet Higher than Christmas Pink.

violets alone were handled around the holiday, and other cut flowers in similar large quantities.

New York Window Decorations.

The ingenious decorator at Geo. M. Stumpp's had. aside from a grand window display of all the seasonable plants, a novelty in the form of a mammoth Easter egg, about three feet in diameter. The shell was twine netting stretched over a wire frame and it enabled the sight-seers to get a good view of the large brood of incubator chickens that were domiciled inside. It was the centerpiece of one window and was banked with flowering stock.

Wadley & Smythe showed a very pleasing window effect in large white azaleas with pink rambler roses, in potholders, overhead. In addition, one side of their store was filled with new varieties of pink ramblers, many of the plants being of great size and decidedly the feature of their offerings, though they had a large stock of all other Easter plants.

C. A. Dards made a remarkably fine exhibit of Lady Gay and Dorothy Perkins roses, grown to standards. There was also a splendid stock of lilies, azaleas, hydrangeas, bougainvilleas and all other stocks. A noteworthy feature of this store was the discriminating taste shown in ribbon decorations of single plants and combinations.

The retailers showed very handsome windows, a prime factor being an abundance of fine pot stock. In Thorley's Broadway store windows there were beautiful effects in orchids, Dorothy Perkins roses and medium sized plants of bougainvillea, all the plants being decorated with ribbon matching the shade of the flowers.

J. H. Small & Sons exhibited a splendid collection of basket combinations, notable being lilies, wistarias, azaleas and rambler roses. Unique effects were attained with a number of combinations in osier or green willow baskets, which were a relief to the eye after viewing yards and acres of red paper and matting.

Thomas Young, Jr., had, as he always has, very handsome windows. There were many fine basket and hamper combinations of lilies, rambler roses, azaleas and other plants. Noteworthy, were fine plants of Pandanus Veitchii.

A window for the plain people was J. P. Klausner's, 314 Columbus avenue, where many handle baskets of pansies, very tastefully arranged and decorated, were to be seen.

Myer, Fifty-eight street and Madison avenue, had his large window space filled with the best in Easter offerings. In addition, he had a vacant store room near at hand, filled up with plants.

Mengham & Westwood, 422 Columbus avenue, had fine window decorations in purple and white wistarias and cattleyas banked with Adiantum Farleyense.

The Easter Business.

Through the courtesy of our correspondents all over the country we are again enabled to present our readers with reports of the trade done during the recent Easter festival. It is pleasing to note that, in spite of the hard times talk, trade generally has been well maintained. In a few cases the amount of sales has dropped considerably, but this is mostly in southern points, where the abundance of outdoor flowers has lessened the sales of indoor stock. The plant trade in the larger cities has been enormous, and high priced baskets and various other devices have sold well. Stock has been exceptionally good for the late season and altogether the trade is to be congratulated on the way it has come through, practically unscathed, one of the worst periods of business depression known for many years.

RICHMOND, IND.—Easter business has been excellent according to G. R. Gause. Roses, carnations, lilies and all flowering plants sold well at prices equally as good as former years. The season up to date has been a good one, a large amount of funeral work has kept us busy. Although a great amount of stock has been thrown on to this market this season, no flowers have gone to waste with us. The prospect for spring plant business is also encouraging and many advance orders are already booked.

LINCOLN, NEB.—C. H. Frey reports sales as 25 per cent greater than those of last year with prices about the same and plenty of stock. Flowering plants sold well, especially lilies, roses, hydrangeas and tulips in pans. Roses, carnations, lily of the valley and the best varieties of narcissi sold well, but tulips, cut lilies and the cheaper narcissi moved slowly. Too many lilies were grown and there was a great rush at the last minute, people waiting as usual until then before buying.

SAVANNA, ILL.—A 25 per cent increase in sales with prices 5 per cent better, is the report of J. Y. Lambert. Carnations and roses were short and plants were equal to the demand. Geraniums, pansies and verbenas sold well but dahlias were slow. There was a better demand for good quality flowers. The "City Beautiful" idea is abroad and the prospects for future trade are good.

KNOXVILLE, TENN.—The late date of Easter and the large stock were responsible for the depreciation in trade and low prices, according to Chas. W. Crouch. Lilies were in good demand though bulbous stock was not much wanted. In cut flowers the best demand was for carnations and American Beauty roses. Outdoor flowers were large competitors.

BIRMINGHAM, ALA.—A 25 per cent increase in sales at better prices than last year and a short supply all around is the report of Lindsay, the Florist. Lilies led in demand, followed by roses and carnations, sweet peas and violets being least asked for. The weather was ideal and there was much interest shown by the general public in the fine displays.

GRAND RAPIDS, MICH.—Crabb & Hunter Floral Co., report a larger quantity of flowers than ever before, but cash receipts less, owing to cutting of prices by dry goods stores and druggists. Both plants and cut flowers were in excess of demand, the only plants that sold well being azaleas, hydrangeas and lilacs. This is indeed an off season.

LITTLE ROCK, ARK.—Tipton & Hurst report a decrease in trade of 40 per cent with prices no better than last year and the supply in all cases equal to the demand. Lilies sold best in plants, and roses, carnations and lilies in cut flowers. The abundance of outdoor flowers is doubtless the reason why Easter sales were so poor.

BRATTLEBORO, VT.—Trade and prices about the same as last year is the report of C. E. Allen. Stock sold out well, lilies, carnations and daffodils being most in demand.

EASTER SUNDAY MORNING AT FLEISCHMAN'S, CHICAGO.

CARLISLE, PA.—A slight decrease in cash sales over those of last year with supply equal to the demand is the report of Jesse Robbins. Lilies were in good demand, also small, cheap plants. Carnations, violets and roses also sold well. Trade on the whole was not quite as good as the banner year of 1907.

GRANDVILLE, MICH.—A 10 per cent decrease in sales, with prices as last year and supply, in all cases, equal to the demand, is the report of the Grand Rapids Greenhouse Co. Plants were in great demand, especially lilies and bulbous stock. Roses sold only fairly well, but carnations were good property.

MITCHELL, S. D.—The Mitchell Greenhouses & Nurseries report a 20 per cent increase in sales with prices the same as last year. Neither plants or cut flowers were equal to the demand and there was a heavy demand for flowering plants. The daffodils and lilies sold best; violets and roses slow.

AURORA, ILL.—Jos. M. Smely, reports a little less trade than last year with prices lower on some items. Supplies of plants and cut flowers were about equal to the demand. Lilies brought more money than other plants and bulbous stock and palms sold well. Roses and hydrangeas were slow.

BRAMPTON, ONT.—The Dale Estate reports sales less than those of last year with lower prices. Both flowers and plants were equal to the demand. Bulb stock was least asked for, and roses were the best sellers. The local cut in lilies down to six cents per bloom revived the regular trade.

OLEAN, N. Y.—A 10 per cent falling off in the amount of sales with prices about the same, is the report of F. H. Johnson. There was plenty of good stock in plants, and roses and carnations were the best sellers. The weather probably had much to do with the falling off in trade.

ST. JOSEPH, MO.—The Stuppy Floral Co. reports sales about the same as last year. Lilies seemed plentiful at first but sold out well. Violets and Richmond roses were scarce. Hydrangeas and azaleas sold well, but there was little demand for bulb stock.

FREEPORT, ME.—J. Burr reports larger sales at the same prices as last year. Neither plants or cut flowers were equal to the demand. Lilies, roses, genistas and hydrangeas sold best in pots, while for cut flowers, lilies, roses and carnations were the favorites.

ERIE, PA.—Baur Floral Co., reports sales about the same with an over supply of cut flowers but prices maintained. Everything good in the shape of plants sold, also cut flowers; it was the cheaper, poorer grades of stock that were left over.

ASHLAND, KY.—Wm. H. Carp reports that roses and carnations were sold in great quantities, at least 25 per cent more than in other years. The fine weather led to a great demand for all classes of pot plants and cut flowers.

GALESBURG, ILL.—I. L. Pillsbury says trade was not equal to last year and prices less in some few instances. There was a large surplus, both of cut flowers and plants, Easter lilies being short and most in demand.

JACKSON, MISS.—W. J. Brown reports a serious falling off in trade, small pot plants being most in demand. This he refers to the early spring and the lateness of Easter, the gardens outside being full of flowers.

EVANSVILLE, IND.—The Wm. Blackman Floral Co. says that sales were about as last year but prices not quite so high. Lilies were scarce, also American Beauty and other roses, but other stock was plentiful.

DECORATED AZALEA BY JOHN MANGEL, CHICAGO.

Asparagus Sprengeri on Handle.

Shipping Flowers to Arizona.

ED. AMERICAN FLORIST:—

I am obtaining most of my flowers from California. What kinds, if any, could I have shipped from Chicago to arrive here in good condition?

Arizona. H.

In reply to "H" it will be only on rare occasions that any kind of flowers would carry so far and then everything would have to be favorable. If there is anything that would ship it would be Bride, Bridesmaid and American Beauty roses. If "H" would send an order to one of the Chicago houses for a few of each variety of flowers as a trial shipment he would have the practical side of it. D.

Twenty Years Ago.

APRIL, 1888.

Bishop Whitehead of Pittsburg was preaching against the use of flowers at funerals or in church at Easter.

It was thought that the craze for artificially dyed flowers was ended.

Trade at Easter was far greater than ever known before, loose cut flowers being in all cases preferred to designs.

Patents for new plants to prevent unauthorized persons from propagating them was the pipe dream of some plantsmen.

Fifteen cents' worth of white flowers to make a pillow was one order for Easter to a well known florist.

Crotons were much grown for sale as house plants as they stood the dry atmosphere well.

Mulching indoor roses was coming in for condemnation by many experienced growers.

The original Kentucky Society of Florists was organized.

Cut fronds of Pteris tremula were largely imported from Bermuda.

Good flowers of American Beauty rose sold in New York at six cents each.

A dinner table decoration in New York consisted of a huge star 28 feet in diameter.

The Brooklyn Times credited John Henderson of Flushing with sending out 200,000,000 roses a year.

OBITUARY.

Ferdinand Bendt.

Ferdinand Bendt, who has conducted a growing and retail florist business for about 30 years at Sixth and Orange streets, Newark, N. J., died April 11 of typhoid fever, after an illness of four days. His wife died April 14 of the same disease. At the time of his death Mr. Bendt was 70 years old. He was born in Koenigsberg, East Prussia, and came to this country when 28 years old. He worked for a short time in the south and returning to the vicinity of New York secured a position as a private gardener with a well known family named Patterson, where he remained until starting in business for himself. He and his family were highly esteemed by many neighbors and friends and the sympathy of the community for the two daughters, thus doubly bereaved, is spontaneous and sincere. They are aged 13 and 6 years years respectively.

THE AMERICAN FLORIST

1885 TWENTY-THIRD YEAR. 1908

Subscription, United States and Mexico, $1.00 a year; Canada $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

When sending us change of address always send the old address at the same time.

Advertising rates on application.

From its first issue the AMERICAN FLORIST has accepted only trade advertisements.

Advertisements must reach us Tuesday (earlier if possible), as we go to press Wednesday.

Sympathy.

Is nature all so beautiful?
The human feeling makes it so;
The sounds we love, the flowers we cull,
Are hallowed with man's joy or woe.

The little speedwell's tender blue
Is not so pure and delicate,
As is the simple wish in you
That will its tardy advent wait.

The breezy hush, the rustling change,
Of leaves that on the poplar shake,
Are not so sweet, or half so strange,
As flutter in your heart they make.

The wishing for the green of trees
Is fresher than the leaves that come;
The blowing of a scented breeze
Is sweetest round a happy home.

—THOMAS ASHE.

FLATS with one loose end or side are far handier for transplanting from than others nailed all around.

GROW what sells in the home market but occasionally try out anything good with which the home market is not supplied.

A GROWER states he has had far less thrips in his houses since cleaning up and burning all rubbish and litter early every spring.

FLOWER SHOWS as a means of raising money for city beautifying seem to be popular in the west. This is a good movement.

RECENT bulletins of the West Virginia Experiment Station contain a lot of useful hints on buying and using commercial fertilizers.

SPRING may have come all right but it is well to remember that spring is not summer and is apt to give growers many queer surprises yet.

MANY of the series of articles on "Half Hour Gardening" appearing in the Chicago Daily News are decidedly above the average of this class of work.

THE GARDEN is out with a colored plate of a new rose, Hugo Roller, which certainly appears to be a very beautiful thing. The raisers are Wm. Paul & Son, Waltham Cross, Eng.

SWEET PEA growers cannot fail to be interested in the excellent practical paper by Wm. Sim, which was read at Boston this week, given in this issue. It is a notable addition to the literature on this increasingly popular flower.

THEFT of postage stamps with firms doing a heavy catalogue and mail business will no doubt be curtailed somewhat by the new postal regulation which permits purchasers "for identification only, and not for advertising, the puncture or perforation of letters, numerals or other marks in United States postage and special delivery stamps."

Society of American Florists.

NOTICE OF REGISTRATION OF CANNA.

The Frank Cummings Bulb & Plant Co., of Meridian, Miss., apply for registration of a canna as follows: Canna, W. E. Cottrell, seedling of L. Patry, originated with us; flower large, dark salmon pink, slightly flecked with red, petals large, rounding, slightly recurved, large branching flower heads, very broad leaves, slightly edged with bronze, thick and leathery, growth very vigorous, height four feet.

Public notice is hereby given of this application for registration and any persons objecting to the same or knowing of any reasons why the registration should not be made as above, are requested to forward a statement of their objections to the undersigned at once. No objection being received within 20 days from this date, the registry will be completed. W. N. RUDD, Sec'y.

April 27, 1908.

National Council of Horticulture.

We have received from J. H. Burdett the sixth installment of the press service of the National Council of Horticulture. As usual the articles are of a varied and useful character and the wide publicity given to such subjects by this method cannot fail to be of great benefit to horticulture generally. The present series consists of: "Brussels Sprouts," "Kohlrabi," "A Backyard Garden," and "Principles of Shrubbery Planting," all timely notes written in a plain, easily understood manner.

A New Botanical Garden.

The new botanical garden of the Johns Hopkins University at Homewood, Baltimore, Md., is in charge of Prof. D. S. Johnson. It is contemplated to commence at present with a biological garden and one greenhouse for biological work. Later on there will probably be added a systematic garden of about two acres. In addition to these plants, trees and shrubs of botanical and ornamental value will be planted on suitable sites in Homewood park conforming to the general landscape plans. Wm. H. Witte, who has had extensive experience in similar institutions in Germany and Italy, with a general horticultural experience of some 32 years, is the chief gardener in charge.

Hail Insurance.

The following letter speaks for itself:

To John D. Esler, Saddle River, N. J.

The check for $12.64 received in payment for my loss of glass from hail. I wish to thank you for same and for promptness in settlement. I shall not be without hail insurance as long as I am in the business. It was quite a relief, when we stood and listened to the hail rattling on the glass, to know that we could get some help from insurance.

R. S. MCMURRAY.

Bellefontaine, O.

A Catalogue Question.

ED. AMERICAN FLORIST:—

Is it just and fair to the retail florist for the wholesaler to send his catalogue to parties not in the business? We have been hurt in many instances by this. Parties in our section not only order for themselves, but any of their friends, at wholesale prices, then, when you offer goods at retail prices, they talk of how high priced you are. It does no end of harm to our business. Is there any way influence could be brought to bear on the wholesaler to discontinue sending wholesale catalogues indiscriminately?

C.

Dickson's Roses.

In the case of Alexander Dickson and Sons, the master of the rolls made an order last week for fuller and better answers by the defendants to interrogatories by the plaintiffs in the action brought by Alexander Dickson & Sons, Ltd., v. Alexander Dickson and Sons for an injunction to restrain the defendants from selling roses or seeds not grown or propagated by the plaintiff company as Dickson's roses or Dickson's seeds, and from carrying on the business of nurserymen and seedsmen under the style of Alexander Dickson & Sons, or any style in which the name Dickson appears, without taking reasonable precautions clearly to distinguish the business carried on by the defendants from that carried on by the plaintiff company. The plaintiffs are well-known rose specialists, carrying on business in Newtownards, Belfast, Dublin, Blackrock, and also in Hertfordshire, and the defendants, Alexander Dickson and his two sons, carrying on business as seed merchants in Parliament street, Dublin, under the name of the Ashbourne Agricultural Company, and as rose growers and nurserymen, at Woodlawn, Dundrum, under the name of Alexander Dickson and Sons.—Irish Daily Independent.

An Insecticide Case.

April 7.—Papers were filed at Salem, in a suit of Wm. Sim, against R. & J. Farquhar of Boston, in an action in which Sim sues for $20,000. The plaintiff says in his declaration that the defendants are merchants in the city of Boston and do keep and sell Nicoticide, a preparation to kill insects in greenhouses and that it is warranted not to damage foliage or flower, and that the vapor will not alter or discolor the blossoms. That he bought and used the preparation as directed in a house containing 66,000 violet plants and five rows of sweet peas, 200 feet long, and that it was not as warranted and because of the use the blossoms and plants were destroyed, and he sues for the above amount. The papers are from the office of Niles, Stevens, Underwood & Mayo, Lynn.—Lynn, Mass., Item.

Meetings Next Week.

Baltimore, Md., April 27, 8 p. m.—Gardeners' Club of Baltimore, Florists' Exchange hall, St. Paul and Franklin streets.

Cleveland, O., April 27, 7:30 p. m.—Cleveland Florists' Club, Progress hall, 2610 Detroit street.

Lake Forest, Ill., April 29, 8 p. m.—The Horticultural Society of Lake Forest, Council club, city hall.

Lake Geneva, Wis., May 2, 8 p. m.—Lake Geneva Gardeners' and Foremen's Association, News building.

Minneapolis, Minn., May 1, 8 p. m.—Minneapolis Florists' Club, Latham's conservatory, 83 South Tenth street.

Pasadena, Calif., May 1, 8 p. m.—Pasadena Gardeners' Association, G. A. R. hall, East Colorado street.

San Francisco, Calif., May 2.—Pacific Coast Horticultural Society.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Advs., See Ready Reference Section.

Every paid subscriber to the AMERICAN FLORIST for the year 1908 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—Grower of roses carnations and 'mums; experience 10 years. Key 516, care American Florist.

Situation Wanted—By grower of roses carnations, 'mums and bedding stock. Key 517, care American Florist.

Situation Wanted—As an assistant in greenhouses; age 27, single; English; private place preferred. Key 514, care American Florist.

Situation Wanted—Young American would like a position in first-class store; long experience no objection to Pacific coast. Address Key 502, care American Florist.

Situation Wanted—A thoroughly practical man is open to position as head gardener; highest references as to ability and character. Address Key 513, care American Florist.

Situation Wanted—A1 assistant gardener on private estate or public place; 8 years' experience in general greenhouse work and landscape; good references; age 23. Please state wages and particulars in first letter. Address W. F. B. R. F. D. No. 2, Alexandria, Va.

Situation Wanted—By good all around florist, single, A No. 1 cut flower grower, life experience, good worker and manager, can handle help to advantage, competent to take charge of up-to-date retail place; state wages, etc. Address FLORIST, care of No. 236 S. Illinois St., Indianapolis, Ind.

Help Wanted—A man to work in rose sections; state wages without board. Apply COLE BROS., Peoria, Ill.

Help Wanted—A good grower of roses and carnations on general retail place; 100,000 feet of glass; one who can handle help. CHAS. W. CROUCH Knoxville, Tenn.

Help Wanted—A good steady single man as rose and carnation grower on retail place near Chicago. State wages wanted with board and room. Key 518, care American Florist.

Help Wanted—Reliable florist with 20,000 carnations, good varieties, little cash and capable of erecting greenhouses—material now at greenhouses, near Chicago, can become part owner of established modern greenhouse business. C. F. MORRIS, 420 Ashland Blk., Chicago.

For Sale—27,000; feet of glass filled with first-class stock; located in one of Chicago's suburbs; low price. Address FLORIST, 4016 N. Clark St., Chicago.

For Sale—Greenhouses and stock; about 20,000 feet of glass, well stocked with all kinds of bedding plants ferns, palms and cut flowers; for terms inquire of Mrs Hugo Book, College street, Worcester, Mass., or L. Midgley, Worcester Conservatories, Worcester, Mass.

For Sale—At Madison N. J. Greenhouses 1500 running feet in all; barn, dwelling, all improvements; also 6 acres of land; ¾ of mile from depot. Key 510, care American Florist.

For Sale—Greenhouses in good condition; 10,000 ft of glass, also double house, all modern, good location, 210-ft. front; or will sell greenhouses alone. HENRY EICHOFF, 2863 E. 75 St. Cleveland, Ohio.

For Sale—Greenhouse establishment, built five years; 85,000 feet of glass, 15 acres of land; 100 miles from Chicago; within easy shipping distance of St. Louis and Chicago. Address J. B. DEAMUD Co., 51 Wabash Ave., Chicago.

For Sale—A retail florist business, 5 greenhouses, about 5000 feet of glass, store, barn, 8 room house, lot 100 feet front, over 200 feet deep, located in fine neighborhood; a good opportunity for two young men who understand the business, with small capital to start; good reason for selling; party must have $5,000, balance to suit purchaser. G. F. THRUN, 8707 Cedar Ave., Cleveland, O.

For Sale—5 greenhouses, about 20,000 feet of glass, well stocked; 4 acres best kind of soil; 5-room and attic house; good well and windmill; barn, horse, wagon, tools and stock; everything goes with the plant; good trade, can sell all the stock you can grow; located near city of about 400,000 inhabitants, accessible to steam and electric lines. WISCONSIN NATIONAL LOAN AND BUILDING ASSOCIATION, Room 22, Mitchell bldg., East Water and Michigan Sts., Milwaukee, Wis.

For Sale—At a sacrifice; a model floral establishment in the city of Youngstown, Ohio. This is the oldest floral establishment in the city, and has a trade that is desirable in every way. In order to close out an estate, this establishment will be sold at a price that will be an inducement. This is an excellent opening for some one desirous of engaging in the floral business For further particulars call on or address, C. EDWIN OYSTER, Receiver, 507-508 Dollar Bank Bldg., Youngstown, O.

For Sale—One of the largest and best known mail order seed, bulb, plant and nursery establishments in the United States. This business was established in 1860, and is known by all seed people the country over, and many abroad, and has an enviable reputation for quality in seeds, plants, etc. This is an excellent opportunity for an individual or corporation desirous of entering into this line of business which is a very profitable one to engage in. To an ambitious young man, or several of them associated together, it offers a rare opportunity to step into and take up the management of a business that is so thoroughly established and as well known as this one is. In order to close out an estate, the entire establishment, including 52 acres of testing gardens office buildings, greenhouses containing 45,000 feet of glass, barns, seven dwellings, a complete and up-to-date printing establishment, in which is turned out all printed matter used, including catalogs; horses, wagons, and entire equipment necessary to carry on this business successfully, will be sold at a sacrifice. Any one interested can have full particulars by addressing or calling upon the undersigned. C. EDWIN OYSTER, Receiver, 507-508 Dollar Bank Bldg., Youngstown, O.

Gardener Wanted.

IMMENSE SUPPLIES.

Weather conditions were most favorable for the Easter trade, up to the afternoon of Saturday, when local rain storms interfered with the market men and street vendors. All along for two weeks, though the nights have been cool, there has been an abundance of bright days, with moderate temperatures, the atmosphere clear and the air crisp and bracing. Greenhouse stock of all kinds came along gradually, with no market drawbacks, and as a result of such favorable conditions the supply of every kind of seasonable product was simply immense. The store windows were handsomely decorated, and the stalls in the market houses were simply piled up with enormous quantities of stock. A very considerable proportion was bulbous stock, a large part of which was lost. The quantity of this that every year goes to the dump does not seem to deter similar experiments each succeeding year. Plants of every kind were in great demand and the distribution was almost universal. Harrisii lilies were not overabundant. There was nothing specially novel or attractive offered, but all the old-time favorites seem to go in good quantities. The churches were, as a rule, all decorated and the custom is extending to those of communions which formerly did not follow the plan of adorning their places of worship. Cut flowers were sufficient to go around and lily of the valley, sweet peas and lilies were closed out before the day was fairly over. Some roses were left but not enough to cry over. Violets were in much greater supply than was anticipated. Altogether the festival seems to have been a satisfactory one generally, and while prices were perhaps as a rule somewhat lower than usual, the volume of trade was quite up to usual dimensions, financial stringency notwithstanding. The week before Easter a good many out-of-town houses were represented on the market here, and very low prices were quoted, but just the amount of business they secured there is no way of estimating. The rain on Saturday afternoon was very detrimental to the curb-stone dealers.

NOTES.

The Playground Association is about establishing in the city ground set apart for play grounds, spaces for childrens' gardens, where the children will be encouraged to cultivate flowers and vegetables, rather than play in the gutters.

Immediate preparation of the grounds for the new botanic gardens at the John Hopkins University is the order, and this very desirable institution will soon be an established fact.

ROSES SCARCE FOR EASTER.

Easter passed off quietly with a good business reported. The great amount of stock on hand gave every one a chance to fill orders complete without an unusual amount of excitement. Good tea roses and medium American Beauty were the only flowers that were scarce; there was an abundance of everything else. It is doubtful if this city ever saw so many lilies at one time before; they seemed to come from everywhere. The sales on these were not brisk, owing to the fact that every one among the buyers who had any glass at all had plenty of his own. Patrick Mair, Woodville, and Chas. Koenig, Millvale, both had their places completely filled with lilies which were all cut for the wholesale houses. Roses cleaned up nicely at an average of 12 cents for special stock. Carnations had to be nice to bring six. An unusual number of daffodils and tulips was in strong evidence everywhere. Violets, while showing the effects of the season, sold well. Pot plants sold very well in the stores, but the rain knocked out a lot of sales from the stands, wagon loads of tulips and hyacinths being hauled back from the two market houses. Undoubtedly there would have been a general clean up Saturday had the weather remained good, but it was one of the worst days we have had this year, raining steadily all day. The scarcity of money was also a factor, many retailers stating that people who formerly were liberal buyers contented themselves with a dollar box this year.

The Pittsburg Florists' Exchange was strong on good roses, especially K. S larney.

ONE DOZEN GARDENIAS ONE WEEK FROM CUTTING.

Gardenia Bulletin.

(Grandiflora Cape Jessamine Buds.)

WHILE it is somewhat too early to make a trustworthy prediction, it seems certain that there is no possible danger of a retarded developement, which has, in some past seasons, made it very difficult for us to promise Decoration Day shipments for far points.

The crop seems to be coming along just right and first shipments expected about May 5th, (an unusually early date), and in this event we can accept orders confidently and especially wish to extend our trade in Eastern states.

We took a decided step forward last season by enclosing the packages in glassine paper and this method will be continued.

To extend trade and as an aid to our florist customers we are using some high class periodicals this year with delivered quotations 300% higher than our wholesale price, which will give the trade about 250% profit above the wholesale price and transportation. Lower margins can of course be made,—our aim being to get the retail price well above the usual retail figure.

Standard Stock, good foliage and finest quality buds, per 1000..... **$7.50**
500 at thousand rate.
On orders of 3000 or more, per 1000..... **$6.50**
Less than 500 buds, per 100,..... **.85**

Chicago.

VOLUME OF EASTER TRADE BIG.

Stock was certainly abundant last week and prices correspondingly low, considering the fact that it was a holiday trade. It is the consensus of opinion that the volume of stock handled exceeded that of any previous Easter and that it was about 30 per cent in excess of that of a year ago. Wholesalers vary considerably in their estimates of the amount of money taken in, some declaring it was fully 10 per cent below that of last year, others maintaining that there was an increase of that much. All are agreed, however, that prices were much too low. The retailers report much the same conditions, declaring that more sales were made, but that few individual buyers bought as largely as they have in former years. Trade was active the week through, beginning briskly on Monday morning and maintaining a steady and even business every day with the exception of only Saturday morning which opened with rain and a dark outlook for Easter morning. The sun came out in the afternoon and trade developed its previous activity. Easter lilies were of course the leading item and were in good demand, but there was a seemingly endless supply of them. Potted stock was not as abundant as the cut lilies though there were plenty to go around. This is explained by the fact that growers held on to their lilies to the last moment; great numbers of them opened up too soon and these were cut and put away in the cool rooms. Such stock brought many complaints, easily going bad in transit, and the custom of holding flowers for a holiday cannot be condemned too strongly. Roses sold well, American Beauty actually going short in supply, especially in stock of medium length stems. Richmond, too, sold well, some growers at certain times not being able to secure enough Richmond. This demand for red roses was one of the surprises of the market. Killarney was as good a seller as any, every buyer of roses apparently wanting them. There were good lots of Bride, Bridesmaid, Chatenay, etc., and the demand was very good. Carnations came from all quarters, all growers cutting heavily. There were many more than was anticipated by usually competent judges. Good prices were realized on some, especially fancy stock. Poor stock piled high and did not sell. Especially was this true toward the end of the week. Bulbous flowers were much in evidence, and continued hard to move off. Good violets sold well, not a great many coming in. Sweet peas were also in good demand.

AUTOMOBILE IN W. J. SMYTHE'S WINDOW.

Wm. J. Smythe, the clever florist of Thirty-first street and Michigan avenue, had his share of troubles while his Easter preparations were in progress. The avenue was torn up for repairs in front of his principal window and thus prevented a good deal of passing traffic. Unfortunately this indirectly led to a far more serious disaster. An automobilist driving down Michigan avenue at a rate, it was stated, of 30 miles per hour, did not see the barricading or note the red lights until it was too late and in endeavoring to swerve into Thirty-first street had too much way on and ran clear into Mr. Smythe's window at the corner. Although, independent of the window, not much damage was done to Mr. Smythe's stock, the hindrance to trade caused by having to stretch a tarpaulin over his window must have been very considerable and his fellow florists will be sorry to hear of the disaster. But at any rate the accident did not prevent Mr. Smythe going right on with his preparations for Easter for he had a magnificent show of baskets and other devices most exquisitely arranged. We trust that he will be amply reimbursed for his losses owing to the accident, though the action of the driver of the car in backing out and endeavoring to escape after doing this mischief and injuring a colored woman looks as though he would like to shirk responsibility.

NOTES.

A fine sight at this time of year is a house of sweet peas at A. E. Hunt's, Evanston. Pansies are also a specialty here, a bench being devoted to them in one of the carnation houses. The chief interest here is the bench of Mr. Hunt's new salmon pink seedling, a cross between Morning Glory and Wolcott which gives considerable promise of being a commercial favorite when enough plants can be secured. There will be about 5,000 plants for cutting from next season. One of its chief merits is its long stiff stems. While the usual supports are in place they seem to be little needed. The cut flowers grown here are consigned to the J. B. Deamud Co.

Last Friday when American Beauty roses were so scarce the demand could not be filled, some joker saw some fine, long-stemmed specimens out in front of the stand of a Greek near the corner of Randolph street and Wabash avenue and attached a sign, "Take 'one." Several persons stopped, thought it almost too good to be true and then started to help themselves, when the irate Greek suddenly appeared, rescued his wares and started out to find the perpetrator of the joke.

Frank Oechslin did a rushing business on Thursday and Friday of last week. On Thursday three wagon loads left the greenhouses after supper and one of these after 9 o'clock in the evening. On Friday besides seven wagons of his own he was compelled to secure the services of two big moving vans for his deliveries. Already he is filling up the empty benches with bedding stock which he has had coming along in frames.

A. H. Hews & Co., of Cambridge, Mass., have opened a branch office and warehouse in this city at 456 North Branch street with M. F. Mooney, manager in charge. A full line of pots will be kept on hand for immediate shipment.

At Peter Reinberg's it is said that practically no stock has been held back for holiday requirements, and in consequence everything moved off at very satisfactory prices. This house was fortunate in having very heavy crops on.

The Poehlmann Bros. Co. has acquired nearly two acres of land immediately between its present range and the railroad track. In this corner operations were started this week on five 27x210-foot houses.

Geo. Hartung, of Kensington, reports a 25 per cent increase in his Easter business this year. Both cut flowers and flowering plants were in good demand and bulbous stock cleaned up early.

The Garden City Sand Co. is sending out notices to the effect that on and after May 1 that firm's address will be 208-11 Chamber of Commerce.

Bassett & Washburn brought in 1,800 long stemmed American Beauty roses last Friday and still had hardly enough for the demand.

Mrs. Amasa Kennicott went to Carbondale last week to spend a few days at her son's place, R. E. Kennicott's.

The A. L. Randall Co. is handling yellow chrysanthemums, a novelty of the season that is selling well.

Visitors: Mrs. J. R. Bather, Clinton, Ia.; M. M. Towle and Mrs. Schutz, Hammond, Ind.; J. G. Crozer, Cedar Rapids, Ia.; James Chacona, Milwaukee, Wis.

PETER REINBERG, 51 Wabash Ave., Chicago.

Easter With the New York Retailers.

Notwithstanding a late Easter and its previous forebodings, the retailers offered excellent stocks and, as a rule, fine taste was shown in combinations and decorations. The average quality of lilies was much below that of some past years. Much of the stock was short and in bud and flower development showed deterioration. Yet, they were lilies, and very much in evidence, as they always are at this season. A number of very happy combinations of lilies and other plants of low habit were noticed in the leading stores. One particularly fine combination consisted of lilies, ericas, lily of the valley and blue hyacinths; adiantums being used as a border. Around the basket and handle there was a broad sash of Copenhagen blue, which is the latest introduction in the line of decorative ribbons.

The offerings in rambler roses were particularly fine. Crimson Rambler, Dorothy Perkins, Lady Gay, Newport Fairy, Hiawatha and others being shown with splendid effect. While Newport Fairy is promising, by another season when more of it is on the market there will be a better opportunity to judge of its staying qualities as a popular favorite. Grown as a bush or standard, singly or in combinations, I consider Dorothy Perkins a splendid variety. Of the standard plants of it shown, all were attractive.

One of the most effective and artistic combinations noticed was at Geo. M. Stumpp's. A tall Crimson Rambler rose was trained about a basket frame or handle of rustic design, and beside it was placed a Dorothy Perkins of lower habit; the basket was in gold shade. The bougainvilleas offered at this store, were for size and quality superior to any collection of these plants that I have ever noticed in a retail store, several specimens standing over six feet high and being perfectly flowered. Hydrangeas were excellent and the growers seem to be introducing more variety in color in these plants than in former years. The blues and the pinks we all know, and now to these has been added a mauve shade, and with ribbon to match, it is handsome. Judging by the amount of stocks offered, its quality and the demand, the azalea still has a firm hold with the public. There were many fine specimens and some complaint of a scarcity of the smaller sizes. The genistas, in quality and variety, were never better. Both in standard and other forms there were many magnificent specimens. In small handle baskets, small plants of genista in combination with spireas or other white blooms, and small ferns, make an acceptable combination. The spireas were popular, both singly and in combinations.

David Clarke's Sons made a hit with a quantity of pink spireas, grown at their own greenhouses at Fordham Heights. Most of the ericas noticed were in small pots and were used largely in combinations. Again referring to the lilies, while many single plants were sold, combinations of five or six plants in a pan, tub or pail, were more attractive and popular with those who could afford the price. If combinations of this kind are decorated with ribbon, pale blue or pink seem to be the most appropriate colors. For a single pot a white crepe paper cover with a narrow band of pink or blue ribbon near the top of the cover is appropriate. Though numbers of the straw matting covers were used on pots of lilies and azaleas, they appear at a disadvantage beside the cretons and other late designs. There were splendid lots of both purple and white lilac and as single plants or in combination they were handsome. Hyacinths, from a single bulb in a 4 or 5-inch pot, to large pans of single or mixed colors, showed well, as did large and small pans of lily of the valley.

There were novelties, but they were old things in a new form, rather than new productions. Of these might be mentioned a number of wistaria plants in large pots but not over two or three feet high, bent over and trained together, showing a mass of bloom. In a round of 25 or more retail stores I saw but one white camellia but it was a fine specimen and covered with buds and blooms. It was shown by Christatos & Koster, Madison avenue retailers. The rhododendrons were very fine and the purples were numerous and popular. There were many splendid specimens of daisies grown as pot plants, many being of very large size. Pansies neatly arranged in small handle baskets were frequently seen and it is pleasing to the admirers of this old favorite to note that its popularity remains unchallenged.

A real novelty was shown by M. A. Bowe, in the shape of an air ship, of the latest approved pattern, with propellers and equipments of twentieth century type. It was suspended in his show window and being filled with mauve cattleyas and Adiantum Farleyense and decorated with mauve ribbon, it was a great attraction for the Broadway sightseers. At several of Thorley's stores a number of small and medium sized pots covered with green sheet moss were noted and the effect was pleasing and natural.

In matching the ribbon to the various flowering plants, unusual care was shown this year. Much light pink ribbon was used on combinations where pink predominated as was also the flowered ribbon of different light shades. Those shrewd fellows, the supply men, are keeping well abreast of the advancements of the florist business, not only in ribbons, but in the many other accessories.

Dr. Britton Returns.

Dr. N. L. Britton, director of the New York Botanical Garden, returned from Jamaica on the royal mail steamship Orinoco. April 16, with 3,500 botanical specimens, including three orchids and two palms, which he believes have hitherto been unknown to botanists. A number of the rarer plants will be exhibited at the botanical gardens in Bronx Park. The director was accompanied by Mrs. Britton and lived on board the same little schooner he employed while exploring the Bahamas. He employed a crew of seven men to navigate the vessel, and to handle specimens, sailing from place to place and landing to make excursions into the interior.

GRAND FORKS, N. D.—The annual session of the Red River Valley Horticultural Society, which was held April 3, at the Crookston school of agriculture, on the state experimental farm, was one of the most important gatherings that has been held in this section of the state for some years. Fully 200 visitors were in attendance and the greatest interest was manifested in the programme which consisted of addresses by Prof. Wm. Robertson, J. F. Hetler, O. J. Hagen, Prof. Dunton and Oscar Wick.

NEW BEDFORD, MASS.—At the meeting of the Horticultural Society, held April 13, Thos. White addressed the members upon the subject of the necessity of inaugurating a movement having for its purpose the saving of our native plants from extinction. At the close of the address a committee was appointed to take up the matter.

GOOD EASTER BUSINESS.

When the condition of the cut flower trade for the past six months is considered, it can be stated that the volume of Easter business exceeded the previous estimates of conservative dealers. There were many dire forebodings on account of the lateness of the date; the possibility of warm weather during early April and disagreeable weather at Easter. Saturday was rainy and disagreeable, but it is doubtful if that cut much figure in the final results. A great amount of cut stock was sold at remunerative prices but nothing went as high as in some previous seasons. The best American Beauty roses brought 40 cents, possibly a few went at 50 cents; best Bride and Bridesmaid 10 and 12 cents; fancy carnations five and six cents; common, three and four cents. Lilies were disappointing. On Thursday and Friday, good cut lilies were up to 10 and 12 cents but on Saturday it was evident that the market was overloaded with them and before the final, the best sold for three and four cents. Though nobody could be found who was willing to father Bermuda cut lilies, there was enough of them scattered about the city to make, at least, a slight difference for the worse, particularly on top of an oversupply of the home product. Two leading dealers, both careful and conservative men, talked of the lily situation with the writer. Said one, "I believe that on account of the great supply of other good varieties of pot plants now being grown, the demand for lilies is falling off, and again their quality is poor." The other dealer said that he believed good lilies were as much in demand as ever but the quality was poor this year, and there were too many of them. After a season of saddening experience the violet made a very creditable Easter record going from 50 to 75 cents per 100. Lily of the valley, tulips and sweet peas went very well at a moderate advance in prices. Quantities of single stocks, candytuft and other small flowers were little in demand. There was no such evidence of abundance in orchids as was witnessed at Christmas, and cattleyas came nearer to their old price of $1 and $1.25 each than they have previously during the season. By Saturday night, it was practically impossible to buy them wholesale. There was a reasonable supply of gardenias with a slight advance over regular rates. While there was some complaint of soft stock it was evident that there was less pickling than usual, and it was fortunate for all concerned that the sensible and rational course of shipping stock when ready, was generally followed. In summarizing the Easter cut flower business, it must be borne in mind that there was in every retail, and many wholesale stores; in auction houses, markets and public squares, a tremendous supply of well flowered plants in such variety as to suit the most fastidious tastes. Adding to these the plant peddlers that swarmed over the city, it will readily be seen that cut flowers had strong competition for popular favor, and all things considered, they have held their ground.

EASTER PLANT TRADE.

A number of the Twenty-eighth street commission men went extensively into Easter plants. Millang Bros., in addition to filling up their main store with plants, took the vacant storeroom overhead, which was also successfully utilized. All through the week there was evidence of good business about their stores as large loads of plants were constantly arriving and going out, and a large force of assistants were kept busy. An exceptionally good quality of stock was handled and the arrangements and disposition of the various stocks proved that the long experience of the members of this firm was a prime factor in the successful handling of a heavy business. They had thousands of lilies, and with rambler roses, azaleas and all other seasonable plants their store was one of the show places of the district. Very noteworthy were their large plants of purple and white wistaria, and pans and hanging baskets of lily of the valley.

The Lecakes Co. had a great stock of good plants. Good Friday was of special interest to John A. Foley of that firm, as a little daughter came to his home on that day.

Ford Bros. carried an exceptionally fine stock of marguerites in pots ranging in size from 4 to 14 inches. They also had a fine line of hyacinths in pans.

John Young carried a great stock of lilies and geraniums and the handling of these in addition to his big stock of roses and carnations kept everybody busy.

Sam. Woodrow, the Thirtieth street plantsman, had a great Easter trade and he and his assistants got little sleep during the week.

H. E. Froment carried a fine stock of lilies, rambler roses and other pot plants, as a side line to his great stock of cut flowers.

George Cotsonas & Co., in addition to doing an immense business in greens, were well stocked with seasonable plants.

HORTICULTURAL SOCIETY.

For the purpose of encouraging the cultivation and the study of orchids, and the formation of orchid collections, a committee of the Horticultural Society of New York has been established for the purpose of forming an orchid section. This action is the outcome of the recent gathering of a few orchid amateurs in this city as it was the unanimous feeling of those who took the initiative that the times were not propitious for the forming of an independent society. The Horticultural Society of New York, in forming this orchid section, gives perfect autonomy to the section which will be free to make its own rules and regulations for the exhibiting of orchids. The first step is made in connection with the forthcoming announcements of the May exhibition to be held in the New York Botanical Garden May 13 and 14, when, besides four cash prizes, two for amateurs and two open to all, there will be offered one gold medal, three silver medals, and three bronze medals, these medals to be awarded at the discretion of the orchid committee, which is composed as follows: C. Moore, Hackensack, N. J. (chairman), and J. E. Lager, J. A. Manda, G. V. Nash, J. W. M. Kitchen, H. A. Siebrecht and E. H. Roehrs, Rutherford, N. J., (secretary).

NOTES.

J. G. Leikens, who recently opened another retail store, at 718 Fifth avenue, got well settled in time to do a good Easter business. His other stores are in the Hotel Belmont, Park avenue and Forty-second street; 7 East Thirty-third street and Bellvue avenue, Newport, R. I. He is an enterprising young man and reports good business all along the line.

The Fruit Auction Co. on Franklin street, did a heavy business in plants, particularly on April 17, thousands of dollars worth of stock being sold on that day at good prices. The firm handled everything in plants that was in demand and had business from leading growers and dealers of this city and vicinity.

Reed & Keller were literally swamped with business. They got out a new creton pot-cover that was a great seller and they could not keep up with their orders for osier baskets. They have a force of men busy at St. Patrick's cathedral preparing for the decoration for the catholic anniversary.

The plant collections on Union Square, always to be seen the Saturday before Easter, were considered of sufficient importance, by the daily papers, to be photographed. Brothers Wallace and Totty, press censors, will please take notice.

On Good Friday, a leading retailer said: "We are selling lots of plants but our best customers are showing economy in their orders. The effects of the panic have not quite vanished."

E. Howard Smith, who recently opened on Twenty-ninth street, carried a good stock of plants. James Blauvelt, his manager, stated that business was very satisfactory.

H. C. Steinhoff of West Hoboken, N. J., had, temporarily, a plant store on West Twenty-seventh street and much good stock was disposed of.

J. K. Allen carried a fine stock of cut flowers and his violet sales were enormous.

Winsor carnations were good sellers and carnations in general moved freely.

Next on the programme are the May and June weddings.

Elmer D. Smith & Co., Adrian, Mich.

Elmer D. Smith & Co., successors to Nathan Smith & Son, Adrian, Mich., will retire from the retail trade on May 1, and the firm hereafter will pay strict attention only to the wholesale trade. This firm has been doing business at its present quarters ever since 1876, when Elmer D. Smith started the first greenhouse. He made a special study of chrysanthemums, and has gained a national reputation as a grower of this popular flower. In fact his fame spread beyond this country, and his name is known and honored among florists in all parts of the world.

While we regret the closing of this famous place to the retail trade, all will wish Mr. Smith continued prosperity in the trade among the larger dealers. The plant is one of the largest and most completely equipped in the northwest, and enjoys a business that is increasing with each year. A large force of employes is kept busy, in proper seasons, supplying the orders that come from near and far. Elmer D. Smith has been the head and brains of this institution all these years, giving his personal attention early and late, and now sees success crowning his endeavors. May he continue in prosperity.—Adrian Telegram.

WASHINGTON, D. C.—The Gude Bros. Co. were given the work of supplying the designs for the employes of Kann's store who raised a large fund for the purpose and purchased special designs to show their appreciation of the firm's policy in improving the building.

TOO MANY EASTER LILIES.

A week ago, or on Palm Sunday, as the retailers moved around amongst the growers viewing their selected stock, one often heard the remark "I wish it was all over." The dread of the great rush of work and the nervous strain looks appalling to even the old campaigners, those who have been through the grind for years and years but who still seem unable to make it but little if any easier as season after season brings its annual burden. It is a tremendous strain on the vitality of the growers, middlemen and retailers alike, who, each in their separate branches, have all they can do, working to their utmost, to dispose of their stock and please their customers by having all orders carried out satisfactorily. The grower has probably to carry the greatest part of the burden, as, in addition to selling, he has also to provide the stock which for many weeks is a great care, so many things being liable to occur and interfere with the perfect development of his plants, things which cannot be foreseen, such as the bulbs which turn out to be diseased and inferior and which has caused so much loss this season. What would have become of all the lilies had the whole crop flowered is a question as there were too many for the demand as it was. Ten dollars per 100 flowers cut and on the pot was about the highest and was without doubt the market price, but we hear of sales in quantity at eight cents per bud and flower. There seems to be no question that there was not so much demand for either lilies in pots, or cut, as for several years past. Whatever this is due to we cannot think but that the lily so associated with Easter will always be the Easter flower. Azaleas and hydrangeas held their own; well flowered plants, those showing their good culture in the bright color of blossoms, particularly in the hydrangeas, sold readily. The hydrangeas, in addition to a well shaped plant with large heads, must have a good bright color or they will be passed by, not appealing to the average buyer. Geo. Anderson had the creamy lot this season. They were snapped up quickly and we question if any were left unsold in the stores.

NOVELTIES.

One of the best novelties was the pink rambler roses of the Robt. Craig Co. This firm's Lady Gay and Tausendschon were as perfect and well flowered as one could wish for and many of the best sold at retail for $10 each, which is a good price for a plant in an 8-inch pot. They carried clusters of flowers ranging from white to a bright pink. The earlier flowers, being forced, came white and later buds, opening in a cooler house, were a bright pink. They are much more popular than Crimson Rambler, which has seen its best day as an Easter plant. Tausendschon is worthy of a trial by all growers. Its flowers are quite large, not very double, showing the stamens when open, but the color of most of the flowers is a fine shade of pink with some of a lighter shade to add variety. The clusters are large and borne in such quantity that the bush is well covered, making a very desirable Easter plant. Hybrid roses in pots sold very well, some very choice stock being seen. Spireas, mostly Gladstone, seemed in good demand. A few of the new pink also seemed to take well, particularly with those who were looking for novelties. There were the usual pans of hyacinths, tulips and daffodils, which are always staple stock. It was thought at first they would not hold, but the favorable weather kept the stock in fine condition and it stood shipping nicely and lasted well for Saturday sales. There were not many genistas. These are good sellers if done properly and our market would stand more of them. Rhododendrons, those of bright colors, were in good demand. Shapely plants of these should be in every stock. Pots of heather were among the choice things offered, sold separately or used to add distinction to made-up baskets.

There was not much new in arrangement offered by the store men. Pennock Bros. had their usual fine lot of plant baskets, the baskets being original and made on their premises. A box made of wood, mostly in square design, decorated with a raised composition and the whole colored to resemble terra cotta was very striking. A basket of willows with the buds still attached was also very pretty.

H. H. Battles used pot covers in various sizes, made of fresh willows with the bark on. These were very attractive and exclusive as well, being made by his own men at Thorne Hedge, his country place.

THE EASTER TRADE.

As to the volume of business it is pretty hard to get at with any degree of accuracy. Some say they did better, others about the same, and again the report is not quite up to last season. There was an immense street business, or at least more plants were seen on the curbs than ever before. Around the city hall there were large blocks of all sorts of flowering plants and although considerable of it was sold, yet quantities remained far into Saturday night which had to be returned to the nurseries that placed it on sale, or was left on the hands of the dealer who had tried to turn his money in this way.

The wholesale men all appear satisfied with their Easter trade and say that while the volume of business was not quite equal to last season yet, with the exception of lilies, there was a general clean up of all staple stock.

Wm. McKissick's business was more than he expected, a large lot of stock being moved at slightly lower prices than usual for Easter. Sold up close on everything except lilies which for some reason seemed to move slowly. He thought perhaps it was owing to the greater quantity being thrown on the market continually since the first of the year which may have robbed them of their novelty for this season. He, however, handled an immense quantity of violets; one shipment of New York stock contained 50,000 blooms.

The Leo. Niessen Co. had a very satisfactory business, the out-of-town trade being excellent. They sold up in American Beauty roses, carnations and sweet peas of which they had large stocks. Lilies seemed in only fair demand, not selling as well as usual at this season.

John McIntyre kept his prediction of plenty of single violets and made good with some thousands of bunches on Friday and Saturday. They were very good for the season and sold as fast as they could be handed out. He also had a great run on sweet peas.

Berger Bros. were well pleased with their trade both shipping and local; their select Bride and Bridesmaid roses were in good demand and their large stock of carnations was all sold out.

E. Bernheimer was strong on American Beauty roses, the long fellows from the Florex Gardens which sold very well; like others his was a good trade at medium prices.

Edward Reid said he was very well satisfied, his out-of-town trade having kept him very busy. He cleaned up on everything except white carnations and lilies.

W. J. Baker had a great run on sweet peas and said he could have sold many more. He also handled carnations in large quantities.

Alfred Campbell handled the Faust lilies and reports good sales, having secured orders early so as to move his large stock.

The Philadelphia Cut Flower Co. report a very busy time; everything moved off well except lilies.

The supply men say they had a great run on all Easter goods, H. Bayersdorfer & Co. and M. Rice Co. doing a large shipping trade. Crepe paper, plain and in made up covers, was in great demand and in the popular colors was all sold out before the last day. K.

Boston.

NOT UP TO LAST YEAR.

Easter brought many surprises and the week's business summarized amounted to about two-thirds of the same week of 1907. These figures are alarming but having in mind the past months of depression it is not surprising to those familiar with the facts. In other words growers and dealers alike were prepared for this situation. As at Christmas unusual limitations were enforced by purchasers and a very strong liking for medium grade goods prevailed. People who are accustomed to selecting from the finest stock the market affords drew lines about themselves and rarely appeared a customer who did not know the price of and see his articles before purchasing. The public plainly showed a preference for flowering plants and storekeepers availed themselves of a heretofore unequalled supply of such stock and greatly curtailed on cut flowers. The larger growers wisely deemed it unnecessary to pickle stock. Violets for which there is always an extensive demand on Easter Sunday were the only scarce article on the market. Owing to the lateness of the season a large number of growers had retired but the few who had waited were well repaid as violets were higher than at Christmas. Few brought less than $10 per 1,000 and no single varieties were available less than $12.50. American Beauty roses were plentiful but the greater part were only of fair quality. The best brought $4 per dozen. Richmond and Killarney, neither of which were of remarkable quality, were the only varieties dealt in extensively and their prices ran together, $3 per dozen securing the best grades. A limited demand for Bride was met with a large supply but like other roses no exceptional values were offered. No extraordinary outlet

was found by a great supply of carnations mostly of medium grades. No standard of prices governed their sale and few large purchases were made. From $1 to $4 was the price, suitable for all choices. White azaleas were exceptionally scarce but their absence was more than filled with a superb collection of pink varieties. Plants for $2 to $5 were the best ever obtained at these figures and remarkable stock for these sizes. Most dealers sold their entire stock of lilies although not filling up as much as usual. A finer stock of flowering plants was never presented at the same standard of prices. Azaleas, acacias, genistas, lily of the valley, bougainvilleas, rhododendrons, Pink and Crimson Rambler roses, lilacs, spireas, lilies and all kinds of pan plants, such as geraniums, heliotrope and bulbs formed an almost endless collection.

NOTES.

About 80 members and friends of the Gardeners' and Florists' Club availed themselves of a rare opportunity to see a first class collection of Easter plants in journeying to Nahant to view the establishment of Thomas Roland, April 11. The party went by train to Lynn, where special cars were provided by the host to carry his guests to their destination. Here they were greeted by a sight seldom equaled. In the prime of condition as considered by this foremost grower were displayed the newest Easter favorites just before shipment to the trade. The party as a whole had never seen the home of the products which have ranked this firm with the leaders of the country and every detail connected with the establishment was inspected. An appropriate collation was served by the host, his reputation for this feat nearing the exceptional rank his abilities as a horticulturist have attained. The party left for home overflowing with wishes for further success in the line which has been so ably handled by Mr. Roland.

"Del" Cartwright, the genial salesman of the Waban Rose Conservatories, who has been confined to his home for two weeks, re-appeared for the holidays, very much improved, but reduced in weight. He dropped from 220 pounds down to 170, and the effect is plainly noticeable in his features, which usually are those of perfect health.

M. J. Barrett, the well known employe of E. MacMulkin, was called to his former home, New Rochelle, N. Y., by the sudden death of his mother, who was over 80 years of age. Mr. Barrett was forced to a speedy return trip, returning home in time for the Easter trade.

Arthur Butterworth, son of T. J. Butterworth, the celebrated orchid grower,

and for whom he is sales agent, has been unable to attend to his duties for a week, being confined with a slight illness. In the meantime the head of the house is caring for this end of the business.

The Henry M. Robinson Co. was greatly pleased with the holiday trade, which was far above its best expectations. All sorts of stock was handled in great quantities and the superb stock of lily of the valley on hand met with great approval.

H. A. Calder presented to his patrons for the holiday trade a superb stock of his favorite product, Campbell violets, which were the envy of the growers of these flowers. Their quality at this time was remarkable. B.

Newark, N. J.

F. W. O. Schmitz, of Prince Bay, New York, who was an intimate friend of the late Ferdinand Bendt, has been appointed executor of the estate and will carry on the business until the orphan's court makes final disposition of the property. Mr. Schmitz is giving his personal attention to the business and everything is looking well. The Easter business exceeded that of last year.

WINONA, MINN.—Ed. Kirchner & Son had a splendid Easter trade. They are about to remodel their greenhouse plant and erect two new houses.

SANDUSKY, O.—The new greenhouse in the park is now assured. The $10,000 bond ordinance to provide the funds for the construction of the new and modern building which is to be located in the park west of Columbus avenue, between West park and Monroe streets, was given its third reading April 6 at the council meeting and by a vote of five to two on its final passage.

HOLLYWOOD, CALIF.—Under the auspices of the civic section of the Woman's club of this city the plant and flower show will be held in Wilcox auditorium April 30 and May 1. The committee on exhibits is composed of Mrs. J. B. Wilkinson, Mrs. S. P. Rhoades and Mrs. Will C. Parcher. Cut flowers, pot plants, fruits and vegetables, garden flowers and local wild flowers will be exhibited.

CUT FLOWERS OR DESIGNS will be Delivered for the Trade on Wire or Mail Orders in Best Qualities and Prices.

Philadelphia, Pa.

Prompt and Careful Attention given to all Mail and Telegraph orders.

St. Louis.

LARGE BUSINESS DONE.

The market during the past week was somewhat crowded and stock up to last Thursday was piling up, but the wholesalers kept a stiff upper lip and there was no evidence of a break in the market. Carnations held a stiff price and even roses did not go below two cents in lots, but Saturday came and with it a firm market. But few carnations were sold under four and five cents, and it was poor stock that was sold at three cents. In roses 10 and 12 cents were asked for anything fancy. Some very fine sweet peas were in and were sold at $1.25 per 100, while but few were sold under 60 cents. Violets brought from $2.50 to $5 per 1,000. The only flowers that failed to move to any extent were bulbous stock. Tulips and jonquils were plentiful and were sold from $1 to $2 per 100. Quite a few callas were left over; smilax and other greens sold well. A large plant trade was done in the down-town market on Saturday.

NOTES.

At Geo. Waldbart's trade was immense; he had a splendid supply of flowering plants and his output of cut flowers was fully up to the standard.

W. J. and M. S. Vesey, of Fort Wayne, Ind., were much in evidence in the Easter market and contributed some fine stock, especially in roses.

J. W. Dunford was very busy at his retail establishment. He handled a fine crop of lilies and made good shipments to the commission houses.

It is rumored that another florist club will soon be started in this city. It is believed that practical florists only will be invited to join.

A. Jablonsky sent in a fine stock of roses; especially fine were Richmond and Chatenay. A fine lot of carnations was also sent in.

Heller Bros., of New Castle, Ind., sent heavy shipments to this market. They shipped a fine lot of roses and callas.

Frank Ellis is on a visit to his family from Panama. He was around to see all the boys, who gave him a hearty welcome.

At Young's load after load left the store of cut flowers and plants. Their supply this Easter was the finest in years.

At Angermueller's the supply was very large and the quality good. Heavy shipping orders were sent out Friday.

Alex. Siegel has now an increased space, the store having been remodeled. He did a very large trade.

Miss Newmann handled some of the choicest sweet peas in the market.

W. F.

PORTLAND, ORE.—Articles of incorporation of the Martin & Forbes Co. were filed in the office of the county clerk April 6 by W. Martin, James Forbes and Geo. Spencer. Their purpose is to engage in the nursery and florist business. Capital stock, $50,000.

OWATONNA, MINN.—The Floral Association held its regular monthly meeting April 1, when the plans and preparations were discussed and made for the work of the spring and coming summer. Few people realize how much this association has really accomplished in beautifying this city.

A fine display of flowers, ferns and plants was put up at the third annual flower show of the Gardeners' Association, which was opened by Mayor Earley in a felicitous speech April 2. The two large tents in which the show is being held on Fair Oaks avenue, next to the Masonic temple, were crowded throughout the afternoon and evening. Horticulturists and others interested in flower culture came in large numbers from Los Angeles and other cities and towns of southern California. Great interest was shown in the exhibits of fruit and vegetables, which were new features of the show this year, as well as in the flowers and plants.

Two notable features were a magnificent collection of orchids exhibited by A. K. Macomber, Roderick Mackenzie, gardener, and Mrs. C. C. Bragdon's collection of cinerarias, exhibited by her gardener, John Coates. There are 18 of the latter, all with large and exquisitely tinted blossoms. The Macomber exhibit of orchids included 20 different varieties, many of them rare and unique. The wild flower section, to which many school children contributed, was of remarkable interest. A mammoth Boston fern 25 feet in circumference and carrying approximately 2,000 fronds, was exhibited by Hugh R. Thomas.

An exhibit of amaryllis, unsurpassed, as several experts declared, by any other in existence in the United States, was shown by Howard & Smith of Los Angeles. The same firm also showed some beautiful specimens of Sparaxis pulcherimma. Robert Pegg exhibited pink tree peonies 10 inches in diameter, and there were callas from Lawrence Newman's gardens with stems five feet long. Some specimens of giant dark red tulips were exhibited by F. T. Holder of South Orange Grove avenue, Otto Heutchy, gardener. The prize cup offered for the finest specimen of carnations and also two first prizes on carnations were awarded to Mrs. E. M. Fowler, John Blake, gardener. The best collection of fruits was also that from Mrs. Fowler's. James Gillvrey was awarded first prize for the finest display of vegetables. Superintendent Albrecht of the city parks had a fine exhibit of cut flowers and flowering shrubs, although he did not enter for competition. In the center of the main tent was a cemented lily pond with an exhibit of aquatic plants from the gardens of Henry E. Huntington, in charge of his gardener, Wm. Hertrich.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

W. ATLEE BURPEE and wife, Philadelphia, Pa., returned from the south and sailed for Europe on the S. S. Adriatic, April 22.

ROBT. LIVINGSTON, of the Livingston Seed Co., Columbus, O., passed through Chicago, April 16, on a two months' trip to the Pacific coast, where he will visit Los Angeles, San Francisco and Seattle.

OF special interest just now is the caution given by Wm. R. Sim in his paper on sweet peas as to obtaining these true to name. Such instances as he cites would show the seedsman to be in fault and such errors as these would bring their own punishment to dealers without interference from congress.

CHICAGO.—The market for onion sets showed little change, with prices for good stock on April 21 at $2.25 for yellow, $3 for white and $2.50 for red. White and red are about cleaned up.——Grass seed contract prices on the board of trade April 21 were noted as follows: Prime Timothy, $4.25 (fillers); choice white clover, $14.

COLUMBUS, O.—The seed trade here has been very good, farmers and gardeners buying freely and they have the cash to buy with. There is an immense demand for reliable seed corn. The trade in shrubbery and other hardy plants is better than ever before. The mail trade is very satisfactory so far and holding up in good shape.

ALEX. FORBES, of Peter Henderson & Co., New York, at the hearing in Washington, protested earnestly that the proposed seed bill imposed a prison penalty on the seedsmen for accidental error, while allowing the farmers with impunity to knowingly and willingly permit the growing of vicious seeds in their grass fields and harvesting them at the same time as the genuine seeds.

IT is said that the Indians of Oklahoma clamor loudly for free seeds from congress. They plant them in their small gardens and eat them. It is not material to them whether the seeds are true to name or not, or how much it costs the national government to keep up the antiquated and senseless practice. This demand for free seed by the few red men on the government reservations is about the only one existent. In fact the intelligent farmers everywhere are rightly opposed to a government appropriation for such useless purposes. The money could be used in many other ways to the advancement of agriculture that would not be an imposition upon the intelligence of the farmer and a free-for-all graft for political congressmen.—Farmers' Guide, Huntington, Ind.

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

Criminal Offense for Weight Errors.

Another example of uncalled-for misfit in the proposed seed law is found in the following paragraph which is copied exactly from the pure food bill, where it possibly had some use. It reads:

> If in package form, and the contents are stated in terms of weight or measure, they are not plainly and correctly stated.

Of 20 seedsmen consulted not one has ever heard complaints of short weight or short measure abuses in the seed trade. As Collier's Jap would say, "Why not Honorable Mann legislate also for hardware, nails, likewise sugar and salt weights?"

The Pure Seed Bill.

At an informal meeting April 21 in Representative Mann's office at Washington, D. C., there were present Representative Mann, President Geo. S. Green of the American Seed Trade Association, Chas. N. Page, Des Moines, Ia.; E. V. Hallock, Queens, N. Y.; A. J. Brown, Grand Rapids, Mich.; J. C. Vaughan and Chas. Dickinson, Chicago; T. W. Wood, Richmond, Va., and W. W. Tracy of the Department of Agriculture, Washington, D. C. There was a cordial and frank discussion of the pure seed bill and real progress was made toward an acceptable modification of it. At the hearing before the interstate and foreign commerce committee there were present, in addition to the above, E. L. Dungan, of Wm. Henry Maule, Philadelphia, Pa.; —— Smith (of Brecks, Boston, Mass.); F. W. Bolgiano, Washington, D. C.; J. M. Lupton, Mattituck, L. I., N. Y.; Jerome B. Rice, Cambridge, N. Y.; Alex. Forbes, of Peter Henderson & Co., New York; S. F. Willard, Wethersfield, Conn., and others. At the first session 13 representatives of the trade were present; at the later and main session only three attended. A stenographic report of the proceedings was made for publication, the speakers being President Geo. S. Green, Chas. M. Dickinson, H. W. Wood, S. F. Willard, Alex. Forbes, Jerome B. Rice, Walter P. Stokes, Chas. N. Page, E. V. Hallock, —— Smith and J. C. Vaughan. There was quite a full discussion of the difficulties of the situation and the meeting closed after five o'clock, with an assurance from Representative Mann that the bill would not be pressed for passage.

Closing the hearing the following resolutions were presented:

"WHEREAS, Representative James R. Mann has introduced into the house a bill, H. R. 13835, the main purpose of which is the prevention of the importation and use of inferior grass, clover and forage seeds or their adulteration in any form; second,

"WHEREAS, the American seed trade believes its industry primarily to be one of the most beneficent, helpful and necessary to the upbuilding of agriculture and horticulture which underlie the greatness of our country; and third,

"WHEREAS, the American seed trade fully recognizes the need of a wise, protective and practical measure in their own interests as well as that of every planter; and fourth,

"WHEREAS, the American Seed Trade Association here assembled is entirely in accord with that part of the proposed act which would exclude the importation of all misbranded seeds, containing adulterants as such, and of adulterants themselves, and would correct any abuses that may exist; and fifth,

"WHEREAS, the working out of a practical and operative law has proven as difficult here as in England and Canada,

"BE IT RESOLVED, that the American Seed Trade Association ask that sufficient delay be given for the appointment of a committee in the house committee having the bill in charge and a committee from the seed trade and experts in the Bureau of Plant Industry to make such an adjustment of Mr. Mann's bill as the practical workings of the act seem to require."

The foregoing resolutions were signed by President Green, Jerome B. Rice, Chas. Dickinson, Walter P. Stokes and J. C. Vaughan.

National Secretary Condemns Bill.

Mr. J. C. Vaughan,
The New Willard Hotel,
Washington, D. C.

Dear Sir:

I have learned with surprise and much regret that a most drastic bill has been introduced in congress, bearing upon the seed business.

The seed business is a most peculiar and difficult one, very intricate in its details and full of difficulties which the ordinary man does not know and cannot appreciate.

Any legislation adopted without careful consideration and consultation with the best growers, sellers and users of seeds is bound almost to a certainty to be bad in its effect on the business of perhaps the most progressive, the most enterprising and, so far as my quarter of a century's active experience in buying and using seedsmen's products goes, one of the most honorable and upright classes of business men in the country. I know of no class of men who have approached the seedsmen in the amount of work that they are doing in a broad and intelligent way to beautify the homes of the people and to banish the ugly and unsightly. I know, too, from long years of business acquaintance with yourself and many other leading seedsmen what ceaseless vigilance is displayed, what enormous sums of money are expended and how strenuously each vies with the other in increasing the standard of purity and excellence in his products.

Correspondence solicited.

I also know that all of this honest, intelligent and painstaking effort that is being made and this great expenditure of money never results in certainty and never can, and that any restrictions imposed, unless most carefully considered by those competent to know, will simply result in penalizing honest and upright tradesmen for things utterly beyond their power to control.

Of course we have the dishonorable and unscrupulous always with us, but so far as my experience goes the percentage of such men in the seed business is very small, and dishonesty in that line automatically brings its own punishment, perhaps to a greater degree than in any other line of business.

I trust that you will make every effort to have this bill withdrawn and submitted to this society for consideration. It is needless to call your attention to the fact that this society is incorporated under a national charter, that it comprises the leading men in all branches of ornamental horticulture throughout the country, and I believe it can speak with authority as to what legislation is advisable and as to what is unadvisable.

Very truly yours,
W. N. RUDD,
Secretary of the Society of American Florists.

HARLINGTON, Middlesex, ENG.

MARKET GARDENS.

WHERE celery is transplanted before going to the trenches nip the end off the root of each plant and prick out on a hard bottom.

PLENTY of air, plenty of potash in the soil and firm planting are the three great essentials in tomato culture.

LEEKS must have a long season of growth and should be sown early.

THE value of a little loose litter around rhubarb and similar roots as a protection and hastener of the crop should not be lost sight of.

AGAIN a shortage of mint in many towns. Why will not growers take hold of these little and profitable side lines.

Making a Mushroom Bed.

ED. AMERICAN FLORIST:—

Please advise me through your columns how to make a mushroom bed. I have no greenhouse. Would a cellar or shed answer for that purpose and which is the proper time to start one?

A. S.

For mushroom growing a greenhouse is not needed. Any building which protects the crop from rain, wind and cold will do. Mushrooms do best in a moderate temperature, say from 45° to 56°; they are easily hurt by drip; the air should be moist and stationary, no drafts; light is not needed. They are really a winter crop, because it is easier to heat a structure than to cool it down. When warm weather sets in, insects often attack the crop and ruin it. Generally the first beds are prepared in September or October, and the last in March.

To make a mushroom bed use fresh horse manure, such as one would get in a livery barn. It should be from grain-fed animals, bedded with hay or straw. Sawdust or shavings are not suitable. Shake out the coarsest straw and throw the material into a heap to start heating. It should be moderately moist, neither wet, nor at all dry. As soon as heating has commenced, fork the pile over to prevent burning and repeat this three or four times every two days. When the material assumes a dark brown or blackish color and smells rather sweet it is ready to form into beds. These may be 15 to 18 inches deep and of any suitable width or length; pack down firmly and wait three or four days to allow reheating. Try with a thermometer and if not higher than 85° or 90°, insert spawn every 10 or 12 inches apart each way. Place the spawn an inch or two deep, and cover the whole beds with a light dressing of loam, say two inches deep, to hold heat and moisture, and form a firm rooting place for the crop. Mushrooms dislike to be watered, hence, moisture should be preserved rather than supplied.

MARKETMAN.

TO THE TRADE

HENRY METTE QUEDLINBURG, GERMANY.

GROWER and EXPORTER on the VERY LARGEST SCALE of all CHOICE VEGETABLE, FLOWER and FARM SEEDS. (Established 1787.)

Specialties: Beans, Beets, Cabbages, Carrots, Kohl Rabi, Leek, Lettuces, Onions, Peas, Radishes, Spinach, Turnips, Swedes, Asters, Balsams, Begonias, Carnations, Cinerarias, Gloxinias, Larkspurs, Nasturtiums, Pansies, Petunias, Phloxes, Primulas, Scabious, Stocks, Verbenas, Zinnias, etc. Catalogue free on application.

HENRY METTE'S TRIUMPH OF THE GIANT PANSIES, mixed), the most perfect and most beautiful in the world, $5.00 per oz.; $1.50 per ¼ oz.; 75c per 1-16 oz. Postage paid, Cash with order.

All seeds offered are grown under my personal supervision on my own grounds of more than 3,000 acres, and are warranted true to name, of strongest growth, finest stocks and best quality.

I ALSO GROW LARGELY SEEDS ON CONTRACT.

List of my novelties in flower seeds for 1908 sent on application.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points April 18 were as follows: New York, cucumbers, No. 1, 50 to 75 cents per dozen; No. 2, $2.50 per box; lettuce, 25 cents to $1.25 per dozen; mushrooms, 25 cents to 60 cents per pound; mint, 40 cents to 50 cents per dozen bunches; radishes, $1.25 to $2 per 100 bunches; rhubarb, 40 cents to 60 cents per dozen bunches; tomatoes, 15 cents to 25 cents per pound. Chicago, cucumbers, 75 cents to $1.35 per dozen; radishes, 50 cents to 60 cents per dozen bunches; mushrooms, 35 cents to 65 cents per pound. Boston, tomatoes, 30 cents to 40 cents per pound; cucumbers, $6.50 to $7 per box. Pittsburg, cucumbers, $8 to $8.50 per box.

NORTH YAKIMA, WASH.—The Horticultural Association has taken steps to put the saloons of the city out of business. At a meeting in the Summit View schoolhouse a committee was appointed to see the commercial club and the city council and protest the granting of licenses.

NEW PLANTS

GLADIOLUS Lemoinei and Nancianus.

V. LEMOINE & SON, Nancy, France.

Catalogues on application.

Imports.

During the week ending April 18, imports were received at New York as follows:

Hy. Bischoff & Co., 58 tubs laurel trees. One case plants.

P. Ouwerkirk, 67 cases trees.

Cleary's Horticultural Hall, 20 cases plants.

C. C. Abel & Co., 16 cases plants.

W. Elliott & Sons, seven cases trees.

C. F. Meyer, two cases plants.

A. Rolker & Sons, two cases plants.

H. F. Darrow, 21 pkgs. seed.

J. Glass, 50 cases lily buds.

Hy. Nungesser & Co., 24 bags clover seed.

Vaughan's Seed Store, two bags garden seed.

To others, 292 cases plants, 124 pkgs. plants, 165 pkgs., 24 cases trees, 126 tubs laurel trees. Nine bskts. plants, 643 boxes lily buds, 692 plants, 303 bags seed, 816 bags clover seed, 20 bags sunflower seed.

NEW CANNAS 1908

Rosea Gigantea. This beautiful variety has extra large flowers which are borne in such abundance that the mass of color on each plant is amazing. Single petals are 2½ inches across; color, a deep rich rose, almost a coral carmine. Plants make a vigorous growth, producing unusually fine clumps of green foliage. Height, 4 feet. (A great favorite with visitors to our trial grounds.) Strong plants, **$2.00** each, prepaid; **$18.00** per doz., by express, not prepaid.

Gladio-Flora. Remarkable for the unusual shape of the flowers which look like large Gladiolus. Petals are not long, but short and rounded and so wide they overlap each other, thus giving a very attractive appearance to the flowers. Color is crimson changing to carmine rose with an uneven edge of gold to each petal. Height, 3½ feet. Price, strong plants, **$2.00** each, prepaid; **$18.00** per doz., by express, not prepaid.

Meteor. Meteor is a vigorous grower with healthy green foliage. It is highly valued because of its magnificent flowers, fully four inches across, and abundance of bloom. Color is a deep crimson, very rich; each plant usually throws up five to six trusses of buds which continue blooming luxuriantly all summer through. Price, plants of dormant roots, **75c** each, postpaid; **$6.00** per doz., by express, not prepaid.

NEW CANNAS OF SPECIAL MERIT.

William Saunders. (1907) The flowers are large, of splendid form and are borne very freely in immense clusters. The color is a deep rich shining scarlet lightly dappled with crimson. Foliage is a rich bronze. Height, 3½ to 4 feet. We believe that Wm. Saunders is decidedly the most perfect Canna of this type that has been introduced. Those who tried Wm. Saunders in 1907 say it cannot be excelled. We offer plants only: **60c** each, postpaid; **$5.00** per doz., **$35.00** per 100, by express, not prepaid.

60 other varieties. Send for our list and prices.

The Nursery Trade

American Association of Nurserymen.
J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport. Ind., Vice-President; George C Seager, Rochester, N. Y., Sec'y.
Thirty-third annual convention to be held at Milwaukee, Wis., June 10-12, 1908.

CLYDE, O.—Mark Summers, of Findlay, has purchased a nursery here.

GREENWOOD, IND.—S. Billingsley reports business rushing, with a special large demand for black locust.

MANY large orchards of the improved varieties of chestnuts are to be found in Maryland. Pennsylvania, New Jersey and New York.

THE Albany Georgia Pecan Co. has purchased a large tract of land at Hardaway, Ga., and has already planted 400 acres in choice pecans.

A GREAT deal of planting of trees and shrubbery, and the formation of a number of new flower beds is in progress at the Maplewood cemetery, Maplewood, Ind.

PAULOWNIA IMPERIALIS is hardy in sheltered positions even as far north as Chicago. It has stood outside for years near the greenhouses in Washington park.

A RECENT bulletin of the Bureau of Plant Industry of the Department of Agriculture is entitled the "Decay of Oranges While in Transit From California," by G. Harold Powell, 71 pages and nine plates, colored and halftone.

THOUGH not suited to close hard city streets the elm, one of the grandest trees in America or any other country, is fine for planting in wide, open, suburban thoroughfares and the sight of it is very refreshing to townsmen. It reaches its best development in light, moist soil.

IN Georgia fruit growers buy lizards in large quantities and turn them loose in their orchards. These lizards are the especial foes of the short-horned grasshoppers, a common farm pest. Examinations of the stomachs of dozens of lizards at the state zoological laboratory shows their diet to have been composed entirely of grasshoppers, beetles and other destructive insects.

Prunus Triloba Flore Plena.

What a beautiful object this double flowering Chinese plum is, when the branches of a well developed individual are wreathed with the lively rose-pink blossoms. The typical single flowering form is a rare inhabitant of gardens, but the double flowering variety has been quite extensively disseminated by some nurseries. It is, unfortunately, liable to attack from that fatal blight which victimizes a number of Chinese and Japanese shrubs and trees in this part of the world, and it is not often that it attains the size of the one seen in the illustration.

Every one who loves beautiful hardy flowering trees and shrubs, should plant this double flowering plum, if they are not already in possession of it, and if it fails with them in a few years' time, try it again. If we should give up attempting to grow this or that, because it is liable to be attacked by some fungoid or insect scourge, we would probably lose a great many of the enjoyments of horticultural life. Prunus triloba flore plena usually flowers from the beginning to the middle of May in western New York, and the flowers are mostly in advance of the leaves. When planted in a sheltered situation, by the lay of the land, it is quite hardy here.

JOHN DUNBAR.

American Association of Nurserymen.

THIRTY-THIRD ANNUAL CONVENTION.

For the thirty-third consecutive year the nurserymen of the United States will meet, June 10-12, at Milwaukee. In looking after legislation; favoring good laws, opposing bad ones, and securing reasonable freight tariffs alone, the value of the work done by this association cannot be over estimated. At a conservative figure the amount saved in freight rates during the past two years is $100,000. Every nurseryman, be he grower, dealer or agent, shares in this benefit. About 500 out of more than 3,000 nurserymen do the work and pay the bills. Will you come in this year and do your part?

PRUNUS TRILOBA FLORE-PLENA.
Growing on a Private Estate at Rochester, N. Y.

RAILROAD RATES.

A satisfactory concession is now practically assured. The Western Passenger Association, having reconsidered its first decision to announce no reduction for our convention, later made the following announcement:

Western Passenger Association,
Chicago, March 19, 1908.
Annual Convention American Association of Nurserymen, Milwaukee, Wis.
Geo. C. Seager, Sec'y.

Dear Sir—Referring to recent correspondence relative to reduced fares account above named occasion: This question was given further consideration at recent meeting of the association and, in accordance with action taken at that time, round trip rate of two cents per mile in each direction will be tendered to other associations for basing purposes for your convention, tickets to be sold on June 6-11, inclusive, good to return leaving Milwaukee until and including June 16, 1908.

Again under date of April 7, 1908, Chairman MacLeod of the Western Passenger Association wrote:

Geo. C. Seager, Sec'y.

Dear Sir—Referring to our letter of March 23 and previous correspondence relative to reduced fares account above named occasion: Beg to advise that summer tourist tickets will be on sale to Milwaukee from points in Western Passenger Association territory daily from June 1 to September 30, inclusive, with return limit to October 31, 1908, at fares based about two cents per mile in each direction. These fares will be available for your convention and have been tendered to connecting lines for basing purposes.

According to past experience this means that a concession on the basis of the rate stated in the above correspondence will be granted by the various passenger associations having jurisdiction in territories from which a reasonable number may be expected to attend the convention. Those outside of favored territories should take up the question early so that they may obtain the benefit from the nearest point from which reduced fares are available.

The Trans-Continental Passenger Association has announced special fares from North Pacific coast points to Chicago and other eastern terminals—dates of sale June 5-6. Also reduced fares from California points, date of sale June 3. These tickets will be good for 90 days and approximate one first-class plus $10 for the round trip.

Special train—Chicago to Milwaukee. Those who remember that most enjoyable trip made by special train from St. Louis to Dallas in 1906, will be delighted to learn that arrangements are being completed for special train from Chicago to Milwaukee on June 9.

Carl Cropp of Vaughan's Seed Store, and Benj. E. Gage of the Peterson Nursery Co., have kindly consented to act as a special local committee in Chicago to perfect arrangements as to starting time, to provide a general meeting place and to make all as comfortable and happy as possible, while the "round up"

MILWAUKEE.

A bright spot.—The convention of 1902 in Milwaukee was a most enjoyable and profitable one. Every effort is being made to render the coming gathering more interesting and profitable. The exhibits in charge of the committee of which T. B. Meehan is chairman are becoming a feature which no live nurseryman should miss.

HOTEL RATES.

In a letter addressed to H. Stanley Green, manager of the Plankinton house, the secretary asked for confirmation of his understanding of the hotel proposition which was outlined as follows:

Rates:—American plan, for one person without bath, $3 a day and upward; with bath, $3.50 per day and upward; two persons without bath, $6 a day and upward; with bath, $6.50 and $7 a day and upward. In connection with these rates you suggest that our members make reservations as early as possible and in that case, if you are unable to reserve room at the rate desired, you will suggest how that rate may be obtained by taking a room with others, say two, three or four people as the case may be, and that you have more rooms at the minimum rate than at the higher rate.

I presume it is unnecessary for me to

ask also that letters from our members asking for reservations be in all cases acknowledged. I have found that in some cases hotels simply make reservations and do not reply. In that case it leaves our members in some doubt as to whether or not they are provided for.

Answering this letter, under date of November 26, Mr. Green confirmed the proposition in every detail. And further stated that any points that might come up from time to time he would be glad to answer or confirm.

Members should note particularly the suggestion regarding reservation of rooms in advance. They should state the rate they are willing to pay and ask Mr. Green to make such suggestion as will secure accommodation at the rate desired.

EXHIBITS.

Dreshertown, Montg. Co., April 1, 1908.
Geo. C. Seager, Sec'y.

Rochester, N. Y.

Dear Sir—This committee has secured two large rooms on the first floor of the Plankinton hotel. In these rooms will be exhibited colored plates, lithographs, labels and all smaller exhibits. The heavier exhibits will be placed in a vacant store on the ground floor of the hotel. From present indications, there will be ample room for all exhibits. The committee desires entries for exhibits of everything that will interest nurserymen, including nursery stock, tools of all descriptions and useful office appliances, records, etc., and in fact, everything that will interest and be of benefit to the nurseryman, whether in the field or in the office. Applications for space must be made prior to June 1, and same must be addressed to Thomas B. Meehan, chairman of the committee, Dreshertown, Pa.

Very truly yours,
THOMAS B. MEEHAN,
Chairman Committee on Exhibits.

PROGRAMME.

The publicity committee has been furnishing frequent bulletins for the horticultural press, and here is one relating to the programme:

Advance information which comes from the programme committee indicates that the programme will be complete with papers on very interesting subjects. It is likely, however, that the programme will not be so full as it has been at other meetings, leaving more time for the discussion of the various papers and for the transaction of other business.

All sections of the country are being drawn from in arranging the programme. H. D. Simpson, of Vincennes, Ind., will discuss "The Pecan," thus recognizing the increasing interest in the production of nut trees. M. McDonald of Salem, Ore., will discuss "Horticultural Inspection Laws as They Affect the Nurserymen." This paper is of great importance to nurserymen, for the inspection laws of some of the northwestern states have greatly interfered with trade in a section where fruit growing is being developed most rapidly at this time.

Others who will speak are: Judge Eugene Stark, Louisiana, Mo., "A Few Points on Improvements;" J. B. Pilkington, Portland, Ore., "Elements of Success in the Nursery Business;" H. H. Hume, Glen Saint Mary, Fla., "Semi-tropical Thoughts for the Nurserymen." Since this information was given out the programme committee has been hard at work, and those who attend may expect this feature of the convention to be entertaining and instructive.

LOCAL ENTERTAINMENT.

The secretary is informed that T. J. Ferguson is making arrangements for local entertainment and outside features while at Milwaukee, and this work could not be in better or more energetic hands.

HIGH PRICED ARTICLES AVOIDED.

Easter trade with all its tribulations passed with the development of no unusual incidents or features except the most noticeable inclination of most purchasers to avoid the very high priced articles and varieties such as the expensively made up baskets and American Beauty and high grades of other roses. Prices were as a rule a shade less than the same grade of stock brought a year ago. Every florist was well stocked with great quantities of seasonable varieties of plants and cut flowers and the advantageous disposal of it all was a matter of much concern and extreme doubt till the business of the day was over. It was then most apparent that the supply had been enormous as, notwithstanding the great sales of the day, at many places could be seen quantities of plants and a stock of cut flowers which alone would be a creditable Easter display. The sale of violets was immense and nearly every dealer was caught short of supply. All the items in the cut flower list were plentiful and of splendid quality. Easter lilies led in popularity as pot plants closely followed by azaleas, while great quantities of bulbous stock in pots was disposed of. The weather was favorable except during the forenoon of Saturday when showers deterred the shoppers considerably. J. F. S.

SCHMALZL & HEMBREIKER,
West End Greenhouses. Lincoln, Ill.

CARTHAGE, MO.—The worst hailstorm in this section for several years struck this city April 7, destroying the Fairview greenhouses, completely battering the growing crop into the ground. Other greenhouses in the city suffered loss from breaking glass. Hail fell for five minutes, covering the ground with immense hailstones.

ALTON, ILL.—J. F. Ammann, of Edwardsville, purchased the residence, store and business of Mrs. A. Dietschy April 4 and will take possession at once. Mrs. Dietschy will manage the store for him and his stock will be shipped here direct. This is an established business of some 10 years' standing, built up by Mrs. Dietschy, who, with her husband, will make an extended eastern trip this summer to take a long needed rest.

SPRINGFIELD, O.—The committee of city council on general and public improvements, has agreed to accept the offer of the Florists' Club to decorate the esplanade with ornamental flowers and shrubs.

BROCTON, MASS.—Crawford & Harris are building a dahlia house.

Washington.

EVERYBODY SATISFIED.

Although business has been rather quiet during Lent, there was no sign of inactivity Easter Saturday. All the retailers were busy and there was plenty of stock to meet all demands, both cut flowers and plants being of excellent quality. Roses, carnations, sweet peas, lily of the valley and liliums were in abundance and in fine condition. There was plenty of blooming plants such as spireas, liliums, hydrangeas, azaleas, rhododendrons, lilacs, marguerites and rambler roses all of which sold well. One retailer said this was the best Easter he had had in some years, and all seem well satisfied. Bulbs are nearly over, although there are quantities of Narcissus poeticus from outdoors; also the outdoor lilacs are coming on. Fruit blossoms are very much in evidence, and are used for decorations. The growers are all busy getting the ground ready for outdoor planting and a number of them have some of the hardier plants out.

NOTES.

A. B. Garden had a fine run on plants during Easter. He also had a very pretty wedding decoration of Crimson Rambler roses, lilium, pink and white spireas, hydrangeas, palms and ferns; large branches of pear blossoms were also used to good effect. The bride carried a shower bouquet of Bride roses and lily of the valley, the bridesmaid Golden Gate roses and the flower girls baskets of sweet peas. The orange blossom for the bride was from Mr. Garden's greenhouses.

Geo. H. Cook, Geo. C. Shaffer, Z. D. Blackistone, Gude Brothers Co. and The Washington Florist Co., all had a beautiful display of Easter blooms and plants.

J. D.

PORT HURON, MICH.—Asman's store was very finely decorated for Easter. The "Rock of Ages" scene was very much admired, the cross being a choice design in white flowers studded with electric lights. The proprietor and his wife have good original ideas and are to be congratulated on their success.

Indianapolis.

EASTER TRADE SATISFACTORY.

Easter business turned out to the satisfaction of all concerned. Up to Saturday noon, sales were behind last year, but Saturday afternoon and Sunday morning made up for it and the result is about the same as last year. The demand for Crimson Rambler roses and azaleas showed a decrease. Bulbous stock and lilies cleaned up well. Automobiles and motorcycles proved very valuable for delivery. It seemed that in Tomlinson Hall Market most everybody had flowers for sale, gardeners, fruit stands and even grocery stands had a display of spireas and bulbs.

NOTES.

A local charity organization held an Easter flower sale in one of the leading furniture stores; seemingly it did not make a notable impression on the trade.

Edward H. Schmidt announces his intention of opening up a flower store and conservatory on the west side.

J

FORT THOMAS, O.—James Ernsteihoff, aged 45, died at his residence in Highland avenue April 6 of a hemorrhage.

Minneapolis.

BIG EASTER TRADE.

Once more the florists' harvest has come and gone with its attendant rush and bustle. The first part of the week the retailers busied themselves putting in their stock of plants, and confirming their orders for cut flowers. The second day preceding Easter rained all day, and the outlook was gloomy, causing a few orders to be cancelled from the wholesale houses. Saturday dawned bright and clear, and the stores were crowded from early morning to late at night. Lilies were plentiful and cheap; there did not seem to be a dearth of anything except violets. The department stores had plants at every turn, some selling lilies at 18 cents per bud. The Greeks seemed to reap a better harvest than ever this year; their stores teemed with people laden with plants and sleepy carnations.

NOTES.

R. A. Latham put in a display at the handicraft guild, and realized a round sum from his venture. The interior of the large room was well adapted to show the number of artistically arranged baskets and boxes of plants and cut flowers. The business was about equally divided between the two stores, with the result of doubling last year's business.

Jas. Souden annexed a neighboring store, and expressed himself well satisfied with his first Easter. He sold a number of baskets, and cut flowers seemed to move rapidly at this store.

Miss Whitted could have sold a couple of thousand more violets, but could not get them. She cleaned out everything in the store in the line of plants and baskets.

Amundson & Kerchner again put in a stock in the West hotel, and caught a number of transients, putting a hole in the sales of the other Hennepin florists.

The Minneapolis Floral Co. reported a house cleared of everything on Saturday night. The immense stock of plants began its outgoing procession three weeks ago, and those who turned in their orders late stood poor chances of getting them filled. M.

E. C. Brown Co., 74 Jay St. Rochester, N. Y.

LA PORTE, IND.—The father of W. C. Kaber, founder of the Kaber Co., of this city, died April 4. Mr. Kaber was our pioneer florist.

Morristown, N. J.

The meeting of the Morris Co. Gardeners' and Florists' Society April 8, was rose night, and though we had a few other things there, the name was most fitting. Novelties did not put in their appearance as much as we hoped, but the home growers came up beyond all expectations and the quality and quantity was better than ever. We had nearly a full attendance of members and visitors from New York, Newark, Orange, Rutherford and Dover. James B. McArdle of Vaughan's Seed Store made an address giving his impression of the exhibition.

The Harry A. Bunyard prize of $5 for the best flowering plant on exhibition went to H. B. Vyse, gardener to A. R. Whitney for a grand specimen of Calceolaria hybrida. A 10-foot specimen plant of fuchsia from Dr. Leslie D. Ward, A. R. Kennedy, grower, received a special prize of $3 and was much admired. The same grower had a nice dish of Telegraph cucumber. C. H. Totty had Azalea Bernard Andreas Alba, which added to the attractiveness of the exhibition. Otto Koch, florist to the State hospital, Morris Plains, brought down six specimen plants of Spirea Gladstone and six of Spirea Queen Alexandra. Gladstone got a cultural certificate and Queen Alexandra got a certificate of merit; also special cash prize of $3. Other awards were:

A. C. Van Gassbeck, Orange, John Dervan gardener, one vase mixed roses and one vase antirrhinum. Cultural certificate.

Robt. M. Schultz, three vases roses, Richmond, Bride and Ivory.—Cultural certificate.

Villa Lorraine Roseries, F. P. Brigham grower, one vase 100 Bride, very fine.—Cultural certificate.

John R. Mitchell, our essayist, three vases roses, Richmond, Bridesmaid and Ivory (the Richmonds were especially fine).—Cultural certificate.

C. A. Wortz, Wm. Muhlmichel grower, one vase Richmond.—Cultural certificate.

Louis A. Noe, Joseph Ruizicka grower, four vases roses, Killarney, Richmond, American Beauty and Bridesmaid. —Cultural certificate. This was a magnificent exhibit.

John Green brought his new seedling carnations Red Seedling No. 1 and White Seedling No. 2. The first was awarded a certificate of merit on scoring 85 points. It is a fine scarlet. The second was awarded honorable mention on 76 points. Both are of decided merit.

Florham Farms, A. Herrington superintendent, four vases roses, Richmond, Mme. Chatenay, Bridesmaid, American Beauty and a fine lot of Darwin tulips.—Cultural certificate.

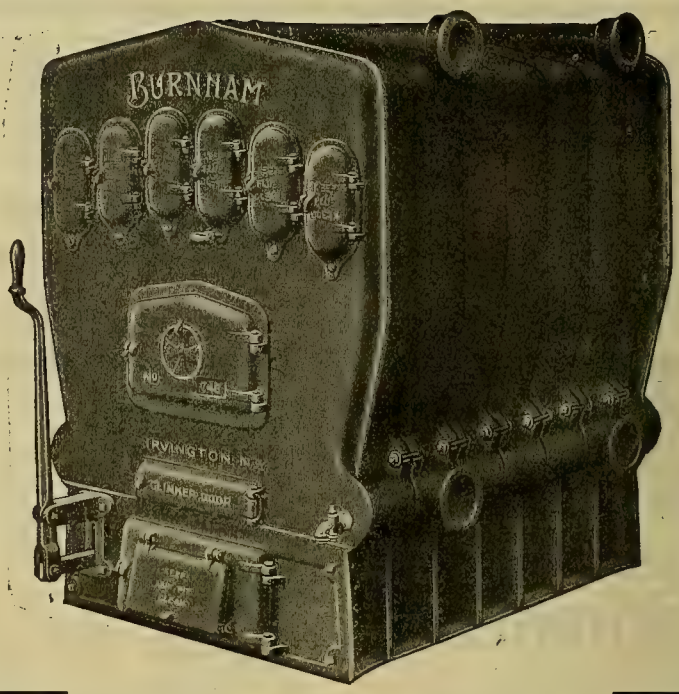
Wm. Duckham had one vase roses, Richmond.—Cultural certificate.

John R. Mitchell when called on for his address on the rose, did it well and was awarded a rising vote of thanks. Mr. Mitchell invited discussion of his paper and a pleasant and profitable time was spent in so doing, Messrs. Ruizicka, Duckham, Manda, Totty, Herrington, Kennedy and Muhlmichel taking part in it.

The next meeting, May 13, will be devoted to flowering shrubs and herbaceous plants. Arthur Herrington has consented to write us a paper on the subject. We are going to give a ladies night on that occasion. We want to fill the hall with the wives, sweethearts, mothers-in-law and aunts of our members. Robt. M. Schultz is chairman of the refreshment committee and Bob has a record of doing things well, so we anticipate a good time.

E. R.

WASHINGTON, D. C.—Dr. Radcliffe, pastor of the New York Avenue Presbyterian church took the "Cherry Blossom" for his text for his annual flower sermon April 12.



FOR SHALLOW CELLARS

For shallow cellars requiring low flow pipe connections, we have made our 18 and 30 Series Sectional Hot Water Boilers with socket connections on either side for caulked joints.

The height to center of flow pipe outlet on the 18 is 48¼ inches; on the 30 it is 61 inches.

When your old greenhouse boiler with side connections gives out, this Boiler will fit into its place without change of piping. Just another "Burnham" money saving point. Send for the new catalog.

BETTER THAN LAST YEAR.

Easter business here was in every respect very satisfactory, better in fact by far than we had looked for. It was up to former years and just a little bit better, with enough of most everything to meet the demand. More pot plants were sold than ever before, owing perhaps to the lateness of Easter and that they soon could be planted outside. There was a great call for lilies with enough to go round and better stock than usual, with the exception of Harrisii. A more complete line of flowering plants was never shown. Tulips and Dutch hyacinths were in full bloom outdoors. As usual the holiday was accompanied by several large funerals and several of the florists were kept busy all day Easter on design work. Prospects are very bright for a good business in bedding plants. Enough advance orders are in to keep the florists busy for some time to come. Carnation planting will begin in earnest this week but rain is needed to put the fields into good working order. T. E.

PHILADELPHIA, PA.

Rochester, N. Y.

Although the Saturday preceding Easter was a rainy day, the storekeepers all pronounced it a very successful Easter and trade averaged well with that of previous years. The demand for Easter lilies, azaleas, hydrangeas and Crimson Rambler roses was very heavy. One commission man disposed of 125,000 violets on April 18.

NOTES.

E. R. Fry has so much landscape work to attend to that he is seriously thinking of giving that branch of his business his entire attention.

H. E. Wilson, in addition to the two main street stores, had an Easter annex, and did a rushing business in all three.

Wm. Galentine, of Barnard, had two houses of carnations come into a heavy crop just right for Easter.

A GOOD TRADE FOR ALL.

Easter has come and gone and I think all had a good trade. The weather was good the first part of the week but Wednesday it rained and turned cold, down to freezing part of Friday with rain on Saturday and Sunday, which retarded early shopping. The stock was never more plentiful nor quality better. No reports as yet as to the amount of business done, but it seems as if it was in excess of last year. Several had branch stores to handle their surplus and others had theirs in the department stores, consequently no one had to look around for flowers. Lilies, azaleas, hybrid, rambler and Baby roses in particular sold well. Some of the lilies were short but not enough to hurt the sale. Cut flowers moved slowly, all wanting one flower and not a mixture. With the vast number of plants, cut roses were not so much in demand, although American Beauty sold well. Violets and lily of the valley were in great demand also good carnations; tulips and daffodils had their usual call. Prettily arranged baskets of plants and trimmed azaleas that were not overdone with ribbons sold much better than last year. The windows of Palmer & Sons' two stores and of S. A. Anderson were the talk of the town, as was also the advertisements of S. A. Anderson in all the daily papers which were only equaled in size by those of the dry good stores and fully demonstrates that it pays. Orchids, while not in oversupply, were all sold. The question of delivery has reached unusual proportions and the system adopted by all in having plenty of boys and wagons was good.

W. F. Kasting has been ill for the past 10 days, and was not able to be at his store through Easter, but still had a good trade. We learn that he is better and expects to be around this week.

Byrne Bros. are going to discontinue their retail store and confine themselves to growing.

The Buffalo Cut Flower Co. had a good trade for its first Easter. BISON.

STOCK OVERPLENTIFUL.

It is hard to classify an Easter business either as satisfactory or poor; for from one point of view the trade has been excellent, while from another it could be called unsatisfactory. Small flowering plants were badly overdone by the growers and finding no market among the best trade were finally peddled from store to store, at last finding a pitiful resting place in some market, drug store or ill-ventilated department store, to be sold like so many stained ribbons or second quality vegetables. It would seem that the ordinary pots of hyacinths, tulips or daffodils have fallen into disfavor with critical buyers and something must be done to produce a finer affair, or at least a fetching novelty. This year the florists' stores noted a better demand than ever for better grade plants, and the things to go the slowest were the cheapest priced goods. The greenhouse men seemed to have difficulty in disposing of their stock, being obliged to seek an outlet through the department stores, the latter stocking up extra heavily and issuing advertisements calculated to stir up the thrifty bargain-hunter, who straightway forsook his florist friend and made his Easter flower purchases in the land of silks and calicoes. With such broad competition it is no wonder the regular florist tells the story of left over stock among the popular priced goods. The only thing to be really scarce was violets, that sentimental flower whose popularity knows no waning. The quality was fair with wholesale figures of 75 cents per 100, and $1 for best grades. Although not at all lasting in fragrance or keeping, those having them were considered fortunate and every one was cleaned up at satisfactory profit. Roses and carnations were abundant, so much so that the strange scene was enacted of growers politely requesting storemen to buy, and the same storemen holding up their hands as signal of all filled up. Quantities of fine flowers changed hands at $2 and $3 wholesale. Roses sold better than last year, with an especially good call for Liberty and Richmond of medium length. Good stock at $1.50 retail, up to $4 per dozen were the general figures. Cut tulips, daffodils and narcissi found a fair sale at 50 cents to 75 cents per dozen and were of good quality. The Victoria daffodil was the favorite. While the sale of plants was not equal to last year, the receipts on cut flowers equalled 1907, and so we must content ourselves with a verdict of good business, considering the previous industrial depression and the fact that really hard times did not appear as scheduled. The Saturday weather was fair and pleasant till 4 p. m. After that a drizzle set in. M.

Two Thoughts.

When I reflect how small a space I fill
In this great teeming world of labourers,
How little I can do with strongest will,
How marred that little by most hateful blurs—
The fancy overwhelms me, and deters
My soul from putting forth so poor a skill;

Let me be counted with those worshippers
Who lie before God's altar, and are still;—
But then I think (for healthier moments come)
This power of will, this natural force of hand,—
What do they mean, if working be not wise?
Forbear to weigh thy work, O soul! Arise
And join thee to that nobler, sturdier band,
Whose worship is not idle, fruitless, dumb.

—EDWARD CRACROFT LEFROY.

SUGGESTIONS FOR PLANT GROWERS.

Ivy Leaved Geraniums.

As the young plants grow and advance for flower some kind of support will be necessary. The method of tying or supporting will vary considerably with the variety. Some kinds are much stiffer and more erect in growth than others, and a single neat stake and a tie or two keeps all right. Others are of a much more rambling nature and while these kinds are fine for window boxes, baskets or similar uses, they take a good deal more room on the benches while preparing. Now that the plant benches are somewhat less crowded than before Easter, the ivy geraniums may be given a new stand and more room. If there are any still in the cutting flats, pots or bench, pot these without delay and give them a good position or they will not be ready for use either for bedding or window boxes. Pot firmly in all cases to ensure a solid, rather than a rapid growth and water carefully until re-established.

Lilium Auratum and Speciosum.

Although not as popular as formerly for pot plants, Lilium auratum and the different varieties of L. speciosum are very acceptable late in the season and dormant bulbs out of cold storage make it possible to have plants at all times. Potted now singly in 6-inch pots, either of these lilies will make showy plants by August, with very little trouble. All they need is to be kept cool and dark for a week or two, until the bulbs are established, then brought into quite a cool house where they come along slowly. Greenfly is the worst insect enemy and this must be kept down; by sponging at sight if possible, if not by fumigation. A few light fumigations prevent the insects getting a hold and will insure success with the plants. Besides plants for growing on indoors, bulbs potted now make excellent stock for planting out in bedding designs or in shrubbery or general flower borders. L. auratum is especially suitable for this kind of work, as the habit of the plant and the foliage is far more graceful and prettier than that of any of the speciosum varieties. L. auratum is fine in single specimens but L. lancifolium looks better in groups.

Hydrangeas.

The Memorial day plants should be showing color now, and if so they may be kept in a cool, airy house to harden the foliage and bring out the full color of the flowers. Make the best of the plants by staking them out. If this is finished early the plants will grow into shape again by the time they are wanted and will have a natural appearance and not look as though they were tied to the stake. A little extra feeding may be needed by the later plants but it is not advisable to overdo this as it sometimes leads to thin foliage. Keep the plants hard and then, if stock is short, some of the flowerless shoots may be taken for cuttings without in any way injuring the appearance of the specimens. They are so little trouble to grow that everyone who has sufficient room should grow a few; even if imported stock is cheap it will be keeping money at home, where help is plentiful, to have home grown stock. Cuttings of flowerless shoots root readily now and the shoots taken off when cutting back old plants for planting out and growing on another season will make good stock. Forced plants may be cut back fairly hard before planting out, leaving a few sound eyes at the base of each shoot.

Cyclamens.

The old plan of drying off cyclamens on a bare shelf or a sunny frame is seldom practiced now, the more natural method of giving a short rest after flowering but not starving the roots being much better. As soon as the flowers are over stand the plants in a frame or house where they will get plenty of air and can be shaded from the brightest sunlight. Here the growth eases up in a natural and gradual manner and there are no violent alternations of drought and moisture. Naturally it will not be necessary to water them nearly so freely as when the growth was active and the flowers forming, but give enough just to keep the foliage in good condition. We have frequently had plants carry their leaves until August or September until, in short, they fell off as the new ones were produced. Some growers like to plant them out in frames in summer;

others prefer to keep them in pots. Success will be assured either way if they are properly looked after. Our best plants have always been produced by keeping the old specimens in pots until about the end of July when they are turned out and most of the soil removed from the roots. The bulbs are then laid out in a shady moist frame and as soon as signs of new growth can be seen, either at the roots or the top of the bulbs, they are repotted into a smaller size pot and grown on as will be noted in due course. If the planting out system is followed they are shaken out earlier and planted about one foot apart in the frames, the atmosphere kept nicely moist and the plants lightly sprayed twice daily when bright, potting the plants in early autumn into their flowering pots. Young seedling stock must be kept moving in a light, cool shady house not far from the glass. Continue to pot the seedlings as they are ready, but do not disturb them too early or the growth may be checked, and it is an axiom of good cyclamen culture never to let the plants be checked at any stage from the seedleaf to the flower. Keep a close look-out for insects; they attack the lower surface of the leaves in almost every case before the upper.

Tuberous Rooted Begonias.

Where the plants are standing at all close spread them out before they get at all crowded and see that they are not over shaded or exposed to the full force of the May sun. After getting a new stand, farther apart, the plants will be found to dry out much more rapidly than when stood close and frequent damping between the pots will be necessary. Varieties differ considerably in the manner of flowering, some producing their first buds when only an inch or so high, while others do not flower until later. Where it is apparent that the plant will not be of fair size by the time the flowers open it is best to pinch out the first buds that appear and so throw the strength of the plant into the growth which will then be far more vigorous. The habit of the varieties varies too; some of them have to be staked early owing to weakness of the stems while others need no support. Wherever it is seen to be needed let this attention be given early. Small bulbs for bedding purposes will be starting up now and must be kept gently moving so as to be about four inches high by June 1. They must be hardened a little before planting out and exposed as far as possible to sun and air; otherwise the foliage will suffer when planted out and the plants will be checked. Continue to prick off and pot up the seedlings regularly as they need this attention so as to keep them going and see that the atmosphere is kept moist about them. Avoid burying the stems deeply when potting or they are apt to damp, but see that the plants cannot swing when moved or they will fail to take hold properly.

WAVERLY, N. Y.—Plans are under consideration by Arthur L. Merrill, of West Lockhart street, to build greenhouses on his farm to the west of his house. As at present planned the houses will cover over 10,000 square feet. There will be three houses, each 20x145 feet. A number of trees that stood on the ground to be occupied by the houses are being removed and Mr. Merrill expects to begin the erection of the building within a short time.

Alexander J. Guttman, New York.

Alexander J. Guttman, the well known wholesale dealer in cut flowers, will, in a few weeks, remove from his present quarters, 43 West Twenty-eighth street, New York, to 34 West Twenty-eighth street. The new store is nearer to Broadway than any other wholesale store on that street and thus there will be a good chance to catch 'em both coming and going. One reason for his removal is that he has been practically crowded out of his present quarters by his largely increasing business. The new store is about three times as large as the one he now occupies and is undoubtedly one of the finest business locations to be found in or near the wholesale cut flower district.

The store is on the street level, which is an exception among the stores in that

Alex. J. Guttman.

locality. Three years ago Mr. Guttman moved from very contracted quarters on Twenty-ninth street to his present location and it is a striking commentary on his energy and business ability that just at the close of a particularly trying season for the trade he finds it necessary on account of increasing business to seek more commodious quarters. Though but little over 30 years old Mr. Guttman's achievements in horticulture may well be envied by many older men. Being himself a grower as well as a wholesaler, he has retained in a marked degree the respect and esteem of all branches of the trade. In conjunction with Chas. Weber he disseminated the now famous scarlet carnation, Victory, and he also has 35,000 square feet of glass at Summit, N. J. Mr. Guttman is so well known to the members of the craft throughout the country that no extended personal sketch of him is necessary. He is always gentlemanly and genial and by these characteristics has made hosts of friends.

MONONGAHELA, PA.—I. S. Crall has just closed a deal with the Lord & Burnham Co., New York, for a handsome semi-iron framed greenhouse, which has become necessary, owing to the increased trade.

THE CARNATION.

WHITE PERFECTION will be very generally planted again this season.

EVEN without the hall mark of a famous raiser Beacon would have made good.

THE tendency to reversion during the first few years is a factor to be dealt with in trying out new carnations.

ENGLISH growers of the American varieties of carnations believe in not stopping the plants until they have attained considerable height.

IT will be noted that many of the most constant flowered among the market carnations are of long, open habit rather than dense grassy and short jointed.

THE scientific raiser uses sterilized implements to insure immunity from error in crossing carnations but the finder of a chance seedling can often tell its parentage without the shadow of a doubt.

Notes in Season.

An important point in connection with the young stock is to see that on the one hand it is not overburdened with compost yet, if the benches are not ready, it is not allowed to get too hard in the pots. The plants must have the best and most open position with plenty of air moving around them at all times. As the later plants reach a suitable height they must be pinched to induce a requisite number of shoots to break. The exact height depends, partly upon the strength of the plants, partly also on the habit of the variety, some of the longer jointed kinds needing to grow a little higher than the dwarfer, closer habited sorts. As a rule one can see where a plant should be pinched so as to insure the production of about four good shoots and these are sufficient. Pinch when the growth is getting fairly hard; not woody nor yet soft and green, and take the point of the shoot only.

Although there is less risk of careless watering now than earlier in the season yet the best plants are they which are carefully looked after in this way and as a bench of plants seldom dries out equally it is safest to go over the plants with care and water dry places and plants rather than a bench as a whole. "Even them up" is a term too often used in carnation growing, both with young stock and plants on the benches. Neither are ever exactly even and it is never policy to water a bench promiscuously, whether all the plants need it or not. Overwatered plants in pots always take on a patchy appearance whereas, when care is used in watering only such as need it and when they need it, the plants come on evenly and regularly. A new stand occasionally, giving the weaker plants the best positions near the walks and light, is also a help in the same direction. The newly potted, late stock must have due care as regards light shading and keeping a little close until established.

The weather is likely to be a little hard on the older flowering plants on the benches as the sun soon takes out the moisture when combined with the ample air currents set up by free ventilation. They must never be allowed to suffer from want of water or good flowers are out of the question. A certain amount

of feeding too is absolutely necessary to keep the flowers in good shape. Throw out any benches that can be spared and use them to plant up young stock at half distance, to be replanted to the full distance later. Any other plants that are to be kept inside during summer must have a shift into larger pots and kept growing solidly and slowly right along. The bright hot days and cold nights render close attention to ventilation and firing necessary. Nothing is more likely to induce an attack of greenfly than a constantly changing atmosphere and temperature. Should any signs of the insects appear fumigate at once and repeat this until the plants are clean. See that no other plants likely to be carrying insects are anywhere near the benches of young stock or they will soon be overrun. Marguerites are often grown in or near carnation benches and late in the spring these are about the dirtiest plants around and do much mischief in a clean house of carnations.

The preparation of the soil for the field plants should by now be complete and planting may be carried out in good time. The weather has been favorable and, with due care in planting, the young stock should have an excellent start this season. There is no great hurry in localities where frosts at night are likely to be severe, but where the soil is in good working condition and the plants are ready the early part of May is an excellent time for the work. The distance the plants are set out will depend upon circumstances—as to methods of cleaning and cultivating especially—but a good general distance is 18 inches from row to row and one foot between the plants in the row. When ground is scarce this distance can be cut down considerably, but if the room can be spared it will allow of ample room for cultivation and the plants, especially those of strong growing varieties, will be all the better for it. These notes refer to medium and light soils; where the soil is heavy and wet, or has not yet been brought into good working order, wait a little longer until it is. In planting take out only sufficient plants for about an hour's work or in some way arrange that they do not lie about after having been knocked out of the pots.

SCENE IN FRONT OF MILLANG BROS'. STORE, NEW YORK, APRIL 18, 1908.

Carnation Culture.

A paper read by Andrew R. Kennedy, gardener to D. Leslie Ward, at a meeting of the Morris County Gardeners' and Florists' Society, Morristown, N. J.

In the early days of November the start should be made. A pasture or old meadow will furnish the best soil; that is the most fibrous. Cut the turf about three inches thick. If suitable soil cannot be found on the home grounds buy it; for "That is best which lieth nearest" certainly does not apply in this case. When the sod is procured it should be piled in a shed or on some well drained spot, placing the grass side down and using two layers of sod to one layer of fresh cow manure.

CUTTINGS.

There exists a vast difference of opinion as to how many cuttings should be taken from a stem, as well as when, where and how to take them. To give a rule to govern this would be extremely difficult, as different varieties differ widely in habit. As an example, take a shoot of Victory 30 inches long and bearing an opening flower. It will be found to have about 10 joints. In the axils of the first three leaves (beginning at the top) are found flower buds, in the fourth and fifth are shoots borne on a foot stalk and in the remaining five are shoots that can be taken off with a heel and will make excellent material for propagation.

PROPAGATION.

A propagating house is the most practical where a large number of cuttings are to be struck. For private gardeners and small growers, boxes or a front bench in a carnation house will give as good results if bottom heat can be given. Clean, sharp sand should be used which, after watering and pounding down with a brick, should not be more than three inches deep. With a straightedge and a pruning knife open furrows about an inch and one-half apart. Place the cuttings one inch apart and insert about an inch in the sand. Fasten the cuttings by an inward and downward thrust of the index fingers, water thoroughly and give an even temperature of 48° to 50° in the atmosphere and 60° to 65° in the sand. Cuttings rooted in boxes or on a greenhouse bench must be carefully shaded on bright days with paper or cheesecloth, until they have become calloused.

POTTING.

About three weeks after insertion in the sand cuttings should be ready to pot. Don't allow the roots to become more than three-quarters of an inch long before potting. A good, fibrous soil free from manure should be used at the first potting, which will be into 2 or 2½-inch pots. If the soil is heavy a little sand may be used to insure good drainage. After the plants are potted, place them in about the same temperature as when they were rooted, preferably a few degrees higher than lower for the first week or 10 days, when they should be removed to a cool, light house. When the 2-inch pots are nicely filled with roots (not pot bound) shift to 4-inch, using soil from the compost pile that is to be used later in filling the benches. The soil should be thoroughly broken up (not sifted) and a sprinkling of bonemeal added. Pot firmly. Do not let the plants get potbound. Good planting will show the soil about one inch below the top of the bench, so in planting see that the top of the ball is set to that level and draw up the surrounding soil to hold the water at planting time rather than fill over the ball when the bench is finally leveled and trodden down. Shading is not necessary with pot grown plants. When benched an abundance of air night and day, careful watering and light and frequent syringing is all that will be needed to encourage a healthy growth till cutting begins.

STOPPING.

A very important part of the work is stopping the growths to form a bushy plant. About the time the plants get their first shift the majority of them will need stopping. The first stopping should be done either a week before or a week

after the shift. Probably the best time is when the roots strike the side of the pot after the shift. It is done by grasping the stem of the plant with the left hand and bending the top with the right till it snaps out. All shoots must receive like treatment until about August 15. Shoots appearing later than this if allowed to mature will produce flowers at a time when the cooler weather will permit of their perfect development.

TIEING.

With potted plants the first tieing should be done while the plant is in the 4-inch pot. A thick cane stake is the best for this purpose. Cut the stakes 10 or 12 inches long so that when forced to the bottom of the pot there will be room to tie not only the main stem of the plant but also side shoots until they reach the first wire after planting. Wires run the length of the bench and twine tied across them furnish the most satisfactory tie after benching.

FEEDING.

Feeding and cutting should begin at the same time. If the plants have made a good growth the soil in the bench will be partially exhausted and feeding from now on may be done with safety and will give good results. Carnations are not particular about their food but demand it regularly. Unlike the rose the carnation is seldom off crop, hence the necessity of regular feeding. The kind of food must be governed by the kind of soil. First find what your soil lacks and then supply it if possible. As a rule, however, carnations will take kindly to a light dusting of sheep manure once a week during the fall and winter months. A good way to apply this is to water lightly, dust on the manure and then finish watering. As spring advances liquid manure is good.

Disbudding is very necessary work. The plants should be gone over at least once a week. Fumigating once a week from the time the plants are potted is a sure preventive for fly and thrips. New diseases seldom attack carnations, and with old ones, such as rust and stem rot, all are acquainted and fairly well able to combat. Many no doubt prefer the old method of field culture, but the foregoing statements have been gleaned from actual and recent experience in pot culture.

THE FUTURE.

The future of the carnation is very bright. Last year's novelties have all made good and those in sight at present look very promising. In conclusion there is a standard that every grower, whether commercial or private, should strive to reach, namely, that every flower be a perfect flower so that every carnation displayed, whether at show, in store, or as a decoration in a private dwelling, shall be an exhibition in itself of professional work.

WASHINGTON, D. C.—Senator Wetmore would transform the gateway to the national capitol into spreading lawns, fountains, and flowers. He introduced a bill April 18 appropriating $2,500,000 for the purchase of six blocks, a majority of which are occupied by buildings, lying between the capitol and the new Union station. These buildings he would tear down, substituting for them an expanse of lawn, dotted with statues and flower beds. This change, the senator believes, would make the entrance to Washington the most beautiful in the world.

THE ROSE.

A CLEAN start in a clean house is a good start.

WHEN clearing the benches hold out a few of the old plants; they may come in useful for making good on the benches that are cut back later. Plant them up outside in the meantime.

Notes in Season.

The planting season is a busy one for the rose grower and more than is usually thought depends upon the care with which this important detail is carried out. No one likes to see empty benches and as fast as the old plants are dug and the soil cleaned out any necessary repairs should be attended to and the filling proceeded with right away. It pays to have plenty of help to carry out this work as usually the soil comes from the mixers in just the right condition for planting and as soon as a bench is filled this work can be proceeded with. On large plants where an outside staff is kept this filling of benches comes quite in the ordinary course of business, but when there is a small force of workers, and these mostly inside men with their daily routine work to do, the task is harder. But in any case let it be carried out with as little delay as possible and the soil will not then have to be watered before planting.

The same manipulation is needed with the plants. It is decidedly wrong to lay out a lot of plants on the benches to dry up while the planters are getting ready to start. Try and arrange the help so that with two planters and two boys knocking the plants out, to a bench, the remaining help can just about manage to bring the plants to the benches and carry away the pots. A careful man or men should be in the house where the young plants are growing to select them and place them in flats ready for the carriers, and these should have instructions to select the plants as near as possible for size in order to keep the benches regular. Although dull weather would seem to be the best for planting this is not necessarily so. The buoyant atmosphere caused by damping the benches freely after planting and the free spraying of the young plants is very refreshing to the latter after their shift and tends to force root action which soon reestablishes them. Never wait for dull weather then but so treat the plants and soil after planting that the best results are obtained either in dull or fine weather, using less water when dull. One great advantage in dull days for planting is that less damping and spraying is needed in the houses and consequently the help can put in more time at it without interfering with the routine work in other sections.

Both in planting and handling, more care is necessary with grafted than with own root stock, as the scions break out very easily at this stage. Where the plants have been growing close together each one helps to protect its neighbor, but when standing alone the strain all comes upon the joint at the point of union of stock and scion; this strain is increased by spraying so that considerable care, even after planting, is necessary. Firm planting is essential. Too many growers put their plants in loosely with the idea that thereby they make a quicker growth—to give them a good start they say. We could never see the advantage of loose planting. Whatever time is saved at first is lost later in the quality of the growth, while the tramping or ramming down sometimes practiced after the plants are established is decidedly wrong. It injures the young roots in many cases and is far better done at planting time or immediately after. The loose soil renders planting easy, and this is all right but as soon as planted let the soil be thoroughly firmed by ramming and the surface scratched over lightly with the rake before watering.

HOUSE OF HYDRANGEAS AT ESTABLISHMENT OF J. W. DUDLEY & SON, PARKERSBURG, W. VA.

CHRYSANTHEMUMS

NOTHING is gained by trying to force backward chrysanthemums.

A GOOD distance for planting single stemmed plants is 6x10 inches.

THERE is still time to propagate a good stock of single varieties and they will probably be very popular this season.

IT is easier to get the soil too light than too heavy for most varieties. Solid soil means, as a rule, solid, short jointed growth.

IF the young stock is at all drawn plant deeply. This will not hurt the plants but will prevent stem hardening, which will.

REPOT the young stock if the benches are not ready and the plants are likely to get potbound. They start badly when this occurs.

Cultural Notes.

The principal work in connection with the growing of chrysanthemums just now is that of getting the young stock in shape so as to have plenty of good healthy plants on hand at the time they are needed for planting. Cuttings of all the commercial kinds should be put into the propagating beds without delay, particularly the early and midseason varieties. It will take them all of the time between now and the middle of June to make fine 2-inch stock for planting. The later varieties which are to be planted into their permanent quarters July 1-15 can be held a week or 10 days yet. The cuttings require a thoroughly clean, sharp sand, well firmed, and an abundance of water to prevent wilting, especially during continued bright weather.

No artificial heat is necessary for propagation except a very little for drying up the atmosphere on rainy days. The early propagated stock now in 2½-inch pots will require a shift into a larger size pot, using a live, stiff soil with a little bonemeal added to it, using a 5-inch pot full to an ordinary wheelbarrow load of soil. The plants should be potted firmly to insure a sturdy growth after which the main thing for their well being is a cool light house with plenty of ventilation. After potting, extra care is necessary in watering until fresh root action is under way; they will then take considerable water to keep them in good condition. A sharp look-out should be kept to keep down the aphis which appear about now when the young shoots are soft. If it is the intention to grow some short, single-stem, pot plants or dwarf market plants, do not neglect to reserve some healthy stock to provide the cuttings when needed later on.

The compost heap should be attended to if provisions have not already been made. Chrysanthemums are gross feeders but they do not like green fodder, so look out for them a little ahead. A soil pile made up now of the proportions of three parts soil and one part live though well rotted cow manure, to which, if the soil has a tendency to be light in texture, should be added enough clay to stiffen it up will, after being thoroughly incorporated, be in good shape when the time comes for filling benches. The specimen show plants and standards should be growing along freely now. If for any reason stagnation has taken place and the plants are not doing what is expected of them an examination should be given and, if the fault appears to be in the soil, they should be repotted. It sometimes occurs that we strike certain pots that are not porous enough to allow for the plant to do well, no matter what inducements we give them and the only thing to do is to pass such pots up. The plants take lots of pinching back and shaping now to keep them in trim and if they are growing freely they can take considerable water. But let them remain a little dry over night rather than water late in the day. As soon as the standards and half standards have attained the required length of stem, the shaping of the heads should commence and sufficient supports given to guard against their being damaged.

C. W. JOHNSON.

SHOWER BOUQUET OF CATTLEYAS AND LILY OF THE VALLEY.
By the Metairie Ridge Nursery, New Orleans, La.

Notes in Season.

It is not too early to plan for the planting of chrysanthemums; if the room is not at command prepare both the soil and the young plants and plant the early varieties as soon as the room is to spare. Keep the young stock in a good, healthy growing condition, without getting the plants too soft and long. Don't get them stunted by neglect in watering and pot room; keep them moving and also give the plants a new stand once in a while, or they root into the soil they are standing on, which will produce soft growth.

If the pots and room are to spare give them a shift and plenty of room and strong, stocky plants to set out will result. June 1 for early varieties and July 1 for late ones are good times to bench them if the stock is taken such care of and in good shape, but if the

plants have been neglected and are spindly or hardened, get them in a little earlier. It makes little difference when the stock is propagated if the plants are kept in good shape and are soft and growing right along. We have benched plants propagated in December and had fine success with them, but of course, these have to be pinched or cut back. Never plant them if they have the appearance of being stunted or have hardened. Don't plant too many varieties, especially for wholesale trade. It will pay far better to grow one or two benches of one good variety than to grow one bench of 10 or 20 varieties. The wholesaler will appreciate it if there are one or two benches of each, and appreciate a sample. Tell him how many are ready and he can get a much better price for them than for a whole lot of different varieties in little batches. Retailers must have some variety, as customers will want that, but, for the wholesale market, weed the varieties down to five or six good commercial varieties. Get the soil pile ready if not done last fall or early spring. Last year's soil that has been lying outside and got frozen through will do very well to mix with the fresh soil and manure. Either mix it now or when it is taken to the house to fill the benches.

T.

"City Beautiful" at Springfield, Ill.

A paper read by Mrs. E. S. Walker at the Springfield convention of the Illinois State Florists' Association.

The "city beautiful" has become almost a household expression and is no longer considered a dream, a mere fad of the idealist; the interest in many directions is an established fact. The making of a more beautiful city is among the new arts. In the days of our forefathers the question of daily existence made too strenuous a life to give much thought to the artistic adornment of home or country. Now, when our republic takes high rank among the nations of the world, when peace and prosperity abound, the attention of men and women is directed toward the pursuit of this new art, the "city beautiful."

Interest in civic improvement in Springfield was aroused by the meeting of the Civic Association of America, held in Milwaukee October, 1906. No one could fail to be impressed with the deep interest in this work exhibited by members present from Texas to Maine, California to New York, Philadelphia and Boston; men and women of broad intelligence occupying high positions socially, giving of their time and talents in the interest of making greater and grander cities and towns in our own America. One of the results from attending this meeting was the inauguration of a "city beautiful" department in one of the local daily papers under the auspices of the Woman's Club of Springfield. The details covered in this department during the period of its existence were: A cleaner city; the need of a good, pure water supply; the abatement of the smoke nuisance; the abandonment of obnoxious bill boards; a suggestion for securing a system of smaller parks; the cleaning up and cultivation of vacant lots; the care of back yards and alleys; the giving of more space in the erection of all new residences, for light and air; a plea for the elimination of all objectionable matter from the columns of the public press; the planting and care of trees; the duty of citizens in placing our public schools on a higher plane, both as to decoration, art studios and landscape gardening.

Our schools are centers of influence; they should take an active interest in the "city beautiful" movement, indeed they should be the chief civic centers of the community, since a problem is thrust upon us for solution, viz.: the guiding of the future of the republic by the children of our homes as well as those born of parents coming to our shores from every foreign land. The civic committee from the Woman's Club endeavored to interest the children of the public and parochial schools by instilling a desire to contribute to the general attractiveness of their homes and yards. Ten thousand copies of the accompanying circular were distributed to the pupils, 11,000 packages of flower seeds were sold at the nominal price of one cent a package and the prizes mentioned were offered:

Helen—"I guess, Harold, you didn't know that violets are the proper thing for Easter?"
Harold—"Yes, I did, my dear girl, but how can I give you violets on a carnation salary?"
—Daily Newspaper.

SPRINGFIELD BEAUTIFUL.
WILL YOU HELP!!!

The Woman's Club offers the following prizes:

(1) Three dollars for the best flower garden in each school district.

(2) A metal flag to be placed on the southeast corner of the best kept block of each school district—these flags to be placed June 15 and re-awarded in September.

(3) A commemoration tree will be given the school district making the greatest improvement before September.

A flower show will be held in September, prizes to be announced hereafter; a badge button bearing the inscription "Springfield Beautiful, I Have Helped" will be given every child who has done something toward making Springfield beautiful.

Look out for the alley, that will count half!

Don't throw papers on the street!

No private grounds will be entered without invitation.

Show what the children can do!

FLOWER SUGGESTIONS.

Do you want to cover an old fence or shed? Use morning glories, wild cucumber, cypress.

Do you want to raise flowers for cutting? Try nasturtiums, zinnias, asters.

Do you want to have blooming plants in your garden? Try phlox, pansies, coreopsis.

Plant hardy flowers.

In addition to these prizes, the daily newspapers offered cash prizes for the best essays written by the pupils of the sixth, seventh and eighth grades upon "What Children Can Do to Make the City More Beautiful." The mayor issued a proclamation, designating the first week of May as a special time for city house-cleaning. The results of this work were most gratifying. The climax, however, was reached in the great flower show. In this enterprise the Business Men's Association and the florists of our city took charge of the work and made the display a great success. The prizes awarded were trees, roots, bulbs and shrubs. A flower show upon a larger scale is among the anticipated events of the coming season.

Do you florists ever stop to think of the mission of the flowers you send forth, of the brightness, of the good cheer they bring to the home life? Even when they cover the spot where rests all that is mortal of our loved ones, they there speak eloquently of the endless life.

It is a beautiful thought that the sites of old colonial homes in New England, indeed almost the exact line of the old roadways, can be traced by the fragrant, flowering plants which still persistently cling to life when the hands which planted and carefully trained them have been for many long years at rest. In the distant and unknown future perhaps some flower may be culled whose fragrance shall serve to discover in the weedy, grass-grown ways of our lives, that, in some work accomplished, some battle won of right over wrong, we too were counted worthy of remembrance. Any effort toward making the city beautiful can but make more beautiful the lives of its citizens, since

"the soul, the immortal part
The sparkling of divinity within,
According as its aspirations are
For high and holy things, or base or low,
Gives him a nobler or a meaner look.
His outward acts affect his inward thoughts;
For, as a sainted bard hath truly said,
'Even from the body's purity, the mind
Receives a secret, sympathetic aid."

London.

Trade is good at Covent Garden and Easter orders came in freely. Lilium longiflorum at $3-$4.50. Erica Cavendishi at $6-$7.50. Hydrangea. Dr. Hogg at $4.50 and geraniums at 60 cents per dozen were the leaders. In cut flowers, roses and carnations are cheap but lilies, callas and scarlet geraniums are firmer. Spanish irises are worth 35 cents per bunch of 12 flowers.

The meeting of the Royal Horticultural Society, April 14, was a good one and well attended, the narcissus and daffodil committee meeting on this date. Various medals and awards were given for novel and rare forms of narcissi, many of those shown not being yet in commerce. In the general show was a fine exhibit of Formosum lilies and L. longiflorum from W. H. Page backing up his show of carnations of the well known American varieties. This grower has handled about 400,000 of the Formosum lily this year. Roses and ferns were well shown and the usual fine display of florists' flowers from various growers was made.

S.

SOME GOOD WREATHS.
By Henry Morris, Syracuse, N. Y.

THE RETAIL TRADE

THOUGH the older Spirea astilboides is more graceful, S. Gladstone is very full and in most cases sells better.

SOME retailers are buying pot gardenias in bud, using the flowers as they develop in the store window or greenhouse annex, and find this plan very satisfactory.

THE series of dwarf azaleas now becoming popular are free and excellent varieties. They are fine for exhibiting singly and far more useful for made up work than the larger growing varieties.

Diplomatic Collecting Letters.

Retailers not infrequently find it difficult to collect on some entirely reliable accounts within a reasonable time limit. The money must be had and the customer must not be lost to a competitor. Tact and diplomacy must be resorted to and this requires the display of considerable ingenuity. These qualities are possessed in a high degree by one of our Chicago craftsmen. Recently he wrote to several of his slow pay customers the following letter:

Dear Sir:

A recent society note in one of the newspapers told of a woman who was very fastidious and was kneading bread with her gloves on. We are not in exactly the same position but we need the money with our coat and hat on, with our shoes and suspenders on, with our shirt and collar on, and if we don't hear from a few of the old customers pretty soon we will be needing money without a blamed thing on, so kindly send us a remittance to cover all that is due. Thanking you, with best wishes, we are

Yours very truly,
(Signed) ——— ———

The writer of the above assures us that very satisfactory returns were secured from this "dun." One customer paid up a trifling account and wrote: "Herewith a small contribution that may buy at least the suspenders." Another letter, written by the same party, was equally good:

Dear Sir:

In the English language we find three words which have an entirely different meaning and yet all sound the same, viz.: IDOL, IDYL and IDLE. The man who can solve the collection of accounts promptly would be an idol in the business world, would have idyls written him and he certainly would not be idle—we are not idle but we haven't solved this problem. If you have any idle money we can put it to work. If money is your idol we want to worship with you. Some of your idle money would keep us from writing business letters and help us to write idyls about you—our idol is the customer and we hope you will not idle but be up and doing at once with a remittance to cover this idle account.

Yours very truly,
(Signed) ——— ———

A. Lange's Flower Boxes.

A. Lange, of Madison street, Chicago, has been making a specialty of boxes of cut flowers at $1 each and these have been very favorably commented on, not only by the trade, but by private buyers. The box is, of course, an inexpensive one, 30 inches long, five inches wide and three and one-half inches deep. The flowers being used just now are one dozen roses, one dozen carnations, two bunches of sweet peas, two bunches of Narcissus poeticus besides pansies or other small flowers, and some maidenhair fern. We had a view of one of the boxes and the flowers certainly looked very fresh and attractive. No packing is used and the initial cost, Mr. Lange says, ranges generally between 50 cents and 75 cents. These boxes are bound to be good sellers as they give purchasers exceedingly good value for their money, even when flowers are cheap, and a customer once pleased usually returns.

Some Good Wreaths.

The wreaths shown in the accompanying photographs are from a group of unusual wreaths made by Henry Morris, of Syracuse, N. Y., for the funeral of Albert K. Hiscock, son of former United States Senator Frank Hiscock. The unusual feature about all of them is the absence of roses and carnations, the wreaths being made up of ferns, orchids, lily of the valley and violets. The following ferns were used: Pteris Mayi, P. Ouvrardi, P. Cretica alba-lineata, P. Victoriæ, P. Wimsetti multiceps, P. magnifica, P. adiantoides, P. argyrea and Cyrtomium falcatum.

Mr. Morris has established a reputation for designing high class wreaths and he has succeeded in getting up something so different from the usual run of designs that his skill has attracted attention.

A. J. B.

Free Cars—Free Roses.

In the settlement of a seven year street car fight in Cleveland, O., April 28, three cent fare has been established all over the city with universal transfers. The public was granted free car rides all over the city for a period of 24 hours to celebrate the event. In recognition of the jollification The J. M. Gasser Co. sent out a box of roses to all city customers, with a card bearing the legend, "Free car fare: Free roses, with the compliments of your florist."

The Petal Box.

Little boxes filled with the petals of poppies, violets, roses or lavender, which have been dried, spiced, and treated with the oil of the flower from which they came are to oust the vinaigrette and the scent bottle with fashionable women. The petal boxes are supplied in gold, silver or tortoiseshell, and are cunningly fitted into the handle of an umbrella, the stick of a fan, or even on a bracelet.—Gardening World.

Rose Day at Milwaukee, Wis.

April 21 was Rose day at Milwaukee in a double sense. In the first place it was the fifth time in a little more than 10 years that David S. Rose formally took possession of mayor's office, and in honor of the event the city hall was literally transformed into an exhibition hall for roses. James Chacona, the retailer in the Plankinton block, furnished the majority of the pieces and bunches, $900 all told going into the work he had. We reproduce herewith the mammoth horseshoe of American Beauty roses enclosing a picture of the mayor. There were also numerous vases and set pieces for other incoming officials.

Prices for Hiring Plants.

ED. AMERICAN FLORIST:—

What should be charged per day for the hire of plants for parties, balls and other decorations? I am now sending out plants that, with the shipping charges from Chicago, come high, to people who need them at various times. Say a party wants plants that cost $50. How much percentage on the price can I charge per day?

Arizona. H.

We have made a business of renting plants for the last 50 years and have always charged at the rate of $5 per dozen for medium sized plants, say palms and ferns worth $3 to $6 each, for one day's hire. I would say that a fair estimate on the value of the plants to charge would be 10 per cent, so that a dozen plants rented at $5 would be worth approximately $50. Larger plants we charge more for in accordance with their size and value.

LOUIS WITTBOLD.

Easter Trade Reports.

This week we give a further installment of Easter trade reports supplementing those in our last issue. Although quite representative, they indicate little change in conditions to those in our last list:

TORONTO, ONT.—J. H. Dunlop says that the cash value of his sales was slightly less than last year, but from a greater number of orders. The prices were about the same as last year. Plants were rather over-done, especially lilies. There was plenty of cut flowers, with the exception of violets; the local flowers were over and we had to depend on New York stock. Azaleas, rhododendrons and lilacs were the best sellers in plants. Small flowers, such as violets, sweet peas, lily of the valley, Killarney, Richmond and Bride roses sold best. American Beauty roses were also in good demand. Had Easter Saturday been fine, instead of a dark rainy day, trade would have assuredly have been 25 per cent over that of any previous year.

MONCTON, N. B.—Sunnyside Gardens report a 20 per cent increase in cut flower sales and even more in plants. Cut flowers were not equal to the demand. Pot plants cleaned out well. Azaleas, lilies, primulas and bulb stock sold well, but we had some lilacs and snowballs left. Carnations, roses and violets were the leaders in cut flowers. The weather was distinctly cold and plants needed more wrapping than at Christmas.

PHOENIX, ARIZ.—Easter trade was good this year, says Chas. Burroughs, a more general observance of the day than usual being noted. Roses seemed to be the favorite decoration; everybody has roses in their yards—nice tea roses and fine American Beauty. The demand for Easter lilies was good, but the supply was small and the quality bad; callas were good, and all went at better prices than last year.

WICHITA, KANS.—W. H. Culp & Co. report trade and prices about the same as last year. Pot lilies were short, but there was plenty of all other stock. Ferns and palms found little demand, but flowering plants sold well. In cut flowers, tulips were not much wanted, but all other stock moved freely. The weather was perfect and the rain had put the air in fine condition for keeping stock.

FALL RIVER, MASS.—A 20 per cent increase in sales at prices lower than those of last year and plenty of cut flowers and plants, is the report of Chatterton Warburton. Spireas and lilacs were least in demand, but azaleas, rambler roses and all kinds of bulb stock sold well. Neither carnations or roses sold as well as violets, lily of the valley and bulbous stock.

SYRACUSE, N. Y.—L. E. Marquisee reports trade to be about equal to that of last year, but prices slightly lower. All stock was equal to the demand, bulbous stock rather too plentiful. Lilies, hydrangeas, azaleas and primulas sold well, carnations leading in cut flowers. Considering the financial depression, trade was remarkably good.

LANSING, MICH.—J. A. Bissinger reports trade fully as good as last year, with prices more on the principal items of cut flowers. Lilies in pots were the only short item and small flowering plants sold well. There was a great call for violets, but other cut flowers moved slowly. Altogether Easter trade was beyond expectations.

GRAND ISLAND, NEB.—Lilies were the best sellers with E. Williams, who reports trade about as last year. Carnations were the best sellers in cut flowers. Spring business is starting up well and prospects are good.

BOISE, IDAHO.—The Rayhouse Floral Co. reports a 20 per cent increase in sales at prices the same as last year. Lilies were the only short item. Roses and carnations sold well, but bulbous stock was slow.

LOS ANGELES, CALIF.—The Ingleside Floral Co. report sales greater by 10 per cent, with prices the same as last year. All cut flowers sold well and, in pot plants, lily of the valley, ferns, lilacs and spireas were the best sellers.

IOWA CITY, IA.—Jas. Aldous & Son report an increase of about 20 per cent, with prices about the same. There was a good supply in all lines and flowering plants sold well, largely taking the place of cut flowers.

CHEYENNE, WYO.—C. H. Garwood reports a five per cent increase in sales at lower prices than last year and plenty of all kinds of stock. Pot lilies sold better than ever before. In cut flowers, carnations were most in demand.

NORWICH, CONN.—G. Geduldig reports an increase in sales of about 20 per cent. Pot lilies were short, also cut lilies and violets. In plants, geraniums sold well and violets were leaders in cut flowers.

FREDERICTON, N. B.—John Bebbington & Son had a smaller trade by 10 per cent than that of last year. Plants were short, but there were more cut flowers than needed.

BANNERS ELK, N. C.—R. L. Hodges & Co. report trade about as usual. Plants were short and the prices about the same as those of last year.

BARNESVILLE, O.—The Easter trade here was very satisfactory, considering the weather, it raining all day Saturday.

For additional reports see pages 750. 751 and 762.

HORSE SHOE OF AMERICAN BEAUTY ROSES IN A MILWAUKEE STORE.

SOME GOOD WREATHS.

By Henry Morris, Syracuse, N. Y.

The American Rose Society.

It is said that the Chicago show, held in March, brought out the largest single assortment of cut rose specimens ever exhibited in America. The only pity was that so beautiful an exhibition had not a larger public patronage. The setting of all the prizes is now a matter of interest; the total number of prizes awarded is 64, of which 54 are in cash and 10 are cups, medals, bone and books. The trade papers did much for the show by the excellent illustrations which gave an idea to those who could not come of what there was at the Art Institute. The American Rose Society has sent letters of thanks to the Chicago Florists' Club and to the president of the Art Museum for the cordial and courteous attention given to the society.

Five new life members joined the society and this brings the permanent fund now invested up to $3,000. What the society now needs is that every flower grower and landscape gardener in America shall join us. We need the help. The membership now slightly exceeds that of 1907. The Rose Journal is to be started but we want more support to be pledged to make it a success. Come and give assistance you men and women who grow roses. There is to be a June rose show in Bronx Park and all the growers of roses who can are invited to show—there will be medals. The certificates of life membership will shortly be forwarded to all new members. "A Rose for every Home, A Bush for every Garden."

BENJAMIN HAMMOND, Sec'y.

To Be Done Now.

IN THE GREENHOUSES.

Repot any Azalea Indica that needs this attention before much new growth is made.

Keep the atmosphere on the dry side in the house where Chinese primulas are seeding.

Watch bedding plants carefully for water when they are taken from the greenhouses to the frames, as they dry out very rapidly.

Feed pelargoniums liberally right up to the time the flowers open.

Use the shears on any genistas, boronias, azaleas or similar shrubby greenhouse plants and trim them into shape a little before they start their summer's growth.

Take off euphorbia and poinsettia cuttings when small with a small heel of old bark, as such cuttings make good plants.

Use great care in handling grafted stock of roses and do not let them get crowded on the bench before moving them or many will be snapped out.

Continue to propagate verbenas by cuttings. They should be kept cool and allowed plenty of air.

Pot up the runners of Boston ferns regularly and keep them well on the move.

IN THE STORE.

When trade is dull try the effect of something out of the ordinary, such as a fine specimen flowering plant or a large design, as an attraction in the window. Let it be sufficiently distinct.

Red carnations and Pheasants Eye narcissi were the principal flowers in a very attractive wreath recently noted.

Make constant changes in the window decorations. Customers get tired of seeing the same styles, and no matter how good, they fail to pull if frequently repeated.

If your neighbor can afford to buy the best stock and gets customers for it, you can.

Hydrangeas are most satisfactory sellers. They last well and give satisfaction.

Ice in packing boxes is detrimental to some kinds of flowers, according to experienced shippers.

OUTDOORS.

Plant out all seedling hardy herbaceous stock from pots or pans before the plants get hard.

Prince Camille de Rohan is one of the hardiest of the dark red roses and can be recommended for exposed gardens.

Continue to sow hardy annuals at intervals for cutting and for a display in the borders.

A little nitrate of soda is an excellent stiumlant to the grass on the lawn now.

Finish cleaning up the rose borders and, where the soil is very light, apply a mulch of cow manure.

Mignonette may be sown between the roses at the back of the borders and thinned out when strong enough to handle.

Keep the soil from the gravel walks as much as possible. There are always weed seeds in it that give trouble later.

Burn off the fog grass in the orchard. This will clean it up and kills many troublesome insects.

Plant out asters with good balls of roots where possible and look carefully after them until well established.

OBITUARY.

Edwin Hoyt.

Edwin Hoyt, New Canaan, Conn., died April 17, and was buried April 20. Mr. Hoyt was one of the oldest nurserymen in New England and was long head of the well known firm of Stephen Hoyt's Sons Co., which was started in 1849 by deceased's father. His age was 76 and pneumonia was the cause of death after only a few days' illness.

Mr. Hoyt was an energetic business man, farseeing in his policy and ambitious in his schemes so that, under his capable management, the business, to which he was devoted, prospered greatly and came to be one of the finest in New England. He was well known for his unfailing courtesy to other and less successful business men, and just and honorable in all his business relations. He was a member of the state legislature and the State Board of Agriculture and had many other interests outside of his nursery business. His funeral was largely attended by neighbors, friends and business associates and the bearers of the remains were the four brothers Kelly, Edward, his foreman, and Frank, James and Harry, assistant foreman. Mr. Hoyt is survived by a widow, three daughters and a son and his brother James. The business of the firm will be continued.

THE AMERICAN FLORIST

1885 TWENTY-THIRD YEAR. 1908

Subscription, United States and Mexico, $1.00 a year; Canada $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

When sending us change of address always send the old address at the same time.

Advertising rates on application.

From its first issue the AMERICAN FLORIST has accepted only trade advertisements.

Advertisements must reach us Tuesday (earlier if possible), as we go to press Wednesday.

THE presence of the fleet off Los Angeles, Calif., is said to have led to considerable falling off in sales, there and in other centers, at Easter.

INVITATIONS to attend the first National Flower Show of the Society of American Florists, and exhibit, are being mailed to prominent florists and horticulturists throughout the horticultural world.

ADVICES from Alabama, Georgia and Louisiana indicate that the disastrous tornado of April 25 did slight damage to greenhouses, there being but little, if any, such property in the track of the storm.

A MILWAUKEE paper prints a cut of an Easter lily with single stem bearing 72 flowers.

IT is reported that E. G. Hill will officiate as judge at an important French rose show this season. This will afford him an exceptional opportunity to exploit our National Flower Show, as chairman of the foreign exhibits sub-committee.

WE are in receipt of the proceedings of the sixth annual meeting of the Chrysanthemum Society of America, held at the American Institute, New York, November 6, 1907. In addition to the proceedings the pamphlet contains a descriptive list of the varieties disseminated in 1907.

THE sweet scented dahlia to which reference was made in our issue of April 18, page 615, is now said to be Dahlia coronata offered for distribution in May by Georges Bruant, Poitiers, Vienne, France, by a correspondent of the Gardeners' Chronicle, from which journal our first mention of the plant was taken.

THERE will be an international exhibition of the East of France May to October, 1909, at which horticulture will be fully represented. Those who desire to make permanent exhibits should make application before July 1, 1908, to the Director General of the International Exhibition of the East of France, Nancy, France, who will supply particulars.

THE annual meeting of the Horticultural Society of New York will be held at the Museum building at the New York Botanical Garden, May 13, at 4 p. m. A vote will be taken on proposed amendments to the constitution which are submitted on the recommendation of the council in accordance with Article 12 and particulars can be obtained of Leonard Barron, secretary, 55 Liberty street. The programme for the meeting and annual exhibition, May 13-14, is also published and contains a list of premiums offered by the society and the managers of the New York Botanical Garden. Medals have been placed at the disposal of the council by the orchid committee to be awarded at its discretion and a lecture will be given by Dr. B. T. Galloway on "The Foundation of Successful Violet Culture."

Society of American Florists.

REGISTRATION OF SWEET PEAS.

The names of the following winter flowering sweet peas are submitted for registration by Anton C. Zvolanek, Boundbrook, N. J. Any person objecting to these registrations or knowing of any reasons why they should not be made, are requested to communicate with the undersigned at once. Failing to receive any such communications within 20 days from this date, the registrations will be completed:

Greenbrook, seedling from Mrs. Geo. Lewis x unnamed seedling, height over six feet, flower white, standard slightly lilac, very large, orchid flowering, up to four flowers to a stem, stems average 18 inches.

Blue Bird, seedling from Walter Wright x Wallace, height over six feet, flowers blue, bearing up to four flowers on 20-inch stems, standards wavy.

Governor John Franklin Ford, seedling of Mrs. Wm. Sim x Spencer seedling, height over six feet, foliage narrow, flowers pink, when fully open changing to salmon pink, standard wavy, producing up to four flowers on 20-inch stems.

NOTICE OF WITHDRAWAL OF REGISTRY.

Learning that the name Mavourneen had previously been applied to a rose, Alexander Montgomery of Natick, Mass., withdraws the name Mavourneen and desires that the name White Killarney shall stand as previously registered.

W. N. RUDD, Sec'y.

Azalea Deutsche Perle.

ED. AMERICAN FLORIST:—

I am credibly informed by many plant growers that Azalea Deutsche Perle cannot be imported in satisfactory condition, and that good importers and growers are giving up the use of this formerly favorite variety. Would like to hear from other of your readers in regard to it. PLANTSMAN.

We can only state that Deutsche Perle azaleas always arrive with us in good condition, and we cannot complain about this plant any more than any other variety. As to their flowering this season, all azaleas suffered more or less by the general wet season in Europe, and so the Deutsche Perle will be no exception.

JULIUS ROEHRS CO.

We are very successful in some seasons in importing Azalea Deutsche Perle. Again in other years, as for instance last fall, the loss is very serious. It is a variety that we shall be glad to see replaced with a better white, for which there is a great opening.

J. D. EISELE.

In regard to the Azalea Deutsche Perle, would say we think very little of this variety.

BOBBINK & ATKINS.

Meetings Next Week.

Butte, Mont., May 8.—Montana Florists' Club, Columbia gardens.

Chicago, May 7, 8 p. m.—Chicago Florists' Club, Union restaurant, 111 Randolph street.

Utica, N. Y., May 7, 8 p. m.—Utica Florists' Club, Hotel Martin.

Washington, D. C., May 6, 8 p. m.—Florists' Club of Washington, 1214 F street, N. W.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Advs., See Ready Reference Section.

Every paid subscriber to the AMERICAN FLORIST for the year 1908 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—As head gardener in private place, age 33; first-class English training.
F. CHAPMAN, care P. Bradley,
Vineyard Haven, Mass.

Situation Wanted—By experienced lady clerk versed in decorations and flower work. Speaks German and Bohemian. Address
R. KOLAR, 5000 Ada St., Chicago.

Situation Wanted—By all-around florist; 22 years' experience in all branches; married, German; commercial or private place; best of references. Key 523, care American Florist.

Situation Wanted—By a young man 20 years of age, 4 years' experience carnations and bedding plants; should like to take charge of small place; state wages. Address
Key 519, care American Florist.

Situation Wanted—By a single man 32 years old; 15 years' experience in the general line, as bedding plants, carnations; capable to take charge of small place; state wages. Address
Key 520, care American Florist.

Situation Wanted—By German, single; 14 years' experience in greenhouse culture of palms, cyclamens, roses, carnations and general stock. Wants position on private or commercial place.
FRITZ BECKER, 291 Richmond Road
Stapleton, L. I., N. Y.

Situation Wanted—As working foreman as grower of roses, carnations, 'mums, violets, bulbs and general stock; has a thorough knowledge of the business in all branches; has 40 years' experience in England and America; age 54, single.
GEO. MORRIS, Hudson, N. Y.

Situation Wanted—By good all around florist, single, A No. 1 cut flower grower, life experience, good worker and manager, can handle help to advantage, competent to take charge of up-to-date retail place; state wages, etc. Address
FLORIST, care of No. 236 S. Illinois St.,
Indianapolis, Ind.

Help Wanted—A man to work in rose sections; state wages without board. Apply
COLE BROS., Peoria, Ill.

Help Wanted—Grower of perennial plants for Illinois firm; young man, but must be practical grower and know the stock. Address
Key X Y Z, care American Florist.

Help Wanted—A good steady single man as rose and carnation grower on retail place near Chicago. State wages wanted with board and room. Key 518, care American Florist.

Help Wanted—A first-class rose grower to take entire charge of rose department in large greenhouse plant; must be a man who thoroughly understands his business; references required.
Key 522, care American Florist.

Help Wanted—Reliable florist with 20,000 carnations, good varieties, little cash and capable of erecting greenhouses—material now at greenhouses, near Chicago, can become part owner of established modern greenhouse business.
C. F. MORRIS, 420 Ashland Blk., Chicago.

Help Wanted—A competent rose grower to take charge of 50,000 feet of modern glass; must be steady, sober, industrious and capable of handling men; state experience, age, nationality, married or single, and send references with first letter; only first-class man wishing to better his position need apply; we expect to pay good wages; position open at once.
STUPPY FLORAL CO., St. Joseph, Mo.

For Sale—An elegant 8-foot florist's refrigerator, good as new; will sacrifice if sold soon.
E. J. PERRY, Greensburg, Pa.

For Sale—27,000 feet of glass filled with first-class stock; located in one of Chicago's suburbs; low price. Address FLORIST,
4016 N. Clark St., Chicago.

For Sale—At Madison N. J. Greenhouses 1500 running feet in all; barn, dwelling, all improvements; also 6 acres of land; ¾ of mile from depot.
Key 510, care American Florist.

For Sale—Greenhouse establishment, built five years; 85,000 feet of glass, 15 acres of land; 100 miles from Chicago; within easy shipping distance of St. Louis and Chicago. Address
J. B. DEAMUD CO., 51 Wabash Ave., Chicago.

For Sale—A retail florist business, 5 greenhouses, about 5000 feet of glass, store barn, 8 room house, lot 100 feet front, over 200 feet deep, located in fine neighborhood; a good opportunity for two young men who understand the business, with small capital to start; good reason for selling; party must have $5,000, balance to suit purchaser.
G. F. THRUN, 8707 Cedar Ave., Cleveland, O.

For Sale—At sacrifice, good paying retail florist's business, consisting of two lots, 4 500 ft. of glass; houses well stocked with bedding plants and carnations; store with living rooms and 7-ft. basement, in very heart of thriving residence city of 10,000 inhabitants; 45 miles from Chicago. Give immediate possession. Price, $4,500; $2,000 cash and balance on time to suit purchaser.
Key 525, care American Florist.

For Sale—5 greenhouses, about 20,000 feet of glass, well stocked; 4 acres best kind of soil; 5-room and attic house; good well and windmill; barn, horse, wagon, tools and stock; everything goes with the plant; good trade, can sell all the stock you can grow; located near city of about 400,000 inhabitants, accessible to steam and electric lines. WISCONSIN NATIONAL LOAN AND BUILDING ASSOCIATION, Room 22, Mitchell bldg., East Water and Michigan Sts., Milwaukee, Wis.

For Sale—At a sacrifice; a model floral establishment in the city of Youngstown, Ohio. This is the oldest floral establishment in the city, and has a trade that is desirable in every way. In order to close out an estate, this establishment will be sold at a price that will be an inducement. This is an excellent opening for some one desirous of engaging in the floral business. For further particulars call on or address, C. EDWIN OYSTER, Receiver,
507-508 Dollar Bank Bldg., Youngstown, O.

For Sale—One of the largest and best known mail order seed, bulb, plant and nursery establishments in the United States. This business was established in 1860, and is known by all seed people the country over, and many abroad, and has an enviable reputation for quality in seeds, plants, etc. This is an excellent opportunity for an individual or corporation desirous of entering into this line of business which is a very profitable one to engage in. To an ambitious young man, or several of them associated together, it offers a rare opportunity to step into and take up the management of a business that is so thoroughly established and as well known as this one is. In order to close out an estate, the entire establishment, including 52 acres of testing gardens, office buildings, greenhouses containing 45,000 feet of glass, barns, seven dwellings, a complete and up-to-date printing establishment, in which is turned out all printed matter used, including catalogs; horses, wagons, and entire equipment necessary to carry on this business successfully, will be sold at a sacrifice. Any one interested can have full particulars by addressing or calling upon the undersigned. C. EDWIN OYSTER, Receiver,
507-508 Dollar Bank Bldg., Youngstown, O.

For Sale—Greenhouse conducted for the wholesale market to be had; $12,000 on time; sold at a bargain for cash. Address
Box 775 Milwaukee, Wis.

For Sale—Greenhouses in good condition; 10,000 ft of glass, also double house, all modern, good location, 210-ft. front; or will sell greenhouses alone. HENRY EICHOFF, 2863 E. 75 St.,
Cleveland, Ohio.

For Sale—Greenhouses and stock; about 20,000 feet of glass, well stocked with all kinds of bedding plants, ferns, palms and cut flowers; for terms inquire of Mrs. Hugo Book, College street, Worcester, Mass., or L. Midgley, Worcester Conservatories, Worcester, Mass.

SITUATION WANTED.

As foreman of large commercial or private place, wholesale or retail; life experience; German, married; fine references.
H. L. LAUSCHER, Abingdon, Va.

MANAGER FOREMAN.

To take entire charge of our plant. Must be strictly sober, reliable and capable of conducting a large place successfully and be endorsed by former business associates; and must be able to take up about $5000, worth of stock to have a working interest in the firm.

L. F. DARNELL, Treas., The J. M. Gasser Co.
1035 Prospect Ave., Cleveland, O.

Rose Grower Wanted.

With not less than 10 years' experience and best references; good pay; state salary. Address

Key 521, care American Florist.

Gardener Wanted.

We can give a young man a position in a public institution as gardener and florist at a salary of $37.50 to $50.00 per month, room and board, with an opportunity for advancement. Send full particulars of former or present employment with references to **Key 515, care American Florist.**

Nursery Opportunity.

A nurseryman's business in the West having rather outgrown the strength of the founder, who has made a splendid start with a fine constituency; wishes to secure a young man to take an interest in the business. Address

Key 524, care American Florist.

Trade Directory for 1908

THE AMERICAN FLORIST COMPANY'S Trade Directory for 1908, fully revised to date, with thousands of new names and changes of address, is now ready for distribution. It contains 509 pages, including complete lists of the Florists, Seedsmen and Nurserymen of the United States and Canada, arranged both by states and towns and all names alphabetically. Also lists of Foreign Merchants, Firms which issue catalogues, Horticultural Supply Concerns, Parks, Cemeteries, Landscape Architects, Experiment Station Horticulturists, Botanical Gardens, and much other conveniently indexed and invaluable trade information.

Sweet Pea Streak.

Fortunately for me I am practically unacquainted with what is termed streak in sweet peas. That there is something attacking plants in various directions, and under different conditions, is apparent by the alarmed statements that reach one from time to time. Perhaps it is only natural to suppose that something would come along in eerie form, appearing only to a chosen few before showing itself all round. A peculiar class of plants are these leguminosæ; it matters not whether they are annuals, herbaceous or shrubby, or perennials; they are all endowed with what are termed root nodules. Yet in spite of their individuality as regards free nitrogen it cannot be said that any one of them is an unconcerned agent when cultural methods are applied.

In restricted areas, where it is almost necessary to grow plants of this order repeatedly, whatever the annual treatment may be as regards manures, we should in time expect to be troubled with either fungoid or insect pests of sorts, more especially if preventive measures of some kind were not adopted. If we study the career of many of our popular garden plants we find that there have been times when their strength has been sorely tried, and we cannot expect the sweet pea to escape visitations from disease, more especially with overcrowding, and over-manuring with both organic and inorganic foods. If we require the finest products for exhibition purposes, animal or vegetable, these are treated out of their natural course to achieve some end, but such things at the end of their treatment lack stamina, they are constitutionally weaker, and in a sense, out of training—cannot stand sudden climatic changes without serious checks because of their succulent nature.

So far as we have heard, what is known as streak has only occurred with amateurs, but under what cultural or climatic conditions the plants have been grown we are not able to state. In cases where peas have gone off in the mysterious manner described by some growers, we should think it folly to attempt to grow in the same ground for some time unless unusually stringent measures were taken in every possible direction, and consider it the height of folly to use old sticks, wires, or other supports unless disinfected with a powerful insecticide strong enough to kill latent spores that may remain from the previous year, and in bad cases we should advise applying gas lime to the soil. The elaborate preparations advised by many growers for these plants, if carried out, need plenty of lime or chalk to keep the soil in a basic condition, and this is especially the case where acid manures like superphosphate of lime are given, and also when much ammonia sulphate is used.

The symptoms, so far as an outsider is able to judge, would appear to favor the opinion that eelworm is the cause of the mischief, and if such is the case it should be easy to diagnose. Striped flowers are plentiful enough during wet, cold seasons without stem disease, it is this latter we should like to be assisted in by having specimens sent for inspection. Suggestions have been made for cultural directions to be given in a definite form by the National Sweet Pea Society, even then we think each cultivator would pursue his own course, certainly no one course could be stated as being applicable to every grower.—Charles Foster in Gardeners' Magazine.

English Carnation Boom.

"Anything like the present demand for carnations has never been known. They're wanted for funerals, they're wanted for weddings, they're wanted for decoration, they're wanted for buttonholes, all the year round." Such is the opinion of one of the biggest growers of carnations in England, expressed recently at the show of winter carnations at the Horticultural Hall, Westminster.

The reason for the "boom" was apparent enough at the show, which is in its fourth year. The tree carnation, evolved by the Americans and the French, can now be flowered all the year round, while the two other great classes of carnation—the Malmaison and the border carnation—bloom only once.

The gold medal went once again to Messrs. Hugh Low. The new flowers developed this year were a good four inches across, and of the purest colors—Aristocrat, cerise; Winsor, pure pink; Perfection, white; and Beacon, scarlet. A hunt for the green carnation—though a green tulip is now grown—was in vain, and modern taste is said to be wholly in favor of pure colors. The freak is out of fashion.

The Malmaisons were of almost every shade, and of bigger flowers than the trees; but the trees, which flower freely from January to January, show the most wonderful results of scientific cultivation and hybridization. As indication of the zeal for the flower, a lecture on the future of the carnation—described as illimitable—was listened to by a large audience, and a number of people were waiting at the door of the hall half an hour before the show opened.—London Daily Mail.

Every Day Is Bargain Day

AT

BASSETT & WASHBURN'S,

ON BEAUTIES, ROSES, CARNATIONS.

Our **Roses** are all from **grafted** stock—planted in solid benches. These produce much better flowers in warm weather as the roots have more soil to work on and don't dry out.

Our Immense Crop of Carnations

Is still on with prices down to $2.00 to $3.00 per hundred.

Bassett & Washburn,

GREENHOUSES, HINSDALE, ILL.

Store, 76 Wabash Ave., CHICAGO.

ONE DOZEN GARDENIAS ONE WEEK FROM CUTTING.

GARDENIAS

(GRANDIFLORA CAPE JESSAMINE BUDS.)

Ready, as previously predicted, May 5th. Season continues to June 5th.

In some previous years our advertising has reflected a feeling of uncertainty in promising Decoration Day Stock. This spring we are absolutely certain that the heaviest day's output will come in time to use all of it for this purpose, as we think the cut from May 21 to 26th inclusive will be at least eighty thousand daily. By the 20th we shall undoubtedly be booked up for the dates mentioned, consequently late wires would be effective only from points we can reach in 60 hours.

We strongly urge Florists and especially our old customers to try placing a standing order for weekly shipments. Those who **have** tried it continue it from year to year. We have one customer on our list who has given us a standing order for fourteen years for 1000 buds to be shipped twice a week for the season and two others of 500 each twice a week for the same length of time.

We don't want you to overstock. Small standing orders are just as much appreciated as large ones.

Quotations following are net f. o. b. here.

Standard Stem, extra good foliage, first quality buds, per 1000.....**$7.50**
500 at thousand rate.
Or orders of 3000 or more, per 1000.....**$6.50**
Less than 500 buds, per 100,..... **.85**

C. W. BENSON & CO., Alvin, Texas.

Chicago.

A LARGE SUPPLY AND SMALL DEMAND.

The market has been decidedly quiet since Easter. The shipping trade has been more active than the local, but at that there has been little to brag of. As a matter of fact the soft weather produced an enormous quantity of only fair to medium grade stock, and material for shipping to any distance has had to be carefully selected. On the other hand, the local market, for the purpose of quick sales, has any quantity of stock and it could be secured at practically the buyer's own price. There has been no very great supply of American Beauty roses, but the demand has been very light, although some fairly large lots have been moved off at very moderate prices. The majority of tea roses have been soft, very few having been of shipping quality. It has been with considerable difficulty that most of them have been moved. The same conditions existed as regards carnations, these having brought very low prices in the past 10 days. New York double violets are about done for, growers hardly realizing express charges on some lots. There have been quantities of sweet peas, with the exception of lavender, the quality being fair and the demand about normal. Peonies, yellow chrysanthemums, gladioli and irises are now seen. Lilies have been hard to move, any quantity of them being unloaded on the market. Other bulbous flowers also move slowly.

NOTES.

A great transformation is fast taking place at Frank Oechslin's. To see the benches lately given over to lilies and various kinds of Easter stock all neatly filled with bedding stock coming along in fine shape and much of it already in bloom one would not suppose Easter had occurred so lately. In the potting shed most of the potted plants have been shifted to larger pots, and now younger stock is being brought in from the frames and potted up. Much delay is usually occasioned at this stage by not receiving pots in time, but here a good supply was laid in some time ago.

The Kennicott Bros. Co. is receiving early red peonies and expect to be receiving all colors within about 10 days. E. E. Pieser says he cannot remember having seen such a market as that at present in his entire experience. He declares there is fully twice the stock handled this year as compared with a year ago, but that prices are more utterly demoralized than ever before.

At J. A. Budlong's fine blooms are being cut from American Beauty plants grown especially for summer flowering. These plants have undergone a resting period with a view to obtaining stock superior to that winter flowering plants are apt to produce at this season of the year.

The orchids now being sent to the principal retail florists from Geo. Reinberg's range are grand flowers. The Cattleya Mossiæ are exceptionally good, large wide petaled flowers of great substance that last for 10 days or more and fine in color.

L. Baumann & Co.'s new building at 118 E. Chicago avenue now has a roof on and is about ready for the interior work. Ruscus and moss wreaths are a specialty here that are much in demand at the present time.

Chas. McKellar says that the after-Easter weddings are causing some demand for orchids, Cattleya Mossiæ and Dendrobium Wardianum and D. nobile being the principal dependence of the market in this line.

Sinner Bros. have made an early start having planted their carnations in the field and being now at work throwing out their old rose plants and planting young stock in their place.

The Kroeschell Bros. Co. has 40 greenhouse boilers of various sizes completed in the shop and ready for delivery to customers who ordered early.

The Florists' Club will hold its regular meeting next week, Thursday, at the Union restaurant, 111 Randolph street.

O. C. Simmons has recently been in consultation with Milwaukee committees regarding their "City Beautiful" ideas.

Gladioli and pink and red peonies are being received in good quantities by the J. B. Deamud Co.

A. L. Randall and wife and daughter are spending the week at St. Joseph, Mich.

E. C. Amling says the demand for sweet peas is still good.

Visitors: W. A. Hartman, South Haven, Mich.; Mrs. Vesey, Fort Wayne, Ind.; Miss Letta Baker, Ottumwa, Ia.; Geo. Vatter, Marinette, Wis.; J. R. Bather, Clinton, Ia.

St. Louis.

WABBLING MARKET.

The week after Easter has been a very poor one. The most disagreeable weather, raining and cold, has put a damper on everything, and wholesalers and retailers suffer accordingly. The wholesalers, one and all, are stocked up with everything, and carnations and roses can be bought at one's own price. There is no market and no quotations; everything is at a standstill. It is hoped that, with better weather, this week will improve. All around us have been wind storms and it is feared that probably damage has been done.

NOTES.

Wm. F. Nichol, president of the St. Louis Seed Co., distributed, free of charge, last Thursday, 60,000 packages of seeds, five or six varieties to the package, to the school children of the city. Each package would have cost 40 cents if purchased.

A telephone talk with Dr. Halsted, of the St. Clair Floral Co., at Belleville, Ill., brought out the fact that but slight damage was done to the greenhouses in the vicinity. The doctor stated Easter trade was the best in years.

Prof. Wm. Trelease will give a lecture on May 12 at the North St. Louis Turner Hall. The lecture will be given with stereopticon views, showing the beautifying of homes and yards with plants and flowers.

Harry Rieman, who was arrested for passing worthless checks, got off with a workhouse sentence. It is hoped that when he gets out he will turn over a new leaf and receive a helping hand.

Young & Sons are bringing in to the Olive street store some extra fine geraniums and a fine crop of roses in pots; also some very beautiful Crimson Ramblers.

Alex. Siegel had the decorations at the Columbian club for the banquet given for the birthday anniversary of Wm. Stox, the dry goods merchant.

Cape jessamine from the south has arrived and a full crop is expected by the first week in May.

The Chicago Carnation Co. is sending some fine carnations to this market.

W. F.

LYONS, IA.—G. L. Nielsen reports an unusually large trade in Easter lilies this year. Everything sold well.

CALGARY, ALBERTA.—Ald. Terrill has purchased from Col. Walker 3½ acres to be used for a big wholesale and retail greenhouse or greenhouses. Though the price is not stated it is understood that it is in the neighborhood of $10,000 as the property is valued at around $3,000 an acre in the neighborhood.

PETER REINBERG, 51 Wabash Ave., Chicago.

Toledo, O.

PLANT BUSINESS GOOD.

Easter business has been in many cases much better than was expected. The growers have sold everything in the shape of plants that had a flower, and Salvia Zurich has proven to be an Easter plant of importance, several hundred being sold by one concern during the week. Roses, hydrangeas, lilies, spireas, lilac, tulips, hyacinths and geraniums sold well and nothing is left. The retailers had one of the busiest days in their history, Sunday morning finding each one hustling. The business since has been slow.

NOTES.

The club has had two very nice outings of late: one was held a few weeks ago at W. E. Hall's place in Clyde. Mr. Hall's plant is not very large, but up-to-date and perfect in every way. His specialty is carnations and he grows principally his own seedlings. He has a red one with very long, wiry stems, that would be a credit to anyone, and a seedling with Prosperity as one parent and one of his seedlings as the other is certainly the finest and largest flower any of us had ever seen. These two varieties form the bulk of his stock and he also grows White Perfection, White Enchantress, Lady Bountiful, Enchantress and Rose Pink Enchantress. Some miscellaneous stock is also grown as needed in a small town.

The other outing was held on April 26 and two of our lettuce growers were the victims. Miller Bros.' plant just covers an acre; lettuce and cucumbers are all that is here grown, but this year a section of the plant will be used for carnations and chrysanthemums. The other place was Searles Bros.' mammoth plant. The new one consists of 15 houses, each 15 feet wide by 750 feet long, heated by hot water with forced circulation. Two crops of lettuce have been harvested and the cucumbers are just commencing to bear. Everything is watered by the Skinner system and one man can do the watering very nicely with time to spare. There are about two tons of lettuce (Grand Rapids Forcing) being shipped every day. The old plant is about half the size and is still filled with lettuce; cucumbers will follow.

Our last club meeting was held at H. A. Mills' residence and there was a full attendance. Mrs. Mills had invited the ladies of the members, entertaining them while we held our business meeting. There was not much of importance going on, the Easter business being the main topic. SCH.

Omaha.

LARGE INTEREST IN TRADE.

Easter business was the best we ever had and most of the florists report an increase of from 20 to 30 per cent. No doubt the beautiful weather helped to make it so. We could not have wished for any better weather than we had during Easter week. The lilies were plentiful, but averaged poor, but the other pot plants were fine and fully made up the difference. Lilies sold at some places at any price and some could not be sold at all; good stock sold readily at 20 to 25 cents per bloom. Easter being late, azaleas were scarce and commanded a good price, lilacs and Bougainvillea sold freely at $5 or $6 each. Hydrangeas and cinerarias did not take well and spireas were a drug. Cut flowers were at their best and plentiful and the prices were not as good as last year. Long stemmed American Beauty roses were scarce; medium and short plentiful. Bulbous stock suffered some on account of the hot weather, especially daffodils and Dutch Roman hyacinths; late tulips sold well and brought $1 per dozen. Violets were much in demand but they were scarce and poor. Sweet peas went like hot cakes; also lily of the valley. The retailers made a very creditable display in their stores and windows during the Easter week. Business has kept up well since Easter and very little surplus can be seen anywhere.

NOTES.

Monday after Easter all the retailers were very busy on account of a very prominent funeral: A. Donaghue made a very elaborate casket cover of Enchantress carnations; Hess & Swoboda also made a casket cover using 400 lilies and hundreds of American Beauty roses. Numerous other designs were furnished.

GRIPPE.

EVELETH, MINN.—The flower sale at the Episcopal church April 16, was a decided success, netting the church upwards of $30.

PLEASANT HILL, MO.—Geo. M. Kellogg, who has been dangerously ill with pneumonia for many weeks is improving gradually.

KEARNEY, NEB.—The Kearney Floral Co's greenhouses, recently erected by George H. and his son, Irving Downing, were formally opened to the public April 11, and fully 1,000 people took advantage of the same and visited the houses from two to five o'clock. The front of the office was decorated with festooned evergreens and the interior of the same with southern smilax and fern leaves, roses, carnations, azaleas, lily of the valley, Easter lilies and other flowers. Graduation bouquets and baskets filled with Bride, American Beauty and Bridesmaid roses were displayed, also funeral designs. The guests were shown through the storage rooms, which were filled with all kinds of flowers, roses, carnations, Easter lilies, hyacinths, etc.

FOR MAY AND JUNE WEDDINGS we offer extra select Lily of the Valley, Bride and Bridesmaid Roses, and of course a full line of all seasonable Cut Flowers and Greens. Try us. We have the stock and can take care of all orders.

Seattle, Wash.

Easter trade has been very good; most of the growers had good luck and got their lilies just in at the right time. The last two weeks the weather was very favorable for them, being clear and bright sunshine. On Good Friday it rained all day but Saturday was fine and the stores did a rushing business up to 12 o'clock at night. Nearly all the lilies were sold out Saturday night; very few to be had Sunday morning. Hydrangeas and bulbous stock also sold well; the prices were about the same as last year—25 cents bud and blossom.

At the last regular meeting of the Florists' Society the bulk of the growers were present and passed on a preliminary schedule of rules and premium list for the chrysanthemum show to be held between November 10 and November 20, the exact date to be set later on. The schedule will be ready for mailing by May 5 and any one wishing one will be supplied on application to Frank Bathurst, secretary of the society, Twenty-sixth and E. Olive street.

The Seattle Floral Co. has opened its new store in connection with the greenhouses at Fourth avenue and Denny way, Geo. Antenan having the place well arranged. J. C. R.

QUIET AFTER HOLIDAY.

Business was rather tame during the past week, as usually happens immediately after Easter and Christmas. Nearly all stocks dropped back to old prices and several were hard to move at any price. Cut lilies got to be a drug before the end of the week and on Saturday, though offered for $1 and $2 per 100, ice boxes overflowed with them. Sweet peas were being offered on the streets in great quantities at prices unnecessary to quote, as, when the street gets any stock, it usually goes for whatever is offered. A heavy cut of ten-week stocks is now coming in and the doubles move fairly well, the quality being fine. Orchid prices have remained rather stiff, 75 cents being paid for the best cattleyas. There has been a number of weddings at which very creditable decorations were seen, and it is hoped that the weddings of the next two months, a large number of which are announced, will aid materially in keeping business on the move. Outdoor and bedding plants are now a big factor in trade. Much planting out has already been done of the hardier stocks and the geraniums and more tender plants are now moving freely, the quality of blooms being very fine. The spirit of Easter prevailed at the great hotels and pots of flowering plants and window boxes have added a charm to the medley of gay raiment worn by the ladies, and the fearful and wonderful liveries of coachmen and footmen.

NOTES.

John Kral, head salesman for Moore, Hentz & Nash, whose home is at Portchester, N. Y., is in the German hospital in this city, where, on April 25, an operation was performed on one of his legs. This was made necessary by trouble arising from an old injury. When a child, his leg was broken and from some cause has been more or less troublesome ever since. He is doing as well as can be expected at this stage, and it is sincerely hoped by his many friends that he will be around again soon, as sound as a dollar.

Weigel & Ujfalussy, who have acquired the florist supply business formerly conducted by Emil Steffens at 335 East Twenty-first street, will, on May 1, open in very convenient and commodious quarters at 138 West Twenty-eighth street. A man about town says that Twenty-eighth street is now the Wall street of the florist business.

J. G. Leikens has returned from a short visit in Newport to arrange for the opening of his new stand on Fifth avenue which for many years was occupied by Hodgson, the Florist. Mr. Leikens had the Barnes-Bliss wedding decorations last week and intends opening his Bellevue avenue branch here on Decoration day as usual.

In every window of the ground floor of the new and beautiful Plaza hotel Fifty-ninth street and Fifth avenue, there is a box of pink hyacinths, with English ivy, and the uniformity, on the background of the white stone of the building makes a very pleasing picture.

In the vestibule of the Holland house there is a fine exhibit of daisies in large pots, as well as other flowering plants. Throughout the Waldorf-Astoria there has been a profuse exhibit of combinations of lilies, spireas and other good plants.

S. S. Pennock of the Pennock-Meehan Co., Philadelphia, Pa., was in the city April 22 and visited Twenty-eighth street.

Albany, N. Y.

In discussing Easter trade, the local florists state that the public demand was greatest for violets in the cut flower line. Sweet peas were a second favorite with roses, carnations, lily of the valley, orchids and gardenias in about the order named. In flowering plants the popular demand was for azaleas in the pink and crimson shades. Hydrangeas and Crimson Rambler roses sold well as did also spireas. The local trade makes no complaint about the volume of business done although it has been somewhat better during Easter in the past two years. In most cases the supply of plants and flowers was at all times equal to the demand and only a few complaints of inability to obtain stock were made.

NOTES.

Daniel Whittle was one of the soloists at the annual banquet of St. George's Benevolent Society held on the evening of April 23 at the Ten Eyck.

Fred A. Danker, 40 Maiden Lane, contemplates building a forcing house this summer but has not yet decided definitely as to dimensions. R. D.

WASHINGTON, N. J.—Alonzo J. Bryan recently started work upon his new greenhouses, which, when completed, will have a capacity of 16,000 square feet, as compared with 3,000 square feet in the present greenhouses. He intends also to change the heating system from hot water to steam.

Washington.

EASTER TRADE GOOD.

While the general business the past two months has not been up to the standard, yet the Easter trade was all that could be expected. The retail stores, the markets and growers, large and small, all did a splendid business. There was a very large supply of good lilies. Those of the Gude Bros. Co., who had between 6,000 and 7,000 pots, were pronounced by visiting florists to be as fine a lot as they had ever seen for Easter. Many of the 6-inch pot plants carried 10 flowers and over. There was a great many short and inferior lilies on the market. A notable feature this year was the selling of Easter plants by a number of our department stores. Some of them sold a good many hundred pots of lilies etc. Although they offered lilies at 16-17 cents this did not seem to interfere with the regular trade, as all the retail florists' stores had all they could do.

One of the greatest floral attractions that was ever put up was a floral fountain of American Beauty roses and adiantum in one of the department stores here, presented to the firm by their employes in token of their good will for their employers and in honor of their spring opening. The fountain stood 14 feet high, was interspersed with electric lights and adiantums, these representing dripping water. Another notable feature at the same store was a tree of American Beauty roses 12 feet high. A great many flowers were used in these two pieces. The local papers took up this matter and wrote about it in a very enthusiastic manner. The floral pieces were designed by the Gude Bros. Co. on a competitive bid with other florists at the national capital. G.

PITTSBURG, PA.—When western penitentiary convicts marched into the prison chapel on Easter day the place was laden with the incense of hundreds of flowers which decorated the platform and rear of the auditorium. Pot plants, including azaleas, tulips, Easter lilies and carnations in full bloom, together with ferns and palms, made the display which was taken from the conservatory in the prison yard, donated by Henry Phipps several years ago. The greenhouse contains many rare plants and flowers. Several prisoners at Riverside have developed into horticulturists and botanists and it is under their charge that the greenhouse is conducted. All the prisoners were given permission to view the Easter flowers exhibited in the conservatory.

EASTER BUSINESS DISAPPOINTING.

The more the late Easter trade, just now a topic of much discussion, is talked over, the less satisfactory it appears to have been, particularly with those whose business is done mostly with the middle classes. The army of small dealers who get the privilege of pavements and some bold enough to rent empty stores and stock them up, together with the hosts of store keepers who run plants for Easter as a side line, and last of all the growers, who if they do not manage to sell out, dump their surplus stock on the sidewalks of the shopping streets in the resident districts and count all they get as so much profit, cater to the people of moderate means and all to a greater or less extent were left with large stocks on their hands when the sales were over. In addition to the general apathy of the buyers, rain, which continued most of Saturday afternoon, was a great handicap, as it doubtless kept many of the prospective customers at home. The smaller florists of the surrounding cities and towns, men who have greenhouses, almost invariably say that business was not up to their expectations and considerably below that of last season. Fine stock, in variety, that would have sold readily in other seasons, was to be seen the week after, on the benches, going to waste. Men turn to one another and ask the reason why. No one seems to have been prepared for such a reversal and it falls very hard on those who hoped for a good Easter trade to pull out the deficit of a bad season.

Business has been fair the past week, a number of weddings, with more or less elaborate decorations, using up some of the surplus stock. The catholic centennial, with its various dinners and receptions also called for elaborate decorations, most of which were done by the Habermehls. Prices are back to the low level of before Easter and possibly a trifle farther down. It is a good dozen American Beauty that brings $2 and many are sold for less. Other roses sell at from $6 to $8, for the specials, with the exception of special Richmond, which range a little higher. Carnations are plentiful, $3 being high for a few of the select, $2 buying very good stock and much less by the 1,000. White carnations are very hard to move at any price. Sweet peas have a rush on, and are coming to hand in great quantities, $3 to $5 being the price per 1,000. Very fine giant daisies are in good demand, at $4 to $5 per 1,000. Violets are now done, the warm weather making their shipment from New York unprofitable. The bedding plant men are making the best of the situation and have filled up what space they made vacant with geraniums and other stock, potted up from small sizes. Much outside planting is going on, the weather being very favorable; in fact the past few days it has seemed more like June weather than that of April. K.

Pittsburg.

AN OVERFULL MARKET.

The market has again fallen into the pre-Easter state of over supply and light demand. The rose market was never worse than at present, the finest grades going begging and the shorter grades going to the barrel. Carnations are somewhat better, the best cleaning up at two cents. Lilies are still the same old drug; no one seems to be able to move them at all. Very few violets are to be seen. In last week's report a misprint changed the meaning of the rose situation "tea" roses being printed instead of "red." Outdoor lilac is plentiful but not used very much. J.

Boston.

GOOD DEMAND FOR CUT FLOWERS.

The re-opening of the social season on Easter Monday was less marked than is customary but brought out a fairly good demand for cut flowers. A conspicuous feature is the small number of weddings of prominence in this locality. College receptions and the like are at their height and call for a line of first class stock with which the market is full. Early graduations are in order this season, the first week in June terminating the courses in all the large colleges. Easter Monday was a local holiday, presenting no business advantages, the week formally opening on Tuesday. Most of the shops have an unsold variety of flowering plants on their hands. Lilies and rambler roses seem to be the chief surplus. Carnations are the greatest burden in cut flowers and no inducement seems strong enough to effect a sale. Bulb stock is gradually disappearing but there is still more than enough to meet all demands. Roses are first-class and prices are very reasonable.

NOTES.

The regular meeting of the Gardeners' and Florists' Club was held April 21 and was largely attended by an audience of enthusiasts interested to hear the celebrated speaker of the evening, Wm. Sim, who lectured on his favorite subject "Sweet Peas." The subject and the lecturer combined an unequalled treat and both were received with unbounded enthusiasm. Five new members were added to the club register. It was voted to donate $25 to the relief of the Chelsea sufferers.

While on the way to market April 23 from the greenhouse, the large auto-van of Pierce Bros. collided with an electric car in Central square, Cambridge. Very little damage was done to the machine but all the windows on one side of the car were wrecked. Turning a sharp corner the collision was inevitable, the view of the chauffeur being completely shut off by the hoods enclosing his seat. The trip to market was continued with the loss of a few minutes in straightening the tangle.

The R. & J. Farquhar Co. gave a public exhibition of their hybrid lily which is attracting so much attention among the bulb growers at Horticultural Hall April 25. This lily is the product of a cross of Lilium longriflorum and Phillipinense and at present gives every indication of being a huge success.

Frank Edgar, son of the late W. W. Edgar, and sales agent for the Edgar Co., has been confined to his home for over a week with a serious affliction of kidney trouble. In the hands of the best physicians obtainable he is now improving, but will be some time in regaining his usual strength.

James H. Delay, who for over a generation has been identified with the retail trade has undergone an operation at the Massachusetts General hospital from which he is now rapidly recovering, after

three weeks of anxiety to his numerous friends.

W. W. Tailby, of Wellesley, is distributing an excellent crop of irises of which he has an extensive collection of the most exclusive varieties. Besides taking care of the local market, large shipments are regularly made to others.

The Massachusetts Horticultural Society will hold its annual exhibition of late bulbous plants May 9 and 10 at the society's hall. A large entry list is already prepared and the display promises to be a most interesting one.

Thomas F. Galvin sailed from New York April 22 on the Mauretania for Europe where he is to join his family which has been spending the winter on the continent.

Visitors: Martin Reukauf and S. D. Greene, of Bayersdorfer & Co., Philadelphia, Pa. B.

Massachusetts Agricultural College.

FLOWER SHOW.

The exhibition of flowers and plants at the Massachusetts Agricultural College, April 24 and 25, was the finest held in this vicinity for several years. The display of carnations was exceptionally good and the college feels deeply indebted to the many growers who cooperated in making this show so successful. The interest shown by the students and townspeople was very gratifying, Wilder hall being crowded to its capacity during the hours the exhibition was open. At the close of the show, Professor White sent the flowers so generously contributed by the growers to the hospitals in the vicinity of Amherst. The following are the exhibitors and the flowers shown:

F. R. Pierson Co., Tarrytown, N. Y.—White Enchantress, Victory, Melody, Winsor, White Perfection and Beacon carnations.

A. N. Pierson, Cromwell, Conn., Bride, Bridesmaid, Chatenay and Richmond roses.

Wm. Nicholson, Framingham.—Fifty blooms Afterglow carnations.

W. A. Manda, South Orange, N. J.—Pink Pearl, a new hardy seedling dianthus, and specimens of his Cherokee and green roses.

Peter Fisher, Ellis.—Alma Ward, Winsor, Snowflake, Rose Enchantress, Beacon, Mrs. Tom Harvey, Evangeline, White Perfection, Mrs. C. W. Ward, Enchantress carnations and four seedlings under number.

S. J. Goddard, Framingham.—Helen Goddard, Winsor, Victory, Britannia, White Perfection, Octoroon, Lady Bountiful and Enchantress carnations.

Patten & Co., Tewkesbury.—Helen Goddard, Harry Fenn, Octoroon, Victory, Manley, Winsor, Variegated Lawson, Beacon, Red Lawson, Pink Patten, White Lawson, White Perfection, Enchantress carnations; also eight seedlings under number.

H. H. Rogers, South Sudbury.—Mrs.

T. W. Lawson, Fair Maid, Winsor. The Queen, and three seedling carnations under number.

H. W. Field, Northampton.—Viola Sinclair, Prosperity, Enchantress, President Seelye carnations; Bride, Bridesmaid, Richmond and General McArthur roses; pansies, nasturtiums and sweet peas.

J. W. Adams & Co., of Springfield.—Fifty Prospector.

Pierce Bros., Waltham.—Mrs. T. W. Lawson, Governor Guild seedling, Enchantress, Rose Pink Enchantress, White Perfection carnations.

The Cottage Gardens Co., Queens, N. Y.—President, Snowflake, Beacon, Mrs. C. W. Ward, Alma Ward and Mrs. Harvey carnations.

Wm. Sim, Cliftondale.—Splendid specimens of the following sweet peas: Mrs. William Sim, Le Marquis, Mrs. F. J. Dolansky, Mrs. Alexander Wallace, Jack Hunter, Christmas Captain, Christmas Pink, Mrs. W. W. Smalley, Florence Denzer.

Especially admired was a vase of 30 magnificent, long-stemmed American Beauty roses from the Waban Rose Conservatories, Natick, also Killarney and Richmond.

The college devoted one room to named specimens of decorative foliage plants.

On Friday afternoon G. H. Sinclair of Northampton addressed the students of the horticultural seminary on the subject of "The Carnation; its Culture and Development."

Dayton, O.

NO ONE COMPLAINING.

The Easter trade here was very satisfactory. Fancy baskets, hampers and ribbons were more in evidence than formerly. The adding of a 25 cent hamper or pot cover to an azalea, rhododendron, hydrangea, pan of lilies, spirea or in fact any flowering plant will not only add to its appearance, but will sell it quicker and at almost double the price than without. Taking in the general conditions of trade there is no one complaining. The weather was fine at Easter and outdoor bulbs were in full bloom. Cut flowers were plentiful and no high prices, therefore the advance not being very much it afforded every one a chance to buy flowers that otherwise would not. On account of the very warm weather that we are now having the outlook for all kinds of fruit is very good—better than for years.

NOTES.

H. Haerlin, chief gardener at the National Military home is making some extensive improvements this season in the way of landscaping work and ornamental bedding. The 300,000 tulips which are in bloom there are worth going a long way to see.

The Dayton Floral Co. is handling a concrete flower vase this season that promises to be a valuable acquisition to the trade. This firm shipped an order on Tuesday of 10,000 carnations to Columbus for souvenirs for a furniture store opening.

The son of H. H. Ritter was married Easter Monday to a beautiful and accomplished young lady from our neighboring town, Troy; they are sojourning in the metropolis on their honeymoon.

The Miami Floral Co. is planting carnation both inside and outdoors. This firm had a fine lot of lilies for Easter.

John Boehner has a splendid show in bedding plants; he does the principal vase filling in Woodland cemetery.

Matthews the Florist had an unusually fine display of Easter plants this season that sold well. M.

Marion, Ind.

Easter trade was fairly good here and all report a busy time. There was plenty of lilies and a few were left over, but all the best sold well and at a good price. Sale of other Easter stock was not quite as good as other years, but lots of cut flowers were sold, especially carnations. We have finally got down to the kind of competition where someone has got to cut prices and take the profit out of the florists' business. One firm advertised in all the daily papers and sold good carnations for 50 cents per dozen and roses for $1, less than such stock could be bought for wholesale in the market. This is the first time in the last 10 years that good carnations have been sold for the holidays for such a price. It is to be regretted and is entirely unwarranted.

Business in general has been fair all through the winter and we have all got our fill of spring stock. Gunnar Teilmann has his two places quite full of fine bedding stock, and is growing about 15,000 chrysanthemums, about half of which he will plant and wholesale the other half. All we need now is a good spring and plenty of business. T.

EAST LIVERPOOL, O.—The flower store of B. A. Mick, formerly located at 555 Main street, wil be moved to a building near the public square.

EASTER REPORT.

Easter was not a record breaker in the line of business transacted but was satisfactory to all, as none had very great expectations. Everybody had been cautious in not overstocking, in consequence of which most everything was disposed of at a fair profit. All flowers, with the exception of lilies were plentiful and could be bought in any quantity at reasonable prices. Lilies brought good prices as they were very scarce, especially cut. In other flowering plants next to lilies, azaleas and rhododendrons were most in demand. There were a great many spireas in the market, but very little call for them. Lily of the valley as usual at Easter was to be seen in great quantities. The season for lilac was almost over, except for the late varieties.

NOTES.

After an unusually dry March and April we are now getting some belated showers, which are benefiting the country very much, although they are too late for some of the crops. The nurserymen and farmers are all hoping for a continuance of light showers for the next few weeks as it will help the orchards and grain.

The most of the lilies brought in for Easter were from the following growers: Ferrari Bros., E. W. McLellan, H. Goertzhain, Sievers & Co., Domoto Bros. and H. Plath.

Kelly Bros., proprietors of Sievers' Floral Co., will, in the near future, open another store on Sutter street, between Polk street and Van Ness avenue.

Julius Eppstein was kept very busy during Easter week; all of his large stock of lilies was sold early on Saturday.

Sievers & Jaques had a large order for cut flowers for Admiral Evans to be sent to Paso Robles.

Chas. Stappenbeck had a fine lot of tulips in his store, which he disposed of quite readily.

P.

Denver.

FINE EASTER BUSINESS.

The Easter business done here will stand well to the front with the best we have ever had, the weather being favorable in every way, no wind or rain, an ideal Easter in every respect. The plants were delivered in better condition this year than at any time heretofore, and we have had fewer complaints of lilies being bruised, etc., as it was not necessary to wrap them for delivery. Plants sold very well, lilies throughout the town being sold out. The cut flower business was quite brisk, in fact almost everything was sold off the market. The large hydrangeas were slightly over-plentiful, that is, the high priced plants, and a good many of these were left over, but everything in the way of medium priced plants was sold out entirely. Ben Boldt had some of the finest Baby Rambler roses ever seen here. They were about two feet high, covered with flowers and were sold as fast as they came in.

Trade has been rather slack since Easter, but we are looking forward to a good spring trade. Flowers are plentiful, the supply of sweet peas with long stems and fine flowers being especially abundant.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

VERMONT formerly had a seed law but it was inoperative and finally removed from the statutes.

G. C. ELDERING, representing W. J. Eldering & Son, Overveen, Holland, reached New York April 20 and is now on his way west.

THE SOUTHERN SEED CO., Louisville, Ky., has been licensed to do business in Indiana, capital stock, $50,000; stock represented in Indiana, $3,125.

IT has been suggested that the originators of H. R. 13835 (Seed Bill) in attacking the seed trade as a class and particularly the vegetable and flower seed houses have "treed the wrong coon."

A "WEED SEED BILL" would be a serviceable and suitable name for a restrictive law in the line indicated by its name and not be a reflection on the seed trade industry as is the title "Pure Seed Bill."

NEW YORK.—Wm. Elliott & Son moved April 24 to Vesey street. F. H. Henry, of Henry & Lee, will sail for Bermuda May 5.—Robt. Fulton is making a trip around the world by way of Europe and Japan.

NEW LONDON, IA.—Hugo Beyer, the well known seedsman, has bought 12 acres of land near Mount Pleasant, and will remove his establishment to that city in November. Mr. Beyer originated the well known Oak-Leaved lettuce.

GREELEY MARKET or Scott's Cross cabbage is a popular Colorado variety which is described by the Agnew Seed Co., Greeley, Colo., as being an accidental cross of Winningstadt and Flat Dutch. The Agnew Seed Co. will handle the seed.

CHICAGO.—Onion sets are quoted quite low for poor stock; for good sets the prices on April 29 were: $2 for yellow; $2.25 for red, and $2.50 to $2.75 for white. Grass seed contract prices on the board of trade April 29 were noted as follows: Prime Timothy, $4.25 (nominal); choice white clover, $15.

SAN FRANCISCO, CALIF., April 18.—I have just come up the coast and find some lack of rain around this city and the Santa Clara seed growing district. Sweet peas and lettuce are both suffering somewhat from want of rain but onion is rather better off at this time.—H. C.—April 22.—Light rains have fallen and prospects seem good for more.

WASHINGTON, D. C., April 24.—In reference to the agriculture appropriation bill, this passed the house a few days ago, and I am informed this afternoon by Dr. B. T. Galloway that he fully expects it to pass the senate in a week or so. Up to this time it has not been taken up in the senate.—G.—[This carries the free seed distribution.—ED.]

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

Pure Milk Versus Seeds.

At the hearing on the seed bill April 21, Congressman Mann argued the responsibility of the seedsmen from the fact that the milkman whose cow produces low grade milk is subject to a penalty if he sells it. Perhaps Dr. Woods will supply an instrument for testing seeds to accurately indicate from the seeds themselves to what extent the winds, waters, insects or tendency to revert has affected the same during their growth; if so the case of the milkman who can make a chemical test can be compared with that of the seedsman, but not otherwise.

What Seedsmen Should Do Next.

Have letters written to these congressmen from the most influential citizens in their home districts protesting against the passage of this law putting the seedsmen in the restricted class along with patent medicines and adulterated foods. Ask if the evidence shows that seed trade abuses in proportion to business done prove the business should be publicly discredited. Ask if their attempted legislation is to cover up the Free Seed Folly, which squanders $400,000—public money. If not that what political move requires this seeming grand stand "reform" play. Ask those who introduced and stand sponsors for the bill to clear up the above questions and prove their personal fairness and statesmanlike motives in the matter before your congressman lends his voice and support to this law which if passed will discredit an industry which inherently and in practice is one of the most beneficent in the country. Ask why the United States government in 1848 started the distribution of rare seeds and plants, if it was a trade of fraudulent tricksters. Ask why it continues this distribution, changing the original intent of the act and sending out now the most common varieties of garden and flower seeds if this industry is a fraud. Ask what is the necessity of this free seed distribution in competition with the seedsmen and follow it with a drastic law, with prison penalties, against the class which has already been wronged. Ask if this on the face of it can be called wise statesmanship by the party in power.

When you secure the writing of these letters, please try to mail a copy of the same to the president of the American Seed Trade Association so he will know what is being done. State your own forcible reasons against the enactment of the proposed law, adding, if you deem them reasonable, some one or more of the above stated in your own language.

Canary Islands Onion Seed Crop.

We illustrate on this page a growing crop of Teneriffe, Canary Islands, onion seed, most of which is under contract with the Southern Texas Growers' Association. The season is rather backward this year, writes our correspondent, April 9, owing to the unusually cold and sunless winter. Even in early April, when it should be hot and sunny, the weather is still bleak and the crop will be both late and considerably under the average in quantity. So far, little if any disease has appeared, except in a few low lying spots. The seed heads look healthy but they are coming on slowly and unevenly and while some heads are in full flower, as shown in the illustration, there are beside them others with buds just forming.

Again.

That other eminent trust buster, Congressman Mann, is made the inquisitor in chief to put the publishers on the defensive and obscure the real, the paramount arguments for the wood pulp and paper proposition. But whom will all these tricks deceive?—Chicago Record-Herald.

Addional seed trade news on pages 735, 736 and 737.

ONION SEED FIELD AT TENERIFFE, CANARY ISLANDS, APRIL 6, 1908.

PROPOSED SEED BILL REVISED.

Without assuming that the seed trade needs restrictive legislation (and even believing that it does not) the committee recently appointed by President Green of the American Seed Trade Association revised the Bill H. R. 13,835 to a degree under which they thought it might be possible to do business if forced to try.

A BILL to regulate commerce in adulterated and misbranded seed and to prevent the sale or transportation thereof, and for other purposes.

PAGE 1.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the introduction into any State or Territory or the District of Columbia from any other State or Territory or the District of Columbia or from any foreign country of any seed adulterated or misbranded, within the meaning of this Act, is hereby prohibited; and any person who shall knowingly and willfully ship or deliver for shipment from any State or Territory or the District of Columbia to any other State or Territory or the District of Columbia, or who shall knowingly and willfully receive in any State or Territory or the District of Columbia from any other State or Territory or the

PAGE 2.

District of Columbia or foreign country, and having so received shall knowingly and willfully deliver or offer to deliver, in original unbroken packages, for pay or otherwise, to any other person any seed adulterated or misbranded within the meaning of this Act, or any person who shall knowingly and willfully sell or offer for sale in the District of Columbia or any Territory of the United States any such adulterated or misbranded seed, shall be guilty of a misdemeanor, and for such offense be fined not exceeding one hundred dollars for the first offense, and after conviction for said first offense for each subsequent offense not exceeding three hundred dollars. The Secretary of Agriculture shall make uniform rules and regulations for carrying out the provisions of this Act, which shall be effective only after six months' publication.

SEC. 2. That the term "seed" as used in this Act shall include all cereal, grass, clover, and forage plant intended for seeding purposes, but the provisions of this Act, except as to the importation of seed prohibited entry under this Act, shall not apply to seed in transit or held in storage for the purpose of being cleaned, or graded, or to seed in process of cleaning or grading, or to seed stored after cleaning or grading, before being offered for sale for seeding purposes.

SEC. 3. That for the purposes of this Act seeds shall be deemed to be adulterated—

PAGE 3.

First. If seed purporting to be orchard grass seed contain more than five per centum of seed of rye grass or meadow fescue; if seed purporting to be Kentucky blue grass seed contain more than five per centum of seed of Canada blue grass; if seed purporting to be red clover seed contain more than two per centum of seed of yellow trefoil; if seed purporting to be alfalfa seed contain more than five per centum of seed of yellow trefoil, burr clover, and sweet clover, singly or combined; or if any seed purporting to be of one kind or variety contain more than five per centum of another kind or variety, such other seed being similar in appearance and of lower market value and which is used as an adulterant: *Provided,* That no seed shall be deemed adulterated within the meaning of this paragraph when it is accompanied by a statement or label in the form and manner prescribed by the rules and regulations in this Act provided for, giving the total percentage of purity and a list of the principal distinguishable kinds or varieties of seeds contained therein: *And provided further,* That no seeds or bulbs shall be deemed adulterated within the meaning of this Act, in the case of mixtures or blends; when accompanied by a statement or label in the form and manner prescribed by the rules and regulations in this Act provided for, stating plainly that they are mixtures or blends of two or more varieties of seeds or bulbs, and in such cases it shall not be necessary to dis-

PAGE 4.

close the names and amounts or proportions of the kinds or varieties of seeds contained therein: *And provided further,* That nothing in this Act shall apply to seeds sold by sample, where no misrepresentations are made; and this last clause shall only apply to interstate traffic and not to seeds prohibited of entry from foreign countries.

Second. If seed of red clover, alsike clover, alfalfa, or Egyptian clover contain more than a trace of seed of dodder; or if any seed contain weed seed, rendering it unfit for seeding purposes: *Provided,* That the provisions of this paragraph shall extend only to seed imported from a foreign country.

Third. If any seed or bulbs contain, respectively, an unusual or exceptional percentage of dead seeds or bulbs or other matter, reducing its quality below a normal average for the current season in the country where grown for the variety in question: *Provided,* That this paragraph shall extend only to seed and bulbs imported from a foreign country.

Fourth. If there shall be knowingly added to seed any weed seed or dead seed, or any other matter materially reducing its value for seeding purposes: *Provided,* That this paragraph shall not apply to the mixing or blending of seed not otherwise adulterated within the meaning of this Act.

PAGE 5.

SEC. 4. That for the purposes of this Act seed shall be deemed to be misbranded—

First. When seeds of one definitely distinguishable kind or named variety shall be substituted for or offered for sale under the name of another definitely distinguishable kind or named variety.

Second. If in package form, and the contents are stated in terms of weight or measure, they are not plainly and correctly stated.

Third. If the article be falsely labeled or branded as to the State, Territory, locality, or country in which it is raised or produced.

Fourth. If any branded box, bag, or other container is used for any other seed of the same kind which is sold in or from said container for the purpose of deceiving the purchaser.

SEC. 5. That no dealer shall be prosecuted under the provisions of this Act when he can establish a guaranty signed by the wholesaler, jobber, or other party residing in the United States from whom he purchases such articles, to the effect that the same is not adulterated or misbranded within the meaning of this Act, designating it. Said guaranty to afford protection shall contain the name and address of the party or parties making the sale of such articles to such dealer, and in such case said party or parties shall be

PAGE 6.

amenable to the prosecutions, fines, and other penalties which would otherwise attach in due course to the dealer under the provisions of this Act.

SEC. 6. That the Secretary of the Treasury shall deliver to the Secretary of Agriculture, upon his request, from time to time samples of seed being imported into the United States or offered for import, giving notice thereof to the consignee, within two days after the receipt of the seed by the custom officials at the port of entry, who may appear before the Secretary of Agriculture and have the right to introduce testimony at such time, within ten days after service of said notice upon him, and if it appear from the examination of such samples that any seed offered to be imported into the United States is adulterated or misbranded within the meaning of this Act, or is otherwise falsely labeled in any respect, or is intended solely for adulteration purposes, the said seed shall be refused admission under such regulations as the Secretary of the Treasury may prescribe: *Provided,* That the Secretary of Agriculture shall render his decision and give notice thereof to the consignee within ten days after the expiration of the time allotted to said owner or consignee to appear and introduce testimony as aforesaid: *And provided further,* That the Secretary of the Treasury may deliver to the consignee such seed, pending examination and decision in the matter, on execution of a penal bond for double the

PAGE 7.

amount of the full invoice value of such seed, together with the duty thereon, and on refusal to return such seed for any cause to the custody of the Secretary of the Treasury when demanded, for the purpose of exclusion from the country, or for any other purpose, said consignee shall forfeit the full amount of the bond.

SEC. 7. That the term "Territory" as used in this Act shall include the insular possessions of the United States. The word "person" as used in this Act shall be construed to import both the plural and the singular, as the case demands, and shall include corporations, companies, societies, and associations. When construing and enforcing the provisions of this Act, the act, omission, or failure of any officer, agent, or other person acting for or employed by any corporation, company, society, or association within the scope of his employment or office, shall in every case be also deemed prima facie to be the act, omission, or failure of such corporation, company, society, or association as well as that of the person.

SEC. 8. That this Act shall be known, described, and designated as the Pure Seed Act of 1908.

SEC. 9. That this Act shall take effect and be in force upon the expiration of six months after its passage.

The Seedsman's Lesson in Politics.

The seedsmen of America have received a convincing lesson in the policies of our present government at Washington. Through the courtesy of James R. Mann they have been introduced to the real meaning of the oft-repeated phrases: "federal control," and "bureaucracy."

The Mann "pure seed bill"—so loosely and so ignorantly drawn that it would put every dealer engaged in honest trade at the mercy of whatever government inspector, armed with the authority and the impudence of officialism, might happen along—has been dropped for the present session. But the policy of congress and of the government remains the same. The bill will undoubtedly be revived if the same congress and the same government shall be continued after the fall election.

It has long been evident, from the fact that the seed trade is the only trade with which the government competes in business, that seedsmen possess small political influence. Were this industry controlled by a combination, did it thrive by reason of a high protective tariff, were its profits so large it could maintain a perpetual lobby to wine and dine congressmen in Washington, its members would not be taxed for the purpose of paying for seeds to be given away to their customers.

The mania for "federal control" does not extend to the paper trust, nor to the oil trust, nor to the sugar trust, nor to the lumber trust; instead of attacking these industries Mr. Mann and his congressional associates seem even eager to defend them.

The suggestion has been made on good authority that the seed trade was chosen as a target because of its supposedly small sphere of political influence, which made it possible to gain political capital by "regulating" it, without arousing resentment, dangerous at the polls.

If this is the case, it is clearly a necessity that, to protect themselves from unjust attack in the future at the hands of our progressive government, the seedsmen shall either acquire political influence, or make a show of that which, unknown to Mr. Mann and his associates, it may already possess.

This can be done honestly, and should be done. If every seedsman will try to get acquainted with the congressman to be elected from his district next fall, and see that he understands the seed trade's problems, or some of them at least, it may be possible to obtain a hearing in the next congress, before an impractical bill which would harass the trade is reported out of committee.

Something might be accomplished by enlisting business men in other lines, in a movement to check the seeming desire of congress that most of the commerce of the country shall be conducted under rules to be prescribed by department clerks in Washington. This is a tendency which every man in competitive business must oppose. There is no room in this country for bureaucracy; "federal control" of this sort is an evil.

DURUM WHEAT.—The Great Northern railway has issued a seed circular for distribution to the farmers, in which this wheat is highly commended and the company offers half rate freights for seed grains for anyone wishing to procure them. As compared with Fife and Blue Stem wheats they claim that the Durum on a four year average showed nearly 90 per cent higher yield than the others, and a yield of 12 bushels per acre in its favor.

President Green's Letter to the Seed Trade.

Chicago, April 23.—I am pleased to report briefly the result of the visit to Washington of the committee appointed at the meeting of seedsmen, held in Chicago, April 10, and other seedsmen who came to Washington to attend the hearing before the Committee on Interstate and Foreign Commerce on April 21.

Our committee was granted an informal conference with Mr. Mann on April 20 and at this conference, we think we made it clear that the bill would need revision before it could be made a just and practicable law. Various changes were urged and most of these were embodied in an amended copy of the bill, which was left with Mr. Mann.

At the public hearing, April 21, our case was fully presented before the committee on Interstate and Foreign Commerce. Further congressional action on the bill will be deferred until the next session, thus giving more time for careful consideration of all features of the bill.

I feel sure that much good will result from this hearing in the way of a better understanding between seedsmen and the parties having this proposed legislation in charge.

I will report more fully on this matter at the Detroit convention, where I hope for a large attendance.

It seems reasonably certain that some federal law will be enacted and it is necessary to the interests of the seed trade that such legislation shall be just and practical.

The committee, which went to Washington, was as follows:

Geo. S. Green, The Illinois Seed Co., Chicago.
J. C. Vaughan, Vaughan's Seed Store, Chicago.
Chas. Dickinson, Chicago.
Chas. N. Page, Iowa Seed Co., Des Moines, Ia.
Jerome B. Rice, Cambridge, N. Y.
Walter P. Stokes, Philadelphia, Pa.

Among other seedsmen represented at the hearing were:

F. W. Bolgiano & Co., Washington, D. C.
Jos. Breck & Sons Corp., Boston, Mass.
Comstock, Ferre & Co., Wethersfield, Conn.
Peter Henderson & Co., New York.
Wm. Henry Maule, Philadelphia, Pa.
T. W. Wood & Sons, Richmond, Va.
Holmes Seed Co., Harrisburg, Pa.
E. V. Hallock, Queens, N. Y.
J. M. Lupton, Mattituck, N. Y.

The proceedings at the public hearing will be printed as a public document within a few weeks, and I hope to secure a sufficient number of copies to send one to each member of our association, and to others who have manifested interest in what we have been doing.

It is impossible at this time to say just what further action may be necessary to safeguard the trade against hasty legislation, or to aid in securing wise and helpful regulation, but this subject will receive consideration.

With thanks to the trade for the support which has been given me, I am, Yours sincerely, GEO. S. GREEN.

Corrections.

The following is the correct form of a paragraph incorrectly printed in the first column of our Seed Trade Department last week:

"Alex. Forbes at the hearing in Washington protested earnestly that the proposed bill imposed a prison penalty on the seedsman through accidental errors, though allowing the farmer with impunity to knowingly and wilfully permit the growing of vicious weeds in his grass fields and harvest them together at the same time."

In the report of the informal meeting in Mr. Mann's office the names of Edgar Brown and Dr. Woods of the Bureau of Plant Industry should be substituted for the names of T. W. Wood and A. J. Brown.

Catalogues Received.

The Frank S. Platt Co., New Haven, Conn., seeds; Joseph Bancroft & Son, Cedar Falls, Ia., seeds, plants, shrubs, etc.; W. H. Page, Hampton, Middlesex, Eng., carnations; Moore, Ltd., Rawdon, Eng., orchids and lily bulbs; American Nursery Co., New York, nursery stock; The Elm City Nursery Co., New Haven, Conn., nursery stock; Rockmont Nursery, Boulder, Colo., nursery stock, perennial plants, etc.; Howard & Smith, Los Angeles, Calif., seeds and plants; The English Home of Alpine Plants, South Pool, Devon, Eng., rock and Alpine plants; Harlan P. J., hardy and bulbous plants; Schaum & Van Tol, Boskoop, Holland (McHutchison & Co., 17 Murray St., New York, agents), nursery stock; United Pump & Power Co., Chicago, Perry pneumatic pump.

Imports.

During the week ending April 25 imports were received at New York as follows:

McHutchison & Co., 147 tubs laurel trees, 25 cases plants.

A. Rolker & Sons: 78 tubs laurel trees, three bls. plants.

Julius Roehrs & Co.: 43 cases plants, 24 tubs laurel trees.

Philip Einsman: 14 cases plants, six tubs laurel trees.

H. H. Berger & Co.: 10 tubs laurel trees, two cases plants, one case bulbs.

Stumpp & Walter Co.: 10 tubs laurel trees, one case plants.

Wm. Elliott & Sons: eight cases plants.

W. Hageman & Co.: three cases plants.

P. Henderson & Co.: two cases plants.

E. C. Converse: one case plants.

Wadley & Smythe: four bls. rose trees.

Hy. Nungesser & Co.: 600 pkgs. seed.

To others: 118 cases plants, 79 pkgs. plants, 18 cases trees, two bskts. trees, 70 tubs laurel trees, eight boxes bulbs, 133 bags poppy seed, 258 bags clover seed, 206 pkgs. seed.

Buying Seeds.

—Chicago Daily New

Maryland Legislation.

A Baltimore letter says that seedsmen are opposed to a law now before the Maryland legislature, known as the pure-seed bill. This bill makes it necessary for the seed dealer to guarantee all seed that he sells, and in case of violating the provisions of the bill he is liable to a fine of $100 and costs. The seedsmen are opposed to this bill, because it places upon them the necessity of guaranteeing something that it is impossible to guarantee. No dealer can guarantee seeds to be absolutely pure. These dealers are making every effort to get seeds that are pure, but growers will not take out weeds that grow in wheat or other grain fields and the seedsmen cannot do so.—Country Gentleman.

ST. LOUIS, MO.—Wm. F. Nichol, president of the St. Louis Seed Co., distributed, free of charge, last Thursday, 60,000 packages of seeds, five or six varieties to the package, to the school children of this city. Each package would have cost 40 cents if purchased.

MARKET GARDENS.

Suggestions in Season.

Start a bed of parsley or rhubarb now if these crops are included in the forcing list. Parsley is very slow to germinate; sometimes it is good policy to mix the seed with a little fine sand, place it in a flat and keep moist for 10 days or so. Sometimes the land is not ready or one has not the time to spare and, by starting the seed as above, time can be saved in germination. The young seedlings do not thrive in hot weather hence an early start is needed. Drill the seed in rows 15 or 18 inches apart on good garden land.

Rhubarb is very sensitive to deep covering or baking of surface; it is quick to germinate. Land should be fine and the seed drilled in very shallow, say half an inch deep. If it is intended to transplant after one year sow the rows 15 inches apart; if to be grown two years, better make it 30 inches, then a horse hoe can be used between them. If rhubarb is started early on rich land and well cared for, the plants can be forced the first winter. To accomplish this be sure and thin the seedlings promptly, giving each about nine inches in the rows.

Winter Blight of Tomatoes.

Any one who wishes to grow some early potatoes would do well to try the sprouting method. Put the tubers in shallow flats, in a warm light place—under a greenhouse bench is good. Let them get green and hard. The eyes will soon start and are then quicker to grow when planted. Some cut the tubers, place in flats and cover with light earth and start them growing.

MARKETMAN.

Winter Blight on Tomatoes.

ED. AMERICAN FLORIST:—

We are having some trouble with our tomatoes and thought perhaps some of your correspondents could help us. The disease is what we call the winter blight and while not new in this section, is worse than usual this year. It started among our plants early in the fall and has gradually spread through our entire place. When a plant becomes affected the top leaves become covered with brown spots and sometimes dies, but usually makes a weak growth and the blossoms will not set fruit. When there is fruit on the plant at the time it is attacked it also frequently becomes covered with brown spots and will not ripen properly. We have removed the soil from some of the worst benches and replaced it with new soil. The young plants which we planted in these benches are still healthy, while others placed in the benches with the old plants have taken the disease in a good many cases. The soil used last fall was a clover sod, ploughed under about July 1. This was hauled about August 15 and one-fifth of manure, which had been composted separately, was added. Also 125 pounds ground bone to 500 square feet of bench. We do not expect to get much of a crop of tomatoes this spring, but would like to know how to guard against this disease in the future. W. B.

Kennet Square, Pa.

This disease is characterized by a curling and distortion of the leaves, which become covered with small brown spots, due to the collapse and death of the leaf tissues. No fungi or other parasites are to be found on the diseased plants. The stems and leaf petioles are also marked externally by longitudinal brown striations of a similar nature and the pith of the older stems is brown and collapsed in places. There is a very noticeable deficiency in wood formation. The stems are extremely brittle and all parts of the foliage are excessively charged with water. The fruits are small and in many cases spotted like the leaves. The central placentæ are large with a relatively small amount of pulp.

Winter Blight of Tomatoes.

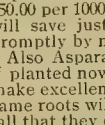
RHUBARB and ASPARAGUS CLUMPS

Sold Now for Forcing for the Coming Winter.

We can sell you fine undivided Rhubarb Roots at present for $25.00 per 1000. These will cost you $50.00 per 1000 next winter, and if planted now you will save just half on your clumps. Can ship promptly by next freight out.

Also Asparagus Roots for $5.00 per 1000, which, if planted now and grown during the summer, will make excellent roots for forcing next winter. These same roots will cost you just twice the money next fall that they do now. Let us hear from you at once, as this stock is going fast.

WARREN SHINN, Woodstown, N. J.



FLORISTS have a splendid opportunity of raising **Mushrooms** by utilizing the **waste space** under the benches, and then utilizing the **waste material** of expended mushroom beds in growing flowers. **Lambert's Pure Culture MUSHROOM SPAWN**, the best spawn in the market, is sold by all leading seedsmen. A fresh sample brick, enough for a trial bed, together with illustrated book on "Mushroom Culture" will be mailed postpaid upon receipt of **40c** in postage stamps. Address **American Spawn Company, St. Paul, Minn.**

This disease is physiological in nature. It appears to be a nutrition trouble, due to unbalanced or improper food rations. These abnormal conditions are often very complex, but in this case the injury would appear to be chargeable to two main factors, a deficiency in potash, and the use of green clover sod. The tomato requires for its best development of fruit a large amount of potash. Your correspondent does not mention using any. The well-rotted stable manure and ground bone used would supply nitrogen and phosphorus, but both are deficient in potash.

Analyses show that all parts of the tomato plant take up far more potash than nitrogen or phosphoric acid. This is least marked in the roots, and most evident in the fruit, where the potash is nearly double that of the nitrogen, and nearly five times that of the phosphoric acid. Accordingly, it is important that potash predominate in the manures. There is also the further reason for a very liberal supply of potash in that nitrogen can exert its fullest action only in the presence of rather more than the minimum amount of potash and phosphoric acid required by the plant. Potash is commonly furnished in the form of muriate, although the carbonate and sulphate also give good results. Wood ashes constitute a good source of potash, and have the advantage of not only correcting soil acidity, but likewise furnish carbonate of lime, which the tomato requires in the ratio of 25 pounds for every 800 cubic yards. Wood ashes may be applied at the rate of 20 pounds to every 50 cubic feet. The following may also be recommended for every 100 cubic yards of good loam: Well rotted manure, 240 pounds; dissolved boneblack, 13 pounds; muriate of potash, 25 pounds.

In the second place, we note that your correspondent used soil in August from a clover field plowed under in July. The organic materials in the soil could not have been sufficiently nitrified in this short time to be properly available to the plants. There is also a possibility that there may have been present in the soil some substances formed by the fermenting clover that would be poisonous to the tomato plants. We approve of the use of clover sod in preparing a greenhouse soil, but would advise that it be composted the fall before it is to be used, so that the vegetable matter can be thoroughly broken down by the action of the soil organisms. It would also be an advantage to apply whatever ground bone is used to this compost the preceding year, as much of the phosphoric acid in fresh ground bone is not available to plants, but slowly becomes so after incorporation with the soil.

W. A. O.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points April 25 were as follows: New York, cucumbers, No. 1, 50 cents to 75 cents per dozen; No. 2, $2 to $2.50 per box; lettuce, 25 cents to $1.25 per dozen bunches; mushrooms, 25 cents to 60 cents per pound; mint, 40 cents to 50 cents per dozen bunches; radishes, $1.25 to $2 per 100 bunches; rhubarb, $2 to $5 per 100 bunches; tomatoes, 15 cents to 25 cents per pound. Chicago, cucumbers, 30 cents to 85 cents per dozen; radishes, 15 cents to 25 cents per dozen bunches; mushrooms, 35 cents to 65 cents per pound. Cincinnati, cucumbers, $1 to $1.25 per dozen; mushrooms, 50 cents to 60 cents per pound. Pittsburg, Pa., cucumbers, $7.50 to $8 per box. St. Louis, cucumbers, 50 cents to 60 cents per doz. Boston, tomatoes, 30 cents to 35 cents per pound; cucumbers, $4.50 to $5 per box.

BRUNSWICK, ME.—Wm. Butler has opened a store here, the first in town, and reports good business for so small a place.

NEW CANNAS 1908

Rosea Gigantea. This beautiful variety has extra large flowers which are borne in such abundance that the mass of color on each plant is amazing. Single petals are 2½ inches across; color, a deep rich rose, almost a coral carmine. Plants make a vigorous growth, producing unusually fine clumps of green foliage. Height, 4 feet. (A great favorite with visitors to our trial grounds.) Strong plants, **$2.00** each, prepaid; **$18.00** per doz., by express, not prepaid.

Gladio-Flora. Remarkable for the unusual shape of the flowers which look like large Gladiolus. Petals are not long, but short and rounded and so wide they overlap each other, thus giving a very attractive appearance to the flowers. Color is crimson changing to carmine rose with an uneven edge of gold to each petal. Height, 3¼ feet. Price, strong plants, **$2.00** each, prepaid; **$18.00** per doz., by express, not prepaid.

Meteor. Meteor is a vigorous grower with healthy green foliage. It is highly valued because of its magnificent flowers, fully four inches across, and abundance of bloom. Color is a deep crimson, very rich; each plant usually throws up five to six trusses of buds which continue blooming luxuriantly all summer through. Price, plants of dormant roots, **75c** each, postpaid; **$6.00** per doz., by express, not prepaid.

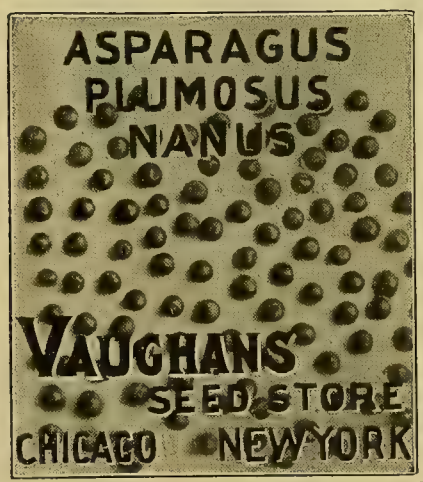
NEW CANNAS OF SPECIAL MERIT.

William Saunders. (1907) The flowers are large, of splendid form and are borne very freely in immense clusters. The color is a deep rich shining scarlet lightly dappled with crimson. Foliage is a rich bronze. Height, 3½ to 4 feet. We believe that Wm. Saunders is decidedly the most perfect Canna of this type that has been introduced. Those who tried Wm. Saunders in 1907 say it cannot be excelled. We offer plants only: **60c** each, postpaid; **$5.00** per doz., **$35.00** per 100, by express, not prepaid.

60 other varieties. Send for our list and prices.

The Conard & Jones Co.,

WEST GROVE, PENNSYLVANIA



We handle this Asparagus both in seeds and plants of all sizes, in very large quantities and make very close prices on larger amounts on application. Our seed is pure, fresh, of best germinating quality and extraordinary vitality

Northern Greenhouse-Grown Seed. Per 100 seeds, **60c**; 250 seeds **$1.25**; 1000 seeds, **$4.00**; 5000 seeds, **$19.50**; 10,000 seeds, **$37.50**. Price for larger lots on application

DAVID HERBERT & SON,

Successors to L. K. Peacock, Inc., ATCO, N. J

The Nursery Trade

American Association of Nurserymen

J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport, Ind., Vice-President; George C Seager, Rochester, N. Y., Sec'y.
Thirty-third annual convention to be held at Milwaukee, Wis., June 10-12, 1908.

THE MISSING LINK APPLE CO., inquired about, is located at Clinton, Ill.

VISITED CHICAGO.—Wm. Satter, representing Ebbinge & Van Groos, Boskoop, Holland.

READING, MASS.—A. Chandler Manning announces that he has opened a landscape architect's office at this place.

BROWNSVILLE, TEX.—The Rio Grande Nursery Co. filed articles of corporate dissolution in the state department April 17.

IN our obituary column the death of Edwin Hoyt, the well-known nurseryman of New Canaan, Conn., is announced.

"CROWN GALL IN MINNESOTA," a circular issued by the state entomologist is specially directed to nurserymen to whom it should prove of considerable interest.

FIG TREES are apparently good property around Victoria, Tex., where a preserving factory is promised as soon as there is a prospect of fruit being forthcoming.

SMUDGE FIRES made of damp material are more reliable as frost protectors than those made of dry material or oil. In addition to creating a dense smoke they add evaporated water to the atmosphere which serves to retard heat radiation.

A RECENT bulletin of the Bureau of Plant Industry, of the Department of Agriculture, is entitled "Self-Boiled Lime-Sulphur Mixture as a Promising Fungicide," by W. M. Scott, pathologist in charge of orchard spray demonstrations and investigations of diseases of fruits.

L. A. GOODMAN secretary of the Missouri State Horticultural Society is authority for the statement that the outlook for fruit this season is unusually good. He says: "In spite of the very warm winter which we have been having the buds have swollen only a little, not enough to allow a sudden drop in temperature to ruin the crops. The berries promise to be plentiful.

THERE seems to be quite a merry little row on at Grand Rapids, Mich., between the nurserymen and park employes. One nurseryman's contribution reads: "Now we don't object to competition, but we do object to help paying the salaries of city officials and then to have them go into the open and give a share of their time to private enterprises. It is not just to the city and especially not to the men engaged in the work which they usurp." This sounds reasonable.

YORK, NEB.—C. S. Harrison reports that business so far has been very good this spring. Mr. Harrison states that he has started a branch nursery at Paynesville, Minn., under the management of Frank Brown, where matters are going along very well. Mr. Harrison considers it absolutely necessary to have a northern base of supplies because nearly everything outside of that region is so far advanced that it is not fit for use in the northern states.

SALT LAKE CITY, UTAH.—The Salt Lake County Horticultural Association met in the city and county building, April 18, and discussed various matters of interest to its members. Inspector J. P. Sorenson was instructed to write to some prominent California fruit grower and obtain information relative to the methods used there to protect fruits from frost. Joseph M. Smith reported that frost had injured apricots in the southern part of the county and that pear blight also had done considerable damage.

Northwest Nursery Co., Valley City, N. D.

The Northwest Nursery Co. is the title of an important corporation just starting up, with its home at Valley City, N. D. The promoters are Dr. E. A. Pray of Valley City, E. C. Hilborn of Enderlin, P. A. Pickett of Leal and O. O. Wagley of Milwaukee, Wis. Mr. Hilborn is president and manager, Dr. Pray vice-president and treasurer, and Mr. Pickett is secretary. These officials constitute the board of directors and the company has an authorized capital of $50,000. Mr. Hilborn is not new to the nursery business having held several important posts and been of late northwest superintendent of the Jewell Nursery Co., Lake City, Minn.

E. C. Hilborn.
President of Northwest Nursery Co., Valley City, N. D.

The new company has secured commodious offices and a desirable tract of land within the Sheyenne valley for an experimental farm and orchard. It will handle home-grown northern stock which will be adapted to the northwest. It had several tracts in view and has secured the very best obtainable for the purpose. It will begin at once erecting the necessary buildings, and is planting a lot of stock this spring for next year's trade. Stock of various sizes has been planted to be ready for the trade offered next year. The managers will experiment with trees and shrubs of all kinds and select those best adapted to this climate. Mr. Hilborn will shortly remove to Valley City and make it his future home. The new company begins life under good management, and with ample backing, and there is every reason to predict for it a prosperous and useful career.

Planting A Shrubbery.

The arranging of the shrubs needs considerable attention and much preliminary thought. Though each will have his own ideas on the subject, and these will have to be adapted to the circumstances of his own particular case, says the Journal of Horticulture, yet there are certain general principles which should be kept in view. Some advocate planting at such distance apart as to permit of taking out alternate shrubs in two or three years' time. Even if one has the heart to do the thinning out sufficiently when the time comes, it is not a very good plan, as the shrubs to be taken out abstract much nutriment from the soil that those remaining will want, and before the thinning out takes place the latter will most likely have suffered from crowding and begun to get bare below. A better way is to give the shrubs ample space at the time of planting, and to grow annuals and low-growing perennials of a non-spreading character among them. If the soil has been properly prepared for the shrubs these flowers will do very well for two or three years, and this is probably as long as they will be really needed. The cherry and Portugal laurels should only be planted where a thick hedge or screen is wanted, or next to fences and walls where anything choicer may be damaged by cattle or passers-by. If planted amongst choicer shrubs they are bound to smother them eventually.

There are so many evergreens of more beautiful and delicate, and yet vigorous growth, that there is no need to plant these coarse shrubs, except in the circumstances mentioned, or where a very large specimen evergreen is wanted. In choosing and arranging the shrubs an eye should be kept to color effect, so as to avoid having a red currant next to a scarlet Japanese quince, or a Daphne mezereum between them. While each shrub should have room to develop its distinctive beauty of form, yet it is often effective to plant three or four of the same variety together so as to form a large bold mass having the appearance of one fine shrub, with perfect freedom of expansion for all the outer branches of the group. This is infinitely more effective than dotting the same variety about the plantation.

A shrubbery should not be composed either wholly of evergreens or wholly of deciduous shrubs, for in the former case it looks too somber both winter and summer, and in the latter case too bare six months of the year. Both should be planted, where the leafless shrubs will show up the evergreens in the winter, and the darker tones of the latter will show up the lighter tones of the deciduous shrubs in the summer.

Chilean Grape Culture.

Consul Alfred A. Winslow, of Valparaiso, reports that much attention is given the cultivation of grapes in Chile, and the manufacture of wine therefrom, as will be seen by the following statistics:

The industry is growing rapidly and promises well. The climate and soil are excellent for the production of some of the best varieties of grapes. In 1906 there were 57,665 hectares, or 142,493 acres, under cultivation, against 51,539 hectares, or 127,354 acres, for 1904. In 1906 there were 17,260 hectares under cultivation on irrigated lands. The grapes grown on the irrigated lands were the best. The production of wine for the harvest of 1906 amounted to 157,604,656 liters (liter equals 1.0567 quarts), of which the greater proportion was red wine. The production for 1907 exceeded that of 1906 very materially, but the exact figures cannot yet be given.

During 1906 wine to the value of $203,430 United States gold was imported, of which the United States furnished less than one-half of 1 per cent. During the same time Chile exported wine to the value of $54,740.

Dreer's Hardy Climbers.

	Per doz.	Per 100
Clematis Hybrids, such as Jackmani, Jackmani Superba, Henryi, Duchess of Edinburgh, Fairy Queen, Sieboldi, Gipsy Queen, Lilacina, Floribunda, Mme. Baron Villard, Mme. Van Houtte, Miss Bateman, Standishi, The Gem, The President and Ville de Lyon, all in strong two-year-old plants	$3.00	$20.00

Surplus List of Peach Trees

At 5 cents each, 4 to 5 feet high, at $45.00 per 1000. We will exchange these Peach Trees for Privet cuttings. Tree roots, Arbor-vitæ or other nursery stock. Please write at once, as this stock is going fast.

Warren Shinn, Woodstown, N. J.

THE South African minister of agriculture having requested Horticultural Commissioner Jeffrey, of Sacramento, Calif., to send a man to Pietermaritzburg to teach local growers the packing of citrus fruits, he has chosen M. S. Sutpen who will start for South Africa at once.

The Supply of Hickory.

The future supply of hickory is a subject that is being seriously considered by various important associations connected with the automobile and carriage industry, no suitable substitute in wood or steel having been found for it, nothwithstanding many tests that have been made. It is hoped that the bias of manufacturers against red hickory, which experts claim is equally as good as white, if clear and of good quality, will disappear as the use of this would largely prevent the present waste of this valuable wood and thus help out the supply of white. Only two woods come anywhere near the quality of hickory for the purpose indicated; these are the eucalyptus and the crowfoot elm, both Australian kinds. But the tests on these are not yet conclusive and American users will have to be very conservative with the present supply of this precious wood.

Hardy Roses for Colorado.

The following roses are recommended by W. Paddock of the Colorado Agricultural Experiment Station as suitable for that locality:

Red.—Prince Camille de Rohan (dark), American Beauty, Gruss an Teplitz (dark), Gen. Jacqueminot.

Pink.—La France, Helen Gould, Anna de Diesbach.

White.—Kaiserin Augusta Victoria.

Yellow.—Franz Deegan.

Climbing.—Crimson Rambler, Dorothy Perkins, Prairie Queen, Baltimore Belle.

Tariff on Evergreen Seedlings.

Species of the laurel (so-called), Aucuba Japonica and Kalmia latifolia, and of the rhododendron (Rhododendron ponticum), which retain their verdure throughout the year, are evergreens within the meaning of paragraph 252, tariff act of 1897; and under said paragraph seedlings of those plants are dutiable as "evergreen seedlings" rather than as "nursery stock." This was decided in an appeal from the circuit court of the United States for the southern district of New York by P. Ouwerkerk against the assessment of duty by the collector of customs at the port of New York.

The merchandise in dispute consisted of three varieties of plants, designated as Aucuba Japonica or Japanese laurel, Rhododendron ponticum, and Kalmia latifolia or American laurel. The board held these plants to be dutiable under paragraph 252, tariff act of 1897, as "evergreen seedlings." The government contended that they had been properly classified under the provision in the same paragraph for "nursery stock."

The theory of the government's contention is that the term "evergreen" is restricted to such evergreen plants as the conifers and box. The board of general appraisers held, however—and its decision was affirmed by the circuit court without opinion—that the term is not so restricted, but applies to seedlings of all plants which retain their greenness throughout the year, and that it is sufficient if a plant fall within the general class of evergreens, irrespective of whether it is hardy in a particular locality or under different climatic conditions. The plants in question, being shown to be evergreen in this sense, were held to be "evergreen seedlings" as above set forth.

The GEO. WITTBOLD CO., 1657 Buckingham Place, Chicago

Hardy Ferns.

The present time—if the weather is open and the soil in good working order—is suitable for the planting of many hardy ferns. There is one thing more than any other that ferns dislike, and that is a draughty position, and though a shady, moist situation is agreeable to them, they do not flourish so well in a stagnant, saturated soil as in one that has fair drainage. When we think of it, numbers of the ferns growing wild are found on banks, and we all know that that implies pretty sharp drainage. It is worth while in the first instance to do for our ferns what we can so far as giving them healthy conditions, for a fernery, even a small one, in which the ferns are growing luxuriantly and in splendid health and beauty is a wonderfully decorative feature in the garden. Cool, green beauty, perfection of growth, exquisite line and curve and variety of form are things to compel our admiration. We do not want to have a few miserable ferns planted simply because nothing else will grow in the particular spot. Supposing there is such a spot, and it is to become the fernery, with a little care and taste in arranging it the ferns need not become languid and miserable-looking objects. It is not absolutely necessary, but where the soil is thoroughly sour and saturated it will improve the state of things wonderfully to dig down three feet or so and throw in a layer four to six inches in depth of old mortar rubble and ashes, and then to bring fresh soil, if the old is in this unhealthy condition. This layer of drainage will keep the soil wholesome for years. Many of our hardy ferns are very beautiful, and besides these there are many American and Japanese varieties every bit as hardy. I cannot vouch for the truth of it, but I have read of hartstongue ferns growing to a height of five feet in Devonshire. We may not compass that, but with careful cultivation our stately evergreen hartstongues may become noble and striking plants. Take, again, the common little polypodium; under the most forsaken and

untoward conditions it makes the best of things, but give it a little attention and good cultivation, and how it responds! The Welsh polypody (P. vulgare Cambricum) is a very handsome form. Among the lastreas we need not be content merely with the well-known male fern, for there are many variations, and L. felix-mas grandiceps is finely crested. A fern catalogue will give many desirable forms among the athyriums, the polystichums and other varieties.

The most difficult fernery to make picturesque is that under the lee of the palings of a small town or suburban garden. But with the help of some sandstone, much may be done. If it be possible to have the ferns on both sides of a pathway, it adds much to the artistic appearance, and it may be possible to make the ordinary pathway deviate a little, and perhaps narrow it slightly in order to make it run through the little fernery, and not merely at its foot. In quite a small town garden that unfortunately faced the north I call to mind a beautiful border of ferns fringing the miniature lawn, a small verge of grass beyond it, then the pathway and then the veranda covered with Virginian creeper—a very charming little picture panel was obtained as the creeper leaves turned to red with the tall waving fronds below them. Ferns make so distinct and characteristic a feature in a garden that it behooves us surely to use this feature. Bulbous plants associate charmingly with ferns for a spring effect. Ivy should not be allowed to become too rampant among the ferns—Gardening World.

VANCOUVER, WASH.—All report Easter business as better than last season by 30 per cent. Lettuce growers are well pleased with the last season's business considering the stringency of 1907, and from the present outlook there will be more greenhouses erected the coming summer. Great credit is due Mrs. Lulu Woodard one of our prominent lettuce growers who, upon the sudden demise of her husband two years ago, has, by strenuous efforts under dire circumstances, pulled through her place of 10 acres and two large greenhouses. More glory to our up-to-date women.—C. M. W.

British Horticulture.

FROM THE BRITISH TRADE PAPERS.

WICHURAIANA ROSE DEBUTANTE.—Although not profusely produced, there is something charming about the late sprays of bloom which this rose yields. Even as late as the first week in December pretty little flowers could be cut, and they are particularly welcome when upon most of the pillars there are few, if any, roses to be seen. There can be no question that raisers will soon be giving us a group of late-flowering rambler roses of the Wichuraiana tribe, and considering the readiness that this tribe can be mingled with other groups by crossing, we are hopeful that such lovely gems as Rene Andre and Alberic Barbier will be produced as autumnal bloomers.

VIBURNUM UTILE.—First discovered near Ichang in 1880, this shrub was introduced to cultivation by James Veitch and Son, through their collector, E. H. Wilson. It grows about five feet high, and bears comparatively small flowers in dense terminal cymes; these are white, and followed by smooth black fruits. Quite hardy, free and effective.

HERBERTIA AMATORIUM.—A pretty irid, from South America. Under greenhouse or frame culture it flowers for a long period, though individual flowers are short lived. The blooms are two inches across, rich violet-blue, with brown markings at the base of the inner segments.

GRAFTED ROSES.

RECENT BOOKS.

Yard and Garden.*

In this excellent little book of about 420 pages the author, Tarkington Baker, manages to get a great amount of useful information. The book appears at a time when much interest is being taken by civic authorities and societies having as an end in view the tidying up of our cities, towns and villages, making them beautiful where possible, and taking away the hideousness of the vacant lot and neglected yard. It is a good work and we welcome any book that will be a help along this line.

A little less preamble perhaps would have been advisable but it is all readable and interesting and in his third chapter the author gets down to business by showing how to plan gardens. His advice as to planting is excellent and is helped out by excellent illustrations. "Lawns" is a good chapter and in those succeeding it, vines, annuals and hardy perennials are discussed in a pleasing and helpful manner, much other useful information with regard to flowering bulbs being given in the appendix. There are other chapters which refer to various details connected with this class of gardening while "The Indoor Winter Window Garden" will be read with interest by those devoted to this class of gardening. We can recommend the book to all amateur gardeners who are seeking information as to how to beautify their home grounds. It is profusely illustrated, has a good index and the price is $2.

Roses and Their Cultivation.*

The full title of this excellent English book is "Roses, Their History, Development and Cultivation." It is written by the Rev. Joseph H. Pemberton, long looked up to as an authority on roses in England, and some of the cultural points referred to are more adapted to British methods than American, but that does not make the principal chapters less interesting to growers and rose lovers in this country. The botany of the rose is very fully treated on and in this connection there is an interesting series of illustrations of various wild and garden species as well as a frontispiece of Rosa canina or the English dog rose. This is followed by a list of wild roses of other countries with concise and excellent descriptions and roses for various seasons.

Soils, manures and other requirements are fully treated on, while planting, propagating, pruning, bedding and grafting have all separate chapters. "Raising Roses from Seed" is an especially interesting and suggestive chapter especially now when so much interest is being taken in new roses. Growing for exhibition and methods of exhibiting are also treated, but here again the British methods with the old style boxes and cups is described though there are many excellent hints as to decorative roses and the methods of showing them. One of our English correspondents has already given his opinion of this extremely interesting and readable book which is excellently bound and got up. It contains 336 pages, and an excellent index and appendix. There are over 40 illustrations and the price is $3.50. It is a thoroughly readable book from cover to cover and we can recommend it to all lovers of the rose.

JERSEY CITY, N. J.—Hippolyte Nicholas Jacquement, an old resident of this city, dropped dead in New York, April 22, at the age of 69 years. Deceased was a native of France and had been in this country 35 years. He was a landscape gardener by profession and had been employed by many of the owners of fine estates in this vicinity. He leaves a wife and six children.

*We can supply any of the above books when price is quoted.

WHITTIER, CALIF.—A flower show with prizes for the school children exhibiting the best blooms, as well as for other exhibitors, whose flowers are found worthy, is to be one of the principal events of the next club year. The club women voted without a dissenting voice in favor of the affair at their meeting April 15, much enthusiasm over the proposal being shown. The show will probably be held during chrysanthemum season.

MARKET OVERSTOCKED.

Business since Easter has been unusually dull; great quantities of stock were forced on the wholesale market, much of which was sold at a very low figure. All stock is exceptionally fine, especially roses, sweet peas and carnations. American Beauty roses are above par and the price on this stock is so low that it actually creates a demand. One would think that, after the Lenten season, society would come out in all its glory, but not so during the past week. Had it not been for several small weddings and two larger funerals, there would have been practically nothing doing. Everything is quiet, even the street venders complain of not being able to dispose of their stock at extremely low prices. As a result the market is so badly over stocked that the buyer has the privilege of buying at his own price. Outdoor daffodils are coming in large quantities.

C. M. Wagner, Euclid avenue, had the decorations for the Morris-Everett wedding. American Beauty roses and white lilac were used in abundance.

The Cleveland Florists' Exchange is handling some exceptionally fine American Beauty roses grown by the Lamborn Floral Co., Alliance.

Visitors: D. R. White, Sandusky; F. J. Stehle, Lorain; M. Shattles, New York. FORESTER.

NEW VIOLET BOSTON.

In introducing this new variety to the trade I wish to state that I have been growing it in quantity for the past two years and do not hesitate to state that it is entirely distinct, a strong grower, a free bloomer and the finest single violet in cultivation. Ready for distribution in April and May. Orders booked now. **$2.00** per doz.; **$12.00** per 100; **$100.00** per 1000. 500 at 1000 rates.

WILLIAM SIM, Cliftondale, Mass.

Milwaukee.

ROSES A GLUT.

The rose glut which started at Easter is still with us and stock is selling at a very low figure, especially the short grade. Carnations are cleaning up fair but at reduced prices. Bulbous stock of all kinds is in overabundance with poor chances of cleaning out. Green is moving very well considering the condition of the other stocks. Violets are nearing their end and most likely will be out of the market within a week or two.

NOTES.

James Chàcona had a large assortment of baskets, horseshoes, etc., for the mayor and newly elected aldermen last Tuesday. One horseshoe measured six feet and was composed of American Beauty roses.

The best **Hardy Varieties,** $3.00 per 100.

We grow many other good commercial kinds not mentioned above.

If any special varieties are desired forplanting, the order should be placed at once.

While we shall have **HALF A MILLION CHRYSANTHEMUMS** for May and June delivery, yet there is always a shortage of many kinds.

ELMER D. SMITH & CO., Successors to Nathan Smith & Son, **Adrian, Mich.**

Columbus, O.

EVERYTHING CLEANED UP.

The Easter trade this year was equal to any previous year in the history of this city. Everything was cleaned up, both cut flowers and plants. Azaleas and rhododendrons sold well and brought good prices, ranging from $1.50 to $3 for azaleas and $2.50 to $4 on rhododendrons. Spireas and small pot plants sold well also. Owing to the warm weather here several weeks ago, it was very hard to keep back lilies and bulbous stock. However, everything was in fine shape although some bulbous stock was rather soft. Prices on cut flowers were as follows: Tulips and daffodils 75 cents; hyacinths $1.50; violets $3; carnations $1.25 and roses $2 to $4 per 100. Rainy weather on Saturday did not seem to affect sales in the least. Spring work is on with a rush now, the outside work being very heavy.

This enchanting time of year may cause spring poets to muse and dream of the beauties of nature, but at present writing, no florist has been observed indulging himself thus, in fact they can't get enough time even at night to dream. This is developing itself into one of the most prosperous spring seasons in the history of the trade. The call for outside work is incessant and urgent, warm weather helping make it all the more so. Funeral work has been very plentiful during the past week, and several after-Easter weddings also added to the amount of cut flower work. Bulbous stock is getting very soft now and can hardly be recommended to customers. Outside stock is somewhat stronger, but is not up to standard. Violets are also quite soft now and the demand is falling off considerably with the advent of outdoor flowers. Carnations are somewhat inclined to go sleepy, but the stock is still very good. Roses are quite plentiful and of good quality.

CHRYSANTHEMUMS.

Monrovia, October Sunshine, F. A. Cobbold, Mrs. T. W. Pockett, Col. Appleton, Nellie Pockett, Cheltoni, Lady Hopetoun, White Coombes, Ben Wells and others now ready at $3.00 per 100, $25.00 per 1000; 2¼-in. pots.

If your stock is run down try some of mine and see the difference next fall. Lots of the new singles now ready.

You got my 'mum list, of course?

CHARLES H. TOTTY, Madison, N. J.

NOTES.

The Livingston Seed Co. had something new in window display this week. A very attractive "merry widow" hat trimmed with flowers adorned the window and attracted the attention of thousands as they passed.

Fifth Avenue Floral Co. had a fine Easter display in a store room on N. High street. The supply of plants was quite large.

C. A. Roth reports a good Easter trade, and, in fact, all the retail florists seem to have enjoyed a good trade this year. CARL.

CLINTON, MASS.—Patrick Burke, employed by Edward W. Breed, has been reappointed by the board of selectmen as forest warden. With Chairman Cannon of the board he has been to Boston to confer with the state forester and at a recent session of the board there was further discussion of the duties which attach to the office, to the matter of the remuneration of Mr. Burke and to an adjustment of his duties.

Chrysanthemums

Now is the time to get ready for your 'Mums. If you want the best money making varieties and the best stock procurable, send or write to

GUNNAR TEILMANN
Marion, Ind.

HARRISBURG, PA.—The long tulip bed in front of the Capitol has been much admired. It is the largest in this part of the state, containing over 4,000 plants, most of which are in bloom. There are other flowers in this bed, which will bloom when the tulips have gone.

Easter Trade Reports.

HAMILTON, ONT.—E. G. Brown & Son report a 25 per cent increase in trade, with prices about the same as last year. There was a good supply of everything, but carnations cleaned out first. Pot lilies were most in demand and Marguerites and large pans of hyacinths sold well. In cut flowers, roses, carnations, daffodils and Murillo tulips sold best. Altogether it was the best Easter this firm has had.

SAN RAFAEL, CALIF.—Laurel Grove Nursery reports an increase of about 20 per cent and prices from 10 to 20 per cent higher than those of last year. The demand for plants was very good, but no cut flowers are grown. In plants the best demand was for ferns, palms and roses.

NEW ORLEANS, LA.—Abele Bros. report a falling off of 10 per cent in their sales, with prices about the same as last year. Good flowering plants were short, owing to the hot weather previous to Easter. Pot lilies were the best sellers and there was little demand for palms and ferns.

BRIDGEPORT, CONN.—James E. Beach reports a falling off in trade of 15 per cent. Plants were not too plentiful and prices were well maintained but the price of cut flowers was rather lower than last year and carnations were the only short item. Roses and violets sold well.

HELENA, MONT.—A 20 per cent increase is the report of the State Nursery Co. More cut flowers and plants were sold than ever before. Spireas were the least salable in plants, but lilies, azaleas and hydrangeas sold well. Pot roses were also well done and sold readily.

DENVER, COLO.—A falling off of 10 per cent is reported by the Park Floral Co., although prices were lower than those of last year. Higher priced plants sold slowly and violets were poor, owing to the warm weather. There was plenty of cut flowers and pot plants.

SAN ANTONIO, TEX.—A 50 per cent increase in sales, at prices about the same as last year, is the report of Geo. C. Baker. Neither plants or cut flowers were equal to the demand, and carnations, roses and lily of the valley were especially asked for.

OGDEN, UTAH.—A 50 per cent increase in sales is reported by F. J. Hendershot. Cut flowers were short but there was plenty of plants. Flowering plants sold better than palms or ferns, and roses and carnations were the best sellers in cut flowers.

SALT LAKE CITY, UTAH.—A 25 per cent decrease in sales at prices about the same and plenty of stock of all kinds is the report of the Salt Lake Floral Co. The churches used very few flowers and, on the whole, it was a very poor Easter.

DUBUQUE, IA.—Harkett's Floral Nursery reports sales as probably 20 per cent higher than last year. Bulb stock was the one cheap item and all classes of cut flowers and pot plants were plentiful. The weather was ideal and helped sales.

POMONA, CALIF.—O. Roessner reports a 25 per cent increase in sales, at better prices than last year. Carnations sold better than roses and all kinds of pot plants moved freely. There was plenty of stock to meet all demands.

WASHINGTON. D. C.—Gude Bros. Co. reports trade and prices similar to last year with a good supply of plants and an over supply of cut flowers. Violets were the leaders in the latter but bulb stock did not sell.

SEATTLE, WASH.—A 25 per cent increase in sales at rather lower prices is the report of G. C. Bjorkman. Plants were scarce and sold well but there was plenty of cut flowers.

CATTLEYA TRIANÆ

JUST AT HAND,

In perfect condition, a large shipment of this profitable orchid. We offer these in cases containing about 40 plants, aggregating 450 and more bulbs, at $55.00 per case.

Cattleya Labiata

in fine shape, in cases of 400 bulbs, at $55.00.

Cattleya Mossiae

in fine condition, in cases of 40 plants, $55.00 per case.

All subject to being unsold when ordered.

LAGER & HURRELL,

Orchid Growers and Importers,

SUMMIT, NEW JERSEY.

SOUTH BEND, IND.—Aug. F. Beyer & Sons say their sales showed an increase of 40 to 50 per cent at prices about the same as last year. There was plenty of stock to meet the demands. Spireas, Baby Rambler roses and bulbous stock sold well in pots. All classes of cut flowers sold well, but there was considerable trouble with pickled stock from the wholesalers.

DAVENPORT, IA.—Sales and prices about the same as last year, with the stock in all cases equal to the demand, is the report of J. T. Temple. Small flowering plants sold well, but the more expensive ones were difficult to move. Everything considered, it was an encouraging Easter trade.

ROCHESTER, N. Y.—J. B. Keller's Sons report trade about the same as last year, but at lower prices. Cut flowers and plants were both equal to the demand and there was rather more bulbous stock than could be moved. Roses, violets, carnations and lily of the valley were the best sellers in cut flowers.

CAMBRIDGE, MASS.—Sidney Hoffman reports a 25 per cent increase in cash sales and a still larger increase in charge accounts. Prices were about the same as last year and all stock was in good supply. Pot roses were in great demand, but azaleas were not so satisfactory. Bulb stock was the best seller in cut flowers.

WILMINGTON, DEL.—A 20 per cent increase, at better prices than last year, was the report of H. P. Potter. Pink carnations were short, but there was plenty of all other stock. Rhododendrons, hydrangeas and azaleas sold best as pot plants and all classes of cut flowers sold well. Since the holiday the trade continues brisk.

VICTORIA, B. C.—Double the trade of last year is the report of the Fairview Esquimault Greenhouses at prices about the same. Plants were plentiful but many more cut flowers could have been sold. Begonias, palms and ferns were in good demand, but primulas and cinerarias did not sell as well. Violets were better sellers than roses.

FREMONT, NEB.—Greene's Greenhouses report a 35 per cent increase in sales, with prices the same as last year. "There was absolutely no indication of the financial depression and the fact that we supplied every want without buying made it the most satisfactory Easter we have had." All classes of cut flowers were in great demand and lilies were the leaders in pot plants.

KOKOMO, IND.—Easter business was good with W. W. Coles, T. L. Knipe and W. A. Bitler. All were overrun with orders, and furnished decorations at several of the churches, Coles and Bitler providing those for Grace church and Knipe those for the Main street Christian church. Mr. Coles also presented each Sunday school scholar and teacher at the Congregational with a rose.

ORCHIDS.

We advise the Growers and Private Places that our Importations will begin to arrive in a few weeks time and we will have the following: C. gigas, C. gigas Sanderiana, C. Mendelii, C. Schroederae, C. Trianae, C. Gaskelliana, C. Percivaliana C. aurea, Miltonia vexillaria, C. Mossiae, C. speciosissima, C. labiata and others. We guarantee that our plants will be extra fine with no disease or Cattleya fly and will quote the Lowest Prices in America.

ORDONEZ BROS., MADISON, N. J.

ORCHIDS.

Arrived in superb contition fine importations of Dendrobium formosum giganteum, D. Wardianum. These are elegant plants.

To arrive April 15, large importations C. gigas Sanderiana, C. labiata, C. Trianæ. A trial order will prove we carry the best stock that can be secured.

JULIUS ROEHRS CO.,

The Orchid Nurseries, RUTHERFORD, N. J.

Easter Trade Reports.

LEAD, S. D.—A 20 per cent increase in sales, with prices 10 per cent better, is the report of Alex. Rose. The supply of plants and cut flowers were both equal to the demand. Rambler roses, lilies and ferns sold well, but callas, genistas and cinerarias were not so good. Carnations and sweet peas were in good demand. The weather was superb and the trade very satisfactory in every way.

UTICA, N. Y.—Wm. Mathews reports an increase of 15 to 20 per cent over last year's business, with prices about the same. Carnations sold well but bulbous stock was not much in demand. The rain on Saturday was a great drawback to the trade.

SANTA CRUZ, CALIF.—Prices and sales the same with a shortage of cut flowers is the report of W. E. King. Hardy plants were in good demand and light colors sold best in cut flowers. The fine weather helped trade.

DIXON, ILL.—O. L. Baird, reports a 15 per cent increase in sales at prices about the same and a good supply in all cases. Lilies sold well in pots and carnations were more in demand than roses, as cut flowers.

WINONA, MINN.—Ed. Kirchner reports a 50 per cent better trade than that of last year, but at lower prices. Both cut flowers and plants were well sold out, plants at 50 cents to $2 being most popular.

TERRE HAUTE, IND.—A trifle larger trade at the same prices and with all stock equal to the demand, is the report of J. G. Heinl & Son. The grand weather helped transient business.

SEDALIA, MO.—Lower prices with everything plentiful excepting lilies is the report of Gelven & Son. Trade has been slack on account of railroad shops closing down.

OAKLAND, CALIF.—Domoto Bros. report a 15 per cent increase in sales at prices about the same and the supply in all cases equal to the demand.

DANBURY, CONN.—Jos. E. Cornell & Co. report a falling off of 50 per cent, with an over supply in all lines.

R. Vincent, Jr. & Sons Co., WHITE MARSH, Balto Co., MD.

GERANIUMS.

One of the best things in the market, the **American Beauty** Geranium, a clear bright cerise just about the color of a good Pink Lawson carnation. The habit is very pleasing, rather dwarf and very stocky, It is a common thing to see 4 to 6 large bunches of flowers on a plant in a 3 to 5-in. pot. Clusters average 4 to 5 inches in diameter. It is a very free bloomer; we think it is freer than any we grow and we grow a great many Geraniums. We grow 8 to 10 varieties. Stock of American Beauty is extra fine but limited as to quantity.

We offer you

2-in	**Pot Plants at**	**$ 6.00**	**per 100**
3-in.	" " "	**10.00**	"
4-in.	" " "	**18.00**	"
5-in.	" " "	**25.00**	"

the 4- and 5-in. pots are very stocky and bushy; have 3 to 5 large flowers on now..

OFFERLE & SCHAAL, Erie, Pa.

Rex Begonias

Ready to Hand Over the Counter.

Will not have to be kept in stock for a few weeks to become salable, but will sell on sight. We get duplicate orders; no complaints.

Flowering varieties, Carnot, Thurstoni, Olbia, Metallica, Rubra, etc., 2½-in., strong, $4.00 per 100. $ 6.00 buys 100, assorted, from 3 and 3½-in. pots. $10.00 buys 100, assorted, from 4-in. pots.

Fancy Coleus, 2½-in., stroug, $2.50 per 100.

HERMS FLORAL CO.,
713 Chillicothe St, **PORTSMOUTH, OHIO.**

The Advance Ventilating Apparatus

Our pull is the merit of our line. Sold a Utica florist a machine last September. Shipped his neighbor florist three machines last Monday. The same day brought us an order for 7 machines from Tacoma, Wash. We sold this man 8 machines last year. The line does the work easy, lasts and is very neat. Give us a trial.

St. Paul.

STOCK VERY PLENTIFUL.

Easter trade was probably a little heavier this year as a whole; there were more sales but they were not heavy compared with a year ago. Stock was very plentiful and there was some cutting in prices on the more ordinary stock. There was some stock left in nearly all the stores, but this can be laid to the bad weather on Friday when very few people ventured out and the consequence was that when they came on Saturday, which turned out to be a very fine day, they could not be waited on, and lots of people went without flowers for this reason. Cut flower sales were probably about the same as a year ago and there was plenty of everything except violets which as usual were in big demand. Outside of lilies, azaleas and Dorothy Perkins roses were in most demand with hydrangeas, bulb pans, rhododendrons and spireas holding their own pretty well. The few Queen Alexandra pink spireas that were shown elicited favorable comment, as also did some well flowered kalmias. There were a few half standard Baby Ramblers which were sold early, when they were dressed up well.

NOTES.

Spring outdoor work opened up strong last week, everybody wanting their work done at once, but this has got a setback the last couple of days when it has rained and turned to one of the worst snow storms of the season.

The funeral of a prominent young lady last week where friends were requested to omit flowers, taxed at least one of the large stores to the limit for fine work.

Holm & Olson had an opening Easter display on the Thursday night preceding Easter when they had music and drew a big crowd. O.

Florists' Refrigerators

A GOOD HOLIDAY TRADE.

The Easter trade was the best we have had for several years back and all are satisfied with the results. Lilies were in abundance and these, with a few exceptions, were outdoor grown flowers. Roses and carnations were from Chicago. The churches were all beautifully decorated and the florists were kept busy with decoration work.

HORTICULTURAL SOCIETY MEETING.

The Horticultural Society held its monthly meeting April 16 and it was decided after some discussion to hold the chrysanthemum show on November 12-14. The following committee was appointed to arrange and take charge of same: Chas. Eble (ex officio chairman), J. A. Newsham, Harry Papworth, C. W. Eichling, Richard Eichling, B. W. Witcher, P. A. Chopin, M. M. Lapouyade and Paul Abele. Jos. Steckler was appointed treasurer and C. R. Panter secretary.

Exhibits from any grower of plants and flowers will be received and prizes will be offered for special plants. The teachers and pupils of the public schools are specially invited to compete in the growth of flowers and plants, and handsome prizes will be offered them. J. Steckler, Paul Abele and P. A. Chopin were appointed a committee to secure a suitable hall for the fall show.

E. Baker, state superintendent of Audubon park, sent in his resignation as a member as he has retired from the business to go in a commercial house. By a unanimous vote he was elected an honorary member. Jas. A. Newsham in a communication to the society from British Honduras states he is doing well in his collection of orchids. A. Alost has invited the society to the annual dinner at Rose Villa farm on Gentilly road on May 3, which invitation the society cheerfully accepted.

M. Cook's Sons have dissolved partnership and both go into business on their own account. D.

STEEL RETURN TUBULAR

Steam BOILERS Water

WHAT F. R. PIERSON SAYS:

JOHNSTON HEATING CO., New York City.
Gentlemen —The internally fired steel boilers which you installed last fall are giving us great satisfaction. They heat very quickly and are very economical. We are exceedingly well pleased with them and they have more than met our expectations. Very truly yours, F. R. PIERSON CO.

Easter Trade Reports.

GLOVERSVILLE, N. Y.—A 20 per cent increase in sales at prices about the same as last year is the report of Richard Loeben. All cut flowers were sold but there was plenty of plants. Violets were short. "The rain checked sales a little or we would have been short of stock on Saturday."

WORCESTER, MASS.—Business at Easter was very good and conservative buyers sold out well at good prices. There was a good supply of lilies, roses and carnations with an over supply of bulbous stock of all kinds. Rambler roses, Baby Ramblers, azaleas and lilacs sold well.—R.

PROVIDENCE, R. I.—W. E. Chappell reports a 25 per cent increase in sales at prices slightly lower and everything in good supply. Lilies and other bulbs in pots and carnations as cut flowers were the best sellers. The weather was ideal and the stock the best ever handled here.

CONCORD, N. H.—G. J. Benedict reports a 25 per cent increase in trade at prices about the same as last year. The supply of cut flowers and plants was not equal to the demand.

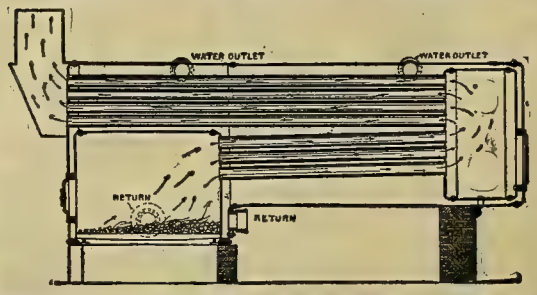
BLOOMINGTON, ILL.—J. D. Robinson, reports trade and prices about equal to those of last year, with plants and cut flowers equal to the demand. Easter lilies sold well.

FARGO, N. D.—Shotwell Floral Co. reports trade about the same as last year and stock of all kinds equal to the demand.

THE SUPERIOR

Return Flue Fire Box Boiler.

Ask the man that knows. The names are yours for the asking of them.



12 of these were bought and used by one grower. 6 by another grower.

This boiler has given better satisfaction than any other boiler on the market
MADE IN EIGHT SIZES FOR HOT WATER.

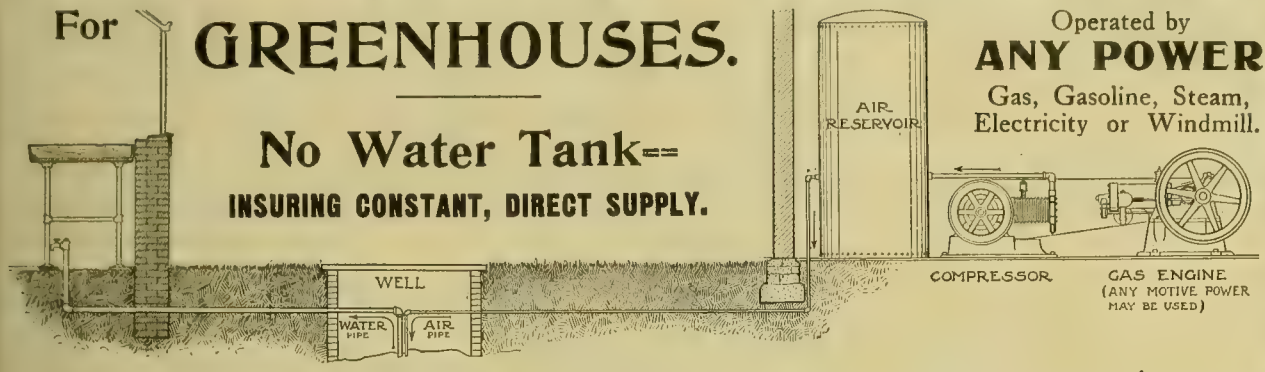
56 Pine St., New York.
Why? Because many debtors will pay the Board, fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.

PERRY PNEUMATIC WATER SYSTEM

For GREENHOUSES.

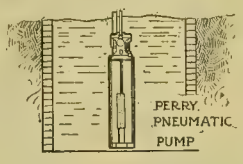
No Water Tank==

INSURING CONSTANT, DIRECT SUPPLY.



Operated by
ANY POWER
Gas, Gasoline, Steam, Electricity or Windmill.

Send for descriptive matter and information blanks. We will be pleased to give estimates on a system for your particular needs.



The Perry Pneumatic Water System

is ideal for the Greenhouse. It delivers a strong, continuous pressure of fresh water from the well or any source of supply direct to the faucets. No water is stored. Cistern water may be supplied or several wells may be drawn from with the same motive power.

The Perry System Is the Only Water-Tankless Water System Made— don't confuse it with systems that require storage of water, or air and water, as a means of supply.

Better Service. Less Cost for Operation.

UNITED PUMP & POWER CO.,

Old Colony Building, CHICAGO.

Montreal.

UP-TO-DATE RETAILERS LEAD.

This year's Easter trade was greater than was expected, some retailers were too careful in providing sufficient stock and consequently ran short; others tried to dispose of stock almost ready for the rubbish heap and of course had it left on their hands. The flower loving and flower buying public today is too well educated to be deceived in this way any longer. The amount of business done by the different establishments differs greatly; in every case it is the newer, recently established, up-to-date concerns that handle the best trade, while the older places seem to allow themselves to drop hopelessly behind the times. In lilies there was not enough to last till Saturday noon but, as there was a good stock on hand of hydrangeas and azaleas, few customers were lost. Small tubs, filled with lilies or mixed plants, were good sellers. Dutch hyacinths in pots and colored tulips, sold well and at good prices; roses in pots were extra fine. In cut flowers, roses were scarce and high in price, Richmond and Killarney being the favorites. Carnations were plentiful and good Lawson and Enchantress were the leaders; of the newer varieties there were not enough to be noticed. Violets were very short.

NOTES.

Chas. Deryncks has bought his old stand on St Lawrence street, paying $15,000 cash, Charlie has been very successful since establishing himself some seven years ago. His Easter trade was away ahead of last year.

McKenna's rented another store for Easter so they had three stores going, and all of them full speed. This firm bought 25,000 carnations from A. C. Legare alone without counting their supply from the west.

Hall & Robinson did an immense trade; their speciality was roses in pots. Lilies and hydrangeas were very fine.

A. C. Legare sold more carnations than he estimated, his cut being far ahead of 50,000, all first class flowers.

Geo. Hopton had to work overtime to get through his business which was well up in Sunday afternoon.

Miss Carmichael was closed early Saturday night, probably sold out.

John Eddy & Son report large sales chiefly in plants. LUCK.

AUBURN, ME.—An addition is being built to Roak's greenhouses on High street.

ELMIRA, N. Y.—The United States Cut Flower Co. under the capable management of Wm. R. Compton is making great strides and the past season has been a good one. Increase in capitalization and additions to the plant are talked of.

BOOKS FOR FLORISTS.

The time is coming along when these are needed and opportunity at hand for reading them. Every one of the following should be in your library.

Send prices quoted and we send the books.

PRACTICAL FLORICULTURE (Peter Henderson).—A guide to the successful propagation and cultivation of florists' plants. Illustrated. 325 pages. $1.50.

THE AMERICAN CARNATION (C. W. Ward).—A complete treatment of all the most modern methods of cultivating this most important flower. Illustrated. $3.50.

HOW TO GROW CUT FLOWERS (Hunt).—The only book on the subject. It is a thoroughly reliable work by an eminently successful, practical florist. Illustrated. $2.00.

FUMIGATION METHODS (Johnson).—A practical treatise on cheap and effective means of destroying insect pests. Handsomely bound and profusely illustrated. 250 pages. $1.00.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. $1.25.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. $2.50.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

GREENHOUSE CONSTRUCTION (Taft).—It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. $1.50.

DAFFODILS, NARCISSUS AND HOW TO GROW THEM (A. M. Kirby).—Contains all that is really worth knowing about these most popular of spring bulbs, written from the standpoint of American conditions. Illustrated, 233 pages; postpaid, $1.21.

YARD AND GARDEN (Baker). An excellent book treating on the method of making home gardens attractive. The author covers a wide range of subjects in quite an able manner and the book is full of interest for the amateur gardener; 140 illustrations, 420 pages, $2.

SUCCESS IN MARKET GARDENING (Rawson).—Written by one of the most prominent and successful market gardeners in the country, and who has the large t glasshouses for forcing vegetables for market in America. Outdoor and indoor crops are treated. Illustrated, $1.00.

MUSHROOMS: HOW TO GROW THEM (Falconer).—The only American book on the subject, 29 illustrations. Written by a practical mushroom grower, who tells the whole story so tersely and plainly that a child can understand it. This book has increased mushroom growing in this country three fold in three years. $1.50.

AMERICAN FLORIST CO.

Ionia, Mich.

The visit of the florists of Lansing, Grand Rapids, and Muskegon to the city April 22, was a pleasant incident brought about through the enterprise of the Ionia Pottery Co. At about 4:30 p. m. the party came down town under the escort of President Fred Cutler, Jr., and Secretary Harvey Kidder, of the company, being taken to the plant. They were started in at the clay pile and shown through the entire institution, seeing for themselves how flower pots are made, from the clay in its natural state, until it is turned out a finished article to the shipping clerk, the famous Ionia flower pot. They made an inspection of all the departments— pressing, drying and burning in the modern kilns. Then through the large new warehouse, which at this time is not largely stocked owing to the extensive spring trade, but which is being put in shape for fall manufacture, now under way. After a visit to the shipping department they were taken upstairs where the veteran potter, Geo. Horseman, who has been with the company 30 years, was moulding by hand the big lawn vases and from there to the wire department.

The wire department is a new venture with a bright outlook. Here all kinds of wire frames, wire baskets, wire emblems, etc., are made, and although the company has not yet issued a catalogue covering the department, orders are pouring in from all over the country. Two months have been occupied so far in getting up the designs and patterns. But the work of supplying orders is now under way and several have already been filled. The institution has shown an increase in business so far this year, exceeding any other year in its history.

The visitors were surprised at the size and importance of the plant. Though every one of them had purchased and used thousands of the pots, to see them made was an innovation. Among them was the well known florist, Henry Smith, of Grand Rapids, who has four acres under glass and also looks after a 200 acre truck farm. The pottery is now employing 30 men and an additional building for the wire department it is expected will be built this summer. The visitors paid the Ionia flower pot many compliments, declaring it to be the best on the market.

NAMPA, IDAHO.—A. H. Behrman has purchased several lots in the Kurtz addition and intends building somewhat extensively. The flowers grown will probably be all handled by local dealers.

Concrete Benches.

ED. AMERICAN FLORIST:—

With reference to J. C. Ahrensfeld's comments upon this subject, in a recent issue, I will endeavor to set him aright upon the several points which, he admits, are somewhat muddled. In the first place it matters not, as far as the durability is concerned, which system is employed, as either the one-piece or portable, if properly reinforced, will be equally as satisfactory.

We have had these benches in use for four years and they are harder today than when constructed. The point is a known fact and any one working in concrete knows full well that it does not assume its maximum strength until after a year or two old. Cement hardens only by contact with water and for this reason such construction becomes harder after water is freely applied. As to the best method of construction, if there is any possibility of being obliged to move the benches, I should certainly advocate the portable system. These benches, when constructed, are practically one continuous bench and differ only from the one piece construction in being composed of many parts.

As to concrete being too cold, will say that it is a better conductor of heat and cold than boards and if the house is warm, the concrete will be the same temperature. As to their crumbling away, there is no danger of this if good cement is secured. As far as we are concerned, it is immaterial to us if other florists resort to this method of construction or not. We have had four years' experience and are satisfied with the results and are confident that we will save money in the operation. What we have contributed to THE AMERICAN FLORIST has been purely for the benefit of others, believing that this method should be better known.

We have no forms or patterns for sale but will be very glad to show any one the necessary equipment for making portable concrete construction. We do not claim that our methods cannot be improved upon for there are a great many florists who possess mechanical ingenuity, that may be able to devise a superior system. We have given our knowledge in the matter to the trade without compensation and if any one is benefited thereby, we will be pleased.

ELMER D. SMITH.

THEY ARE PRODUCTIVE. Because of the wide glass, light framing and unobstructed eave, floods of unhindered light and sunshine reach the benches, producing unmatched growing results.

Their attractiveness, simplicity, great strength, durability and low cost of maintenance are other strong points.

The Tomb and the Rose.

The Tomb said to the Rose—
"Of tears the dawn bestows
What makest thou, Lovers' flower?"
The Rose said to the Tomb—
"What makest thou in thy gloom
With what falls there every hour?"

The Rose said—"Tomb so drear,
Of these flowers I make i' the sere
Perfume of sweetness rare."
The Tomb said—"Plaintive flower,
Of the souls come in my power
I fashion the angels fair."
—From Victor Hugo.

SUGGESTIONS FOR CUT FLOWER GROWERS.

Callas.

As the callas go out of flower reduce the water supply by degrees, and let the plants finish their growth. They then go naturally to rest and as the foliage turns color, preparatory to falling, let them dry quite out. Place them outside in the full eye of the sun and let them have a thorough baking. In an ordinary summer there is no need to turn the pots on their sides, as is sometimes done; the little rain that falls will not injure the bulbs or start them growing. But in localities where there is a very heavy rainfall, it may be advisable. At all events it can do no harm, provided they are again moved and set upright before the new growth starts. Otherwise the young stems would draw towards the light and get crooked. Potting the bulbs need not be delayed as long as is often done. They may be repotted at any time after they have had a good baking, and may then be stood level and pot thick, still in an open situation. If one good soaking of water is given after repotting the bulbs, no more will be needed until they begin to grow. There is no question that the outdoor summer culture, giving them a thorough ripening, is best for these useful plants.

Antirrhinums.

After the flowers are cut the antirrhinums throw out stocky little shoots from near the base of the stems and these make the best cuttings for next season's stock. The middle to the end of May is an excellent time to propogate these free flowering, useful plants, and, by using cuttings, one is sure of perpetuating the varieties needed, though, if no stock plants are at hand, they may be raised easily from seed. Grow plenty of bright colored types, clear yellows and deep reds being usually good sellers. No bottom heat is necessary for striking the cuttings, but they must be made from unripened though solid shoots and kept constantly and regularly moist. When rooted, pot up singly and, as soon as established, place them outside in plant protectors or frames in the full sun and keep them growing as gently as possible without starvation treatment. It is not usually necessary to repot them though if they cannot be benched in good time, say by the end of September, it is better to repot than to let the young plants get starved in the pots.

Freesias.

Growers who intend keeping their freesia bulbs over for another year will, if they followed the instructions previously given, have the plants all ripened off by now, and if the bulbs are good they will be the better of a thorough baking in the sun. There are many positions where a shelf or two could be rigged up, such as the sunny end of a span roofed house, and here the pots may be stood for another few weeks, taking no room that is valuable and needing no water. Any late pots that have the leaves still green must be watered a little, but dried off by degrees, and afterwards treated as noted. The earliest ripened bulbs should be chosen for the first potting, and these may be placed eight or nine in a 6-inch pot when ready. It does not pay to bother with small or weak bulbs; throw them away and procure new ones. But there is no reason, if proper care is taken after the flowers are cut, why some at least of the bulbs cannot be saved every year.

Coreopsis Grandiflora.

A good bed of fall sown seedlings of Coreopsis grandiflora will produce a great number of flowers, and if there is no stock on hand it will be well to purchase some now and plant it out at once. Select a comparatively shady position if possible, and a medium soil well enriched to obtain good flowers. The plants should be set out in beds about four or five feet wide to facilitate cutting, and the plants may be set in rows one foot apart each way. Cultivate them well in the early stages and see that they do not suffer from want of water when flowering freely, or the flowers will be small. Although a perennial, C. grandiflora is best propagated from seed and kept about two seasons. Sow a batch each spring and fall and throw away the old plants after flowering the second time. Stakes every six feet and a wire or cord run around the bed about two feet high will prevent the plants getting blown about when in flower.

Dahlias.

Pot roots of the cactus dahlias are usually the earliest to flower and the most free flowering all through. Where they are getting well advanced in growth the plants must be kept in quite a cool, light house, where the growth will be solid and not drawn or soft and when planted out will not suffer either from cold or bright sun. Plants from cuttings or seed, that are not sufficiently forward, may be given a little more heat and moisture and kept moving more freely. It is getting late for dividing up old roots, but there is no reason why this should not be a success if the divisions are kept moving right along. In all cases the aim of the grower, as hinted above, will be to produce growth that will not suffer later when put out. It is only time wasted to grow lanky, soft plants that have to start up again before flowering. Where dahlias have to be frequently cut, ample room should be left between the rows. These should be five feet apart and the plants at least 30 inches apart in the rows. Planted closer than this the plants get damaged in passing between the rows and nothing is gained. The soil should be light, rich and well drained and if of a sandy texture all the better. If possible, choose a somewhat sheltered position where early frosts do not strike the plants, as sometimes valuable cuts can be made late in the season if the plants escape the first visitation. Heavy watering is not advisable early in the season, but during July and August, when the growth is active and a number of flowers are forming, the soil must be kept moist or the flowers will be small and poor. Pinch any plants now that are inclined to run too tall, and again, if necessary, after planting out.

Gardenias.

The young plants from cuttings inserted early in the year will be making nice little stock in 2-inch pots. A shift to 4-inch will be in order now, and the plants may be pinched if any shoots seem to be taking an undue lead. The natural breaks, where flower buds form and are pinched out, are sometimes sufficient to keep the plants in track for planting out for cutting from; though when grown for pots it is usual to pinch the plants as well. Pot firmly in a sound, loamy compost with well decayed cow manure freely added and a good sprinkling of coarse sand. If the benches are ready, the plants may go out from the 2-inch pots, but we prefer the 6-inch stock as it is stronger and the roots take a firm hold of the soil more quickly. Given healthy stock with good active roots, gardenia growing on benches for cut flowers is simply a matter of keeping the growth moving freely right along, and to do this a brisk, moist and buoyant atmosphere is necessary, and, as mentioned in previous notes, plenty of ammonia in the atmosphere is a great help. The soil in the benches need not be more than five inches deep, as it is necessary that the roots take full possession of the whole of it before winter when they have to be kept a little on the dry side. Briefly, the young plants must be kept growing freely and all flowers pinched out until about September, when rather less atmospheric moisture is needed to consolidate or ripen the growth which will remain in a comparatively quiet state during early winter and will then answer readily to heat when applied to force the plants into flower. To keep the foliage clean, frequent spraying is needed, and this is another reason for keeping the soil on the benches thin. Much of the water runs off the smooth foliage down the stems to the roots, no matter how carefully the work is done, and if there was much unoccupied soil about the roots this would become waterlogged and sour. Old plants that have been flowering may be cut somewhat hard back now and started up again into growth, to be eventually treated as described for young plants. Keep the soil a little on the dry side for a week previous to cutting back and until the new growth is again getting well away. The pretty old Tabernæmontana coronaria, the double flowered form, thrives well planted out and treated as advised for gardenias and should prove a good seller if raised in sufficient quantity.

Sport of Rose Crimson Rambler.
Grown by Anton Schultheis, College Point, N. Y

A New Palm.

PTYCHORAPHIS SIEBERTIANA.

The genus ptychoraphis is exceptional among eastern palms in its elegance, the three or four species known, all of them Malayan, being as graceful as Cocos Weddelliana and Geonoma gracilis. P. Singaporensis and P. augusta, which are already in cultivation, although comparatively recent introductions, possess good decorative qualities and in this new species, which is named in compliment to Herr Siebert, the highly-esteemed director of the palm garden at Frankfort, we have a most promising garden palm. In the pose and form of the young plant there is a resemblance to Dæmonorops fissus, but there are no spines on the ptychoraphis. The stems are slender, in the case of mature plants probably tufted, with elegant arching leaves, the petioles clothed with small brownish scales, the leaflets regular, 10 inches long, three-fourths inch wide, tapering gradually to a long, thread-like point. When young they are copper-colored, changing with age to a rich green color. This fine palm has been introduced by Sander & Son, St. Albans, and it is likely to prove one of the best of this firm's many introductions.

THE ROSE.

NEVER allow any old flowers to remain on the benches. They are sure to attract thrips.

CONSTANT and heavy syringing robs the plants of a natural protection against diseases and insects and practical growers are beginning to take note of this.

THE beautiful rambler, Lady Gay, is becoming very popular in England as a market plant, realizing in some instances up to $6.50 per plant wholesale.

New Rambler Rose.

SPORT OF CRIMSON RAMBLER.

The new rambler rose, herewith illustrated and recently exhibited by Anton Schultheis, College Point, N. Y., before the New York Florists' Club, is a very attractive single. It somewhat resembles Newport Fairy, beside which it was shown, though the center of the petal is much lighter in color. Mr. Schultheis thinks very highly of it and it has received many words of commendation at the club meetings and those who have visited Mr. Schultheis' range.

Houses for American Beauty.

Growers of American Beauty are by no means entirely in agreement as to the size and style of house most suitable for the culture of this famous rose. Some think the connected houses of small or comparatively small size are more suitable than the extremely large houses being built, while many growers think the bigger the better. Others have various opinions as to the class of bench or bed most suitable for its growth. We would like to have the opinions of all growers of experience on this important question. It is not only important to growers, but greenhouse builders will also be interested and we trust that all who have ideas on the subject will state them freely and unreservedly for the benefit of those who may be seeking information. We publish herewith the opinions of two noted growers:

ED. AMERICAN FLORIST:—

In regard to houses for American Beauty I would say that my houses are all connected, 22 feet wide, gutters seven and one-half feet high, beds five feet, and walks two feet wide. We prefer these to small separate houses. Have had no experience with houses wider than 27 feet; these were also connected. These have all been very satisfactory and, situated as we are, where ground is limited, would certainly continue building connected houses with either three or four beds to a house. We prefer solid beds as we save the expense of replanting every year and also get a longer cutting season. About three years, we think, is the limit for American Beauty in solid beds.

ALFRED BURTON.

We have only the ordinary commercial, 20-foot houses in use on our plant, all of which are of the three-quarter span style, separated, by spaces varying from 16 to 20 feet. Taken for what it is worth, I should without hesitation say that I would have no other style of house than three-quarter span, isolated houses, connected by a cross house to give access from one to another. The length of house seems to make but little difference in the hands of a good grower, always provided there is sufficient head room to keep buds clear from the glass.

Personally I prefer raised benches, deeming them safer for use under any and all conditions. As to width of house, there are so many opinions that for one who has never had any wide ones, to express an opinion, would seem foolish; all I can do is to give you my personal ideas, you to take them for what they are worth.

From observation I should say that to make houses very wide and at the same time give the proper pitch to the roof, must of necessity make the height of ridge very great and thus make the necessary repairs very hard to make and expensive. That there is merit in the claim of wide house admirers, when they say the temperature can be kept more even, I do believe, but, all in all, for our future building, we propose to use a modification, and build about 36 feet wide on the three-quarter span style, raising the grade line, at an even rise of one inch to the foot, from front to back.

BENJAMIN DORRANCE.

Modern Methods of Rose Growing.

A paper read by E. Holmes, of Montrose, Mass., before the Gardeners' and Florists' Club of Boston, March 17.

Let us look for a moment at the rose growing industry of 20 years ago, that we may better appreciate the situation today. We had then such varieties as Gontier, Bennett, Bon Silene, Safrano, Catherine Mermet, and other good ones. It cannot be said that these have run out or have deteriorated. They have simply been superseded by better varieties. We had an illustration of this recently in the flowers of Safrano exhibited at the Boston show. At that time also we had the old style house, 100 feet long and about 18 wide, with wooden walls and benches built up high to bring the plants up to the light. Now we build glass walls and keep the plants nearer the ground.

The question might naturally be asked, to what can be attributed the advance in the quality of roses produced today over those of that period? The reply is first of all, the modern house. If I had to follow the rating given to flowers in the exhibitions, taking 100 as a total, I would give the modern house 40 points. The other 60 I would divide equally between, the use of grafted stock, improved methods of growing, and new and better varieties in cultivation today.

WHAT IS THE BEST HOUSE?

Taking these points in this order, what is the best house? And another question often asked is, what is the limit of size? We have a house 32x500 feet even span, continuous ventilation at the top on both sides, contaning five benches, which I like very much. It is a very easy house to build and maintain. The width could be increased to 34 or 36 feet at a slight additional cost, and the extra space obtained would be of great value for an extra bench or wider walks. It is an old saying that the best roses grow in the walks, for the more air and light the plants get, the better the results. We have another house 54x300 feet, which I like better, with the possible exception that it is not so easy to make repairs on a high roof as on a lower one. These large houses are easier to heat than the smaller ones. They catch every ray of sunlight in winter, fires can be banked earlier, and started up later than in the small houses. It is no experiment now, but it is a fact that, with the larger body of air, the temperature does not fluctuate as it does in a small house. We find that our large house runs evener on cold nights, with less trouble than smaller ones. With ventilation at the top on both sides and front ventilators, hinged at the bottom so that the air strikes upward instead of directly on the plants, the temperature in warm weather can be controlled in spite of the long stretch of roof. It costs a little more proportionately to build the larger house, for it must be made stronger and braced to withstand any gale that may blow. The steeper the pitch, the greater the resistance, and the large houses are triumphs of the builder's skill.

I think that 60 feet is wide enough for any rose house. The only limits to the length, are the size of the field and the purse of the builder. I believe that the largest houses produce the largest flowers, everything else being equal, and no man needs any better argument in favor of this type of house, than the fact that men like W. H. Elliott of Brighton and Robt. Montgomery of Natick, who are the most conservative, and at the same time the most progressive rose growers we have, after years of experience with large houses, erect larger ones.

GRAFTED VS. OWN-ROOT PLANTS.

Our next consideration is the practice of grafting, so common now in the place of using own-root plants. I cannot do better than recommend Montgomery's treatise on grafting, to anyone wanting the subject explained in a digestible manner. I might say, however, buy the best stocks obtainable. As soon as received, we unpack the stocks and bury them in a cool cellar away from frost; first a layer of loam, then one of stocks until all are covered, taking them out as required for potting. They can also be heeled in a cold greenhouse if there is room, and no cellar or shed is available. If no cold house is at command in which to start the stock, clean out part of a bench on the north side in the coldest part of the house and hang up burlap to keep out the sun, but not so as to exclude the air. Keep well damped down and syringed, being careful not to get the roots too wet.

The grafting case, if it has to be built in a rose house, should be on the north side or it will be difficult to keep the heat down as the season advances. Cheese cloth makes a good shade for the grafting case, and cloudy days are to be preferred to sunny ones for this operation. We prefer standing up to a table about the height of a potting bench when grafting. It is as comfortable as the position you must assume when sitting down to this work, and a man can work faster when he does not have to keep changing his position. A good man will graft from 150 to 175 an hour. It is important that the grafts should not be allowed to wilt, but should be placed in the case as quickly as possible, which should be as airtight as it can be made, and closed up at once. More plants are killed by improper treatment in the case than in any other way, and there is a good deal in knowing enough to let them alone for the first five days or so if the thermometer reads aright, and the plants look fresh and moist. If, however, the case should be too hot, or dry, or seem too full of moisture, I would not hesitate (with the ventilators in the house closed) to open the case for a few minutes and remedy the defect. It is important to keep the water out of the cut until it has healed thoroughly.

YOUNG STOCK.

We find when buying young stock of new varieties that we often get more than we pay for in the shape of red spider, etc. In this case we always dip small lots as soon as received in tobacco water, or syringe with whale oil soap to which a little nicotine has been added. I have seen roses successfully transplanted at any time of the year, but the earlier the better for young stock. It is simply a question of money and convenience, and on large places the planting covers several months.

Remarks written on watering are often misleading, for one soil will use up two or three times more water than another; so in other ways. Take Richmond for example. I have seen it cut down in the summer with splendid results, and thought that was the proper way to treat it after the first year. I have seen it left without pruning, standing to the top of the stakes, and also tied down, doing absolutely nothing. I have seen others tied down giving an abundance of magnificent flowers. All this goes to show that it is not so much how it is done, as who is doing it. The greatest discoveries of science and manufacturing are sometimes the result of an accident, and it is no less true of some secrets in rose growing today. The observant man, in addition to experimenting, will note every detail in the working of his place, and out of some miscalculation or disaster today, will possibly see the way to success later. All men make mistakes; the ones who make the least are the most successful.

SOIL.

We have used loam for planting after being piled up one or two years, and have also used it plowed and chopped up in the field one day, and in the house

A NEW PALM—PTYCHORAPHIS SIEBERTIANA.

Reproduced from the Gardeners' Chronicle.

planted the next without any different results. I would, however, prefer four to six inches of sod rotted and chopped up with cow manure. If this has been put together the previous fall, so much the better, for it is easier to plant in. On large places the old method of piling up soil ahead has given place to the horses and disc harrow in the spring. The large houses are easier to fill than the old style, where a man pushed a wheelbarrow 100 feet or more. A house up to 40 feet wide can easily be filled by removing glass or sash in the sides and driving teams alongside with the loam. Five or six men make a good gang for operating these houses when filling. With two or three men outdoors loading and unloading the carts, and three or four inside, placing, treading and leveling, good progress will be made. Before filling, all woodwork should be whitewashed, or receive a dusting of air slacked lime. We also use lime mixed with the soil for planting, and particularly in loam and manure for top dressing. It is a very good and cheap fertilizer and sweetener of the ground, and might be used a great deal more freely than it is. Before commencing to plant, if the weather is hot, we use a light shade of whiting, syringed on the glass. It is cheap, quick to apply, good for the men and plants, while the work is being done, and can be washed off with the hose if rain does not come in time to take it off.

I do not like a line for planting young stock, as it is in the way and takes too long to move around. We use a marker made of light strips of wood with pegs fastened on. One man can handle it, or two men, one on either side, may work quicker. Being the same width as the bench boards it cannot get out of line, and the distance in the row is obtained by following the end mark every time it is moved. It will make 20 holes every time it is moved and enables a bed to be carried through at once. Team work comes in to good advantage in planting where it is important to transfer the plants quickly. A good man should be detailed to pick out the stock, for it is useless to waste time on poor plants. It will take one or two men to pick out the plants and knock them out into flats, one with a wagon to cart to the house where they are to be planted, a couple to dig holes, two good men to plant, and one at least to pound down. Six or eight men working well together will plant 4,000 young plants in a day if the beds are already prepared. In planting it is well to grade the plants as they are set out of the flats, placing the largest ones in the back row and the smallest in the front. I would not leave too much dish around the plants, as with the frequent syringings necessary at this time, it collects too much water.

OLDER PLANTS.

In replanting one year or more old stock, we use no line or marker, but commence on one end of the house digging up, cleaning out old loam, throwing in new and resetting at one time. We do not like to do more than necessary of this, for it takes five men a month to go through 10,000 square feet of bench and thoroughly overhaul it, and costs $1,000. Three years seems to be about the limit of age for profit. It has been said that Richmond should be replanted every year; this is not necessary with us, and others report the same. A feature of Richmond is that while grafted stock makes a larger plant in the fall, giving one or two crops before the own-root plants come into bearing, in the middle of the winter the own-root stock is livelier than the grafted, and will throw up long shoots from the bottom four to six weeks earlier.

After planting, we give a thorough watering around the plant without wetting the whole bed, and after that we give no more water for from one to three weeks, as the case may require, but rely on syringing and cultivating to keep things moving. Keep the soil stirred once a week among newly planted stock. It can be done quicker than the weeds can be pulled out, which come if the soil is not scratched over, and is of incalculable benefit to the plants. As soon as the planting is finished, all left over plants can be planted in the field and, unless required, may be left there until just before the ground freezes in the fall, when they can be brought in and potted or planted thickly on a bench in a cool house, where they will make good plants for Easter or Memorial Day. If lifted about September 1 they will make acceptable plants in pots for Christmas. Liberty makes a splendid rose for this purpose. If established in pots in the summer and treated as a hybrid in early fall, it can be well flowered for Christmas.

TREATMENT OF SURPLUS PLANTS.

If needing room now for replanting, any healthy plants to be dug up, if potted, will be fine for Memorial Day. Last year we had 800 plants of Liberty in a house with Bride and Bridesmaid; they did well up to Christmas, after that they refused to work. About the first week of March we trimmed the weak wood out of them, and, as they grew, kept them pinched back until April 15. Between May 15 and June 15 we cut over 10,000 good flowers from these plants. About eight weeks before Christmas is late enough for the final pinching back for Christmas flowers. This method of holding back flowers is not so new as some may imagine, as it was practiced in the middle west, 20 years ago.

In regard to drying off plants to be carried over to another year, more harm is done by too much drying than otherwise. The beds will dry naturally in the heat of the summer; the wood should never shrivel and the foliage should be syringed enough to keep down spider. The summer treatment is where local conditions and soils call for different treatment.

Syringing is another operation which calls for discretion. Is it paradoxical when we read, "Do not let roses get soft," and "Do not let them get hard," in notes written on the subject? The softness to be avoided is of the foliage and young shoots caused by insufficient air, too much fire and syringing; the hardness to be guarded against is of the older wood caused by too low a temperature and not enough syringing. And this operation varies with the seasons. Commencing now with the increasing sun and still lots of fire heat at night, evaporation is rapid and heavy syringing is in order to keep the foliage clean and large. Special attention should be given to the ends of benches where pipes may be nearer the plants, and dry walks should be damped down every day. If a general syringing is not given every day, the plants should at least get a spraying through the bottom from every other walk. I believe in afternoon syringing in the summer time, especially for young and replanted stock. I would not do this later than four o'clock, not on cold or wet days, and would discontinue it as soon as the nights get cool. As the fall approaches, it must be done early in the morning, so that the plants can dry off before night, or mildew and black spot will soon make their appearance. In the winter when the plants will not dry, the syringings have to be cut down to about one a week, and even then some varieties have to be shaken to remove the surplus moisture, or they remain wet over night. At this time we rely on frequent damping down of the walks and boards, combined with spraying through the bottom of the plants, to keep the wood soft and induce it to break.

Disbudding is another detail which must be attended to at the right time. When the plants are growing fast, this should be gone over at least every other day.

MULCHING.

Mulching is another important matter; right now is the time to apply a coat if not already done, if good flowers are wanted for the next three months. I believe that September 1 is late enough to mulch for Christmas flowers. If applied later, when the days are shortening, it is difficult to dry the plants out and make them break properly. We apply a light dusting of bone flour, about 100 pounds to 2,000 square feet of bench surface, and then for the same space, from one half to three quarters of a cord of good cow manure chopped up with dry loam and a little lime. In a few weeks this becomes a part of the bed, as it will crumble and can be leveled down and is in good condition later to receive liquid manure. If topdressing has to be done later, I would lay it in ridges rather than blanket the whole bench with it. We find pails of wood or zinc the handiest things to use for applying top dressing. Here again, five or six men can work together to good advantage, and will cover about 5,000 square feet in a day.

CATTLEYA HYBRIDS JUST REPOTTED IN LEAF MOULD, AT ST. ALBANS, ENGLAND.

Fumigation must be attended to regularly, and the proprietary articles sold are cheaper in the end than the old fashioned tobacco stems. A little sulphur should always be kept on the pipes to keep down mildew, remembering that prevention is better than cure. When flowers are not selling well, the plants require particular attention, as poor stock is of no value in a falling market.

VENTILATION.

Ventilation is of the utmost importance in rose growing. Commencing now with the warm spring days approaching, a little air should be given early in the morning. Soon the temperature will begin to rise before 7 a. m. and if air has not been carried all night, the night man can put on a little on his last round. I like to anticipate the rise, and by frequently raising the ventilators a little, always keep ahead of the game, and, by this method, the houses never get so hot in the spring time and the plants are kept healthy and clean. It is important that the houses be kept clean at all times, with no muddy places or water standing in the walks, especially when the firing is reduced to a minimum.

The flowers should be cut as early as possible in hot weather and be placed at once in clean water. It is noticeable that every man's stamp is on his own products. A man handling roses in a store, can tell, without any distinguishing mark, who grew this lot, or where these flowers came from.

NEW VARIETIES.

In conclusion, a few words about the new varieties. It is the part of wisdom to go slow unless you know what they are. Descriptions are often misleading, and the only way to find out is by experience. Take No. 1 for instance. A friend writes me, I intend to plant 5,000 plants of this, and by the way, I have not heard of any fault which this rose has. No. 2 on the list he thinks enough of to put in 2,000 plants. I saw this exhibited some time ago and remarked to a friend that the flowers did not look perfect. He thought that this rose would produce a large percentage of deformed flowers. Speaking to another man who had seen the flowers, and asking his opinion, he said the flowers looked as if they had been fumigated. Take No. 3 which I picked out for a winner; looking over a large place recently, I had pointed out to me two plants growing on the end of a bench, and was asked why they did not grow like the others which were a standard kind, and growing luxuriantly. I could not tell why; they all looked exactly alike; the chances were in favor of the two plants doing nothing; the answer was, those are No. 3. I said things then which I will not repeat here, for I had ordered a few of that kind. Take No. 4 condemned by several good growers. I asked one large grower what he thought of it, and he said, I have ordered it and wish that I had not. The next man says, don't believe all he tells you.

I think that undoubtedly, when White Killarney comes on the market, if it proves to be a good shipper, it will be an acquisition, as it possesses the good growing qualities of its sister, Killarney. In seeking information, after asking several questions of a friend, I finally asked him one, and I think that he truthfully replied, "That's what I am trying to find out;" so with us all.

Hog Manure for Roses.

ED. AMERICAN FLORIST:—

I have a big pile of soil scraped from a spot where there was a hog pen for seven or eight years. Can I use this for roses? I intended to mix it with rose soil but my friends tell me it won't work. Can you assist me in this? J. L.

Unless too much is used it will be all right as the manure is very strong and dangerous in large quantities. We would advise you to use not more than one part in 20 at first and you can always add more as a top dressing if it seems to be needed. G.

CYMBIDIUM EBURNEUM.

ORCHID NOTES.

CATTLEYA SUPERBA needs more heat than most other cattleyas.

WATER calanthes freely when the roots are taking well to the new soil but not before.

ALWAYS keep Cattleya Dowiana aurea, the varieties of C. gigas and the hybrid C. Hardyana well up to the light.

PROPAGATE Dendrobium nobile and the hybrid forms now by cutting the stems and laying them on pans or boxes of moss.

A STUDY of the roots of orchids and the way they are working in the compost is an index as to the amount of watering needed.

VANDA COERULEA likes plenty of air and a cool, light house. The roots should be confined to small pots or baskets or the plants will not flower freely.

Orchids in Leaf Mould.

Partly, no doubt, owing to a scarcity of good peat, but probably more owing to the fine odontoglossums exhibited by the Belgian growers at the Temple and other shows of the Royal Horticultural Society, British growers went quite largely into the culture of orchids in leaf mould a few years ago. Where the culture was understood and where the right kind of leaf mould was used the plants did remarkably well, but in many cases the growers treated the plants much the same as they had been used to doing in peat and moss, and, in consequence, the leaf mould soon got into a wet, close condition, the roots failed and the health of the plants suffered.

The Belgian leaf mould is a very different substance to that gathered about British woods and gardens. It is a sharp, hard material in which the leaves have not rotted into a close mould but have hardened and broken up. It is also full of a kind of coarse grit that insures æration and allows of the free passage of water. As long as this was kept comparatively dry, there could not possibly be a better or more natural medium for orchid roots, and the odontoglossums referred to above as put up by the Belgian growers were among the finest examples of cultural skill that have ever been shown. The most generally successful among the growers were they who potted their plants in the genuine Belgian leaf mould and surfaced this with sphagnum moss to conserve the moisture rather than water the compost heavily. Others who used ordinary leaf mould and watered the plants in the usual way were not successful, but quite the opposite, and, for this reason, growing orchids in leaf mould never got much

beyond the experimental stage though when carried out properly it is good practice.

The illustration shows a house of cattleyas at Sander & Son's, St. Albans, England, making a good growth in leaf mould. Although we have no data on the subject doubtless this firm's Belgian connections enable it to obtain the best

A FAMOUS FRENCH GARDEN.

Partial View of Grounds Surrounding the Former Residence of Worth, the Noted Parisian Costumer.

class of leaf mould at first hand and this would in some measure account for the successful growth. But in this country where there is plenty of good swamp peat or fern root there is no need to trouble about leaf mould for cattleyas. The excellent growth made in the former material could not be improved upon and this makes a perfect root hold for cattleyas. Whether odontoglossums could be more successfully grown in leaf mould here or not remains to be proved. It is the general opinion that the heat of the summer is too great for these cool species to be satisfactory, but it must be remembered that years ago, the same thing was said about European countries where now some of the finest odontoglossums in the world are grown.

Cymbidiums.

Although a fairly large genus numerically, cymbidium is not a popular one, if we except a few well known species and hybrids. The flowers are attractive and extremely lasting, in one instance especially—the well known C. Lowianum—the flowers of which last for months on end if kept in a moderately cool house. One of the most charming of all is the species illustrated, C. eburneum, which is an early spring flowering plant of great merit. It bears large, handsome flowers, deliciously fragrant, the sepals pure ivory white, the petals and lips stained with yellow, making it most attractive. In the young stage C. eburneum has a distinctive pseudo-bulb, but with age the plant assumes a kind of distichous leaved stem and the flower spikes occur between the leaves. A native of the East Indies, it thrives well in a warm moist house.

C. giganteum and C. Lowianum are two species a good deal alike in habit, so much so, in fact that they cannot be distinguished when out of flower and the cool fernery, where, owing to defects in the heating system, we could not keep the temperature much above 40° on cold nights and which was comparatively shady owing to the vicinity of trees and buildings. Here the cymbidiums made a wonderfully free growth with fine healthy foliage and flowered every year most profusely. They were taken out of the house for decoration when in flower, and, owing to the large size of the plants, were not moved about much and often remained in living rooms for six weeks while in flower.

There is a hybrid between C. Lowianum and C. eburneum which was raised in England and christened C. eburneo-Lowianum. It is a very beautiful plant, with flowers having the white sepals and petals of C. eburneum and the wedge shaped crimson blotch on the lip as seen in C. Lowianum, which makes it very effective. The cross has been raised both ways and is becoming more plentiful owing to the strong growth and the ease with which it can be propagated.

These cymbidiums like a much more substantial compost than the majority of orchids and we have been most successful with a mixture of three parts good sound loam and the fourth part peat and chopped sphagnum moss. If some good sharp leaf mould can be obtained this is also a good addition, and the whole should be kept in good mechanical order by the addition of plenty of rough crocks and charcoal. When healthy, the plants extend very rapidly and soon become immense specimens, but when they once get into really bad order they may as well be thrown away, for they seldom recover to amount to much. While growing freely cymbidiums like plenty of water, both at the roots and in the atmosphere, and unless they get it the foliage soon gets overrun with insects and they cease to be satisfactory. When the growth is quiet, reduce the water supply considerably, but at no time is drying off, as practiced with dendrobiums and other deciduous orchids, necessary.

A Famous French Garden.

We are fortunate in having secured for publication views of the beautiful home and surroundings of Worth, the fashionable and artistic costumer of Paris, which, since his death, have passed into the hands of Jack Harris, formerly known as Chicago's most fashionable tailor. For years Mr. and Mrs. Harris conducted a successful business in Chicago, spending several months each year in the French capital. Last fall, on retiring from business, the Parisian home was bought. This is one of the most famous gardens in that country where the gardening art has been brought to so high a standard. The home and surroundings embrace an entire city block. Pansies, violets and other semi-hardy flowers bloom here all through the winter. Just outside of the bounds of our pictures are two greenhouses.

A FAMCUS FRENCH GARDEN.

STORE OF CHAS. A. DARDS, MADISON AVENUE, NEW YORK, AT EASTER.

THE RETAIL TRADE

KEEP out of the rut with design work. Customers like something original.

MAIDENHAIR FERN must be kept in a closed box where no air can reach it. The dark green fronds last better than the light.

A TELEGRAPHIC order recently received by the Memphis Floral Co., Memphis, Tenn., read as follows: "Express today, C. O. D., one yard carnations, funeral."

Chas. A. Dards, New York.

The accompanying illustration shows the interior of the store of Chas. A. Dards just at the beginning of the Easter rush. The store is located at Forty-fourth street and Madison avenue, New York, being but two blocks from the Grand Central station. Mr. Dards has long been a successful retailer, his store being noted for the good quality of the stock carried and a business policy of promptness and fair dealing. The whole field of the retailer is well covered, noteworthy being many fine wedding and dinner decorations in their respective seasons. In the illustration, baskets and boxes of various combinations of popular plants are shown with fine effect, though it falls short of doing justice to such a collection.

Notes on Window Boxes.

Nothing is so great an aid in breaking up the dull monotony of city and suburban streets as fine shade trees and window boxes. The shade trees are often supplied by the authorities, and public spirited citizens like to have window boxes as good as those of their neighbors to say nothing of the pleasure they take in the plants themselves. This window box filling and the looking after of the plants after they are filled is a lucrative part of the florists' business and any retailer or small grower who does not lay himself out to get some of it misses a chance safer and easier to make money at than holiday cut flower or plant trade. The class of people who like to see their windows neatly and effectively treated with plants is usually a class that is worth cultivating for other lines, and in few other ways has a florist a better chance to show what he can do in the way of tasteful and lasting plant arrangements.

There are places, of course, where rich owners want constant change in their window boxes and where a great deal of money is spent on plants for the purpose of keeping up a constant show of all the best plants in season. This means a lot of money and the number of such places is few, while most even of these have their own gardeners. The class of window box trade most generally profitable to the retailer is that which demands an effective display of flowering plants and vines followed in fall and winter by a few hardy evergreens and small conifers, and a display of bulbous flowers in the spring. The cost of this is not too great for people of fair income and the amount of money spent by hotel keepers and others is also very large. Florists should get after this trade and not be satisfied to turn out a box and then leave it, but make arrangements with the owners to have the care of such boxes all the year around.

The first detail in connection with this work is to provide a good class of soil. The space is small and, if good results are to be obtained, the soil must be rich enough to encourage and maintain a vigorous growth in the plants. Owing to the position of the boxes, feeding with animal manures or the ordinary manure water is out of the question. It is necessary then to have in the soil at first plenty of a good lasting artificial fertilizer such as bone dust or finely broken bone as well as something more stimulating like nitrate of soda or sulphate of ammonia. It will not do, of course, to run to the opposite extreme and make the soil so rich that plant roots will sicken in it. Make it good and keep it good all through the season by frequent applications of chemical or artificial manures and by careful attention to watering.

The small space in many boxes renders it absolutely necessary that watering must be light and frequent rather than heavy. Heavy waterings not only

swill away much of the feeding properties in the soil, but the surplus water runs down the walls and over the sills of windows below, which would not be tolerated. The very position of the boxes, high up often and fully exposed to sun and air, makes frequent attention to watering necessary, for if once they are allowed to get really dry the amount of water needed to thoroughly moisten them would be excessive. And when the soil is allowed to be sometimes very wet and at others perfectly dry, the action of the chemical manures is hindered. In most cases light spraying overhead is also necessary. It is always necessary until the plants are thoroughly established at least. In dusty streets this spraying is absolutely necessary or the plants would be one mass of dust in a short time. These details have not, of course, always to be attended to by the florist or his helpers, but he should always be prepared to instruct the owners or their janitors or servants what to do and when and how to do it.

Somewhat close planting is advisable for window boxes. The season of growth is so short that the plants have not time to fill out much and a display is looked for by owners right from the start. The grower has, in fact, to forget that he is a grower for the time being and bend his energies towards making a show regardless of the future of the plants. Vines of the vinca, tradescantia or thunbergia order should be good, well furnished plants that will fill up the front of the boxes well and hide most of the sides at the time they are set out. Geraniums, marguerites and other flowering plants should be either in flower or rapidly advancing for flower and coleuses, dracænas and other foliage plants should be bright, well furnished specimens with good leaves. Such plants create a good effect at the start and the customer is better pleased with a box that looks well, than one that promises great things in the future. To do this a certain amount of overcrowding is almost inevitable as the growth of the plants develops, but a little judicious pruning will put this right in the box while the vines are seldom too full.

With regard to what to plant in the boxes there is a great variety of plants to choose from. Good, well flowered geraniums are a great aid and these with vincas (green and variegated) and marguerites are quite indispensable. Unless there is a good stock of these on hand they should be obtained without delay. Ivy-leaved geraniums are also extremely useful and should be prepared in quantity. The old Tropæolum Canariense is a fine vine for training from the box up the sides of the window or other ways while Thunbergia alata, with its handsome deep green foliage and pretty orange or buff flowers with deep colored eye is a free flowering and excellent vine for trailing over the fronts. Abutilons, coleuses, fuchsias, dracænas, mignonette, dwarf and climbing nasturtiums, begonias, both flowering and foliage, and Cyperus alternifolius are all useful, while in some cases dwarfer plants, such as lobelias, achyranthes, sweet alyssum and similar subjects can be used with good effect. These by no means exhaust the list of suitable plants for the purpose and many fine combinations may be worked out with these and other subjects, the details of which must vary according to the price of the work and other circumstances.

Cape Jasmine Shipments.

It is something of a coincidence that just after the first shipment of jasmines north and east a norther should blow up and sweep over the whole west and southwest. This tender and much prized flower—among the most fragrant in the world—passed through Houston, Tex., from Alvin packed, in charge of the Wells Fargo Express Co. It was the first shipment of the season and was sent by C. W. Benson & Co. of Alvin to one of their regular customers, to be delivered at a point north of the Ohio river. The Wells Fargo Co. made special arrangements for handling these delicate flowers and the firm expects to handle millions of them this spring. The season for shipping them lasts only about six weeks, but during that time thousands of dollars worth are sent away from Alvin and Houston to lovers of flowers in the cities of other states.

The orders come from all parts of the middle states, on special dates, such as Decoration day, and events of a similar character. Through Mr. Benson it is learned that orders begin to come to the growers 10 days or more before the time for shipments, and when the date for starting arrives they are moved by hundreds of thousands. The express company has its schedules down so fine that the flowers reach the destination within an hour or so of the time they are wanted, and when received are in perfect condition for use, being as fresh and fragrant as when shipped.

It appears that the active workers and growers about Alvin and Houston have a monopoly of the jasmine, there being no other place that is regarded as a competitor. It might be a pardonable pride to say that Alvin fills orders that come from New York and Canada. The method of handling these flowers has been so satisfactory that the perishable feature is almost eliminated from the flower as a risk.—Houston Post.

HOOSICK FALLS, N. Y.—Arthur O. Curtice has purchased land at the corner of Wilder avenue and Snow street on which he will build greenhouses.

NEW LONDON, CONN.—S. J. Reuter & Son are busy from early in the morning until far after closing hours to keep up with the demand for their plants and cut flowers. The design department is busy filling funeral flower orders and the pot plants hardly arrive from Westerly, R. I., in time to meet the growing demands. There is little evidence of hard times at that store. The Easter trade was unusually large and rarely in the past has business kept up so nicely after the Eastertide rush. The greenhouses at Westerly are experiencing the same good business.

DESIGN BY LINDSAY THE FLORIST, BIRMINGHAM, ALA.

Composed of Callas, Roses, Carnations, Hyacinths, Lily of the Valley, Narcissi, etc.

To Be Done Now.

IN THE GREENHOUSES.

Bedding plants must now be fully exposed to light, air and sun, nearly approaching outside conditions.

Keep a sharp lookout for cattleya fly and pull the growths out on sight where the work of the insects is noted.

See that the soil in the pots in which young Begonia Gloire de Lorraine is growing is not allowed to case over.

Box or bench tuberoses and let them get well established before forcing.

Keep the grafted plants of roses well apart. If they grow into a tangle many will be broken out when they are moved.

Keep the soil stirred in the benches planted to young stock to admit air to the roots.

Spread out all plants as far as the room at command will allow, giving the best positions, of course, to plants advancing for flower.

Sow Chinese primulas for Christmas and New Year's flowering.

Pot up castor oil plants, thunbergias and other seedlings before they get overcrowded in the flats.

IN THE STORE.

No matter how good they are, artificial flowers look cheap in a florist's store and their use is not to be recommended.

Lady Gay has been a great success for Easter and is one of the most charming of the rambler roses.

The smaller, fine-leaved begonias are excellent for plant devices and are not sufficiently appreciated.

It is not necessary to turn the store into an information bureau but everyone connected with the establishment should be able to answer questions on the plants sold intelligently.

Don't have Easter specialties lying about; anything unsold should be stored away in a dark cupboard where they will keep fresh looking for another season.

Don't be too emphatic in telling customers to throw away plants that have lost their freshness. They are often valued for the giver, or some other associations.

OUTDOORS.

Sow a few radishes with carrots to mark the rows for early cleaning.

Herbaceous peonies may be moved now if absolutely necessary, but are better left until early autumn.

Finish pruning the gooseberries and apply a mulch of good manure.

Mulch all newly planted vines and do not leave them full length, as cutting back a little greatly eases the roots.

Head back all newly planted apple and pear trees if a good shapely head is desired.

The perennial lupins thrive well in limy soils where many flowers and trees fail.

A little bonemeal and nitrate of soda helps the bare places on the lawn.

Sow pole beans to hide unsightly places in the garden. They are ornamental even if the beans are not wanted.

Have the edges of the lawn well consolidated by frequent rolling before trimming them up for the season.

An Interesting Letter.

ED. AMERICAN FLORIST:—

Allow me to call your attention to a few things which have come to mind reading articles in the AMERICAN FLORIST. About Mr. Sims' speculation as to the origin of the early flowering sweet peas; he says, "I do not believe"—"A grower in England claims"—"but I believe a stray seed had in some way got among his Captain of the Blues." Unless we know for a certainty we can only believe what seems to us most probable. And to me it seems very easy, I might say natural, that early flowering varieties should appear under such circumstances. We may call them sports—just why I don't know, since sweet peas are grown from seed and the term sport is generally applied only when a change occurs in the same individual plant. For example: in the dwarf form of forget-me-not, one shoot grows up tall like the original—sports back. I have seen that and it was on one plant, no stray seed responsible for it, for I tore the tall part off and could see the parts were severed by splitting to the center of the one central stem. [The cases are hardly analagous. ED.]

Some enterprising gardeners sow celery early and it runs to bloom, partly because of what they do and partly what the seed grower has done already—sowed seed late in the summer or in the fall, because it will bloom and make seed anyway next year. Sow tall asters late and they will bloom when quite small. We have hollyhocks that bloom the first year, salvias that bloom early and carnations that do not bunch but shoot right up and bloom. So the phenomenon of early flowering is only an adaptation to surrounding conditions and the result of influences to which the plants have been subjected. This is not always desirable as in the case of the early flowering sweet pea. When head lettuce or cabbage does not head it is trouble and we know very well what causes it.

The Late Charles Smith.

For several years I had known of the talk about a sweet scented dahlia; particularly that Luther Burbank was working up a variety or race of them. I supposed it was like the verbena, of which the dark blue sorts smell sweet. So, when I smelled a small single dahlia, which I had grown from seed and had kept for its pleasing coloring, I was not greatly surprised. I have kept only one clump, thinking the variety useful to mix a few small flowers with a bouquet of the large heavy sorts. It has a distinct odor like that of German ten week stocks. I am thinking of taking some cuttings and grow enough to have a large bouquet for the convention. By the way the sweet scented dahlia is heralded, this should be worth the trouble. I had that variety four or five years ago; that I did not throw it away is merely luck.

Who is running the parks in America? The landscape architect? He considers the financial resources and lays his plans accordingly in the matter, like some doctors and lawyers in their cases. But he wants the case. The committee consists of business or professional men, shoe or hat dealers, druggists, editors or doctors. They consult the architect, take a trip to some park to look at it and buy things. Carolina poplars and sycamores were bought in Philadelphia for this town. And the excellence of the park is proved by what it has cost.

E. B.

Rose Capt. Aaron Ward.

The new rose Capt. Aaron Ward is a seedling of Richmond which pleased Capt. Ward when at the establishment of the E. G. Hill Co., Richmond, Ind., recently and was named in his honor. Capt. Ward is probably the most accomplished rosarian in the United States, having a splendid rose garden on Long Island which he personally superintends and cultivates. Pernet-Ducher, the well known French specialist in roses, two years ago named a magnificent hybrid tea for Mrs. Aaron Ward, a beautiful combination of cream and orange, which is destined to become one of the most popular of tea roses, and E. G. Hill is certain that the beautiful red hybrid tea admired by Capt. Ward will prove a worthy companion to M. Pernet's fine variety; it is a good double, has the reflexing form of flower noted in Richmond and is a beautiful shade of bright red, besides being an extremely strong grower.

OBITUARY.

Charles Smith.

Charles Smith, who for about 40 years has been identified with the cut flower and plant trade of New York, died at his home in Boundbrook, N. J., of pneumonia April 30. He was born in London, Eng., 63 years ago. When about 20 years old he came to this country and worked for a time as a private gardener, on estates in the vicinity of New York. In the early seventies he for a time conducted a retail store at Fifty-seventh street and Sixth avenue. Later, he abandoned the retail branch of the business and went into growing at Long Island City, where he remained until the early eighties, growing plants and cut flowers for the New York market. About 1881 he bought land at Woodside, L. I., and erected greenhouses which formed the nucleus of what is now a range of 30,000 square feet of glass, and where cut flowers are extensively grown. Two years ago he bought land and erected about 10,000 square feet of glass at Boundbrook, N. J., leaving the management of the Woodside range to one of his sons.

He was a member of the New York Cut Flower Exchange from its organization and six years ago he opened a stand in its market in the Coogan building, where a wholesale cut-flower business has since been conducted. Up to his final illness, which lasted but a week, Mr. Smith was an active man for his years, making frequent trips between his Boundbrook home and his New York interests. Though of an unassuming and retiring disposition, he was a man of fine character, straightforward and upright in his business dealings and devoted to his home and family. He was married in 1871 in New York to Miss Mary A. Crowe, a native of Arbroath, Scotland, who, with three sons and three daughters, survive him. The sons are: Frederick, Charles and Alexander; the daughters: Mrs. G. C. C. Schrader, Mrs. Theodore Erhard and Miss Alice Smith. The funeral and interment was at Boundbrook, on May 3, and was attended by a large delegation of New York florists, the following acting as pallbearers: Frank Millang, Victor Dorval, John Donaldson, Leon J. Bonnat, Chas. Beedsman and W. H. Kuebler.

Auf Wiedersehen.

"Auf Wiedersehen"—but not good by,
She said to me—when we did part.
And ah! those words "Auf Wiedersehen"
What does it mean, "Auf Wiedersehen,"
Why not simply say "Good by?"
Yet words like these, "Auf Wiedersehen,"
Express more fondness than "Good by,"
"Good by" may mean—well, we must part,
Without a wish to meet again,
Where wish and hope the heart assures,
When we tell friends "Auf Wiedersehen."

YES, we say it again, hardy herbaceous perennials are in heavy demand.

THE area of glass insured against hail in Great Britain amounts to over 35,500,000 square feet.

FAR sighted growers realize that a great amount of time is wasted by the use of poor, worn-out or out-of-date tools.

SCREW PEGS that will not draw out of the soil look promising. They are made of wire of varying sizes for indoor and outdoor use by an English firm.

WM. R. SMITH, superintendent of the National Botanic Garden, Washington, D. C., is said to own the most complete collection of Robert Burns' works in the world.

PAPER POTS that slip upwards when the young plants are transplanted and form a protection against cutworms and other insects are meeting with favor in some places.

ARIZONA retailers found a difficulty in obtaining good lilies for Easter. Chicago shipped a great many but they arrived in some cases in bad shape while none were forthcoming from points further west.

THE American early flowering varieties of sweet peas have not, so far, proved of great value in England, possibly owing to climatic conditions, but growers are hopeful that they will do better when thoroughly acclimated.

THE Denver Post is offering many prizes to its readers for attractive grounds and yards, porches, window boxes and other decorative gardening effects. This paper also prints some excellent articles on gardening subjects.

WE are in receipt of the Proceedings of the Twenty-third Annual Convention of the Society of American Florists, held at Philadelphia, Pa., August 20-24, inclusive, containing in addition to the routine matter the excellent papers read at the meeting, together with the discussions on a great variety of live trade topics.

THE list of premiums for the joint show of the California State Floral Society and the Pacific Coast Horticultural Society is out and contains a varied schedule of good prizes for amateurs and trade growers. The show is to be held May 15-16 in the Lyric hall, Larkin street, San Francisco, and H. Plath, 510 Wyoming avenue, is manager.

THE great rose garden recently presented to the city of Paris by Jules Gravereaux, owner of the famous Bon Marche department store, is said to contain 11,000 varieties and it is the exhibition of new varieties under trial there this year at which E. G. Hill, of Richmond, Ind., has been requested by the municipality to officiate as judge of the novelties.

A Deserving Case.

We have received a communication from Michael Kelley, an Englishman, who met with an accident to his neck some years ago and this injury is developing into cancer. He is a gardener and florist of 20 years' standing, but, not being an American citizen, cannot be aided by local institutions. He wishes to go into a hospital for the removal of the cancer, but has no means and has asked for publicity for his case. His statements are testified to by a physician of standing, and also by the British vice-consul at San Diego, Calif. Mr. Kelley's address is General Delivery, San Diego, Calif., and we trust that those charitably inclined will do their best to aid their unfortunate brother gardener, as his case is a very deserving one.

National Flower Show.

About 40 members attended the meeting of the committee of 50 in the Art Institute, Chicago, March 26. Chairman W. F. Kasting presided and reports showing that great interest prevails in the show and that rapid progress is being made in preparing for it, were made by W. N. Rudd, chairman of the premiums committee; E. G. Hill, chairman of the foreign exhibits committee; Otto Koenig, chairman of the special features committee; Philip Breitmeyer, chairman of the American exhibits committee; and J. C. Vaughan, chairman of the local management committee. A report from the treasurer showed that a large number of the guarantors had paid a first assessment of 20 per cent on their subscriptions. Chairman Kasting appointed Albert T. Hey of Springfield, Ill., a member of the committee in place of the late P. J. Hauswirth. The secretary reported that 1,300 preliminary premium lists had been mailed, and more were on hand and ready to be sent to all who addressed a request to Room 1411 First National Bank building, Chicago. The American Carnation Society, the American Rose Society, the Chrysanthemum Society of America and the Horticultural Society of Chicago have offered their medals liberally as special prizes. W. N. Rudd, chairman of the premium committee, reported that $2,336 in special premiums has been offered by various private persons and firms, together with about $800 in medals and cups. The premium list offers a total of $11,023 in prizes.

Committees have been appointed by the various chairmen as follows: Executive and finance—W. F. Kasting (chairman), Philip Breitmeyer, E. G. Hill, W. N. Rudd, J. C. Vaughan, Otto Koenig, August Poehlmann, J. A. Valentine; American Exhibits—Philip Breitmeyer (chairman), Frank Traendly, George Asmus, S. S. Skidelsky, Elmer D. Smith, Robert Craig; Special features—Otto Koenig (chairman), Theodore Wirth, Leonard Kill, S. S. Skidelsky, Harry Papworth, J. F. Sullivan, W. L. Rock, A. J. Guttman, John Bertermann; Auditing—J. A. Valentine (chairman), E. B. George, Roy F. Wilcox, Otto Koenig: Local management—J. C. Vaughan (chairman), August Poehlmann, J. B. Deamud, W. N. Rudd, C. Cropp, Elmer D. Smith, J. E. Hauswirth; Exhibits, foreign—E. G. Hill (chairman), J. D. Eisele, Carl Cropp, E. B. George.

At a meeting of the executive committee held the following day Mr. Kasting appointed George Asmus chairman of the publicity committee. James H. Burdett was made permanent secretary and newspaper representative of the committee. The question of manager was discussed and the local management committee was authorized to engage one. It was determined, after a lengthy discussion, to give visiting florists, not members of the S. A. F., in good standing, the privilege of purchasing a season ticket to the National Flower Show for $1. Several amendments to the rules were proposed to the premium committee, the most important being that in all classes where it is deemed permissible, an entry fee of $1 be exacted from each exhibitor. J. H. BURDETT, Sec'y.

Adiantum Hybridum.

Emil Wohlert, of Swarthmore, Pa., makes a specialty of Adiantum hybridum, devoting his entire plant of 12,000 feet of glass to it. Mr. Wohlert cleaned up everything ready to cut for Easter week, and although prices have been less than last year, he has no complaint to make. The total cut to May 1, 1908, has been 300,000 fronds and these have sold at an average price of $12 per 1,000.

National Council of Horticulture.

The National Council of Horticulture has issued the eighth installment of its press service as follows: "Making a Flower Bed," "Dogwoods," "Egg Plant," and "Hedges." All florists should call the attention of the editors of their local newspapers to this excellent service, which may be had for the asking on application to J. H. Burdett, 1720 W. One Hundred and Fourth place, Chicago.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Advs., See Ready Reference Section.

Every paid subscriber to the AMERICAN FLORIST for the year 1908 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—By A No. 1 good all around florist and gardener. Address
WM. KLOTZBSCH, 158 E. 19th St., Chicago.

Situation Wanted—By good grower of roses, 'mums or carnations; can give good references; state wages in first letter. GEORGE SPEER,
401 East Iron Ave., Salina, Kans.

Situation Wanted—By German, single; 14 years' experience in greenhouse culture of palms, cyclamens roses, carnations and general stock. Wants position on private or commercial place.
FRITZ BECKER, 291 Richmond Road
Stapleton, L. I., N. Y.

Situation Wanted—By experienced grower of roses carnations, 'mums and general stock; good propagator; capable of taking charge of section, or full charge of smaller place; single, American; references; state wages. Address
Key 527, care American Florist.

Situation Wanted—By an all-'round, reliable, trustworthy nurseryman; good propagator; worked in best Holland, English and American nurseries; nine years' experience; single age 23; state particulars and wages, please. Address
Key 528. care American Florist.

Situation Wanted—A No. 1 assistant gardener on private estate or public place; 8 years' experience in general greenhouse work and landscape; good recommendations; age 23 single; please state wages and particulars in first letter. Address
W. F. B., R. F. D. No. 2, Alexandria, Va.

Situation Wanted—As working foreman, Ohio, Indiana Illinois or Missouri preferred; 14 years' experience on wholesale and retail places; will produce results for you; good wages expected; will be disengaged June 15; married, 32 years old, one child. Key 529, care American Florist.

Situation Wanted—By good all around florist, single, A No. 1 cut flower grower, life experience, good worker and manager, can handle help to advantage, competent to take charge of up-to-date retail place; state wages, etc. Address
FLORIST, care of No. 236 S. Illinois St.,
Indianapolis Ind.

Help Wanted—A man to work in rose sections; state wages without board. Apply
COLE BROS., Peoria, Ill.

Help Wanted—At once young man in flower store; experienced preferred; no sleepers need apply. 595 W. Fullerton Ave., Chicago.

Help Wanted—A good grower of general greenhouse stock; must be able to do bedding; good wages; apply at once. BOEHRINGER BROS.,
325 Park Ave., Bay City, Mich.

Help Wanted—Young man as working foreman to take an interest in an established greenhouse business. Only small capital required. Correspondence invited. Address
Key 530, care American Florist.

Help Wanted—A first class rose grower to take entire charge of rose department in large greenhouse plant; must be a man who thoroughly understands his business; references required.
Key 522, care American Florist.

Help Wanted—The advertiser wants a thoroughly capable man to grow a general stock of greenhouse plants, including palms, ferns and bedding stock. Address with full particulars. W. W. SEEKINS, 109 W. Superior St. Duluth, Minn.

For Sale—27,000 feet of glass; filled with first-class stock; located in one of Chicago's suburbs; low price. Address FLORIST,
4016 N. Clark St., Chicago.

For Sale—Greenhouse establishment, built five years; 85,000 feet of glass, 15 acres of land; 100 miles from Chicago; within easy shipping distance of St. Louis and Chicago. Address
J. B DEAMUD CO., 51 Wabash Ave., Chicago.

For Sale—A bargain for a good florist stand and store opposite Woodland Cemetery; with full line of confectionery; also greenhouses of 10,000 feet of glass; offered after July 1 for $1,500. HENRY EICHOFF, 6818 Woodland Ave. S. E.,
Cleveland, O.

For Sale—Milwaukee offers a greenhouse establishment for growing for the wholesale market composed of 5 greenhouses, heated by hot water, 11 room residence; 1⅓ acres of ground. $3000 down balance in monthly installments. Inquire for details Box 775, Milwaukee, Wis.

For Sale—Greenhouses and stock; about 20,000 feet of glass, well stocked with all kinds of bedding plants, ferns, palms and cut flowers; for terms inquire of Mrs Hugo Book, College street, Worcester, Mass., or L. Midgley, Worcester Conservatories, Worcester, Mass.

For Sale—At sacrifice, good paying retail florist's business, consisting of two lots, 4 500 ft. of glass; houses well stocked with bedding plants and carnations; store with living rooms and 7-ft. basement, in very heart of thriving residence city of 10,000 inhabitants; 45 miles from Chicago. Give immediate possession. Price, $4,500; $2,000 cash and balance on time to suit purchaser.
Key 525, care American Florist.

Partner Wanted—Reliable florist with 20,000 carnation plants, good varieties, little cash, and capable of erecting greenhouse; or florist with 5,000 cash, more or less. Material now at greenhouses near Chicago; can become part owner of established modern greenhouse business Address
G. F. MORRIS 310 Ashland Block, Chicago.

SITUATION WANTED.

As foreman of large commercial or private place, wholesale or retail; life experience; German, married; fine references.
H. L. LAUSCHER, Abingdon, Va.

Rose Grower Wanted.

With not less than 10 years' experience and best references; good pay; state salary. Address
Key 521, care American Florist.

WANTED.

At the Topeka State Hospital, Topeka, Kans., a competent florist and landscape gardener; salary, $500 per annum with living. Only a thoroughly competent man need apply.
Inquire of the superintendent.

...WANTED...

All Florists using steam heat to send for our latest catalogue, which contains some very valuable information.
Address Key 512, care of American Florist.

Gardener Wanted.

We have a vacancy for a well informed young gardener of good character; salary to start $50 per month, with house, heat and light; applicants should send full particulars to
Key 531, care American Florist.

Our Pastimes.

Announcement of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to A. F. Faulkner, 1133 Broadway, New York; Robt. Kift, 1725 Chestnut St., Philadelphia; or to the American Florist Co., Chicago.

Spring Poem.

'Tis spring, the gay, the glad, the gleeful spring!
The crocus kicks the covers from its bed;
The robin comes its madrigal to sing,
And folks have influenza in the head.
There is a haunting fragrance in the air
As though the earth the summer's scent distills:
And in the overcoat which now you wear
The mothball yet the little pocket fills.

Our hearts are filled with melody and song
At seeing the reviving trees and grass—
A voice within us, too, is calling strong
For vernal brew prepared of sassafras.
Across the fields the dandelions now
Prepare to stretch their golden belt with haste—
Inside the house, with calm, untroubled brow,
The paperhanger daubs the chairs with paste.

The glory of the hyacinth and pink,
The beauty of the larkspur and the phlox,
Within the grocer's window make us think
The seeds he sells are held in last year's box.
The turquoise sky is fair to look upon
And sends a hopeful message to the soul;
The grayness of the winter now is gone—
There but remains the bill for all the coal.

'Tis spring, the same, the dear, expansive spring!
The poet feels a rhapsody divine,
And fits his meter to the rhythmic swing
Of some one beating carpets on a line.
The iceman now emits his matin call;
The sweet girl graduate is growing wise—
She lets her cyclopedic essay fall
To read what bonnet-makers advertise.

W. D. N.

The Janitor's Mistake.

Charles Grundy, the colored janitor at the city building, has an undying love for flowers. He "stands in" with a florist who gives him all the fading buds in his greenhouse and Grundy carries them to the city building where he decorates the desks of the officials with the sweet scented flowers. The habit, says the Evansville, Ind., Courier, has earned for him the title of "city florist," which carries no extra pay with it save that of the good will he earns by his thoughtfulness for the men in the building.

Grundy recently walked into the mayor's office and deposited a big bunch of yellow flowers on the mayor's desk. Comptroller Nolan walked into the office a few minutes later and as he is dubbed "mayor" during the absence of Mr. Boehne from the city, at once decided that the flowers were for him. After looking the flaring yellow buds over he turned to Grundy and said:

"Grundy, have I done anything to make you sore?"

"No, siree." was the answer. "I am not sore at you, sir, and hope you don't feel sore at me."

"Well, then, Grundy, the letters N-o-l-a-n signify that the man who owns that name is Irish, some Irish. If you and the front end of the building leave here at the same time please don't get sore at me."

Grundy's eyes began to get big.

"And if you bring any more flowers around here leave the yellow boys somewhere else. The only place I like to see yellow is on money," continued the "mayor."

The official florist withdrew from the office and hunted up John Tinley, the white janitor and asked for an explanation. Tinley gave it to him in a hurry. Grundy didn't go back to the executive's office, but when Walter Wunderlich tried to bribe him to secure a half dozen yellow bouquets for St. Patrick's day he declared Wunderlich his arch enemy.

Meetings Next Week.

Lawn Cultivation.

It is well to bear in mind that lawns require cultural assistance as well as any other garden crop. It is a much too common occurrence, in the stress and hurry of spring work, to overlook the top-dressing due to an impoverished lawn. We do not always realize that the constant mowing and sweeping of tidily-kept sward, cannot fail to deprive it of much natural nourishment, which should be periodically restored in a suitable form during early spring and autumn. On lawns, which have, for any reason, been comparatively neglected since autumn, no time should be lost before levelling up any inequalities in the turf, and carefully extracting all plantains and other coarse weeds or grasses. After rain the ground should be well and repeatedly rolled; first backwards and forwards from opposite sides, afterwards varying the process at right angles to the former course. In this way any parts of the surface soil which may have been loosened by frosts or worms will be effectively solidified, and the grass roots pressed firmly into position. A good top-dressing, consisting of sifted loam with a liberal addition of wood ashes and soot, may be spread over the plot, filling up all holes and forming an appreciable layer upon the entire area. Stable manure mixed with fine soil also makes an admirable surfacing.

Artificial manures are very useful on turf of all kinds, especially where well-decayed stable dung is not easily procurable. Superphosphate of lime and kainit may with advantage be mixed with the spring dressing at the rate of from 100 to 200 pounds to the acre. Where it is thought proper to encourage clover, a well-known authority recommends a dressing of from five to eight pounds of basic slag, and two to three pounds of kainit per 40 square yards, to be applied in November. Too much clover, however, is not desirable for ground upon which games are played, as it is somewhat slippery, especially in damp weather. The quickly acting stimulant, nitrate of soda, will have an excellent effect if well crushed and applied at the ratio of about 100 pounds to the acre in April. It is best given in two dressings, during showery weather if possible, with an interval of about a fortnight between each dressing. To facilitate an even distribution, the nitrate may be mixed with sifted soil. A word of caution may, however, be in season. It is, undoubtedly, a very unwise practice to apply nitrogenous salts to a starved lawn, if an adequate proportion of the other necessary plant foods are absent. Nitrate of soda is not the all-sufficing manure it is sometimes supposed to be; and when administered without first enriching the soil with the requisite basis of potash and phosphates, its exhaustive action is bound to have deleterious effects upon the vitality of the finer grasses. The unduly forced luxuriance, although gratifying to the eye, is not healthy growth, and is only bought at the expense of the enfeebled constitution of the turf.—Journal of Horticulture.

CONVENTION OF THE

American Association of Nurserymen

Milwaukee, Wis., June 10-12.

The official route between Chicago and Milwaukee selected by the Committee on Arrangements for this Convention is the

Chicago Milwaukee & St. Paul Railway

DEER PARK, ONT.—At the greenhouses of E. Grainger & Co., Yonge street, considerable activity is evident. Mr. Grainger has just finished a new greenhouse, 40x100 feet, the framework being entirely of steel, with automatic ventilating devices. The display of Easter lilies is remarkably fine.

DARK, COLD WEATHER AFFECTS SUPPLY.

The dark, cold weather of last week and this has materially shortened the supply of cut flowers. The fore part of last week saw big gluts on, with sales made at ridiculously low prices. Friday morning saw a radical change take place. Buyers found little in the line of carnations to select from, good red selling as high as $4 per 100. With the shortage on the local market the demand from the shipping trade began to swell; the cold, clouds and rain, being rather general, shut off the supply of retailers who operate glass of their own and forced them into the short market. Carnations were most noticeably affected. Roses, including American Beauty, were also affected, but the demand was not such as to affect prices materially. Bulbous stock had some outlet on Friday and Saturday, clearing up probably for the first time in many weeks. The expected larger supply of peonies has not materialized, it being understood that the unfavorable weather has materially reduced this season's crop. White daisies are plentiful, but few yellow are seen. Sweet peas are still good sale.

The J. D. Thompson Carnation Co., of Joliet, was placed in the hands of a receiver on Tuesday afternoon. This appears to be a suit to determine the management of the business, and in no way affects the retail concern operated under the name of Thompson, Florist. The business will be continued as usual with J. D. Thompson as manager under the receiver.

Geo. Reinberg has completed six of the twelve houses he is rebuilding this season and they are all ready for planting. Several hundred more orchids are about to go into the orchid house. These cattleyas Mr. Reinberg is convinced are a good thing to grow for this market as they have been continually in demand even during the glut of other stock.

All hands are getting ready for the spring overhauling at J. A. Budlong's. They do not believe here in planting stock out in the field until all danger of frost is past. In the meantime fine stock and big cuts are in order, and right now the summer American Beauty plants are the center of attraction.

Bassett & Washburn are busy replanting in the rose houses. Sixteen thousand American Beauty plants are going into two large houses, two other houses are being planted to grafted Killarney, one to Bride and another to Bridesmaid. This week the work of planting carnations in the field started.

The few fine white peonies seen this week at the Kennicott Bros. Co. were being sold at from $1 to $1.25 per dozen. E. E. Pieser, of this firm, says last year was a very light one with the early peonies brought in up to Decoration day, but adds that indications point to the crop this season being from 10 to 20 per cent below that.

Tulips in the garden in front of the conservatory at Washington park are very fine just now. Ed. Kanst is to be congratulated on selecting his varieties to flower simultaneously and make a grand display, which is evidently much appreciated by visitors.

The body of Wm. F. Gloede, the veteran florist and landscape gardener and father of Richard F. Gloede, who died at Evanston March 29, was taken from the vault to its last resting place in Graceland cemetery last Saturday with appropriate ceremonies at the grave.

Carnations are being planted in the field at Peter Reinberg's. In spite of the fact that roses are being largely replanted, big cuts are being made; 25,000 tea roses per day are being cut, including 5,000 Mrs. Marshall Field.

L. Baumann & Co. are now sending out a special folder calling the attention of the trade to their Decoration day supplies. This firm has just received a large shipment of imported pressed wreaths.

The Geo. Wittbold Co. is moving large quantities of hardy herbaceous stock. Vinca minor, or grave myrtle, is a popular thing, well grown here and much in demand.

N. C. Moore & Co., of Morton Grove, are going extensively into the business of growing pot plants. Some of their glass, however, will remain devoted to cut flowers.

W. N. Rudd has a fine assortment of bedding plants for Decoration day trade. He is planning to build another large commercial greenhouse this season.

Sinner Bros. have already planted their carnations in the field and are now thinning out their roses and planting young stock.

Florists' Club meeting at The Union restaurant, 111 E. Randolph street, Thursday evening, May 7, at 8 o'clock.

The J. B. Deamud Co. is receiving fine lilac in large quantities and it is said to be selling well.

A. Lange says he uses 10,000 select roses per day at his Madison street store.

Griffiths, the North End Florist, opened at 160 E. North avenue, Saturday.

Wietor Bros. have finishel planting their carnations in the field.

Frank Oechslin has received a carload of imported bay trees.

The E. F. Winterson Co. is meeting with a good advance sale of Decoration day supplies.

PETER REINBERG, 51 Wabash Ave., Chicago.

Carnival at Havana.

The flower parade and carnival which took place in March at Havana, Cuba, must have been a very entertaining and interesting event. The Cuban Horticultural Society, under whose auspices a fine exhibition was held, had a valuable reunion, and we were interested in receiving from a correspondent a picture of the first certificate issued by this society and many photographs taken at the carnival showing the beauties of the country and the wonderful tropical vegetation. El Figaro printed some fine pictures of the carnival and show. Finely decorated vehicles, driven by lovely and superbly dressed women, grand exhibits of fruit, flowers and vegetables and a great display of canned fruit were among the principal attractions of a horticultural nature.

Co-operative Cut Flower Growers' Assn.

A meeting of the proposed Co-operative Cut Flower Growers' Association was held at the Fruit Auction Co. building corner of Franklin and Washington streets, New York, April 25, and was well attended by rose, violet, carnation and other growers, representing over a million feet of glass devoted to cut flower growing, all shippers to New York market. This association is being formed with the object of operating a salesroom in New York similar to those operated by commission men, but on a much larger scale; to employ a competent manager, salesmen, bookkeeper, etc., under the direction of a board of directors elected by its members. The details of incorporation have not been settled or the amount of capitalization decided upon, but is in the hands of a committee which will report at the next meeting.

It is not the mission of this association to try to fix any arbitrary price on stock but, by concentration and organized effort, to reduce the cost of selling. In all probability a supply department will be added. Composed as this company will be of regular shippers, with a salesroom second to none in the city and efficient management and fair dealing, it will prove to the buyer it is to his advantage to deal direct with the producer. Similar concerns as this are successfully operated in other lines of business, perishable goods included, and it is claimed that the ability of many of limited capital to combine under efficient management and without incurring liability beyond the amount of their stock subscription has been one of the chief sources of the tremendous growth of this country. No stronger argument is needed to demonstrate the superior money getting capabilities of the corporate form of business than the fact that it is universally used by successful business men and the cut flower growers seem to be waking up and falling in line with the march of progress. The next meeting of this association will be held in the same place Saturday, May 9, 2 p. m., when all cut flower growers for the New York market are invited to attend. No others will be admitted.

ONE WHO WAS THERE.

Frost and Snow Damage Crops.

Frost and snow did much damage to fruit and vegetation in nearly all states of the upper and central Mississippi valley in the 36 hours preceding May 1. The unexpected visit from winter is reported as far south as Texas and as far east as Pittsburg, Pa.

In Illinois, quinces, strawberries, currants, potatoes, sweet corn, and grapes suffered, but apples, peaches, and other fruits high above ground escaped serious damage.

Garden truck and grain were hurt in Texas, but fruit was not affected.

Oskaloosa, Ia., fruit growers are in doubt as to the extent of loss from the 27° drop in temperature there. Other Iowa points believe great damage has been the result.

Heavy, wet snow fell in the Cincinnati, O., region, delaying traffic and breaking the branches of trees. Cleveland dispatches state that the storm is general throughout Ohio and that should cold weather continue, fruit will be hurt. The recent warm spell brought out vegetation to an unusual extent.

The mercury fell 33° in Kentucky. Two inches of snow is reported from several cities.

Vegetables and fruits were slightly affected by frost in Kansas and Missouri.

Rain followed a 2-inch snow at Pittsburg and the temperature is two degrees above freezing. Unless it gets colder it is believed vegetation will escape injury.

Thousands of acres of garden products and hundreds of flower beds were ruined by frost in western Wisconsin and southern Minnesota. Fruit buds were killed and strawberry plants frozen at a loss of many thousands of dollars.

Too Hard to Pronounce.

A well-dressed man entered a florist's shop near the city hall, recently, says the Philadelphia Record, threw down a dollar, and said he wanted some flowers to take home. He was quite unsteady, evidently tapering off a spree, and the flowers were apparently intended as a domestic peace offering. The florist picked out a collection of hyacinths, and the caller started to leave, but at the door hesitated. "I say," he said, thickly, "what's these flowers called?" "Hyacinths," said the florist. The customer shook his head, and, as he walked back to the counter, said: "Gotter have something easier. Gimme a dozen roses."

FOR MAY AND JUNE WEDDINGS we offer extra select Lily of the Valley, Bride and Bridesmaid Roses, and of course a full line of all seasonable Cut Flowers and Greens. Try us. We have the stock and can take care of all orders.

Destroying the Trailing Arbutus.

Botanizing public school teachers and pupils, and also that class which picks wild flowers just for the sake of having them, are lumped together this spring by farmers who have patches of trailing arbutus in their woods, and neither botanizers nor despoilers will be able to secure much of the coveted flower this season, says the Pittsburg Gazette Times. The trailing arbutus is everywhere prized for its fragrant rose-colored or white flowers, which appear in early spring. If lovers of arbutus contented themselves with picking the flowers nobody would object, but the method of gathering followed for many years in this neighborhood has almost driven the flower out of existence.

The arbutus is a creeping plant, its joints throwing out roots which fasten to soil, to rocks, to rotten wood, to anything that furnishes the little claws a foothold. If the flowers were gathered by the stem like other flowers are plucked the plant would not be injured, but the stems are tough and a pull at them dislodges the roots, and so arbutus gatherers are never seen with bunches of flowers, but with long strands of the vines. A small party soon makes sad work of a patch of the plant.

Farmers are now protecting the birds among which they as boys went birdnesting; they are careful about allowing cattle and sheep to pasture in their woodlots, because the animals destroy so much young growth; they are learning to love flowers and, regretting the gradual disappearance of the trailing arbutus, they will treat botanizers and the reckless flower gatherer alike. Some farmers are thinking of putting up notices forbidding the gathering of trailing arbutus in their woods, but as the notices would attract attention to the existence of the plant on their grounds, they will content themselves with warning off trespassers who may discover the places where the arbutus grows.

ST. JOHN, N. B.—McLean & Chartton state that the florists here report a good Easter trade. There were a few nights of hard frost followed by rain which kept a good many indoors that would probably have bought.

New York.

BUSINESS DULL.

Last week was extremely dull and even Saturday brought little or no relief. Prices were about what the buyers would offer, and there was a lot of stock that nobody wanted, which was finally lost. The weather has been cool and there is plenty of good stock coming in, but buyers are needed. Though there are weddings and social entertainments taking place, it now seems more fashionable to use spring blossoms than cut flowers. It is believed that after the discouragements of this season many growers will pull out old plants and begin their preparations for planting earlier than usual; that may reduce the surplus under which the market is groaning. In the meantime reports come in of new houses projected or being erected; wholesalers are preparing to refit, or move into better quarters, and the general tone is hopeful.

At John Condon's range, near Greenwood cemetery, Brooklyn, there are now ready for bedding out over 50,000 coleuses, 35,000 geraniums, and 100,000 alternantheras. In addition, there is a large stock of the plants most used in cemetery vases. Practically all of this large stock will be used in Greenwood, as Mr. Condon has charge of many lots there. Unless the cold snap is protracted, bedding out will begin at once.

Alexander Donaldson, a young man well known to those who frequent the New York Cut Flower Exchange, and a son of John Donaldson, of Elmhurst, was married at Grace church, in this city, April 29, at 5 p. m., to Miss Octavia Clapton, of Whitestone. There are many kind wishes for the future happiness and prosperity of this young couple.

The next monthly meeting of the Florists' Club will be held in the Grand Opera house, Twenty-third street and Eighth avenue, May 11, and now that the rush of work is about over, there should be a good attendance from all branches of the trade.

There is a rumor afloat that a parcel of Twenty-eighth street property will soon change hands, and that an enterprise of great importance in the cut flower trade will be located there. The property in question is between Sixth and Seventh avenues.

Alfred Kotmiller, a popular designer and decorator, who during the past season was with Thomas Young, Jr., in his Fifth avenue store, sailed for Europe last week for a vacation.

P. Bogart, a Sixth avenue retailer, had an extensive job of decorating the pillars of the immense St. Patrick's cathedral with laurel for the Catholic centennial.

John Weir's retail store, on Fulton street, Brooklyn, is one of the busiest places in that thriving borough, and few stores handle as many flowers.

Syracuse, N. Y.

The florists having had a rest since Easter, are now busy preparing for the spring plant trade. P. R. Quinlan & Co.'s force has been kept moving quite briskly since Easter, having several large weddings on, the past week, in town, as well as executing a fine order for wedding bouquets used in Oswego. Good spring stock seems to hold out well, plenty of hyacinths, daffodils, etc., being shown.

H. F. Bellamy, foreman for L. E. Marquisee, and Miss Lulu C. Andrews, were married Easter Monday. They have the best wishes of their many friends.

DEW.

JACKSONVILLE, FLA.—Mills, the Florist, did less business than usual at Easter and at prices not quite so good. Lilies were scarce and sold well both in pots and cut and pot azaleas, callas and hydrangeas were also good property. Business must have been better taking the city as a whole as there are now two more florists than last year.

Summer Beauties

We are now on with our crop of Summer Beauties. Fine color, stem and foliage—better than can be cut at this season from stock that has bloomed all winter.

WHOLESALE GROWER of CUT FLOWERS

Hardy Shrubs Under Glass at Kew.

Although some of our hardy shrubs have for many years been forced prematurely into bloom for the embellishment of the greenhouse or conservatory, their popularity has increased of late, and we now find a greater variety of subjects so treated than was at one time the case. At the end of February and early in March forced shrubs of different kinds contributed largely to the display in the large greenhouse (No. 4), and in the temperate house, quite large bushes of some of them serving to lighten up the latter structure in a remarkable manner.

Rosaceous plants are, as usual, strongly represented, particularly noticeable among them being Spirea arguta, which is one of the very best shrubby spiræas for the open air as well as for forcing. A second species, Spiræa prunifolia flore plena, has the leafless branches wreathed for some distance with clusters of pure white double blossoms, whose clearness of tint is intensified by contrast with the dark-colored bark, which, in some instances, is almost of a blackish hue.

That delightful member of the cherry family—Prunus pseudo-cerasus roseo plena—has very large double flowers of a delicate pinkish tint, while the dwarf-growing Prunus Japonica, known also by the specific name of Sinensis, has two charming double-flowered varieties, one pure white, and the other tinged with pink. In any selection, however limited, of plants for forcing, Prunus Japonica, as represented by one or other of its double forms, is certainly entitled to a place. Prunus triloba, with double pink flowers, varying in depth of coloring according to the amount of exposure they have received, is fully recognized as most desirable for forcing, and large numbers of it are grown every year for the purpose. The double peach, represented by a rich rose-colored form, is very conspicuous in the temperate house. Pyrus floribunda, which, when outdoors, has such bright coral-red buds, is under glass almost white, but is even then very pretty, and exceedingly floriferous. The last of the rosaceous plants to mention is an old and well known inhabitant of our gardens, yet it is not often employed for forcing, though it has been treated in this way at Kew for years. I allude to the ordinary double-flowered Kerria Japonica, whose blossoms, like little yellow roses, are borne in great profusion. The bright green of the bark is, indoors or out, a notable feature of this kerria.

Next in quantity to the rosaceæ comes the different members of the rhododendron family, with which the azaleas are now included. Rhododendron Cunningham's White, or Caucasicum album, is in some nurseries grown in large numbers for forcing. A group of it in No. 4 greenhouse shows its suitability for this mode of treatment. The deciduous Rhododendron (azalea) Sinensis, which, by the way, is better known as Azalea mollis, is represented by several kinds, varying in the tint of the flowers and in other respects. The rich orange-colored Anthony Koster is one of the best of all. In addition to these the small-flowered forms of Rhododendron

(azalea) Indicum may, in many districts, be regarded as hardy shrubs. Especial mention may be made of R. obtusum, with salmon-red flowers, and its variety album, as well as one of the amœna hybrids, viz., Illuminator, with deep purplish-magneta colored blossoms.

Beside the above there were Viburnum Opulus sterile, the guelder rose or snowball tree, so striking and distinct from anything else; Jasminum primulinum, which in many places at least is more of a success under glass than it is in the open ground; lilacs, including that pure white and extremely floriferous Marie Legraye: Staphylea colchica, whose blossoms are agreeably scented; Cytisus præcox, and Cytisus scoparius Andreanus, two charming brooms either in or outdoors.

Wistaria Sinensis is, according to our nurserymen, becoming year by year more of a favorite for forcing, and this need not surprise anyone, as it supplies a welcome change in color, and when grown as standards in the contour of the plant also. Lastly, must be noted the forsythias, so soon to make an outdoor display. For medium-sized plants Forsythia intermedia can be recommended, while quite large bushes of Forsythia suspensa in the temperate house form masses of yellow flowers, and associated with dark-colored evergreens they stand out conspicuously.—Gardeners' Magazine.

QUIET DAYS ON THE MARKET.

The past week has been very quiet there seeming to be very little of importance in the way of decorating which was felt in the market. The weather has been favorable, the cold nights holding back the production and incidentally coating the leaves of many of the roses with mildew. All kinds of flowers are seen in quantity and prices rule low. Two dollars with few exceptions now buys the fancy carnations. American Beauty roses sell for $1.50 per dozen and tea roses are high at $8, except for a few long flowers of Liberty. Lower grades of roses sell very low, in quantity. Sweet peas are in good demand at from $3 to $7.50 per 1,000. Violets are down and out and were in fair demand up to the finish. Some very fine cattleyas are seen, 60 cents being the price. Easter lilies have been very plentiful and sold entirely at buyers' prices. Lily of the valley is still plentiful but it seems to be hard to get much over $2 for it. The bedding plant men are now very busy. It was astonishing to see how soon after the Easter stock was cleared out that the empty benches were filled with plants for bedding out.

THE FLORISTS' CLUB.

The interesting feature of the May meeting of the Florists' Club was Edwin Lonsdale's talk on schizanthuses and the hybridization of geraniums. Mr. Lonsdale has obtained by selection a new type of Schizanthus Wisetoniensis which he has named Compacta, a beautiful plant which he had on exhibition. He also spoke of a better type of Dryden geranium which he obtained by crossing it with a red seedling which invariably lacked stamens, but which seeded freely when pollinated from flowers of other varieties. The subject of the next meeting is co-operation of wholesalers and retailers in times of overproduction. Arthur Niessen will prepare a paper which will no doubt prove a valuable addition to the literature on this subject. Some very artistic patterns of pedestals, vases and window boxes of cement or concrete were also on view, showing a new handling of this material. A free smoker will be held after the June meeting which will no doubt draw a full house as the committee says it has material that will make the evening delightful for everyone.

NOTES.

The Henry F. Michell Co. has taken the bull by the horns and purchased a property, a landmark in this city; the old Tower Hall at 518 Market street, running back to Ludlow street, with numbers 511 and 513. This is a large property, having a front of 23 feet on Market street and a depth of 180 feet, with an additional space 47x60 feet in the rear. This building is five stories in height and will give them about 60 per cent more room than they have in their present location, where the business has grown to such proportions that every department has now only about half enough room. The lease on the property now occupied has over two years to run, but there is so much demand for space for 5 and 10-cent stores and 5-cent moving picture show buildings along Market street, from Ninth to Broad, which are gradually crowding out the legitimate business, that the old location can be leased promptly. H. F. Michell says his firm is beginning to feel the change in the different class of people which these places are attracting and in addition to the benefits derived from more room they hope to profit by getting away from the mob and think they will be able to carry their trade with them.

Robert Craig has several large houses filled with geraniums, cannas, lobelias and other vase and window box plants, which seem to have sprung from somewhere, almost over night. Two large houses of Otaheite oranges are in full bloom. Just outside the house a hive of bees has been placed and through a few panes of glass, removed, they are continually passing, working among the flowers, getting honey and pollenizing at the same time.

The Henry A. Dreer Co. is now in the midst of its spring rush and about four nights a week the men in the packing shed have to stay to work overtime in order to catch up with the orders and keep from getting behind. Mr. Ruppert, just back from a New York and Connecticut trip, reports a fine business, finding a great demand for herbaceous plants of which the firm has a very complete stock.

W. K. Harris has several large houses full of Crimson and Baby Rambler roses which will be just right in a week or so for planting out or for decorative work, as they are very full of buds. Mark Mills, the foreman, says they had a remarkable clean-up at Easter, not having a single salable plant left over, which is quite a record for the season of 1908.

John McIntyre has had a great week with blossoms, apple, lilac and dogwood. He handles these by the wagon load and seems to find sale for all he can get.

The Floral Exchange, Inc., has moved the city office to its new plant at North Wales. K.

Pittsburg.

PRICES VERY LOW.

A slight improvement was noted in the carnation market toward the end of the past week, although the rose situation remains about the same. Peonies have made their appearance, but are not much in demand, owing to the abundance of other stock on the market. Violets are done and lilies still as hard to move; on the whole prices are so low they are not worth quoting.

NOTES.

Wm. Hamilton resigned as superintendent of the Allegheny parks May 1. The following editorial from the Dispatch well voices the sentiments of all, especially those in the florists trade: "Regret will be general touching the resignation of Wm. Hamilton as superintendent of parks for Allegheny. Mr. Hamilton was the first park superintendent in that city and he was the last, for the North Side parks are now under the jurisdiction of the bureau of parks of the greater Pittsburg. Superintendent Hamilton endeared himself to thousands by his skill in horticulture before Pittsburg acquired a system of parks, and he maintained his place in the popular affections by his devotion to duty and his kindly humanity. While other men of ability were piling up private fortunes Superintendent Hamilton labored happily to bring pleasure to the multitude. He loved his work, he delighted in his vegetable creations, so he brought gladness to thousands while pleasing himself.

The Pittsburg Cut Flower Co. was the first to handle peonies this season, receiving some red ones early in the week.

The Pittsburg Florists Exchange is handling an immense lot of snapdragon which is a good seller at present.

J. B. Murdoch & Co. are having a strong run on a fine quality of lily of the valley.

BUSINESS POOR.

The market has settled back again to the well worn rut of this disastrous season and no improvement is looked for until the fall business opens. Plans are being studied for a great curtailment of expenses with efforts to make the best of a sadly disastrous year. It is the small concerns of which there is a big majority engaged in this business, who suffer the most. Memorial day is the one celebration still remaining on the season's calendar, the occasion calling for a general remembrance of deceased friends. In this section the day is loyally followed out and this year should afford an excellent opportunity for the retailer. Stock in general bears a strong likeness to storage products and prices follow out the assumption. A few warm days have severely weakened rose stock and drawn the bulb season to a close. Carnations have suffered and their growers, who have felt the year more seriously than their friends in other lines of cultivation, have given up all hope of recovering their losses. There is no market for American Beauty of which there is a great collection of medium grade goods. Richmond has weakened under the weather; so has Killarney. Violets have passed out and sweet peas, orchids, lily of the valley and gardenias are taking their place. Hydrangeas are the only first class plants available and but little desire for them is apparent.

NOTES.

Henry M. Robinson & Co. have just received from the south a tremendous stock of fancy ferns, smilax and other greens, with which to supply their trade for Memorial day. This is the second day of importance in the year for this firm and additional facilities for handling the business are already well planned.

Wm. Hastings of the A. H. Hews Co., has left on his summer western trip, stopping first for a short time at Chicago where the company has established a distributing depot in charge of Martin Muldoon, who for several years has been connected with the home office.

H. A. Wheeler's orchid establishment is now gay with an unsurpassed crop of the finest cattleyas. The plant is devoted principally to the growing of cattleyas, rare specimens well worth inspecting.

Charles Evans of Waltham is distributing a novelty in Italian clover. It is most interesting and the plant has been very well received.

FROM THE BRITISH TRADE PAPERS.

NEW HYDRANGEAS.—The name of Lemoine of Nancy is known to everyone as a most successfuly hybridist, and the successes that have emanated from that establishment form a very long list. Of late years attention has been devoted to hydrangeas, and three new varieties are announced in the February catalogue just issued. They are said to be a selection from several thousand seedlings, the result of artificially crossing H. Otaksa monstrosa, H. Mariesii, H. Souvenir de Claire and H. rosea. From these a good number of plants were selected for further observation, and three varieties were ultimately chosen therefrom. They are Avalanche, described as the whitest of the hydrangeas; Fraicheur, enormous clusters, flowers medium, round, white, shaded rose tips greenish, eye mauve; La Lorraine, large corymbs and flowers, these last having the edges slightly toothed, in color soft rose, turning to bright rose.

A FLORIST'S PROFITS.—At Wandsworth county court, February 17, Henry John Crump, a Tooting florist, who sought to recover the value of a pad of roses and a pad of violets, said the two pads cost him 30 shillings ($6.50) at Covent Garden, and that he would have made £2 10s. ($12.50) profit on them. This, he explained, was December profit, and the price was as much for the making up as for the flowers. They had been entrusted to James Hughes, the defendant, carman and contractor, and his servant had lost them on the journey. His honor awarded plaintiff 23 shillings ($5.75) and costs.

A HINT ON ROSE PRUNING.—There is no harm done by allowing a few buds to push into growth at the top of the shoots before pruning is commenced. This is often an advantage. When the top growth commences the roots are also active, and owing to this after the pruning is done the dormant buds quickly develop into strong vigorous shoots. The end of March is quite early enough to commence pruning the hybrid perpetuals, to be followed by the hybrid teas leaving the teas to be dealt with in April.

WASHINGTON, D. C.—Alonzo Henrick died April 23, aged 75 years. Mr. Henrick was born in Copenhagen, Denmark, March 18, 1833. At an early age he came to this country and for the past 45 years has been a resident of the District of Columbia. He was appointed horticulturist at the government hospital in 1876 and, during his 32 years' service it is said, developed one of the finest vineyards and fruit orchards in the country.

NASHVILLE, TENN.—Geny Bros. report Easter business 10 per cent better than last year but prices not quite so good. There was plenty of all stock and Easter lilies were in great demand.

Flowers for the Canadian Northwest.

The office of N. Stewart Dunlop of the C. P. R., in the Windsor station, Montreal, showed signs of a very early and beautiful spring recently, when every available spot was given over to the displaying of plants and flowers of every description known to be grown satisfactorily along the many lines of the Canadian Pacific.

Mr. Dunlop is just sending forth his eleventh annual greeting to flower lovers, who are also station agents, section bosses, or in any way connected with the road in such a position as to be able to keep a garden. Eleven years ago he first suggested the beautifying of stations on the C. P. R. by means of gardens or beds of flowers. There were few in those days to take interest. As long as the trains got through safely and on time, that was all that was necessary. They hardly thought of or realized the pleasure they would be giving themselves as well as travelers by having a neatly kept garden, even if it only possessed one bed with one variety of flowers.

Today Mr. Dunlop is sending forth all over the country reached by the C. P. R. 50,000 packages containing 29 varieties of seed each. Poppies, asters, carnations, mignonette will be scattered from coast to coast in one long, beautiful, sweet-smelling line. "During the past few months," said Mr. Dunlop, "I have had hundred of letters from people who received these packages of seeds, telling of the great pleasure they derived from them. The work has proved a blessing to thousands of employes of the company in the lonely districts of the west, where both they and their families have taken great interest in beautifying the stations with their garden work. This year we expect to have more railway gardens than ever before, and the result cannot but be both beneficial to the road and its employes, as well as a source of pleasure to travelers along the line."

PHILADELPHIA, PA.—James Doyle has been the victim of a swindler who ordered $10 worth of flowers, ostensibly for a church, where, on trying to collect his bill, Mr. Doyle found the flowers had not been delivered and nothing was known of the man who ordered them. The latter was arrested.

STOCK OVER PLENTIFUL.

Business the first part of the week slumped; stock was so plentiful, especially roses, that one of the wholesale houses took advantage of the overstocked market, and sent large boxes of flowers to all of its customers in the city. A genuine snow storm hit the city Thursday, the heaviest for the past 20 years, for this time of the year. The result was that stock shortened up wonderfully. It is gratifying to note that prices stiffened a little, too. Monday saw the market still shorter, particularly in carnations. Green goods are short; the demand for smilax exceeds the supply. The call for American Beauty roses is erratic. Southern peonies are beginning to arrive, the first were used at a wedding decoration last week.

NOTES.

The window decoration at Smith & Fetters' is very attractive, consisting of three immense hats, measuring 42 inches across; they are trimmed with fresh flowers and chiffon. The combinations are very artistic and effective, and are rather enticing to those interested in the popular "merry widow" hat; one is trimmed with double violets, American Beauty roses and adiantum, one with pink rambler roses and Asparagus plumosus and the other with calendulas and adiantum.

Miss Jane Eadie, of The Eadie Co., is in Sagertown, Pa., where she will stay for several weeks on account of ill health.

Wm. Greif of the Ohio Floral Co. was elected director in the municipal traction company.

Knoble Bros report a decided pick up in business during the past week.

J. H. Turnbull, Rocky River, is cutting some very fine callas. FORESTER.

HARTFORD, CONN.—The Connecticut Horticultural Society was entertained April 24, at its room in the county building by an illustrated talk on "Rose Culture" given by Carl Peterson, the manager of the Whiting greenhouses of West Hartford.

NORFOLK, W. VA.—Fifteen thousand people attended the 10 services held April 30, in the evangelical campaign, almost every worshiper bringing from one to five carnations or roses, making a grand total of fully 30,000 flowers received during the day and evening.

The Seed Trade.

American Seed Trade Association.

Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

Congressional Seedsmen.

PUBLIC PAYS SALARIES AND SUPPLIES SEEDS.

If the current custom of indiscriminate distribution shall indefinitely continue, if this congressional comedy shall drift into a continuous performance, we shall ultimately be driven to the mournful admission that we are not statesmen, but seedsmen; and it will be in order for some distinguished seedsman, some sainted hero of a score of memorable distributions, some legislative knight upon whose shield is blazoned a radish in its glory or a turnip in repose, to arise in his place with becoming gravity and move, Mr. Chairman that the American eagle be taken from the mace and supplanted by a package of vegetable seed as the supreme emblem of the genius, the character, and the principal occupation of American statesmanship.—*Morris Sheppard, of Texas, in House of Representatives.*

ALL varieties of field seed corn are well sold out.

STOCKS of Caladium esculentum and tuberose are well worked down.

INDICATIONS already point to a shortage in sweet peas for next season.

THE counter trade in seeds is now declining and the plant demand increasing.

DETROIT, MICH.—Lem W. Bowen is starting this week for a short trip to Europe, returning about July 20.

PHILADELPHIA, PA.—The Henry F. Michell Co. has purchased the 5-story building known as Tower Hall at 518 Market street and will move to that location.

STATE authorities everywhere are waxing active in pushing violators of fertilizer laws. Are your brands all registered and do they stand the analysis as branded?

JOHN J. DAVIS, of the etomological department of the experiment station at Urbana, Ill., is investigating the ravages of the onion maggot in the Chicago onion set districts.

PEA stocks have, in the main, proved sufficient for the trade and in a few cases there will be some lots carried over; the drop in Alaska prices showed this. Nott's Excelsior is well sold up.

CHICAGO.—W. W. Barnard returned Tuesday from Petersburg, Fla., whither he was called two weeks ago by the illness of a relative.—Grass seed contract prices on the board of trade May 5 were the same as last week.—G. C. Eldering, Overveen, Holland, and Wm. Hagemann, New York, were visitors.

SACRAMENTO, CALIF., April 24.—State Horticultural Commissioner Jeffrey, at the request of the secretary of the interior, today ordered an indefinite quarantine on all cotton seed shipped into California. [It would seem that possible injurious seed (in this case suspected of boll weevil) may be stopped even without the use of H. R. 13835.—Ed.]

Braslan Seed Growers' Co.

Growers for the Wholesale Trade Only.

SAN JOSE, CAL.

An Excited Bean Market.

The disfavor with which canned goods as a class came to be regarded by the public, evidently does not apply in any way to canned beans. One concern alone is said to be putting out at the present time 200 carloads of this product per week, while another corporation has engaged $85,000 worth of sign board space to exploit its product, in one section of the country alone. Western farmers in bean districts are now receiving $2.20 per bushel for any fair quality of pea or medium beans, while grocers, jobbers and others are selling imported white beans of all kinds, sizes, and varieties, shipped from the great ports of the world, Hamburg, Antwerp, the Mediterranean and the Black sea, all under name of "hand picked pea beans." Prices are going up and the demand is greater than the supply. It would appear that the millions of consumers who have been buying canned goods of many kinds have pondered over the problem as to the one safest canned food and have all decided on beans. As Charles Heath (with the Albert Dickinson Co., Chicago), a Massachusetts-raised man, suggests the Boston idea may have, as is perfectly natural and consistent, permeated the whole country and transformed all people into "bean eaters."

New and Rare Tulips.

W. J. Eldering & Son, Overveen, Haarlem, Holland, are offering this year a considerable number of new and rare tulips, described as follows:

SINGLE VARIETIES.

Brilliant Star, large bright orange scarlet, with black base, very desirable for early forcing.

Flamingo, a sport of White Hawk, light and dark rose, merging together.

Golden Queen, golden yellow; the largest yellow flower.

Grace Darling, a dark nasturtium red of beautiful shape.

Golden Lion, orange and yellow, a very distinct and attractive variety.

Joost Van Vondel, rose, a most beautiful soft rose, with the enormous size and fine shape of the white variety.

King of the Scarlets, the best of all scarlets beyond a doubt, meriting the name.

La Riante, a splendid variety, shaded rosy white and of fine shape.

Maes, a large dark scarlet flower, desirable for early forcing.

Primrose Queen, a sport of La Reine, yellow and white running together.

Princess Helene, snow white, a very large flower, forcing early.

Rose La Reine, a sport of La Reine, very delicate rose.

Queen of the Netherlands, rose, grand flower of great merit.

DOUBLE VARIETIES.

Anna Rooze, an elegant dark rose, highly recommended.

El Toreador, red, broad yellow orange border, with all the good qualities of Tournesol.

Golden King, this is the pure yellow Tournesol.

Lord Rosebery, the earliest of all, lovely rose.

Princess Beatrice, a very charming flower of a fine rose shade.

Purity, a pure white, shaped like a peony, very large flower and early forcer, grand novelty.

Rose d'Amour, rosy and white, a charming variety.

Schoonoord, the pure white Murillo, with all the merits of that popular variety.

Thearose (Brimstone), soft orange yellow with a fine rosy shaded edge, a sport of Murillo.

Seedsmen's Hearing on Proposed Seed Bill

We present herewith a summary of the views on the proposed seed bill, H. R. 13835, expressed by seedsmen at the public hearing before the Committee on Interstate and Foreign Commerce, Washington, D. C., April 21:

President Green opened the hearing with a general address explaining the great difficulty of working under the original bill and asking that action on the same be deferred until the next session, giving the seed trade full opportunity to assist in amending this or preparing such new bill as might be practical.

Chas. Dickinson protested that Section 5 provided for a guarantee which it would be unsafe to give unless the working margins in the business were greatly increased to cover such risk. "In what way," he said, "the business which has been conducted for years on margins of 2 per cent or less, as has been the case in field and grass seeds, can be changed to a guarantee given with safety, I do not know."

F. W. Bruggerhof in a letter read by H. W. Wood, submitted that all reference to vegetable and flower seeds and bulbs should be entirely eliminated, adding that the proviso of the bill as to the purity percentage, would make the cost of many seeds prohibitory. He believed that since many seedsmen handle over 5,000 varieties of seed from all parts of the earth, in doing which a reasonable percentage of accidents must occur, a discrimination must be made between wilful and accidental violation of any proposed law. Further, regarding grass seeds and clovers, which require 30 to 40 days for a complete test of germination, it would be very difficult to comply with the conditions which the law imposes, during the active selling season.

H. W. Wood, regarding Section 6, said: "It seems to me that seeds imported into this country ought to be inspected at the port of entry and if found adulterated or to contain noxious weeds, a bond should be required, but I think they should be passed upon at the time, and the bill should so provide. Again, I think a report should be made

Seedsmen's Hearing on Proposed Seed Bill

CONTINUED FROM PAGE 790.

to the seedsman within a reasonable time, as to whether these seeds will be rejected, otherwise making it very difficult for the seedsman to know when he would get possession of his seeds, if at all, or if in time for the season's planting. If a law is desired simply to correct abuses, legitimate seedsmen are with it heart and soul to make a practicable law. No crop guarantee should be given because of hybridizing from wind, insects, and tendency of varieties to revert."

Walter P. Stokes held that leading vegetable seeds should not be included in the law because many kinds of vegetable seeds could not be told apart. "I have never known a case in 25 years where a man bought cauliflower seed and received turnip seed." He referred also to the necessity of selling cabbage of the best type seed of 65 per cent germination following a poor seed producing season. He held further that in reporting abuses in low germination of vegetable seeds, as had been done in the report in the former hearings, there should be some evidence that the seeds were sent out by the seedsman who is held responsible for them in the year in question, and that they have not been carried over for two or more years by some irresponsible grocer dealer.

Jerome B. Rice explained the difficulty of growing, rogueing and handling seed pea stocks.

Alex. Forbes, of Peter Henderson & Co., felt that good work might be done with some regulations that would apply to seeds distinguishable in the grain, but on seeds that are not distinguishable in the grain no regulations should be worked out except from the standpoint of germination. On this basis clovers and grasses are mostly distinguishable in the grains. But few vegetable seeds can be so distinguished. I cannot see the advantage in having a law to guarantee the purity of seeds which cannot be distinguished by sample." As to guarantee, many of the finest seeds bought by American seedsmen from Europe cannot be secured with any guarantee or any warranty and it seems hardly fair to expect American seedsmen to do what the seedsmen of no other land have been asked to do. Mr. Forbes added, "I am here to denounce adulterants in grass seeds and say that it is a blot on the seed trade, and I believe those who have done it ought to be shown up, but I am advised that this disreputable class of seed handlers can be numbered on the fingers of one hand." Mr. Forbes mentioned an incident where a grocer had carried over packets of seeds for 10 years and still offered them to planters. He objected to the gathering of sample packets from such lots and making the statement that these are fair samples of what the seedsmen in America are selling, and publishing such statements in the newspapers. Again, the farmer grows a field that he knows is full of weeds, and he harvests thistle, dock and other weeds with the grasses in his field, threshing, sacking and offering for sale. That farmer has the right to sell such seed to his dealer or his neighbor if he will buy it. If the seedsman is to be held responsible, the farmer should be made to bear his share of the burden. This would apply also to the Department of Agriculture itself, said Mr. Forbes. They are large seed merchants and yet they have made mistakes of that kind. They sent out a flat onion calling it Maule's Prizetaker, doing great damage to Mr. Maule.

Curt Nye Smith, representing Jos. Breck & Sons, said the report which the committee made to the house stated that the seeds had been deliberately adulterated and that the bill was strict as to the deliberate and wilful adulteration, but, continued Mr. Smith, "the bill as presented does not represent to the seedsman the meaning of the words as stated in the report which accompanied it. It is part of my duty here to say that this bill or any bill that will prevent the intentional misbranding or adulteration of seeds will meet with the entire approval of the Boston trade. But this bill makes it possible to stop an honest man's business in ways that he cannot possibly prevent. Under this law, two varieties of lily bulbs that cannot be told apart, if mixed by accident on the voyage or in the customhouse, would make the seedsman liable under the law."

Congressman Townsend of Michigan, of the house committee, said here, "I hope there is a chance for me to learn yet, as I said before, in the practice of criminal law I have never discovered a law where intent was not necessary in order to constitute a crime. Mr. Mann suggested that if one man shoots another down that is sufficient to convict him. I never heard of that doctrine before."

Mr. Smith made the further objection that by the terms of this act the seedsman can have his property taken from him by the government. He said, in comparing this law with the pure food law, "the latter has every chemical possibility for chemical reaction to determine the exact conditions of products and the very worth of the bill is due to the fact that there cannot be adulteration of food without the intent being present. We cannot measure seeds with the same measure with which we measure food products."

S. F. Willard: "I wish to add a little emphasis to the standing of the seedsmen as merchants. The statement has been made here that two-thirds or three-fourths of the seed business is done with the same customers year after year and in my experience I know this is true. Now this could not be maintained except on merit and I wish to make the statement that the great bulk of the seed business is done on a high plane and that the errors complained of in framing this law are confined to small purchasers and possibly the dead seed question is of very small dimensions, but I want to say that these things do not represent to any extent the transactions between seedsmen and market gardeners, large planters of seed. They occur in small packages and in that it has not been with intent to profit by deception but is an error and unintentional, for, if it was intentional, it would be done where the greatest pecuniary gain would come, in the large trades. We have to draw from a wide area for our supply and I believe it is a fair statement that this business is done very largely upon honor, because the results show it. I believe that the matter, so far as it relates to garden and vegetable seeds, should be omitted from the bill because I feel that it is not important and it is likely to prove an objection and will have no good practical effect among seed buyers.

Chas. N. Page.—It has been mentioned at this hearing that seed dealers objected to a regulative law in the matter of noxious weeds and adulterants. Three years ago when president of the American Seed Trade Association I made a trip to Washington for discussion with Secretary Wilson and Messrs. Brown and Pieters, to see if a law could not be enacted to keep trefoil and other noxious weed seeds out of the country. I was told at that time it was impossible except by a high tariff and that congress would not enact tariff laws. This same matter was discussed by our association that year. We are a unit in wanting a law to prevent the importation of adulterants or low grade seeds.

The comments of E. V. Hallock and J. C. Vaughan will be summarized in our next issue.

DAHLIAS.

Now is the time to place your order for Bulbs which will insure you getting named varieties in any quantity; delivery to be made this fall or early spring.

DAVID HERBERT & SON,
Successors to L. K. Peacock, Inc., ATCO, N. J.

SHANDON, S. C.—The Ladies' Flower Association is taking up the question of improving the two acres of land on Wheat street, which were given to the town by the Columbia Land and Investment Co., for park purposes. There is a spring on the place which supplies about 10 gallons of water per minute and plenty of shade. The land is rolling and is covered with quantities of wild flowers and sweet shrubs; so it is in every way a most attractive subject for the ladies to take hold of. The president appointed a committee, consisting of Mrs. D. P. Duncan, Mrs. Jno. E. Lawson and Mrs. H. A. Taylor, to consider the question and report to the next meeting.

NEW CANNAS 1908

Rosea Gigantea. This beautiful variety has extra large flowers which are borne in such abundance that the mass of color on each plant is amazing. Single petals are 2½ inches across; color, a deep rich rose, almost a coral carmine. Plants make a vigorous growth, producing unusually fine clumps of green foliage. Height, 4 feet. (A great favorite with visitors to our trial grounds.) Strong plants, **$2.00** each, prepaid; **$18.00** per doz., by express, not prepaid.

Gladio-Flora. Remarkable for the unusual shape of the flowers which look like large Gladiolus. Petals are not long, but short and rounded and so wide they overlap each other, thus giving a very attractive appearance to the flowers. Color is crimson, changing to carmine rose with an uneven edge of gold to each petal. Height, 3¾ feet. Price, strong plants, **$2.00** each, prepaid; **$18.00** per doz., by express, not prepaid.

Meteor. Meteor is a vigorous grower with healthy green foliage. It is highly valued because of its magnificent flowers, fully four inches across, and abundance of bloom. Color is a deep crimson, very rich; each plant usually throws up five to six trusses of buds which continue blooming luxuriantly all summer through. Price, plants of dormant roots, **75c** each, postpaid; **$6.00** per doz., by express, not prepaid.

NEW CANNAS OF SPECIAL MERIT.

William Saunders. (1907) The flowers are large, of splendid form and are borne very freely in immense clusters. The color is a deep rich shining scarlet lightly dappled with crimson. Foliage is a rich bronze. Height, 3½ to 4 feet. We believe that Wm. Saunders is decidedly the most perfect Canna of this type that has been introduced. Those who tried Wm. Saunders in 1907 say it cannot be excelled. We offer plants only: **60c** each, postpaid; **$5.00** per doz., **$35.00** per 100, by express, not prepaid.

60 other varieties. Send for our list and prices.

The Nursery Trade

American Association of Nurserymen.
J. W. Hill, Des Moines, Ia., President; C. M. Hobbs, Bridgeport, Ind., Vice-President; George C Seager, Rochester, N. Y., Sec'y
Thirty-third annual convention to be held at Milwaukee, Wis., June 10-12, 1908.

SPICELAND, IND.—Mercer Brown pronounced the fruit prospects as the best he ever saw.

ALBANY, N. Y.—Considerable improvements have been carried out and are under way at Washington park.

VISITED CHICAGO: W. Van Kleef, Jr., of W. Van Kleef & Sons, Boskoop, Holland; John T. Withers, Jersey City, N. J.

THE double flowered almond is fine in Washington park, Chicago, this week, and attracts much attention from visitors.

"CLIMBING ROSES," is the title of an illustrated pamphlet by Wm. C. Barry which may be had on application to Ellwanger & Barry, Rochester, N. Y.

BATAVIA, N. Y.—Nelson Bogue has offered to beautify the Court House park by planting about 1,000 plants and shrubs entirely at his own expense.

A CIRCULAR recently issued by the Bureau of Plant Industry entitled "The Treatment of Damping-Off in Coniferous Seedlings," by Perley Spaulding, should be interesting to all growers of nursery stock.

LOUISIANA, MO.—Stark Bros.' Nurseries and Orchards Co. presented the public library with a number of shade trees and ornamental shrubs, which have been planted in front of the building. C. M. Stark arranged the planting.

LARGER foreign purchases of apple cider will be made by Great Britain, according to a statement of the Canadian commercial agent at Manchester. The cause is a poor apple harvest in Devonshire last fall and the increasing consumption of apple cider.

FREMONT, O.—At the request of many leading citizens the city council has passed an ordinance which will prevent the ruin of many beautiful shade trees in the future. The ordinance provides that trees cannot be trimmed, cut or pruned and cannot be moved unless permission is first secured from the board of service and the applicant has satisfied the board that he is capable of doing the work.

SANTA ANA, CALIF.—Two thousand acres in the Verdugo Canon, south of San Juan Hot Springs, twelve miles from San Juan Capistrano, and on the Trabuco forest reserve, have been laid off by forest-service men as the site for a forest experimental station. It is expected that the forest officials in time will establish a nursery in the Verdugo for the purpose of raising trees for planting on the reserve.

BOBBINK & ATKINS,
Rutherford, N. J.,
Bay Trees, Palms, Buxus, Azalea indica, Rhododendrons, Evergreens, Herbaceous Plants, Roses, Trained Fruit Trees, Greenhouse Grape Vines. Ask for catalogue.

FALMOUTH, MASS.—H. V. Lawrence has planted up his lot adjoining his place on Locust street with choice shrubs and hardy flowers, making a fine display.

THE following circulars have been issued by the forest service of the Department of Agriculture: "Suggestions to Woodlot Owners in the Ohio Valley Region"; "The Relation of Southern Appalachian Mountains to the Development of Water Power"; "Forest Planting on the Northern Prairies"; "The Analysis and Grading of Creosotes"; "Practical Forestry on a Spruce Tract in Maine"; "Tests of Vehicle and Implement Woods."

Iris Kaempferi.

ED. AMERICAN FLORIST:—

Five years ago I planted this iris in a black clay loam. The position is open, fairly moist and not over shaded. Two years ago it was top dressed with chicken manure and last year the plants were given sheep manure. They make a good growth but do not flower. Can you tell me the reason? G. M.

Replying to "G. M." regarding the non-flowering of Iris Kaempferi I have grown some 75 or 80 varieties of this species of iris and sometimes 500 or 600 plants of a single variety and I have yet to see a single plant that has failed to bloom with me amongst all the thousands I have yearly grown, now for quite a number of years. I think "G. M." must have got hold of some worthless or spurious stock. If he will send me a plant I shall be pleased to give same a fair examination and trial and will gladly report results through your columns. From the information supplied I see no fault as regards soil, situation or culture. Some of your readers may not have been so fortunate as myself in the growing and flowering of these fascinating plants and may give "G. M." the desired information.

Alaska-Yukon-Pacific Exposition.

ED. AMERICAN FLORIST:—

On behalf of the Alaska-Yukon-Pacific exposition, April 8, 1907, I invited the American Association of Nurserymen to hold its 1909 convention in Seattle during the time of the exposition. This invitation is again extended and I sincerely hope that at its next meeting it will decide to do so. The exposition will open June 1 and close October 15, 1909, and low railroad rates will be in force from all parts to Seattle. In the case of transcontinental tariffs it is likely the railroads will adopt the same policy as prevailed during the Lewis and Clark centennial exposition at Portland, Ore., and establish validating offices at other points on the Pacific coast as well as the exposition city, so that eastern visitors may come by one road and return by another.

Ampelopsis Veitchii, 2-in.,	$2.50 per 100

The GEO. WITTBOLD CO., 1657 Buckingham Place, Chicago

Seattle will be able to accommodate comfortably all the visitors who attend the exposition, and, by the time it opens, the living accommodations will have more than doubled. There are in course of construction, or contemplated, hotels sufficient to take care of as many more persons as can be taken care of now. The price and variety of accommodations vary to meet all demands, and the exposition management will see that reasonable rates are charged. Besides the wonders of the exposition, Seattle will offer many other attractions. Its beautiful Puget sound, its wonderful lakes and snowcapped mountains will give the visitor a great scenic treat. There are many places of interest in and about Seattle, namely: Puget sound navy yard, where there are always many warships; Fort Lawton, a regimental military post; United States assay office, where more than $156,000,000 worth of gold has been received since 1898; Alki Point, a popular summer resort; 20 public parks in the city and bordering on the sound and the lakes. There are also many delightful side trips that can be made within a few hours or a day's journey. The ride across the country is in itself worth the trip.

HENRY E. REED.

TOLEDO, O.—As a measure to partially relieve the unemployed Bulgarians living on the east side, a co-operative gardening plan has been adopted. Forty acres of land located on Navarre avenue have been rented. Tools and seed have been furnished by interested persons, and it is expected that many of the aliens will be thus assisted.

ORCHIDS.

We advise the Growers and Private Places that our Importations will begin to arrive in a few weeks time and we will have the following: C. gigas, C. gigas Sanderiana, C. Mendelii, C. Schroederae, C. Trianae, C. Gaskelliana, C. Percivaliana C. aurea, Miltonia vexillaria, C. Mossiae. C. speciosissima, C. labiata and others. We guarantee that our plants will be extra fine with no disease or Cattleya fly and will quote the Lowest Prices in America.

ORDONEZ BROS., MADISON, N. J.

ORCHIDS.

Arrived in superb contition fine importations of Dendrobium formosum giganteum, D. Wardianum. These are elegant plants.

To arrive April 15, large importations C. gigas Sanderiana, C. labiata, C. Trianæ. A trial order will prove we carry the best stock that can be secured.

St. Louis.

DEPARTMENT STORES SLASH PRICES.

The weather the past week has been wretched, continual rain and cold and nothing doing. There is one consoling fact, that the price on good stock has stiffened, and anything good in carnations is bringing two cents. The rose market, perhaps, is not quite so crowded, but the absence of demand makes prices low. Quite a few roses are arriving mildewed. Sweet peas are normal in the absence of violets. A great many of the retail stores are complaining at the inroad made by the department stores into the plant trade. The low prices of geraniums and other plants sold by the department stores is generally condemned, as the sale of these plants is used in a great measure solely as a bait to sell their other goods, and thus, through these methods, the legitimate florist has to suffer. Surely the growers of these plants should get together and reason among themselves and keep the trade in its legitimate channels. Of course the grower can fight these low prices, but the florist who has to purchase his plants has a hard road to travel.

A meeting of the executive committee of the Horticultural Society took place last week. Over $1,500 in prizes was subscribed in addition to the Shaw prizes, for the flower show to be given the first week in November. The location of the hall has not yet been decided.

Dominic Bova, during the glut, purchased heavily for the store on Franklin avenue, and also the floral display made by the Red Bud Floral Co., at the Union market. They give special bargain days under the management of Mr. Bova, the head of the firm.

The society ladies are very busy preparing for their floral booth at the Charity carnival May 16, to be given at Forest Park Highlands.

Grimm & Gorley had a very fine display of decorative plants at the Columbian club for a recent event.

The Bentzen Floral Co. is making a fine display of plants, including geraniums and ferns. W. F.

JACKSON & PERKINS COMPANY

NURSERYMEN AND FLORISTS—Wholesale Only.

Newark, New York.

NEW YORK.—L. Boehmer & Co., florists, have incorporated with capital stock $25,000. The directors are Vivian L. Outerbridge, Ethel Morrow and Bernard J. Tracey.

BALTIMORE, MD.—The Gardeners' Club held a meeting and exhibition in its clubroom, St. Paul and Franklin streets, April 27. The exhibitors were mostly out-of-town florists, with the exception of John Cook, who exhibited his new rose, My Maryland. Prof. J. N. Corbett, of Washington, D. C., gave an interesting talk on the proper treatment of soil in raising flowers and fruit.

ROSES. STRONG, CLEAN STOCK.

Grafted Killarney, Richmond, Brides, and Maids $12.00 per 100; $110.00 per 1000. Own-root Brides, Maids, Gates, Ivory, Perle, Killarney and Richmond $6.00 per 100; $55.00 per 1000.
All from 3½-in pots.

P. R. QUINLAN, SYRACUSE, N. Y.

ROCHESTER, N. Y.—The Livonia Floral Society of the Methodist church has just issued schedules for its tenth annual flower show to be held in Prettyjohns Opera House, August 13 and 14.

BYER BROS., Chambersburg, Pa.

Minneapolis.

CUT FLOWERS SCARCE.

Stock in general was very scarce the past week, roses and carnations being about the only thing on the market, and not nearly enough of them could be secured. The demand was heavy for general cut flowers and funeral work; there are no weddings or social events to warrant the use of anything in an elaborate decoration. The weather has been so cold that there has not been much done in planting, but, evidently, this will not be a year for the hardy nurseryman, as winter jumped so suddenly into spring and, Easter being so late, not much attention was paid to the hardy stock.

NOTES.

The Minneapolis Floral Co. has the front of its establishment decorated with rows of fine boxwood, pyramid, standard, and fancy shapes. This firm is displaying the largest line of iron vases ever seen in this city, ranging from two feet to seven feet high, and expects a large shipment of bay trees a little later on in the spring.

Rice Bros. find stock as scarce as the majority; they are shipping in some very good Spanish irises.

R. A. Latham has just received a shipment of first class bay trees and boxwood. M.

AUBURN, ILL.—Harry Boyd will in the near future begin the erection of greenhouses on his ranch south of town. His intention is to conduct the greenhouse business on a large scale.

CARNATION SPECIALISTS

674 W. Foster Ave., CHICAGO.

Boundbrook, N. J.

In honor of Governor Fort, A. C. Zvolanek has named a new variety of sweet pea that he is cultivating. Being a great admirer of the governor, he decided that either one of his two new varieties should bear his name and be so registered officially. Mr. Zvolanek has recently received a report concerning the trials of his peas at the University College gardens, Reading, England. Among other interesting data the report says: "There was not one really late sweet pea in the whole trial."

Thomas Young, Jr., will build several new greenhouses this season.

ROCHESTER, N. Y.—Geo. T. Boucher says his Easter trade this season was even better than that of last year, in spite of hard times generally.

Fort Wayne, Ind.

GERANIUMS.

One of the best things in the market, the **American Beauty** Geranium, a clear bright cerise just about the color of a good Pink Lawson carnation. The habit is very pleasing, rather dwarf and very stocky. It is a common thing to see 4 to 6 large bunches of flowers on a plant in a 3 to 5-in. pot. Clusters average 4 to 5 inches in diameter. It is a very free bloomer; we think it is freer than any we grow and we grow a great many Geraniums. We grow 8 to 10 varieties. Stock of American Beauty is extra fine but limited as to quantity.

We offer you

2-in Pot Plants at	$ 6.00	per 100
3-in. " " "	10.00	"
4-in. " " "	18.00	"
5-in. " " "	25.00	"

the 4- and 5-in. pots are very stocky and bushy; have 3 to 5 large flowers on now.

OFFERLE & SCHAAL, Erie, Pa.

Chrysanthemums

FOR EVERY PURPOSE.

A partial list with prices appeared in previous issue.

ELMER D. SMITH & CO.,

Successors to Nathan Smith & Son,

ADRIAN, MICH.

BLOOMINGTON, ILL.—The Minier Plant Co. was recently organized for the purpose of growing plants, cut flowers, etc.

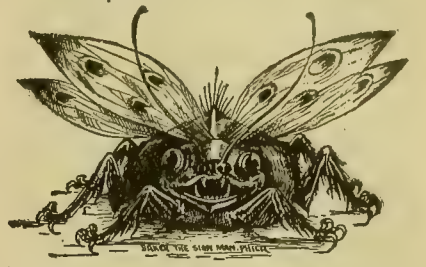
OWENSBORO, KY.—The Nanz Floral Co. has announced that it will give away to the owners of corner lots, flowers to be planted in the triangle at corners between the sidewalks and the curb. These flowers will be given to any owner who will call for them and agree to care for them after they are planted. Before a lot owner can secure the flowers it will be necessary to secure an order from Mayor O'Bryan.

SANTA BARBARA, CALIF.—Uncle Sam's fighting tars of the battle-ship fleet were spectators of a battle on Ocean boulevard here April 27. It was a battle in which flowers served as the only ammunition, and it ceased only when the ammunition gave out and the "powder monkeys"—scores of pretty girls, who passed out the bouquets from the grandstands—were exhausted. The floral conflict followed a flower parade in which were vehicles of every description, but of which a description was impossible because of the manner in which they were completely hidden by blossoms.

Everybody Talks About It!

LIKE THE BEE

A Prosperous Florist Is Never Idle.



An immense stock of bedding plants is now ready. Every hole and corner full for immediate shipment.

Geraniums, S. A. Nutt, John Doyle and some pink, 4 in. pots, $7.00 per 100.

Ageratum, dwarf, best blue, 4 in., $7.00 per 100; 3 in., $4.00 per 100.

Begonia Vernon, newest strain, flowers as dark as blood; seeds gathered by myself from specimen plants in Zurich, Switzerland, during my trip to Europe; 4-in. pots, $10.00 per 100; 3-in., $7.00 per 100.

Begonia Erfordi, true; this is one of the best pink varieties known; it is a sight to see a bed of them in bloom; nothing but a mass of flowers. This plant decorates the flower beds of aristocratic people in England, Germany, Switzerland and Paris. Price: 4-in., $10.00 per 100; 3-in., $7.00 per 100.

Scarlet Sage or **Salvia,** Clara Bedman or Bonfire. Ours is the true genuine variety so much admired in all the capitals of Europe and America. Deep red, medium tall varieties; free bloomers. Seeds of these famous varieties were gathered by myself in Zurich Switzerland, the home of the Salvias. Price: 4-in., $10.00 per 100; 3-in., $7.00 per 100. Have 5,000 of these to offer.

	Per 100

1365-79 Flushing Ave., Brooklyn, N. Y.

The Holly Standard Electric Circulator...

Peters & Son of Hempstead, L. I., say: "Your circulator, new model, installed for us last December gives perfect satisfaction. It heated without half trying, our three large greenhouses. We figure that in one more season it will nearly pay for itself in saving of coal. No fear of frosts now!"
No greenhouse is perfect without it. No greenhouse is out-of-date with it.

Ventilators. The Advance Ventilating Apparatus. Write for estimates and circulars. The Advance Co., Richmond, Ind.

TROY, O.—L. A. Thomas reports better business than he has had in years.

WHITMAN, MASS.—Maurice L. Belcher is a voluntary petitioner in bankruptcy with liabilities $967, assets $40.

NASHUA, N. H.—The weather during March and April has been very favorable for retail trade. Stephen Chase makes a specialty of shipping geraniums out of 3½-inch pots. He puts out a very fine plant and is making large shipments at the present time.—B.

Carman's Antipest

INSECTICIDE AND FUNGICIDE

For the Garden, Orchard and Greenhouse

Non-poisonous and harmless to vegetation.

Kills Green Fly, Aphides, Bark Lice, Thrips, Mealy Bug, Red Spider, Scale, Wire Worms, Ants and Slugs.

This is the Grower's Friend, handy to use, cheap and effective, mixes readily in water. Destroys all insect pests and keeps down filth. Circulars on application. $1.50 per gallon. Also in quarts, half gallons and in bulk.

PERFECTION CHEMICAL CO., FLUSHING, N. Y.

Increase Crops in Orchard and Field with **THE AUTO-SPRAY**

It is guaranteed to be the most powerful, easily operated, economical hand sprayer made. With it a boy outworks three men with ordinary device. Used by U. S. Government and State Experiment Stations. Fitted with Auto-Pop Nozzle it is equal to large operations as well as small. Write if you want agency. Spraying Calendar Free.

E. C. Brown Co., 74 Jay St. Rochester, N. Y.

FAIRFIELD, CONN.—Geo. H. Smith is developing his greenhouse business and has considerably increased his glass, besides going in largely for all kinds of vegetable plants.

ALLEGHENY, PA.—G. & J. W. Ludwig report considerable decrease in Easter sales at prices less than those of last year. Carnations and roses sold best as cut flowers.

PEORIA, ILL.—James C. Murray reports larger Easter sales than last year at better prices. Carnations were scarce and sold at high prices, and the sales on flowering plants were above the average.

CHEYENNE, WYO.—Chas. F. Swayger, for a number of years general landscape gardener of the Union Pacific, has resigned his position with the road to take charge of the landscape gardening at Fort D. A. Russell.

SOUTH HAVEN, MICH.—Trade has not been very brisk here all winter but is picking up a little. W. A. Hartman has not been well all winter and has been obliged to go away for a while; he is visiting his sister in New York.

PALM BEACH, FLA.—Foster & Foster have had a good business this season, but it practically ends in April. Prices held the same as usual with everything equal to the demand. Roses, violets and lily of the valley were in greatest demand.

GAINESVILLE, FLA.—Extensive preparations are being made here for the entertainment of the members of the State Horticultural Society, which will convene in annual session in this city from May 12-15. This event is anticipated with a great deal of interest, as it will bring together 200 or more of the best growers in the state, representing every section and every class of horticulture.

PEORIA, ILL.—For the first time in nine years James Cole, the pioneer florist of the state, came down town April 24. The occasion was a Masonic parade in which James Nelson Cole, Jr., aged 22, took part. He is said to be the youngest thirty-second degree mason in the world.

PERRY PNEUMATIC WATER SYSTEM

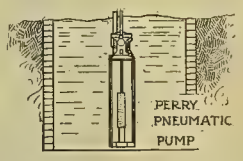
For GREENHOUSES.

No Water Tank==

INSURING CONSTANT, DIRECT SUPPLY.

Operated by
ANY POWER
Gas, Gasoline, Steam, Electricity or Windmill.

Send for descriptive matter and information blanks. We will be pleased to give estimates on a system for your particular needs.



The Perry Pneumatic Water System

is ideal for the Greenhouse. It delivers a strong, continuous pressure of fresh water from the well or any source of supply direct to the faucets. No water is stored. Cistern water may be supplied or several wells may be drawn from with the same motive power.

The Perry System Is the Only Water-Tankless Water System Made— don't confuse it with systems that require storage of water, or air and water, as a means of supply.

Better Service. Less Cost for Operation.

UNITED PUMP & POWER CO.,

Old Colony Building, CHICAGO.

Red Bank, N. J.

The Monmouth County Horticultural Society held its regular monthly meeting at Red Men's hall May 1. A delegation of members of the Elberon Horticultural Society were visitors and joined the society. The president of the Elberon society, Henry Wood, made a very flattering speech about our society and suggested that the two societies should cooperate in the fall show which was promptly accepted. It was then decided that the twelfth annual chrysanthemum show should be held in the Frick Lyceum November 4-5 in conjunction with the Elberon society. The secretary was ordered to have the preliminary schedule printed at once. The lectures for the remaining year are as follows: June 5, Geo. A. Steele, "Shrubs"; September 4, Wm. Turner, "Stove Plants"; October 2, N. Butterbach, "Melon Culture Under Glass"; November 6, J. C. Hale, "Evergreens"; December 4, H. A. Kettel, "Bulbs." B.

Orange, N. J.

The regular monthly meeting of the New Jersey Floricultural Society was held May 1. The floral display consisted of orchids from the well known houses of Lager and Hurrell, of Summit. Dendrobium Dalhousianum., Oncidium varicosum Rogersi, Cypripediums Rothschildianum and Curtisi exquisitum, and Cattleyas Mendelii and Mossiae. Thomas Jones of Short Hills showed Cattleya gigas Sanderiana and Joseph A. Manda of West Orange, Dendrobium Bronckartianum (flowering for the first time in America), Lælia elegans Schilleranium and Oncidium Marshallianum, besides the usual contributions from private estates. The address of the evening was by J. B. Davis upon "Cartography Applied to Landscape Work," illustrated by many maps and pictures from the speaker's collection. It was decided to dispense with meetings during the summer months. J. B. D.

HEMPSTEAD, L. I.—Geo. Williams, of 152 Henry street, formerly employed as landscape gardener and utility man on the Kernochan estate, The Meadows, was found dead April 28, under a shed on the Hempstead Manor property, by some workmen. A common sash cord was found around his neck and fastened to a beam in the shed. Williams had, apparently, been dead some hours when found. He was about 55 years of age and leaves a widow and grown-up children.

Hoquiam, Wash.

This is one of the spots where we never lack for moisture. On Grays Harbor, 12 miles from the Pacific, every low cloud that drifts over the land from the water spills a part of its contents. The soil here in the city is reclaimed tide lands, a heavy, mucky, rich soil, and all vegetation thrives in it. The holly is fine; rhododendrons are showing color; English ivy grows rampant. Primula veris is in its glory. It does not get very warm here, and some things that require heat will not do well. The nights are cool. It does not get very cold in the winter. The native trees are spruce and fir. The deciduous varieties planted here are coming into leaf. Lilacs are nearly open. Tulips are in bloom. No greenhouse flowers are grown here. I have seen a few carnations in a store, mostly Enchantress, shipped in from Tacoma or Seattle. T.

LA FAYETTE, IND.—F. Dorner & Sons Co. have appointed Mrs. C. M. Kerlin as agent in Delphi.

BUTTE, MONT.—Horace Cheeseman, representing Vaughan's Seed Store, Chicago and New York, was a visitor this week. Trade was good generally, he reports, but an occasional town he referred to as "the hardest proposition he ever tackled," evidently "confronted by a condition." He proposes to tackle the mormons next.

Columbus, O.

TRADE VERY BRISK.

Trade still continues very brisk, but rainy and cool weather has put a damper on the call for outside work for the present. Most of the growers have their carnations planted out now, and most of the young spring stock is potted off and in shape for the spring sales. Geraniums are in 3 and 4-inch pots and looking fine. Hanging baskets are being planted now, in order to give them a start before being purchased by customers. Roses, carnations and sweet peas are the principal cut flowers now. Violets are very poor, and bulbous stock gone, leaving very little variety to select from.

NOTES.

The Florists' Club was entertained April 29 at the establishment of Mr. Hessnauer, on South Front street. A business meeting was held first, after which baked beans and other delicacies were served. The club gives its first annual ball Monday evening. It is expected that fully 100 couples will attend. The committee on arrangements is composed of Jas. McKellar, chairman, Jacob Reichert, Wm. Metzmeier, Geo. Bauman and Albert Hills. The hall will be prettily decorated for the occasion. CARL.

NEW BEDFORD, MASS.—A committee from the Horticultural Society, with representatives of the Farmers' club and Teachers' association, held a conference April 9 in Y. M. C. A. building to discuss the wholesale slaughter of wild flowers and ways to prevent it. Some plans were considered and the interest of other societies that were invited to the conference and did not send delegates will be sought again before the next meeting of the Horticultural Society. There was a good deal of interest shown in the movement by those who attended the meeting, and the plants which it is sought to preserve are the trailing arbutus, mountain laurel and fringed gentian.

Buffalo.

TRADE FAIR.

Changeable weather from almost a summer temperature to a cold rain, followed by about six inches of snow, have been the variations here the past week. Trade has been fair. Weddings, waiving all weather conditions, have been numerous, giving all plenty of work. Greenhouse men are more than busy now getting things in readiness for spring work.

NOTES.

Chas. H. Sandiford read a very interesting paper before the Y. M. C. A. on "Small Gardens and What To Grow." It was very interesting and instructive to the home man. We expect a good paper from Mr. Sandiford very soon at the club.

The Buffalo Cut Flower Co. has removed to 495 Washington street, the home of the wholesaler, where D. B. Long started and was succeeded by W. F. Kasting. We wish the firm the success of the former occupants.

J. H. Rebstock has vacated his Main street store temporarily and is now located at his Elmwood avenue store. He will be in a new location in the near future.

The Florists' Bowling Club, which is separate from the B. F. C. Club, bowled in Niagara Falls last week, covering themselves with glory.

S. A. Anderson and wife are on a fishing trip in Michigan.

Visitors: Walter Mott, and L. G. Colyn, of Holland. BISON.

Memphis, Tenn.

TRADE SATISFACTORY.

Easter trade was better than last year; for the first time there were plenty of pot lilies to go around and some to spare, but all used in the following week. Hydrangeas all cleaned up and the demand for American Beauty roses was better than at any previous Easter for the past 10 years. On the whole a very satisfactory Easter. The demand and sale of geraniums this year has been good. We account for it in the excellent blooming stock; people bought them for the full handsome double blooms on the plants, one firm selling over 25,000 plants.

NOTES.

The East End Floral Co. is no more, attachments being issued in April by local tradesmen, the stock not covered by chattel mortgage will be sold May 11.

A local drug firm that backed the enterprise is said to be out $6,000, secured by some decorative palms, horse and wagon and uncollected accounts. Chas. Hammer, the active spirit of the defunct floral company, contemplates opening a florist stand in a new soda water and confectionery store in a week or 10 days. H.

HEATING **BOILERS.**

1122 Betz Bldg., PHILA., PA.

Tarrytown, N. Y.

The monthly meeting of the Tarrytown Horticultural Society was held on April 24, President Angus in the chair. Three new nominations to membership were received. James Stuart, Mamaroneck, and Wm. Brown, Ossining, were elected active members of the society. We are glad to say that donations to our prize fund are still coming; and, to date, five silver cups are offered for the November exhibition.

James W. Smith's prize for the best two flowering plants was won by Thomas Oitckinson, gardener to Henry Siegel, Mamaroneck, with a large pelargonium in fine bloom and a calceolaria; both were well grown specimens. The feature of the evening was the talk on "Water Gardens," given by Charles H. Tibbits. Mr. Tibbits is connected with the park department of White Plains, and has had very satisfactory results with aquatic plants. He kept his hearers listening with pleasure to his remarks. Subjects for next meeting will be "Shrubs," and "Hardy Perennials."

E. HIPPARD, Youngstown, O.

JERSEY CITY, N. J.—Daniel Cole surprised many of his friends recently by marrying Miss Anna May Baumann and he and his young bride will take up their residence in the Bergen section after a brief wedding tour.

MEXICO CITY.—The annual flower parade and floral fiesta, which took place here April 26, was one of the most brilliant events of its kind ever witnessed in this city. President Diaz and representatives of high society participated.

Toronto.

BUSINESS AND PRICES POOR.

Business at present is not much to brag of; excepting a little funeral work and an odd wedding there is not much doing, consequently stock of all varieties has accumulated to very large proportions. The horse show which is now on does not prove the large factor to business that it has heretofore and the florists with but few exceptions did not even decorate their windows for the occasion. Roses predominate and were never better or more plentiful. American Beauty, Richmond, Killarney and Bridesmaid are a pleasure to behold, very creditable to the growers but finding little sale. Carnations are the same and if wanted in quantities can be had at unreasonably low figures. All stock meets the same fate and although the wholesale list is published few adhere to it. A few very well grown flowering plants are still seen but are not much in demand. Baby Rambler roses have been good sellers; well grown and nicely arranged they have outsold other varieties of plants.

NOTES.

W. Wilson of Niagara Falls, Ont., has been appointed park commissioner of this city, succeeding John Chambers, who resigned some months ago. A number of local men applied for the position, but the strong support of the newspapers was responsible for Mr. Wilson's selection. He has had considerable experience at Queen Victoria park and has plenty of opportunity here in the large park system of this city to prove his worth.

J. S. Simmons won first prize at the horse show for his delivery wagon. This is one of his best mediums of advertisement and his wagons are always up-to-date. He had a nicely decorated window for the occasion which was also given first prize.

A freight car which was being loaded with lilies and palms by Grobba & Wandrey was run into by a shunting engine doing considerable damage to the contents.

Frank Duffert had a splendid lot of lilacs, possibly the best ever grown in this section; they met with a ready sale.

The Bedford Park Floral Co. is busy replanting some of the rose benches and expects to have an early crop this year.

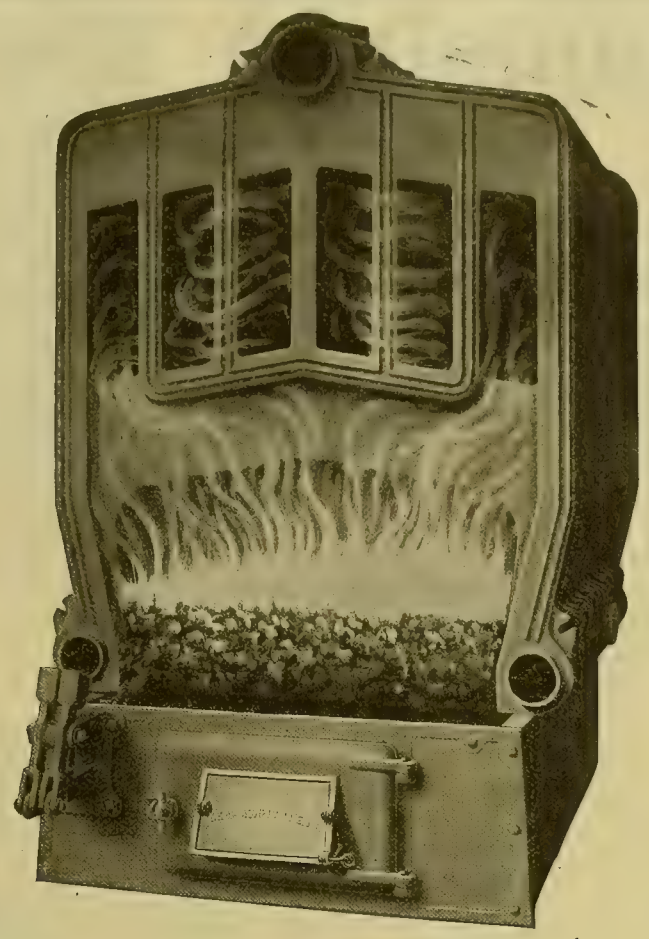
H. G. D.

Albany, N. Y.

The bureau of parks of the city will erect a new greenhouse for palms and other foliage plants on New Scotland avenue. The proposed house will be 30 feet by 60 feet. In addition to this there will be erected also this summer a propagating house 10 feet by 60 feet. The bureau will also install a new Hitchings boiler of the latest type to replace another boiler worn out in service.

At the present time the parks are busy places. The gardener, John J. Walsh, has had a gang of men out planting trees in different parts of the city. The men have planted 45 oriental plane trees in Beaver park and 45 other trees of different varieties will also be planted in the same park. The men have also planted a large number of maple trees along Western avenue, Hudson avenue, and Yates street. Forty tons of soluble ground bone were received by the bureau during the last days of April and men are engaged in spreading the same upon the lawns and other places in the various parks of the city.

The common council at its last meeting in April passed an ordinance appropriating the sum of $150,000 for a new park in parts of the Twelfth and Thirteenth wards. It is expected that work upon this new pleasure ground will be begun immediately. The bureau of parks has also secured plants of about 75 new varieties of chrysanthemums for exhibition at the annual show in October in the lake house, Washington park.



Once Across the "Burnham" the Fire Travels.

Note the extra depth of the "Burnham" fire pot and the great heat-absorbing capacity of those deep fire channels, one for each section, extending entirely across the fire box. See the way the blaze first rises into these channels and is drawn along in them to their ends, then into the side flues. All fire surfaces are completely water surrounded.

Get it firmly fixed in your mind that the water returned from the steam or hot water system comes in direct contact with the hottest part of the boiler, reheating water instantly.

57 sizes—Burns hard or soft coal.

The members of the Florists' Club met on April 30 in Eyres' greenhouses and inspected his stock which is in charge of Chas. Sanders, foreman.

R. D.

Rochester, N. Y.

Geo. B. Hart is handling some very fine antirrhinums grown by the Wm. Scott Co. of Corfu, N. Y. It is the very best strain of antirrhinum that we have ever seen, and sells readily. We think that it would pay some of our local growers to grow a quantity of this useful flower. It is very easy to handle and grow. Spring struck plants, kept from flowering, can be planted on the bench in September, in a house suitable for carnations, and will bloom profusely all winter.

The worst blizzard of the season struck this city April 30. Luckily the temperature did not go below the freezing point, but the snowfall was six inches. Great damage was done to the electric light and telephone wires. We have not learned of any damage being done to any glass in this vicinity.

Alfred Vick of Mt. Carmel, Conn., died April 28 and was buried April 30. Mr. Vick was the elder brother of Edward H. and Fred W. Vick, of this city.

Tile Benches.

There seems to be much interest shown by growers all over the country in some permanent bench material to take the place of wood. It is evident that a permanent bench that can be easily put up is what is called for. Tile bottom floors used on various kinds of frame work have been used successfully for years and I want to state, through the columns of the AMERICAN FLORIST, my experience with tile bottoms. I am using tile, replacing the wooden bottoms as fast as they rot out. The tile I use is specially made for the floor or bottom. It is two inches thick, 12 inches wide and two feet long. I secure this tile and split it myself, and support the same on a wooden frame of 2x6. At the joints of the tile I run a coat of mortar to keep the drip off of the wooden support. The tile make a nice level surface. The drainage is perfect and my plants are very thrifty.

Tile has been known or acknowledged for years as one of the best materials for growing plants on. I have just been shown a circular issued by the Camp Conduit Co., an Ohio firm, showing a tile for the floor the same as I am now using, but I note that they also make a tile post and cross support upon which they place the bottom or floor tile. Judging from the experience I have had in splitting and setting the floor tile, I am quite certain that its claim that two ordinary skilled common laborers can erect from 700 to 1,000 square feet of bench, including the splitting of the floor tile, in a day, is correct. Even though it should take a little longer, yet the cost of erecting the bench is so low that the bench should meet with great favor among growers. These people say they will be glad to send a circular to anyone interested, or give them any information about tile construction.

I have noticed a few articles recently on cement bench construction, but from what I can learn it is rather expensive, and it is hard to secure the proper drainage. There is also objection to the one-piece bench on account of not being able to make any changes after the bench is once in place. I am very much interested in any article on the bench subject, and I hope that there may be a general discussion.

SUGGESTIONS FOR PLANT GROWERS.

Fuchsias.

These should be placed in their flowering pots now, and as they make a considerable amount of growth between now and flowering time, a fairly large shift should be allowed. Young plants in 3-inch pots should be given 6-inch or 7-inch pots and a substantial compost, to which may be added a good proportion of horn shavings, bone dust or some lasting fertilizer. From now on is is impossible to keep fuchsias too cool in the ordinary greenhouse, and only the lightest of shading should be given just to keep the foliage from being injured. Pot firmly and, when staging the plants give them ample room, as they will grow rapidly. The most desirable form for a fuchsia is the pryamidal, which most varieties assume naturally if allowed to do so, but this is a matter for the individual grower to consider. If he has a call for plants in bush form, then these must be pinched regularly until this is attained. For the pyramid it is only necessary to keep the plants growing in a good light and pinch out the flowers as they form until about six weeks before they are needed in flower. Water freely when the roots are working well and keep an eye lifting for white fly.

Caladiums.

To bring out the fine coloring of the fancy-leaved caladiums to the full a light house and almost full exposure to the sun is needed. The development of the leaves is checked by inferior root action or lack of moisture in the atmosphere and allowing the flowers to develop and form seed is also against them. The ideal cultural atmosphere is one where the strongest rays of the sun are broken up by an open lath blind and where plenty of moisture is held in solution, thus doing away with the necessity of spraying or syringing. The sun ensures a brisk buoyant temperature and sufficient fire heat at night to prevent the temperature dropping below 60° should be allowed. A lot of moisture is needed by the roots to keep the large showy leaves in good condition and feeding is also necessary for, unlike many foliage plants, the best varieties of caladiums must have considerable manurial support to bring out their exquisite coloring. This high, intensive culture is best for exhibition plants and without it success is, to say the least, doubtful, but small plants good enough for the ordinary market or decorative purposes can be had by giving less room in the pots and feeding less. Although such plants will not produce such fine, handsome leaves, yet the foliage they do carry will be harder and better able to stand the vicissitudes of shipping and being kept about in retailers' windows. Quite nice little specimens may be produced in 5-inch pots or even less and, during the summer months, when flowering plants are scarce, they are extremely useful. Never let the flowers form or the growth of the foliage is checked.

Chrysanthemums.

The earliest struck cuttings for pot chrysanthemums will have been potted up and they must be kept growing gently in a cool light frame on a bottom of ashes or similar material. This class of stock must be potted firmly to induce a solid growth and the plants should be pinched when about three inches high to produce the requisite number of breaks. More cuttings may be inserted of suitable varieties and these should have the points pinched out directly they are rooted and be potted into the 2-inch size. Practically outdoor conditions are needed as soon as the plants are potted, though they must be protected from frost. Every few weeks the plants must be sorted over and given a fresh stand. If they have the soil cased over on the surface let this be loosened up to admit air, and if they are rooting through the bottom it is a sign they need repotting. At this second potting the plants must be stood on tile or some other hard substance that they cannot root into. Plants potted early for standards will probably in many cases have reached the desired height. When they have, pinch out the point and young shoots will soon be produced to form the heads. Old plants to be trained flat must be shaken out and repotted, using a size smaller pot and giving the best compost obtainable.

Select the requisite number of shoots and bend them in the required direction, tying these down to stakes when they are sufficiently strong. A plant protector or outside, where covering material may be thrown over at night if necessary, is the best place for all these plants now, as it is important to keep the growth hard and vigorous from the start. Watch closely for green fly and if any is seen in the points of the shoots dust a little tobacco powder in them to keep it in check. Avoid overwatering, as this causes a yellow tinge to the leaves and such leaves drop later, while it is advisable for pot plants to maintain the foliage in good condition right to the bottom.

Begonia Gloire De Lorranie.

The young plants will not in some cases be growing very rapidly as yet, but do all that is possible to keep them on the move by breaking the crust that forms on the surface of the soil, and thus admit plenty of air to the roots. Plants from leaf cuttings grow more shapely than those raised from stems, but, if due care is taken in pinching later, cuttings may yet be struck and will make nice little stock for Christmas. Keep them going all the time with a gentle heat and abundant atmospheric moisture. The young stock that is growing freely now in the smallest sized pots may be given a shift into pots only slightly larger, removing practically all of the old soil and giving light sandy compost. Keep the strongest and best rooted specimens by themselves, as they will grow more rapidly than the weaker stock and need more water. Maintain a brisk growing temperature and shade the plants from bright sunlight. As soon as possible put the old plants into shape a little, removing weak and soft shoots, and repot, shaking away a good deal of the old soil and placing them in pots a size smaller than they have been growing in to be again shifted into their flowering pots later.

Rubber Plants.

Where there are large old stock plants of Ficus elastica or F. pandurata, good specimens can be quickly produced by ringing and mossing the growing points, now. The plants may be taken off of various sizes from five to eight good leaves being the handiest. Wherever it is decided to take the plant off, ring the bark completely around, taking a ring about half an inch or less. Have some sand and sphagnum moss ready and tie moderately firm all around about two inches above and below the point of ringing and about two inches thick. Keep this constantly moist by syringing daily, or otherwise. If allowed to get dry the plants, even if they root, will likely lose their foliage later, but if the moss is kept always wet from the start practically every one will root and root quickly. When the young growing points of the roots can be seen through the moss the plants may be cut off and potted into 3-inch or 4-inch pots and kept rather close and moist until well established. While propagation in very large numbers cannot be carried on this way, yet a few old plants will produce quite a number of good useful young ones and if such are not grown it will pay to plant out a few in some bench or corner where they may be left undisturbed.

The Great Ghent Quinquennial Exposition.

The famous Societe d'Agriculture et de Botanique de Gand has just celebrated its one hundredth year of existence by holding one of the very finest of its shows in the great casino at Ghent. The show was formally opened April 25 by King Leopold, who examined the exhibits for two or three hours and conversed with some of the leading horticulturists of the day. The preceding week, however, had been one of hard work for the officials and exhibitors, as the wretchedly cold and boisterous weather impeded

The Great Ghent Quinquennial Exposition.
Monument of Comte Oswald De Kerchove.

not only the progress of the staging and arrangement, but was also responsible for the backward state of some of the flowering trees, shrubs and bulbous plants. There were 760 classes in the schedule and nearly every one of them found an exhibitor, so that one may form some idea of the magnitude of the undertaking that confronted the 200 judges who conducted their labors in 32 sections on the Friday preceding the opening.

The illustration (Fig. 1) shows the great casino, seen from the garden as it appeared some time ago before the lake was filled in. The interior of the annex was arranged with much art and care to produce the excellent landscape effect shown in Fig. 3. There was only one shadow over the exhibition and that was the absence of the revered Comte de Kerchove de Denterghem, whose name and personality have been associated with the great Ghent quinquennials for so many years past. A man of gigantic proportions, keen intellect and unbounded love of horticulture, his death a year or two ago came as a great blow not only to the Belgian horticulturist but to the whole of horticultural Europe. His memory, however, will always be green and visitors to Ghent in future will recall his services to horticulture when they glance at the magnificent statue and monument that has been erected in his honor close to the railway station in the Place du Comte de Flandres. This monument is well shown in the accompanying illustration.

Another interesting feature of the centenary exhibition was a replica in the grand annex of the first exhibition and the building in which it was held 100 years ago. "In Frascati," the sign over the door, was about 35 feet long and less than 20 feet wide, and contained specimens of plants that were shown on the first occasion, as well as a refreshment bar, a charcoal brazier for pipe lights, the original medals granted to prize winners and other curiosities. The exhibition now covers three or four acres of ground, so that one may safely say that Belgian horticulture has made immense strides during the past 100 years.

Coming to the exhibits the first thing that strikes one is the excellent style and arrangement of the various groups. Effect, effect—that seems to be the great thing, and anything like the inartistic staging one is accustomed to see at many English shows is nowhere to be seen. Not that the plants or specimens are better grown by any means, but the way in which they are displayed appears to make otherwise ordinary specimens of good culture appear to be monuments of the gardener's skill. New Holland plants were made to set off the sloping, moss-covered foreground to a panorama of mountain scenery painted on canvas at the back. The plants themselves were nothing remarkable, only the skill with which they were presented to the public. Fig. 3 gives a view of magnificent specimen azaleas arranged apparently in an endless vista—an effect caused by another panoramic painting at the extreme end of the annex. This extreme end is very natural and anyone who had not actually seen the show would easily imagine the horse chestnuts, lake, poplars, sloping banks and winding walks to be a reality. Yet one can scarcely distinguish that the canvas started from the front edge of the sloping bank.

Taking the exhibition as a whole, the most striking groups of plants were azaleas, crotons, palms, cycads, pandanus, anthuriums, hippeastrums, orchids, and New Holland plants. The azaleas (Fig. 4) were simply superb specimens such as can only be produced in Belgian gardens. Many of them were from four feet to six feet across and so literally smothered in blossom that the leaves were completely hidden from view. Crotons were present in magnificent array—huge pyramidal or bushy specimens that must have taken years to grow. Without their brilliant colors the great hall would have looked dull indeed. And banking them up as a background came the palms, cycads and pandanus, while in great glowing groups in the center were splendid specimens of Anthurium Scherzerianum in numerous varieties and A. Andreanum with large spathes of crimson or cream.

From England the two most remarkable collections of plants came from Capt. Holford, the well-known Gloucestershire amateur, and Messrs. Ker, nurserymen of Liverpool. Capt. Holford staged a magnificent collection of about 300 orchids in great variety, which attracted universal attention owing to the excellent way in which they had been arranged, and because every plant was a specimen of the very best cultivation. In addition to the orchids Capt. Holford also had a splendid group of hippeastrums

whose huge bulbs, fat scapes and large, well-shaped flowers bore ample testimony to the skill of his gardener. The hippeastrums shown by Messrs. Ker were equally magnificent and being shown in the competitive classes secured five first prizes, including a couple of gold medals. Hippeastrums are not yet popular plants on the continent, but they may become so after the displays from England.

Orchids generally were more extensively shown than we have seen them on previous occasions, and there is no doubt their culture is being extended considerably in Europe. Odontoglossums, cattleyas, lælias, miltonias, oncidiums and cypripediums were in great variety. The piece de resistance, however, amongst orchids—indeed, in the whole show, was the unique exhibit of M. Vuylsteke, of Loochristi, which consisted of 100 plants of the most magnificent varieties of spotted Odontoglossum crispum. The value of the exhibit was simply enormous, and £1,000 ($5,000) for some specimens was considered to be rather a low figure. Certainly the experts never had such a treat in their lives. It would be futile to describe the varieties in detail, but it may be said that as a rule the ground color was almost a pure white, and the blotches were large and either bright purple, maroon or chocolate and many clearly defined other shades for which names want finding.

Other groups worthy of mention were American carnations, shown for the first time, a few bromeliads, at one time so popular in Belgium, and a few groups of zonal pelargoniums, forced trees and shrubs, cinerarias, etc.

One must not forget the New Holland and Cape plants, of which there were some really fine examples. The acacias have done duty at the Ghent quinquennials on many previous occasions, but they are still as popular as ever, and one would regret the disappearance of their golden forms. A few heaths were evident—one, a very fine bush about eight feet high of E. caffra, being particularly noticeable, as it was beautifully flowered from base to apex. In the grounds were numerous exhibits of greenhouses, boilers, lights, frames, horticultural sundries, etc., while specimens of plant evolution and interbreeding, as well as plans of gardens, etc., were to be found in some of the corridors of the casino. On the whole, the exhibition, although singularly poor in really new plants, was the finest exhibition of horticultural skill that has ever been held in Ghent, and it will live in the memory of those who saw it for many years to come. W.

THE GREAT GHENT QUINQUENNIAL EXPOSITION.

Fig. 3—One of the Azalea Displays.

Society of American Florists.

THE QUESTION OF PLANT REGISTRATION.

So much matter has been published of late upon this subject, so much sharp criticism made, and so many have evidently failed to appreciate the purpose of plant registration that it seems desirable that the position of the society upon this point, as understood by its officers, should be made plain.

Many of the recent writers seem to confuse the registration of a name with a certificate of merit. The writer's idea of the matter is that the act of registry has to do mainly with the ownership of the name, and in this connection the value of the plant is of no importance.

The registry of a name is an announcement to the public that a certain person has selected that name for a variety of some class of plants, and equitably vests the ownership of that name in the person registering it, always provided that some other person has not previously selected the same name for a variety of plant of the same class. The value of the plant to which he proposes to apply the name does not enter into the proposition at all. The publication of an application for registry is notice to the public at large, and the main purpose of making such publication is to cause anyone having knowledge that the same name had previously been used for a variety of the same class of plants, to make that fact known.

The duplication of names, the writer ventures to assert, has been in ninety-nine cases out of one hundred, a matter of oversight or error and not an intentional deception, and while there have been many cases, since the society first started to register varieties, in which application has been made to register a name previously used for another plant of the same class, the writer does not believe that there has been a single instance in which, when the facts were brought out by the publication of the application, the duplicate name has not been promptly withdrawn and never subsequently made use of by the originator in any way. Everyone will recall numerous instances of this kind during the past few years.

We are not, of course, at this time discussing plant names from the point of euphony or utility. Setting this question aside, the only matters in which the horticulturist is interested regarding the name of a plant is, first, that it shall not be a name which has previously been applied to another variety of the same ciass; second, that it shall not be a new name applied to a plant which has previously been given another name. The present system of registry which should comprise a scrutiny of names previously registered by this society and a publication in all trade papers, followed by a publication in the annual report of the society, would seem to be about as far as it is feasible to go in guarding against the first error and has, the writer believes, proved very efficacious so far.

THE GREAT GHENT QUINQUENNIAL EXPOSITION.

Fig. 4.—In the Palace of Azaleas.

When the time comes that the society has ample funds at hand, has greenhouses of sufficient extent and growing grounds to supplement them, and has in its employ and under its control a corps of expert growers and plantsmen and a large collection of growing specimens, as well as a complete herbarium, it will then be in position to investigate matters pertaining to the identity of plants with a reasonable possibility of certainty in the results; but to undertake such investigations, attempt to do such work and assume to pronounce authoritatively upon such subjects now, will inevitably lead it into error; its work will be discredited and more harm will be done in the long run than any possible good which may be accomplished.

The publication of these applications for registry has brought cases of renaming to light in the past and will do so in the future. It is, of course, desirable and is the intent of the society to require full information as to the origin of plants for which registry application is made, and to require a reasonable description of the same, so there are not likely to be many cases in which a second use of the same name will escape the sharp eyes of the many shrewd plantsmen who read the trade papers.

While registry is made after waiting a reasonable interval subsequent to publication, yet there is nothing to prevent complaints being filed at a later date, and while the writer is inclined to think that a registry once made and entered must stand unless properly withdrawn, yet, in case of a proved error, in which the person making the registry refuses to withdraw it, it would be the duty of the secretary to make public in the press and to print in the annual volume in connection with the registry, a full statement of the facts.

It is accepted in all matters of plant naming that priority of publication establishes the name. Registry by the S. A. F. fixes and records the date at which each name is selected, provides a way to authoritatively settle disputes in subsequent years, and gives notice to all persons subsequently desiring to name plants of the same class, that the name in question has been used and is to be avoided.

The foregoing sets forth, as far as the writer understands it, the present intent of plant registry by this society. Further than this, under present conditions, it does not seem either feasible or desirable to go. The submission of all applications for registry to the nomenclature committee has been suggested. It might be well to state that the society at the present time has no nomenclature committee, and it would seem a matter of great difficulty to get a committee of this kind, which would have to consist of men of great knowledge and be provided with facilities for growing, comparing and testing varieties. It would seem, I repeat, a matter of great difficulty to get such a committee, who would undertake and carry out the vast amount of work which it has been suggested should be loaded upon its shoulders, as the members could be given no adequate compensation for their services.

Another question would be the long delay which would occur before any plant could be registered, and also the hostility of the introducers, which would surely follow any attempt to put burdensome restrictions upon them.

W. N. RUDD, Secy.

THE GREAT GHENT QUINQUENNIAL EXPOSITION.

Fig. 2—"In Frascati" Replica of Exhibition of 1808.

Forcing Tree Peonies.

In the long list of hardy plants there are few subjects that can compare with the Moutan peony as regards easy culture, and the manner in which it adapts itself to flowering in pots, says a correspondent of the Gardeners' Chronicle in its issue of May 2. I doubt if there is any other plant having flowers of equal beauty that can be had in bloom so early in the year by gentle forcing. Undoubtedly there is a great future before it for forcing purposes, and I see no reason why it cannot be retarded in a manner similar to that which proves successful in the case of many other hardy subjects. Some of our leading nurserymen offer them in pots at reasonable prices already prepared for early flowering, but by many growers their value in this direction is overlooked.

With generous treatment they will live for years, and keep increasing in size. I have had plants in 16-inch pots with 20 magnificent flowers open at one time, and these easily obtained early in February, the flowers being little less in size than those developed in the open; ample foliage appears before the flowers expand, thereby increasing the utility of the plant for decorative purposes.

Plants growing in the open may be lifted and gently forced, October and November being the best months for their transference to pots, and when potted they should be placed in a cool peach house. Plants, however, treated in this way seldom flower again for two seasons following. A temperature of 55° to 60° is necessary to flower them by the month of February.

Established plants may be brought into flower at the present time with little artificial heat, but a cold frame or cool house should be allotted them after flowering is over. By so doing a check is avoided, and flower-buds are formed early for the succeeding season's display. When the weather is warm, the plants should be placed outside and exposed to full sunshine.

PORTLAND, ORE.—Improvements at Halladay park are now under consideration and propagating houses are to be erected in Columbia park. Preparations for the rose festival are well advanced and this promises to be a great event.

Chicago Parks in Early May.

WASHINGTON PARK.

The principal attraction at Washington park, Chicago, just now is the flower garden in front of the large conservatories where there are 30,000 tulips in 22 of the best and showiest bedding varieties in full beauty. Thousands of visitors thronged this part of the park on Sunday last and were enthusiastic and loud in their praises of the excellent show put up. The frost of the previous night, according to E. Kanst, had taken a little of the color out of the flowers but they were very bright and beautiful even at that, the yellows, dark reds and pure whites being especially admired. The varieties have been well chosen to flower simultaneously and the show is certainly a gorgeous one, well set off by the deep green of the fresh young grass and the varied tints of the young foliage on the trees and shrubs around.

TULIP KEIZERSKROON, IN WASHINGTON PARK, CHICAGO.

In the conservatories there is a fine display of flowering plants while the palms and foliage plants in the rotundas look well. Among the showiest of the flowering plants is a fine batch of calceolarias in varied and good colors, well grown and flowered. There are also some excellent hydrangeas and still a fine lot of azaleas and cinerarias left. Coleuses are quite a feature in one of the connecting houses and here also the fine collection of succulent plants obtains a good deal of attention from visitors. The quaint looking old Bowiea volubilis, with its long twining stems is also interesting and a number of fine old plants of genista in the back are very showy now. Many other flowering plants are at their best and the display is a very bright and effective one. In a hasty look through the propagating houses we thought that the bedding and other stock never looked better. The geraniums are fine stocky plants in all leading varieties and just coming into fine flower. There is an immense stock of cannas, coleuses, alternantheras and the many other plants that are used in the large beds all in fine shape, while a batch of fuchsias, young vigorous plants, naturally grown, are considerably above the average. Ferns in great variety, palms and all the many fine foliage plants needed for the embellishment of the conservatories and various offices are coming along in grand style and the whole place is in excellent order.

LINCOLN PARK.

In Lincoln park there are many grand varieties of tulips used, but the varieties are not flowering simultaneously and this gives rather a patchy effect. That grand variety, Kiezerskroon, is in perfect condition and its fine appearance under such untoward weather conditions as we have had this season should render it very popular another season. King of the Yellows is a most telling color, finer than Yellow Prince, but slightly later. The old Vermilion Brilliant is in grand shape here, also La Reine (white), which is well displayed around the fountain in the center of the garden. Some large mixed beds are also very fine and the beds of Coleur Cardinal will be grand in a few days should the weather improve. This is a deep colored tulip of great promise. Other white varieties are White Swan and White Hawk, but they are too late for use with the other varieties noted. Some hyacinth beds nearer the conservatories are pretty, but the alterations have apparently thrown surface water here and the flowers are not as good as they otherwise would have been. Altogether about 50,000 bulbs were planted, and it is a great pity the weather has been so bad that visitors could not enjoy them as fully as in other years.

In the conservatories there is a bright and beautiful display of all the popular flowering plants, the splendid lot of pelargoniums being now in full beauty. Azaleas are still flowering freely, also the stellata forms of cineraria. Fuchsia syringæflora is among the out of the way plants seldom seen. It is flowering here freely in large loose heads of pinkish flowers, totally distinct from the florists' varieties. The ferns and palms are in fine shape, fresh and green looking, and the various ferneries are well arranged. Alois Frey is more careful than some others in naming his plants correctly, and the interest to the general public is greatly increased. Calceolarias are especially fine here, the plants large and well flowered, of various and good colors and an excellent strain. Among the stove plants there are fine specimen anthuriums and a nice variety of crotons, acalyphas, coleuses and various others. The whole are well arranged and decidedly worth a visit.

Easily first in the esteem of the general public are the orchids. Just now there is a varied and interesting lot of plants in flower and among those noted in a hurried look around were fine forms of Cattleya Mossiæ, C. Mendelii, C. Skinneri and Skinneri alba and the charming little C. citrina. The Mossiæs are good, well marked varieties and the plants finely flowered. Odontoglossum citrosmum is very well done and besides the type we noticed grand spikes of the variety roseum. The showy Lælia purpurata is in good order, also the quaint little Leptotes bicolor. To those interested in botanical species the singular Bulbophyllum barbigerum, with its almost lifelike flowers, always in motion, will appeal. It is perhaps the most singular and quaint in all this wonderful family of plants. The seldom seen Cyrtopodium Andersoni is in flower here also many fine dendrobes, including D. superbum.

TULIP COTTAGE MAID, IN WASHINGTON PARK, CHICAGO.

D. primulinum and several hybrids of the D. Vannerianum type. In the growing quarters the cattleyas look remarkably well, while the dendrobiums are making excellent roots and growth. We noticed a nice plant of the pure white variety of Coelgyne cristata flowering in the house devoted to this and the Mexican lælias. There is a grand lot of bedding and other stock coming on in the propagating houses, the geraniums looking exceptionally well, while ferns, foliage plants of all kinds and palms are in the best of condition.

ESTABLISHMENT OF A. N. PIERSON, CROMWELL, CONN.
No. 2 Range of 300,000 Square Feet.

WITH THE GROWERS

A. N. Pierson, Cromwell, Conn.

Connecticut has been called "the land of steady habits" and in the generally accepted meaning of that phrase, industry and thrift are synonymous with steady habits. The two ranges, comprising 700,000 square feet of glass, of A. N. Pierson, at Cromwell, are fine object lessons of study and intelligent effort, along the lines of commercial horticulture.

Though the illustrations, herewith shown, give an idea of the work being carried on, it was impossible to secure a photograph that adequately illustrates range No. 1, in which there are 400,000 square feet of glass, though it does show a sea of glass stretching away to both right and left. In No. 1 are located the palm houses, a very large area in roses and the rose grafting house; the forcing houses for lily of the valley and other stock and the bedding plant department. with a great variety of general stock. Here also are located the offices, such a business requiring commodious office room, and the cold storage plant, where the temperature is kept right by the automatic system, which starts the ammonia pump whenever the temperature rises to a certain point. A feature of the heating of this range is that there is both a steam and hot water system, which run parallel in all the houses. Both are operated in cold weather, with the usual adjustments to suit varying conditions. In the comparatively mild weather of spring the hot water is shut off and what heat is required is furnished by steam. At No. 1 range there are five hot water boilers and seven steam boilers, one of the latter furnishing power for the various machines about the place, and another being used as an economizer. A blower drives the smoke from the other furnaces through the economizer and the heat that would otherwise be lost is utilized and there is one less furnace to fire. Two other large blowers are used for forced draft on the furnaces; soft coal is burned and there is always an advance supply so large as to make the matter of a coal famine an impossibility. All the boilers are of large capacity, several being 150 h. p.

Leading features of the place at this date, May 7, are the great stocks of rose, chrysanthemum and bedding plants, from which daily shipments are made, and a large stock of plants coming on for Decoration day bloom. Houses that were filled with lilies are now in stocks, spireas, candytuft, etc. This stock will be succeeded by chrysanthemums, of which about 100,000 plants will be grown for flowers. It is estimated that a total of 450,000 chrysanthemums will be propagated by the close of the season. Last season 245,000 young chrysanthemums were sold, exclusive of those used for home planting. The rose grafting house is a very interesting feature of the range. One hundred and sixty-two thousand plants have been grafted this season, comprising, largely, Killarney, Bride, Bridesmaid and Richmond.

As must necessarily be the case in a range which is so successfully conducted, everything is vigorously pushed. Since Easter a rose house 40x400 feet, has been planted, with a fair proportion of the following varieties: White Killarney, Mrs. Jardine, My Maryland, Enchantress, Queen Beatrice and Mrs. Potter Palmer. White Killarney is well thought of and about 4,000 plants will be grown this season. Rhea Reid is also being planted. Of Killarney there are now on the place over 25,000 flowering plants, and of Bridesmaid there is one house alone that holds 5,000. There are four 300-foot houses of American Beauty and five 200-foot houses of Richmond. For lily of the valley, there is a 275-foot forcing house, of average width, and in the season when it is most in demand other space is utilized. The pips are forced on benches running the length of the house, and the average planting per day in the course of the year is 5,000 pips. Though great numbers of pips are imported and placed in cold storage there is also a home supply. On Mr. Pierson's large farm there is six or eight acres devoted to the culture of lily of the valley. There are successive spring plantings of the stock pips, each planting being given three years' growth, when they are dug in the fall and placed in cold storage. Some bloom is cut from this outdoor stock but that is merely incidental and not the main object.

Of the many interesting features of this place none is more noteworthy than the immense number of young plants that are successfully propagated, packed and shipped to all sections of the country, reaching their destinations with but a minimum of breakage and loss. Last year an order was filled for a well-known firm of Dallas, Tex., consisting of 15,000 grafted rose plants, and in the whole lot the breakage did not amount to 100 plants. In one day of this season there were shipments aggregating 32,000 coleuses and though that day was a record one, it illustrates the capacity for propagating and shipping stock. In the management of this great business Mr. Pierson is ably assisted by his son, Wallace Pierson. He has the personal supervision of range No. 2, which is located some distance from range No. 1, and has an area of 300,000 square feet. It is at this range that the chrysanthemums are propagated. There is also an extensive area in roses and carnations at range No. 2. Last year 170,000 carnation plants were propagated and 100,000

ESTABLISHMENT OF A. N. PIERSON, CROMWELL, CONN.
House of Coleuses.

were sold as young stock, leaving a surplus for home planting. Carnation, as well as rose planting, is now being pushed. Noteworthy items in this work are the planting of 15,000 Winsor and 10,000 White Perfection for home flowering. In range No. 2, in addition to the 17 houses 300 feet long and ranging in width from 18 to 40 feet, there is an asparagus house

ESTABLISHMENT OF A. N. PIERSON, CROMWELL, CONN.
Grafting House Showing Frames and Young Stock.

560 feet long and of average width, the string capacity for A. plumosus nanus being 22 feet. Great quantities of A. Sprengeri are also grown in this house.

At range No. 1 ferns are grown in variety. Adiantum Farleyense being very noticeable. It has been the aim in this sketch to deal with the stocks that are most extensively handled, but there are important features that have not been mentioned in detail. As will be seen from the illustration of the large palm house, there is a great stock of palms, all the leading commercial varieties being cultivated. Orchids, pandanus, Ficus elastica, F. pandurata and many other foliage and ornamental plants are grown. In a building near the heart of range No. 1 the offices are located, including the private office of Mr. Pierson. Four bookkeepers are employed and there is an order and a shipping clerk, with assistants. The packing, shipping and storage rooms are located in the same building. Concrete vats have recently been constructed for the cut flowers and by a simple, yet ingenious arrangement of perforated and bottomless jars, and pipes around the vats, fresh water constantly circulates about the stems of the cut stock.

Throughout the range, as fast as the necessity arises for new benches, they are being constructed of concrete and in repairing and refitting it is also being used wherever it will do the most good. At the present time the working force of the place consists of 200 persons. In this is included a number of mechanics, as there are machine, blacksmith and carpenter shops, and a sawmill, but little work going outside that can be conveniently handled on the place. About 50 neat cottages have from time to time been erected; as Cromwell is not a large town and as a matter of convenience for the help, it became practically a necessity to build comfortable dwelling houses. Going away from the roar and bustle of a great city, it was restful and refreshing to look on the green fields and noble shade trees of Cromwell, as well as its many handsome homes and grounds; but doubly interesting to those of us who are interested in flowers and plants is this great enterprise, which in a comparatively quiet and secluded spot, has been brought up to a high standard of perfection by the indomitable energy of a man still vigorous in mind and body.

Poehlmann Bros. Co., Morton Grove, Ill.

No addition to the glass structures was made at the great plant of Poehlmann Bros Co., at Morton Grove, Ill., last year, but a most imposing and useful structure, comprising under one roof offices, cut flower rooms, refrigerator plant, packing rooms and shed, was erected, which forms a fine finish to the A plant. We were especially interested in the cool room facilities. There are four rooms, each 18x20 feet. The inner or cooler structure is kept around 26° and here are stored the bulk of the stock of 600,000 lily of the valley pips which the firm handles to enable it to keep up its cut of 1,500 or so of flowers daily. The next room can also be kept at the same temperature if desired, or kept slightly warmer for the storage of cut flowers. The other two rooms are also used for cut flower storage and are excellently fitted for the purpose, the temperature being kept around 36° to 40° according to the flowers. The ice-machine is run by an electric motor, the power for which is generated on the place. A capital flat for the use of the foreman has been built on the upper floor, thus enabling him to live close to his work, a very important point.

The excellent stock grown on this place is so well known that one hardly needs to describe it. Everything is in the pink of condition, from the immense carnation range to the grand benches of roses and downwards. The American Beauty houses are just now very interesting. The cut was not particularly heavy at the time of our visit, but there were numbers of shoots just budding and hundreds of others coming on. The plants are remarkably clean and healthy and cutting will be very heavy within the next few weeks. The young stock in both plants is in excellent order. There are about 125,000 young American Beauty plants in the A plant in various stages, some just rooted, others in small pots and the earliest batches in 3-inch, but all equally healthy and promising in appearance. Add to this somewhere around half a million young carnations in all the best and most popular market varieties, besides chrysanthemums, apparently innumerable, and some idea of the extent of this firm's trade in young plants can be formed. The increase in this branch of the trade has been brought about by the policy of the firm, for only what is good enough to plant on its own benches is good enough for its customers.

The carnation range here has been frequently described and we have never seen it in better condition than now. Beacon and Victory grown side by side here formed an excellent opportunity to compare the two. As seen here Victory has slightly the advantage in color, but Beacon is more free. On one plant we counted the stubs from which 14 flowers had already been taken, and the plants, apparently, were not set any wider apart than those of Victory. Both are grand varieties without a doubt and will long be in the money making class. Toreador

ESTABLISHMENT OF A. N. PIERSON, CROMWELL, CONN.
Palm House 67x240 Feet.

looks like a glorified Prosperity, its flowers large and very showy. White Enchantress, White Perfection and other popular kinds, including some fine benches of Winsor, were also noted in the best of condition. Chrysanthemum propagation is being rapidly pushed, the stock plants and cuttings looking hard and full of vigor.

The Easter lilies are grand this time. Heavy cuts are being taken from L. multiflorum and there were very large lots of L. giganteum grown for Easter. A heavy shipping trade in pot plants is done here around Easter, special cases being made to carry 20 plants, and August Poehlmann says that L. giganteum is the best variety for this purpose. L. multiflorum showing a disposition to give way at the tips of the leaves. Besides those noted there are other large lots of plants just breaking through the soil as a constant succession of this flower is kept up here the year around. Poehlmann's lily of the valley is famous and looks remarkably well; it is grown in quantity in low narrow houses and a heavy cut is taken daily.

The roses at B plant are in grand shape, splendid growth being made on all the popular varieties. Cardinal is very fine here, large handsome flowers, of a pretty deep red, being produced on long stems with heavy deep green foliage. The plants are both one and two year-old and the older plants look even better than the young ones. Mrs. Potter Palmer is proving an excellent variety, its deep pink flowers being very popular. Richmond is grand here, so are Bride and Bridesmaid, bench after bench showing the same rude health and producing grand flowers and stems. It would be impossible to find a more even and excellent lot of roses than are here in this immense range of houses. There is not an insect to be seen, or a sign of mildew, while the great healthy shoots coming up from the base of the plants in all directions give promise of great things later. The young stock, both grafted and on its own roots, looks just as healthy and vigorous, and here again immense numbers are grown. We were much interested to note that compressed air is used to dislodge the old leaves from the plants, thus saving the labor of hand-picking or the danger of using the hose. The hose, in fact, is used but the water is first blown out of the system and the air is driven in, the ordinary water faucets being used. Another interesting point is "cooking" the manure here. Perforated steam pipes are laid in the chambers where the manure is thrown for steeping, this ensuring that all the fertilizing elements are well soaked out of it. This seeps through and screens itself as it falls into a large vat-like structure from which it is pumped to the houses as required. These are only a few of the interesting points about this splendidly equipped and up-to-date plant. A look around it is quite an education and each time we visit it we leave with more admiration for the excellent manner in which it is conducted.

LYNN, MASS.—A. B. Madison, a florist, left his coat in the dressing room at St. Stephen's church, and while he was absent for a short time somebody stole his gold watch and chain. The police are attempting to recover the stolen jewelry.

ORCHID NOTES.

THE yellow lycastes are frequently seen now, and these old-time favorites are worth attention.

SOME of the best growers of dendrobiums give the plants practically outdoor treatment in summer.

THE hybrid phaiuses, when they become sufficiently plentiful, should prove useful to cut flower growers.

The Most Useful of the Cattleyas.

Abstract of a paper read by Geo. McClure, Jr., at the Buffalo Florists' Club, May 10.

The cattleya is an American orchid found growing from Mexico to South Brazil. Nearly all of the labiate cattleyas are natives of northern South America, while the others are chiefly from south Brazil. The idea generally prevails that cattleyas, and in fact all orchids are difficult to cultivate. This idea is entirely without foundation, being induced by the common belief that there is something uncanny or mysterious about orchids. The cattleya, or orchid is a very natural plant and will respond to natural treatment as readily as most of our common plants. While it would be a mistake to say that the culture of a great many varieties in the same greenhouse would be easily accomplished, yet a little study and observation would enable any enthusiastic amateur to secure excellent results, with the well known cattleyas. Greenhouses specially built for cattleyas are not necessary; any light greenhouse, which is not too high, will prove suitable. The plants need not occupy valuable space on the benches, but may be suspended from the roofs of greenhouses devoted to a mixed collection of plants, where a temperature of from 60° to 65° is maintained, and in this way will prove an acceptable by-product.

HOUSES FOR CATTLEYAS.

If a greenhouse is to be built for the express purpose of raising cattleyas, it should be designed as low as possible. If the greenhouse is narrow and built to accommodate two stages, the direction at which it is built is of no consequence, but if the house is high, with three stages and two walks, it should, if possible, run north and south, so that both sides have the benefit of equal light in the winter, which is very essential. The central bench in a 3-bench house is usually broad and should be raised in the middle for economy of space. The rasing of the plants in the center stage would shade half of the plants in the winter, if the house ran east and west.

The matter of shading is an important one; with a small collection, in a small greenhouse, lath frames could be made about the size of hot bed sash, or just large enough to reach from the ridge of the house to the eaves. The rough laths of the plasterers could be used, if strict economy is desired; otherwise planed lumber would be more desirable, as it could be painted and be more sightly and durable. The laths should be spaced according to their width; there should be as much light as shadow. Laths wider than one and one-half inches should not be used. The

CATTLEYA TRIANÆ.

frames should be merely laid on the glass but not fixed to the house, as they should be removed in the evening and on all dull days. During the early spring when such a shade would be too heavy, a temporary shade may be secured by spraying the glass with a lime wash to which a little salt has been added. This shading can be easily removed with a hose, when the lath shading is to be used. No shade should be used in the dull winter months.

CULTURE.

The failure which so often attends the raising of cattleyas is nearly always due to ignorance of the conditions under which the plants grow in a state of nature. Every one knows that there is a wet and dry season in the tropics and many believe that the dry season is more rigorous than it really is. Although the rains cease, the condensing of the moisture in the humid atmosphere of the tropics, results in a heavy dew, which sustains plant life during the resting season. This condition is quite different from that of a greenhouse in the winter, where excessive firing dries up the atmospheric moisture and causes the pseudo-bulbs to shrivel and the plant to lose its vitality. The pseudo-bulbs should never be allowed to shrivel. Water should be given occasionally during the resting season and the plants should be syringed lightly on all bright days. The resting season of the cattleya begins after the flowering period, or after the growth is matured, at which time the temperature should be kept several degrees lower if possible.

COMPOST.

As a rule cattleyas should be repotted every two years, and topdressed every alternate year. The best material for this purpose is orchid peat or osmunda fiber, the roots of the royal fern. It is well to insist on getting young peat from the dealer. It should be of a brownish color. When the peat is old it is very wiry and black and is not suitable. No other potting material is needed for cattleyas. The majority of orchid raisers use a mixture of peat and sphagnum moss, but the moss soon decays and causes the roots to rot, especially when the watering is done in a careless manner.

Sphagnum may be used with peat when the latter is very old and wiry. The advantage in using peat is that it does not decay as rapidly as other materials. Before using the peat, it should be chopped with an axe or hay cutter. It should not be chopped very fine and the fine particles should not be thrown away, but should be mixed with the rough, open parts of the peat.

POTTING AND TOPDRESSING.

Although cattleyas are strictly epiphytic in a state of nature, yet, under cultivation, they grow better in pots than on either blocks or baskets. Baskets are useful and are preferred by some, but the system of mounting cattleyas on blocks or cork bark is very injurious and will ultimately kill the plants. No matter how strong the plants may have been, nor how well they may have succeeded for the first year or two, they will soon dwindle away and die. Mount the plants in half pots, or what are known as azalea pots. Make the hole in the bottom at least twice as large as the potter has made it and cover it with one large crock, no more. The old system of using a high pot and filling it up with small crocks merely furnishes a safe retreat for cockroaches, snails and woodlice, the principle enemies of cattleyas. Set the stems of the plants well above the rim of the pot, and ram the peat firmly around the roots. Test the firmness of the potting by holding the potted plant up by the leaves. It should not disturb the plant. The potting should take place just before the new growth commences, and while the roots are fairly dry. After the plants have been potted, water should be withheld for several days in order to allow the injured roots to heal. Water sparingly at first. In topdressing the plants, remove as much of the old peat as possible without injuring the roots, and work a good coating of finely chopped peat over the surface.

FERTILIZERS.

Manurial fertilizers for cattleyas should be studiously avoided, especially when sphagnum moss has been used with the potting material, as it causes too rapid decomposition, with the consequent decay of roots. However, with the system here advocated it is well to use what is known as the Cookson formula, which is as follows: Three ounces potassium nitrate; two ounces ammoniam phosphate, dissolved in three gallons of water. Use one liquid ounce of this solution to every gallon of water applied. If this fertilizer is used once each week during the growing season, the plants will be much benefited.

CATTLEYA LABIATA.

THE BEST KINDS FOR SUCCESSION.

By a careful selection of species and varieties a constant succession of bloom may be maintained. The excellent lasting qualities of the cattleya blooms enable one species to remain in bloom until another begins. The first to bloom is C. Trianæ and its varieties. It is a native of the United States of Columbia and is pre-eminently the best in the genus. It has many distinct varieties, which range from pure white to rose purple. C. Trianæ begins to bloom in early January and lasts until March. C. Schroederæ, which resembles C. Trianæ in size of bloom and habit of growth, is sometimes referred to as a variety of C. Trianæ. It is lighter in color than C. Trianæ and blooms a little later. It is also a native of the United States of Columbia and is invaluable, as it is the only cattleya obtainable in quantity to succeed C. Trianæ in time of flowering. It blooms from March to April.

The next cattleya of importance in the order of flowering is C. Mossiæ, a Venezuelan species, which is in its prime from April to May. It is a very prolific bloomer and for this reason it does not last long in cultivation, but with ordinary treatment it will last long enough to amply repay all care and expenditure.

C. maxima, a very distinct plant from Ecuador, blooms at various times during the winter months. Its lilac flowers and lip, lined with purple, are very freely produced. It is of easy culture and should find a place in every collection.

C. Mendelii blooms from the end of April to early June and is an excellent orchid, though seldom offered in quantity.

C. Warneri, a fine species from south Brazil, blooms during May and June. This species has been called a geographical form of C. labiata, as it is almost identical in color and markings. It differs only in time of flowering, as C. labiata blooms in the fall.

C. citrina, which also blooms during May and June, is a most distinct cattleya, commonly called the tulip orchid from the fact that its three petals, which form the outer envelope of the flower, and the two petals which form part of the second series of three, never open as fully as they do in the other cattleyas, and in this way they resemble yellow tulips. The flowers are lemon yellow and the crest of the lip is white. It has a

strong odor of citron, hence the specific name. The whole plant has a pendant habit and can never be raised any other way. Its foliage and pseudo-bulbs are glaucous. It is a native of the high altitudes of Mexico and it cannot be raised with a high degree of success except in a cool house. The price of this interesting orchid is very low and one or two plants can be raised in the coldest part of the cattleya house during the winter, and hung under a tree in a moist place during the summer. In this way it may be kept in health for several years. The fleshy flowers last a long time and one blossom will perfume an entire greenhouse.

During the months of June and July a number of fine cattleyas bloom. One of the best of these is C. Warscewiczii, (gigas) and its variety Sanderiana. It is a native of Venezuela, and produces more flowers to the spike than any other of the large lipped cattleyas. The flowers are large and beautifully marked. It is easily recognized by the two yellow eyes or blotches at the base of the labellum. This species should have a very decided period of rest in order to produce flowers in quantity.

CATTLEYA PERCIVALIANA.

C. Hardyana, one of the most valuable of the cattleyas, also blooms during June and July. It is a natural hybrid between C. Warscewiczii Sanderiana and C. Dowiana aurea, and is of course found in the same localities as the parents, but in limited quantities, and for this reason and its beauty it is highly prized.

Another fine cattleya, which blooms during June and July, is C. Dowiana and its variety aurea. The species is from Costa Rica and the variety is from the United States of Columbia and it usually blooms a little later than the species. The two forms are very much alike. The petals and sepals are nankeen yellow, and the lip is very large, crimson purple and beautifully lined with gold. They are more expensive than most of the cattleyas, but furnish a pleasing break to the prevailing pink and purple shades of the other species. They may be grown in the coolest part of the East Indian house or possibly in the warmest corner of the cattleya house, as they require a higher temperature than the other cattleyas.

A very fine cattleya from Guatemala, C. Skinneri, appears in June and July and sometimes a little earlier. Its purple flowers are produced in great abundance, and as the plant is very cheap and beautiful, it is a welcome addition to every collection.

Another cattleya of the two-leaved section blooming during June and July, is C. Schilleriana. It is a little gem from south Brazil. Its flowers are fleshy and lasting, and are of a dull purplish hue, with a little pink in the lip.

C. Eldorado is a beautiful Brazilian species and, as its name suggests, has considerable yellow in the lip. It blooms during July and August.

One of the cattleyas of the first rank blooms during August and September, C. Gaskelliana, and it is from Venezuela. Its petals are narrower than most of the large-flowered cattleyas, but its lip is large and beautiful. It might be called the best summer flowering cattleya.

During these months, August and September, C. granulosa also blooms. It is a Guatemalan species, and is very distinct; its fleshy flowers are characteristic of the two-leaved section to which it belongs. Its lip is very striking, white with small purple papillæ. Its sepals and petals are yellowish green and the flowers remain in good condition for over one month.

In October the well known C. Loddigesii and its variety Harrisoniana appear. They are almost alike, belong to the two-leaved class and are natives of Brazil. Their pink and white flowers are borne on rather long spikes, and they are among the best of their class.

During the months of October and November, two of the finest cattleyas make their appearance, C. labiata and C. Bowringeana. These two are found in every collection. C. labiata is the type of the labiate or large lipped group, and C. Bowringeana might be taken as the type of the two-leaved group, as it is commoner than any other of the small flowered species.

C. labiata, one of the best of the cattleyas, begins to bloom in October and continues during November. It is of easy culture and can be obtained in large quantities at very low prices. It is a native of Brazil, and is sometimes sold under the name of C. labiata vera to distinguish it from others of the labiate class, of which it is the type.

C. Bowringeana is a native of Honduras and much resembles the Guatemalan species, C. Skinneri, already mentioned. Its flowers are rose purple, with a lighter throat, and many are produced on each spike. It is perhaps the best of the two-leaved class.

The cattleya house during the last month of the year is made bright by one of the most beautiful of all cattleyas, C. Percivaliana. Its flowers are a little smaller than the other species of the labiate section, but its extremely beautiful lip more than makes up for this slight disadvantage.

Phlox Drummondi.

The brilliantly-colored varieties of Phlox Drummondi may be said to have taken the place of the verbena in the flower garden, says The Gardeners' Magazine, though even now they are probably less commonly grown than almost any of the well-known bedding annuals. The reason for this lack of popularity is probably not far to seek, for they want the best possible cultivation if they are to be really a success, thin, weedy, straggling plants—the result of letting them take their chance with other annuals—giving no satisfaction whatever. I once heard someone remark that Shirley poppies would grow on a dust-heap, a remark which was verbally true, though no experienced grower would be satisfied with the result. So with Phlox Drummondi. Few annuals give a greater variety of brilliant colors, salmon-rose, pink, deep crimson, bright scarlet, violet, yellow, blush white, pure white, etc., while some have dark eyes, some white, and some none at all.

Though a somewhat fragile plant, even when well grown, it is not nearly so much injured by summer storms as many of the summer flowers are, and, though it may be beaten down, and the blossoms splashed with mud, yet it soon recovers, and, given a renewal of bright weather, and a judicious watering to clean the flowers and foliage, it will show little trace of the rough treatment it has received after a few days. Some sorts grow only six inches in height, while others grow a foot or more, and lend themselves to very effective table decoration if suitably arranged, an operation which calls for a good deal of judgment.

These phloxes are only half-hardy annuals, and should be treated accordingly. To get them in bloom before the summer is too far advanced—and lateness of coming into flower is rather a drawback with many of the bedding annuals—they should be sown in gentle heat in light, rich soil in March, pricked off in boxes as soon as they are large enough to handle, and kept in a moderately cool house. If one has not a house at one's disposal, or cannot spare room, they may be sown in a cold frame at the end of March, and treated in the same way. In either case they should never be allowed to become stunted, either in the seed pan, or after being pricked out, for they never recover from it. The essential principle is to keep them growing straight on under the best conditions from the time the seedlings are up until they are put in their summer quarters. They should be hardened off gradually, not being set in full sunshine outdoors until their foliage has become thoroughly inured to the dry air. It is recommended to pinch out the central shoot when the plants are three or four inches high to induce a bushy growth and prolong the flowering season.

NASHVILLE, ILL.— Horticulturists of this county who have been puzzled at the damage inflicted on orchards in this vicinity recently have had the matter explained by Colonel J. W. Stanton of Richview, treasurer of the State Horticultural Society, says the Decatur Herald. Foliage and embryonic fruit were killed and appeared as if nipped by a heavy frost or intense heat. Colonel Stanton says that southern Illinois has been struck by the fag end of the storms from the southwest and that this damage was caused by electric currents, borne in the winds against the trees.

THE RETAIL TRADE

With the Chicago Retailers.

There was a decided slump in business just after Easter and all felt it more or less, but this has passed with the majority of the better class retailers, who are now doing a nice business. There is plenty of stock of a varied order and the prices are low with the exception of good carnations, which on some days have been quite firm. Peonies are a great help to retailers now and though possibly some of the earlier southern stock has not been quite first rate there are some very nice flowers to be had. Despite the dismal prophecies of some wholesalers as to the prospects we see no reason why the local grown peonies should not be good. The frosts so far have not interfered with their development and the comparatively cold weather has rendered the growth hard, so, unless something untoward happens, they should be at least as good as usual.

Cape jasmines are selling well and their low price causes surprise to many customers who confuse them with the gardenias from under glass that they have been paying more money for. They are a great help in making up cheap boxes and in decorations where a quantity of flowers is called for. Good yellow flowers are not overplentiful, as the bulb stock from under glass is getting over and daffodils outside have been rather badly battered by the recent storms. Gladioli are coming in fine and there is still a large number of good roses to be had. Funeral work is moving briskly and we hear from several retailers of good orders booked for coming weddings. Plant trade is still brisk, especially in the moderately good flowering stock. There are fine rhododendrons, hydrangeas and ferns shown and these move freely at good prices. One prominent retailer said that he finds an increasing demand as the season goes on for really good stock and that his customers seem not to mind what they pay provided they get what they want. Unfortunately this is not the case everywhere and some are complaining that patrons, being educated by some of the cheap and nasty business methods of department stores and street corner barkers, take a good deal of pleasing. Still, there is a good, bustling activity in the stores on fine days that augurs well and some of the kickers are apt to forget the bad effect that the miserable weather of the first weeks in May had on trade.

While nothing especially striking is being shown there are a few things worthy of note. The Eaton Flower Shop is displaying excellent plants and we saw here the finest gladioli of the season so far, also some splendid violets for so late in the season. The ferns are wonderfully fresh and healthy looking and Charles Balluff, as usual, has excellent displays in his windows. A. Lange is reaping the benefit of treating his customers well in regard to his $1 boxes of flowers. His two stores when we called were crowded and the window in the permanent store was finely decorated. Fleischman is showing grand hydrangeas and some noble pyramid and standard boys adorn this fine store. Harry Rowe has some excellent flowers shown in fine china vases of openwork pattern and is busy with funeral and wedding orders. John Mangel is showing good orchids and other first class cut flower stock and plants. At Hauswirth's fine plants in variety are shown as well as all the best stock in cut flowers. Gardenia plants are a specialty here and are used for cutting from as well.

HOUSE OF LILY OF THE VALLEY AT H. N. BRUNS', CHICAGO.

To Be Done Now.

IN THE GREENHOUSES.

Look out for red spider in American Beauty rose and take measures to destroy it at once.

Keep the young fuchsias regularly pinched and do not allow them to flower yet.

Keep seedling and other dahlias in a good clear light and allow plenty of air to prepare them for planting later.

Feed and water the old carnation benches freely now as they are probably quite full of roots and soon dry out.

Keep after the violet propagation until finished and do not allow the plants to lie about after being prepared.

Spray the young smilax regularly and keep insects in check and let it make a good bottom before starting up the strings.

Good winter flowering geraniums may be produced from cuttings rooted now.

Keep Phœnix Rœbelenii and similar palms away from the walks where they are constantly being rubbed by passers by.

Avoid feeding herbaceous calceolarias heavily while in flower.

IN THE STORE.

American Beauty roses and lilac sounds a peculiar mixture but they are very telling in funeral work.

The beautiful rambler rose, Lady Gay, makes a grand show in a colored straw basket of the same tint as its flowers.

Artificial green is best now for very sunny windows, but it must be good.

White lilac and pale mauve rhododendrons were recently noted used together and they made a fine combination.

Avoid showy and heavily flowered vases or flower pots, plain green or dull colored ones look much better.

A striking contrast is all right in ribbons and plants but a poor match in the same color is bad.

OUTDOORS.

Finish up all hardy herbaceous stock planting and pot up seedling stock at once.

Protect the young leaves and growths of the eremuri or the appearance of the plants will be spoilt.

Set out seedling plants of Brussels sprouts, cauliflower and late cabbage.

Fine stock of pentstemons and phloxes for next year may be produced by striking the young shoots now appearing and a little thinning will not harm the plants.

Thin out seedling poppies, cornflowers and other hardy annuals before they get too thick and crowd each other.

Look carefully after the asters for water if dry weather sets in and also for cutworms that are very destructive to newly planted stock.

Have protective material of all kinds ready to hand to guard against sudden severe frosts.

OBITUARY.

August L. Ehrle.

We regret to have to report the death of August L. Ehrle, at Carlstadt, N. J., April 28. Mr. Ehrle had been employed by the Julius Roehrs Co., Rutherford, in the orchid department, for 12 years. Beginning when only a boy, the love of orchids grew upon him, until these charming flowers became a part of his existence. Mr. Ehrle contracted a severe cold in his throat 12 months ago, which caused his untimely death. Being of a genial nature he was loved by all who knew him. He was 26 years old. He leaves a wife, who has the sympathy of all his friends. A.

Thomas Green.

Thomas Green, 87 years old, for 31 years a resident of Joplin, Mo., died at his home, 2127 Ivy street, at 12:45 p. m. May 3. For years Mr. Green owned the only florist establishment in Joplin, on the corner of Third street and Byers avenue. The greenhouse has since been razed.

He was born in Manchester, England, in 1821, and received his education in that country. In 1867, following the close of the civil war, he came to the United States. Shortly before coming to America Mr. Green married Miss Caroline Hathaway Taylor, on the Isle of Man. Miss Taylor was a relative of Shakespeare's wife and a relative of Benjamin Hathaway. Ten years later he came to Joplin. In the early pioneer days he purchased property in what is now the western residence district of Joplin. A few years later he started his flower gardens, and as these prospered opened a greenhouse, where he raised early vegetables. Before many years had passed the glass houses extended over the entire half block between Second and Third streets on Byers avenue. Here Mr. Green lived until five years ago, when he sold the establishment and erected a home in South Joplin. His first wife died about 10 years ago. He married a second time, and this wife, who survives him, was Mrs. Eliza Lillison of Eldorado Springs, Mo.

GRANITE chippings are said to cause high color in flowers if used in pots or borders.

NEW YORK papers are noting the fact (?) that geraniums are suffering a lack of popularity, their place being taken by hyacinths.

THE idea of "honoring the best mother that ever lived—your own," by wearing a white carnation was the occasion of a large number of these being sold, May 10, at Pittsburg.

DAHLIAS continue growing in popularity.

SEVERE FROST may occur in the middle west as late as May 25.

LATH HOUSES are gaining favor for the growth of many plants during the summer months.

SURPLUSES of bedding stock should be offered promptly, as some kinds are running short now.

SOOT.—Answering "G." we wish to state that soot is an excellent fertilizer either indoors or outdoors.

GREENHOUSE BENCHES should be thoroughly cleansed and whitewashed before they are refilled with soil.

THE dated yellow address label on your paper shows when the subscription expires. Please renew promptly.

PLANS for changes in and additions to greenhouses and heating arrangements should be completed at once and the materials ordered without delay.

ROSES, chrysanthemums and other young stock ready for planting soon depreciate in quality at this season and surpluses should be disposed of quickly.

DECORATION DAY, falling on Saturday this year, will be an unusually busy occasion for florists in many places and preparations should be forwarded accordingly.

THE liberal premiums offered for competition at the National Flower Show, to be held at Chicago next November, are attracting the attention of foreign exhibitors.

FLORISTS in northern cities are complaining seriously of the continued cold and unseasonable weather, which requires constant firing and consequent coal expense, while plant trade has hardly begun.

J. D. CARMODY, who recently visited Panama, was on his return called upon by the citizens of Evansville, Ind., to deliver an address on his trip. This highly interesting address was duly given and now appears in pamphlet form.

WE have received the preliminary schedule of the eighth annual exhibition of the New Haven County, Conn., Horticultural Society, to be held November 10-12. A good list of classes is given but the value of the premiums is not yet decided. Walter Koella, 58 Bishop street, New Haven, is secretary.

SECRETARY RUDD of the Society of American Florists is making a vigorous campaign for new members. A little slip printed in red attached to most of the matter leaving his office these days reads as follows: "Say, what's the matter with your getting one new member for the S. A. F. now?"

Behind the Times.

One of our regular advertisers writes as follows: "I am all sold out in many lines and many readers of your paper are bothering me now about stock they ought to have ordered two months ago."

Mothers' Day.

The "Mothers' day" proposition seems to have been taken up with spirit in Lincoln, Neb. We have several letters from prominent florists in the city and these point out that there was hardly a white flower to be had for love or money late on May 10. The custom of wearing a white flower in honor of the wearer's mother appeals to every man and every manly boy and we hope to see the idea extended. The idea in Lincoln appears to have originated with the secretary of the Young Men's Christian Association and Mayor Brown issued a proclamation recommending it. Senator Burkett introduced a resolution in congress concerning the celebration of the day as a national holiday but it did not meet with a very good reception.

American Rose Society.

JUNE SHOW AT NEW YORK.

A conference was held in New York last week relative to the June show of outdoor and other roses. This meeting decided the date to be in the middle or last week in June. President Simpson and others of the American Rose Society and the committee of the New York Horticultural Society attended this meeting. There has been a strong inclination at all gatherings hitherto to emphasize the desirability of the June exhibitions and this year it is now proposed to carry it into effect. "A rose for every home; a bush for every garden." At the time of the year when this motto can be brought to the eyes of a larger gathering than at any other period of the year, the American Rose Society invites the attention of all its members to this affair, requesting especially growers of outdoor roses of any and all varieties to be on hand and furthermore would be more than pleased to receive the support of any friends in the way of prizes for this show. A word to growers: Remember that this is a popular show thrown open to thousands of people who, at this season of the year, gather for miles from the most populous suburban district in all America—and this means cultivating business. So we want the rosarians of New Jersey, all of New York, Connecticut, Massachusetts, Pennsylvania and Maryland with as many from Ohio and further west as practical to send on what they can. We want the rich men's estates with their wealth of beauty and their educated gardeners to lend a hand and contribute of the glory of the products of "the leafy month of June" to the coming rose show next month.

BENJAMIN HAMMOND, Sec'y.

Meetings Next Week.

Boston, Mass., May 19.—Gardeners' and Florists' Club of Boston, Horticultural Hall.

Denver, Colo., May 22, 8 p. m.—Denver Floral Club, 323 Charles block.

STOCK SHORTENED UP.

The weather all last week was wretched, raining and continued cold, which put an entire damper on all business. It was hard to move stock at any price. Saturday, however, came a welcome change; prices stiffened and everything was cleaned up at good prices. Sunday saw the retailers fighting for stock, and good carnation stock was sold at three cents. The supply seemed to have been suddenly cut off and from now to Memorial day there is likely to be a shortage. Peonies are selling at four and five cents. Cape jasmine is selling at 50 cents per 100. Quite a little demand was caused for white carnations on Sunday, this being Mothers' day, a fad which it seems will grow. A white carnation in remembrance of mother seems to have caught on and will become quite a factor in trade as regards white carnations for that day. Hardy ferns are in much earlier than last year, and selling at $1.50 per 1,000; also wild adiantum, at $2.50 per 1,000.

NOTES.

The Horticultural Society has offered its services to the society ladies engaged at the charity carnival. It has offered to erect a tastefully decorated floral booth and to donate cut flowers to be sold by the ladies at their various booths. F. C. Weber, Geo. Waldbart, Otto G. Koenig and other florists have promised decorations.

All the plant dealers complained last week of the very unseasonable weather, buyers being scarce and afraid to plant out on account of cold weather.

Ostertag Bros. will be very busy this week. They have the reception to be given by the musicians, who have their convention this week. W. F.

AM. BEAUTIES

Killarney, Kaiserin, Richmond, Brides, Maids and Perles.

All planted in solid benches and the roses are grafted plants. At this time of year they produce much better flowers and stronger stems as the roots have more soil to work on. Give us a trial order and compare our stock with others.

Our Immense Crop of Carnations Is Still On

with prices down to $2.00 to $3.00 per hundred.

Bassett & Washburn,

GREENHOUSES, HINSDALE, ILL.

Store, 76 Wabash Ave., CHICAGO.

London.

Red and white roses sold well for St. George's day but the snowy, wet weather was against trade. General Jacqueminot is still the best seller, though Liberty goes fairly well at 35 cents to $1 per dozen. The need of a good white rose is sadly felt.

The thirty-second annual show of the National Auricula Society was held in connection with the Royal Horticultural Society's meeting April 28. James Douglas, the veteran grower, was first throughout, a great tribute to his well-known skill. Certificates and medals were awarded to several varieties. Cutbush & Sons exhibited St. Louis and Victory carnations and were awarded a Banksian medal. Paul, of Waltham Cross, had grand pot and climbing roses and W. H. Page had among other flowers fine Lilium Formosum. He considers it the best of the longiflorums. C. F. Waters showed 29 varieties of carnations arranged with Asparagus Sprengeri. H. Cannell & Sons, Swanley, Kent, had a fine display of zonal geraniums for which they were awarded a silver Banksian medal. Arabie (bright scarlet), Campania (salmon), Caronia (bright pink), Cenic (delicate flesh), Clevedon (orange), Cymric (purple self), Lady Warwick (white, pink picotee edge), Lucania (cerise and scarlet), Lusitania (deep magenta), Mauretania (white, salmon eye), St. Louis (scarlet) and Carmania (salmon rose) were the best dozen; all of 1907 introduction.

AT J. SWEET'S WHETSTONE.

This firm has some 30 acres of trade premises, chiefly glass, and every house right up to date. Every year one house is built. This is due to the fact of vines being planted, and as in three years they cover the roof, plants being grown underneath and light being essential, enlargement must take place yearly. Cinerarias are of the right stock, the firm's own selecting and hybridising, colors of the best. Of the newer things on trial is a good batch of schizanthus, re-selected stock, this selling in the market at $3 per dozen; color suits the ladies. Hydrangea Mareisi, the blue variety, is done well. Roses are largely grown. Hiawatha is in splendid condition as also Dorothy Perkins. As instancing the quantities grown, one span contained 20,000 heaths for next year's trade.

FRANCO-BRITISH EXHIBITION.

A very wonderful 140 acres, and while all is at present very busy, by the opening date there will be plenty to interest all. The horticultural section should be very fine as a strong horticultural committee is working. Schedules and catalogues of the shows are now going through the press. The Garden Club will be a strong link in the matter of horticulture. Sutton & Sons have the grass seeding in hand, while James Carter & Co. and J. Veitch & Sons, Ltd., have the planting, these names assuring us of the best work being done. J. A. Alexander, by no means a novice in horticultural matters, has charge of the office arangements at 56 Victoria street S. W., and he will supply all information.

S.

Poison Ivy.

Each recurring spring brings forth a fresh crop of people poisoned by poison ivy (Rhus toxicodendron) and poison sumach (R. venenata). It may interest them to know that the poison is reputed by some to be due to an acid called toxicodendric acid and by others as due to an oil called toxicodendrol. Whatever the cause of the poison, the intolerable itching may be allayed by a variety of alkalies. The old fashioned remedy was a poultice made by spreading soft soap on a piece of bread and applying it to the infected part. Now that soft soap has given way to the various bar soaps, the cheapest laundry soap will do just as well. Washing soda or sodium hyposulphite is recommended and painting the poisoned part with collodion has its adherents, also. Rhus poisoning and the disease erysipelas have many characteristics in common. Cows and sheep eat the plant without harmful effects. It is said that leaves of various species of sumach (rhus) have the property of expelling their resin with noticeable violence when placed in water, but like many another "it is said" nobody seems to have looked into the truth of the matter. We shall be glad if anyone can enlighten us.—American Botanist.

Nurserymen at Milwaukee.

On the way to the Milwaukee Convention you should travel from Chicago via the beautiful north shore route of ***The North-Western Line,*** and thus have an opportunity to enjoy the beauty of a magnificent chain of Chicago's suburbs, with glimpses of splendid landscape gardening and a trip along the shore of beautiful Lake Michigan.

Twenty-one trains a day between the two cities

THE NORTH-WESTERN LINE

SHIPPING DEMAND HEAVY.

Shipping demand was very heavy toward the last of last week. Business gradually increased until Friday when the market held firm on almost all classes of stock. Saturday being a bright, clear day brought a good trade, both locally and for shipping. Sunday last was the banner Sunday in many weeks, and the good demand continued into the fore part of the present week. Good American Beauty roses are rather scarce with a very good demand. Other roses cleaned up well on Saturday and Sunday, several shipping orders not being filled in full. Roses of all kinds have been exceptionally good for the time of year. Carnations seem to have come into their own again, the demand being about equal to the supply, and good shipping stock cleaning up every day. There is considerably more white stock than anything else. Double Hudson river violets seem to be about over, none having come into this market on Monday. The supply of bulbous flowers has also materially lessened. Lilacs are plentiful and cheap. No great number of peonies are coming in as yet, but what there are meet with a ready demand.

May 13.—Rain today has shut off the demand and the market is exceedingly quiet.

THE FLORISTS' CLUB.

The regular meeting of the Florists' Club was held at the Union restaurant May 7, President Kill in the chair. There was a good attendance considering the unfavorable weather. President Kill announced that Geo. Asmus had been appointed chairman of the sports and pastimes committee, which was instructed to arrange for a picnic in July. Four new members were elected, namely. Geo. Schuber, James Novak, J. L. Schillo, 418 Mohawk street, J. B. O'Neil, Elgin. W. O. Johnson, with the Foley Mfg. Co., was nominated for membership. F. F. Benthey, chairman of the board of trustees, announced that the Hartshorne fund now amounts to some $1,800 and that arrangements have been almost completed for the purchase of a house and lot in Joliet for the family.

NOTES.

Sam'l Muir's place, at 3530 Michigan avenue, is an attractive one right now. The huge window is filled (not too full to be artistic) with lilies and spireas. The greenhouses are full to overflowing with decorative and bedding stock. Even the cold frames are full of geraniums, crowded outdoors by the numbers needed for later bedding and window and porch box work. Mr. Muir grows his own seedling ferns, many pans bringing along their tiny plants under the benches. He brings along his dracænas, rooting same from his own stems.

F. W. Martin, at 280 E. Fortieth street, reports a flourishing spring business. Mr. Martin has about 8,500 square feet of glass and grows an assortment of decorative and bedding stock in which he does not only a good retail business, but also a wholesale trade on a small scale. A new house, 30x100 feet is in contemplation.

J. W. Breakey on Friday last moved into his fine new store at 3909 Cottage Grove avenue. This is just a few doors north of his old location. The building is a two story one built on a long time lease, expressly for Mr. Breakey. At the rear is an attractive show house filled with a variety of well grown decorative stock.

The home of James G. Hancock at La Grange caught fire May 4, and the firemen were unable to control the flames before the roof was entirely gone. Mr. Hancock is foreman for Frank Oechslin. Last Friday he removed his family and such household effects as escaped damage to Western Springs.

Philipps & Opitz, 3626 Cottage Grove avenue, have dissolved partnership, the business being continued by J. P. Opitz. Trade is reported good here. Toward the end of the week Mr. Opitz will open a branch store near the corner of Cottage Grove avenue and Sixty-seventh street.

Weiland & Risch have let the contracts for their new greenhouses, the Adam Schillo Lumber Co. furnishing the lumber and the John C. Moninger Co. doing the work. John Risch reports having an excellent crop in sight for Decoration day, both in carnations and roses.

A. Lange says he is contemplating a trip this summer to Paris to visit his friends, Jack and Mme. Harris, illustrations of whose beautiful home, the former Worth residence, were shown in our issue of last week.

Wietor Bros. are now cutting American Beauty roses of exhibition quality. In their greenhouses are already planted two new roses, including 5,000 plants of Mrs. Jardine and 2,500 of Rhea Reid.

Willie Updike, of Ypsilanti, Mich., was in town Monday and announced his intention of opening a first class retail store in that town in the near future.

Some extra fine Aristocrat carnations are to be seen at J. A. Budlong's. Phil Schupp says they are both busy and satisfied.

Six acres of carnations in the field is the result of this year's planting at Peter Reinberg's mammoth establishment.

C. A. McKellar says there is a fine lot of Cattleya Mossiæ now coming in.

PETER REINBERG, 51 Wabash Ave., Chicago.

Chicago Notes.

CONTINUED FROM PAGE 834.

The Ernst Wienhoeber Floral Co. had the decorations for the recent Herrick-Havemeyer wedding, and neither expense nor pains were spared to make the floral feature an artistic success. It was a home wedding. The mantel before which the ceremony was performed was banked with white lilac, prunus and Spirea Van Houttei. The country was scoured for miles around for all the available peach blossoms which were used, together with apple blossoms in profusion, throughout the house. Asparagus plumosus was the only green used. The bride's shower bouquet was of the lightest shades of Cattleya Schroederæ. The eight bridesmaids' bouquets were of flowering almond. The dining-room was done in pink, apple blossoms being used. For the center-piece there was a large handle basket of flowering almond.

Schiller, the Florist, is erecting a new store with greenhouse attached at 906 West Madison street, just opposite the present location. The building will be 30x50 feet and two stories high, while the greenhouse will be 25x150 feet. The new place will be ready for occupancy in September, when the old location will be abandoned.

The A. L. Randall Co. reports a good demand for wire designs. The expansion of the cut flower department has necessitated a rearrangement of the floor space. All the packing and shipping is now done at the rear leaving the entire front part of the store excepting the offices to the sales force.

N. C. Moore & Co., who have announced their intention of going extensively into the plant business, are about to place about 25,000 geraniums in 4-inch pots on the market. Foreman W. L. Smith, who has recently taken charge of this establishment, has his stock in excellent shape.

The members of the Benthey-Coatsworth Co. in this city claim that the report in our Cincinnati letter, printed on page 869 of this issue, in reference to the sale to Weiland & Olinger of their greenhouse plant at New Castle, Ind., is unfounded.

The J. B. Deamud Co. this week showed the first bachelor buttons of the season. An exceptional offering here is a fine lot of the salmon pink sweet peas, which are meeting with a good demand.

Last Saturday was Mother's day and every man was supposed to wear a white carnation in honor of his mother. The observance, however, was not so general as to be noticed on the market.

E. E. Pieser, of the Kennicott Bros. Co., says there is every indication of a crop of exceptionally fine peonies a little later. Those now coming in, he says, are in strong demand.

Michael Callahan, who has been foreman at one of the rose ranges of Poehlmann Bros. Co., has been engaged by the Stuppy Floral Co., St. Joseph, Mo., for a similar position.

The Foley Mfg. Co. has just issued a fine new catalogue and with its new factory in full running order is in excellent shape to handle all kinds of contracts in its line.

Frank Johnston, of Vaughan & Sperry's is at Crystal Lake, suffering a severe attack of gastritis.

Vaughan's Seed Store has just received three carloads of bay trees.

Visitors: H. E. Philpott, Winnipeg, Manitoba; W. G. Matthews, Dayton, O.; Louis Hartung, Two Rivers, Wis.; F. Stuppy, St. Joseph, Mo.; Jos. Pollworth, Milwaukee, Wis.; M. Shattls, with Lion & Co., New York; Ballard G. Shaw, of Shaw Fern Co., Pittsfield, Mass.; Chas. Hammer, Memphis, Tenn., saying he was enroute to New York; S. J. Dangel, representing Ellis-Chalmers Co., New York; Martin Reukauf, representing H. Bayersdorfer & Co., Philadelphia; B. Juerjens, Peoria.

Springfield, Ill., Florists' Club.

The local club at its regular May meeting held May 11, decided on holding a flower show in November, the exact date to be arranged later. It is the intention of the club to donate a part of the proceeds to city charities. A. C. Brown, Harry Drake and Frank Friedley were appointed to the committee to take charge of the show. President Rauth appointed David Wirth, A. T. Hey and Wm. Hamberg to serve on the finance committee. The club adjourned till the next regular meeting. A lunch and smoker followed the meeting. The club meets the second Monday in the month.

F.

Louisville.

STOCK OVER PLENTIFUL.

Business conditions since Easter have been very poor, with but few exceptions. The supply of stock has generally been very large, consequently the loss was very heavy. Roses are about all that have had a respectable demand, and the supply of these is getting large. Carnations find a fair demand, especially first class stock, but there are too many. Lilies have a slow demand, and can be had in great quantities. Lily of the valley has a very good demand, and the supply is a little short. Sweet peas have some demand, and are in good supply. Green goods are in good supply, with the exception of smilax, which is very scarce. The bedding people have had a very bad season so far, owing to the many rains and cool weather, but now the weather is very warm and they hardly know where to start first.

David C. Etheridge has opened a flower store at 216 Fourth avenue, with Mrs. Lipps in charge. The craft wishes him much success.

F. L. S.

FOR MAY AND JUNE WEDDINGS we offer extra select Lily of the Valley, Bride and Bridesmaid Roses, and of course a full line of all seasonable Cut Flowers and Greens. Try us. We have the stock and can take care of all orders.

WHITE CARNATIONS WANTED.

The past week saw practically no change in the market. Towards the middle of the week business slumped but by the end of the week everything cleaned up nicely. White carnations were in good demand Saturday, on account of Mothers' day, May 10. All stock that was fairly good brought $2.50 and $3; even at that price it was impossible to supply the demand. Some of the roses are coming in slightly mildewed. Lily of the valley and sweet peas were scarce items the past week. Snapdragon and peonies are more plentiful. Several are commencing bedding out this week.

NOTES.

A. Graham & Son are very busy booking orders for bedding stock. The greenhouses look as though Mr. Graham is better prepared than ever to handle the great volume of business that comes his way every year.

F. J. Stehle, Lorain, is shipping in some extra fine Harrisii lilies to the Cleveland Florists' Exchange.

The Cleveland Cut Flower Co., was the first wholesale house to handle peonies this season.

L. F. Darnell, of the J. M. Gasser Co., was in Chicago last week.

CANTON, O.—A good deal of Easter stock remained unsold, flowers seemed to have lost a part of their charm, at least they failed to attract the prospective buyers as they have in the past, or else those by panic pinched had their eyes set on their lean and scrawny pocketbooks.

TRADE DULL AND MONOTONOUS.

Business was very dull throughout the past week, though Saturday showed a slight improvement in demand. Sometimes the weather is blamed without cause but there was certainly a good case against it last week. Mark Twain's definition of New England weather was completely covered, which was, that "there was always plenty of it." The cut flower trade varied between monotonous dullness and complete stagnation, and, since the drenching rain of Thursday, landscape and gardening operations are completely tied up till the land dries. There was some decrease the latter part of the week in the arrivals of roses, but there seemed to be a corresponding decrease in demand. As for lilies, let us forget them, and place a great bunch of other lesser stocks in the same category. I note that in New England they are moving to preserve the wild flowers. Let the good work go on. Let us have a society for the preservation of the apple trees, the dogwoods, etc. "The scent of apple blossoms" looks fine in a poem but this barbarous onslaught on every tree that bears a blossom is mighty tough on the men who have invested their money in greenhouse glass. If this outdoor stock that is shipped in by the carload had any merit there would be less cause for complaint, but much of it has none. The southern lilac, for instance, seemed to be all burnt when it reached here and much of the local supply seems worthless. There are many rumors floating about as to associations for this, that and the other purpose, but what is most needed is an association that would put an ironclad ban on a lot of stock that is sent to market and also place it on any dealer who handles such rubbish. May 7 was a day to be remembered in the trade of this city. Rain came early in the morning and throughout the day it poured down and driven by a high wind, even a dog caught out in it was to pitied. It is needless to add that there was a general paralysis of business.

May 11.—There is a much greater activity today than has been seen in the market since Easter. This is partly accounted for by a shortening up in the supply of stock arriving, caused by a succession of dark and cool days last week. Carnations made a sharp advance, but as the present indications are for several days of bright sunshine, the supply is likely to be greatly increased before the middle of the week.

FLORISTS' CLUB MEETING.

The regular monthly meeting of the club was held in the Grand Opera House building on the night of May 11. Considering the fine weather, the attendance was rather disappointing. A resolution of sympathy on the death of Miss Dean, daughter of James Dean of Freeport, L. I., was adopted. Miss Dean was a popular school teacher of Brooklyn, and is mourned by a very large circle of friends.

A report from the outing committee was very encouraging. There have been numerous donations to the prize fund, and it is the belief of the committee that it will offer a better programme than ever before. The steamboat, the grove and the orchestra have all been engaged, and the way seems clear for an enjoyable outing. Chairman Rickards of the house committee reported favorably on the preparations for ladies' night and requested generous donations of flowers for the occasion.

P. O'Mara brought up the question of a correct census of the florists of the country. He read a letter from Secretary Rudd of the Society of American Florists, bearing on the question. The blanks sent out by the bureau of plant industry, Department of Agriculture, were brought into the discussion. Mr. O'Mara advocated co-operation as he thought it very important that there should be as perfect a census as possible. He said, however, that some of the questions as sent out by the bureau were evidently prepared by men unfamiliar with the subject as no florist could do more than guess at an answer to some of them. J. T. Butterfield said that he believed the directory published by the AMERICAN FLORIST Co. was the nearest to a correct list of florists of anything that has been published, and he advocated its use in the census work. Vice-president Marshall reported on the progress of bowling in the contest for representation at Niagara Falls. Mr. Marshall has offered two prizes for the best averages in the preliminary contest for choice of bowlers who will represent the club at the S. A. F. tournament. The following were proposed for membership: Alexander Hogg, John Herlihy, August Millang, Alexander Donaldson, John Meisen, B. Chadwick. The following were elected: Frederick Lentz, W. G. Badgley, Chas. Lynne, Thomas Kerr, E. H. Smith, Anton Schultheis, Jr. Giant white daisies and Madam Perrett pansies were exhibited by H. Beaulieu of Woodhaven and received a vote of thanks.

NOTES.

The window decorator at Geo. M. Stumpp's retail store, Fifty-eighth street and Fifth avenue, who I have previously mentioned as a genius, has recently completed what seems to be his crowning achievement. The center-piece is a rustic well-sweep with the old oaken bucket attached by a chain, resting on the crib. A pipe from beneath furnishes water. A summer or well house has been deftly constructed, the walls of which are covered with ivies and other climbers and creepers. In the foreground is a fish pond in which a great colony of goldfish and tadpoles disport themselves and all about the banks are plants and mosses, arranged with an eye to preserving the rustic scene. It is a very original creation and a fine tribute to the handiwork of the younger Stumpp.

Secretary John Young of the Florists' Club has issued the following notice: "Members will please take notice that Wednesday evening, May 27, will be ladies' night. The house committee is making great efforts for their pleasure, but the committee must know as soon as possible how many ladies intend coming, so that suitable provision can be made for their comfort. Will you kindly drop a postal immediately to Wm. C. Rickards, chairman, 37 East Nineteenth street, that you will be present and how many ladies you will bring with you. This is absolutely necessary, so that the committee will know how many to provide for."

Adolphe Le Moult, the well known Bowery florist, has issued and dedicated to his patrons a neat booklet containing a calendar for the month of May and many poetical sentiments, and explanations of the "Language of Flowers," the latter being the title of the booklet, which, though issued for advertising purposes, nevertheless shows literary taste and appreciation in the selections.

A well known department store of this city, which also has greenhouses and a retail florist shop, advertised: "A new holiday as inaugurated by the New York Federation of Women's Clubs, Sunday, May 10. The honoring of the best mother that ever lived—your own—by wearing a white carnation on that day. 100,000 white carnations on sale at a penny apiece."

S. Hanfling, of Russin & Hanfling, dealers in florists' supplies, sailed for Europe on May 9, where he will remain about eight weeks, looking after the business interests of the firm. It is expected that when he returns a fine line of novelties will be seen in their store.

Chas. Millang was adjudicated a bankrupt May 6 and the first meeting of his creditors is to be held May 22. The liabilities are placed at $7,242.97 and the assets $4,787.15.

Frank S. Hicks & Co. are now well settled in their new store, 39 West Twenty-eighth street, where their business facilities are much improved.

Albany, N. Y.

At the last meeting of the Florists' Club John J. Walsh, head gardener in Washington park, and J. Lang were admitted to membership. Thirty-two members were present at the meeting and a most enjoyable social time was had. Among the visitors was James H. Snyder, a violet grower at Rhinebeck, who is taking great interest in the club. The committee, appointed some time ago to get out a circular for distribution among customers, reported progress. The chairman of the committee, Fred A. Danker, had been unwell for some time before the meeting. The circular will contain simple directions for the care of the more common varieties of plants purchased from the local florists. The next meeting of the club will be held at the establishment of W. C. King, Madison avenue, June 4.

W. S. Egerton, who has been identified with the present park system here since its institution over 30 years ago, has handed in his resignation to take effect June 15. Superintendent Egerton gives as a reason for his resignation the constantly increasing extent of the park system with an augmentation of duties. The many friends of Superintendent Egerton will regret to learn of his determination to sever his relations with the park system of the city. R. D.

SAG HARBOR, N. Y.—Mrs. Russell Sage is having a lot of New Jersey soil brought here, believing that it will prove better for some shrubs and ferns she has imported from Germany and Holland. She expects to occupy the old Hunting mansion in a few weeks, and work on the grounds is being hurried. Sag Harbor people, with whom Mrs. Sage is very popular, are talking humorously of the "Jerseyizing" of Long Island, as they characterize the transference of the soil.

INTERESTING CLUB MEETING.

Prof. Charlemagne Koehler was the center of interest at the May meeting of the Florists' Club, held in Gude's hall May 5. Between the routine business matters, which engaged the attention of the members until a late hour, Prof. Koehler rendered selections from Italian operas and related some of his experiences in Ireland.

The Sunday closing bill now pending in congress was discussed at length, but no final action was taken by the club. The executive committee was given power to make recommendations. Those who took part in the debate were F. H. Kramer, W. F. Gude, Theodore Dietrich, George C. Shaffer, Nathan Hammer, and John Robertson.

At the suggestion of Mr. Kramer, president of the club, a vote was passed recommending that the club attend in a body a special benefit entertainment for Prof. Koehler, to be given at Rauscher's on the evening of May 19. Plans were made to raise money to send the bowling team representing the club to the national tournament at Niagara Falls. A luncheon was served after the business session.

MOTHER'S DAY CAUSES DEMAND.

The feature of the week was the rush of business on Saturday. It had been quiet all week but almost without warning a demand sprung up on Saturday morning which continued and kept the boys on the go all day long. Everything in white flowers sold out clean, the principal demand being for white carnations. It was the first celebration of Mother's day, when everyone, man, woman and child, was to honor the "best mother in the world, their mother," if happily they still enjoyed her companionship, by wearing a white flower or if she had passed away, wear a white flower in memory of her. It is proposed to make this an annual event to be commemorated on May 10 each year. This custom is said to have originated in this city, being the idea of a lady resident, which was taken up by the city press and spread in a few days so that it is said to have been observed quite generally in many of the adjacent states. Owing to the short time or notice that was given to it, its observance was not at all general here, when one takes into account the whole population. Yet the demand was enough to use up every white carnation in sight and was a godsend to the commission houses, where the whites had been hanging fire and had, for a long time, been the hardest to sell. It is hoped that with the favorable way in which the idea of Mother's day was received that it will become, in time, one of the great flower days of the year. Why could not the idea be carried out so that the last resting place of those who have passed away should have placed thereon a bunch of white flowers? It would be a beautiful custom and much might be done by the craft in an unostentatious way to bring it about. The cool weather of late has kept down the surplus considerably, still there is more than enough to go around and prices rule low. American Beauty has ruled a trifle higher, $2 being asked for the best, 50 cents higher than last week. Carnations also moved up until the fancy brought as high as $4. Spanish iris is in, $1.50 to $2 being the price. Lilacs are done and peonies are promised the latter part of the week with snowballs a day or two later.

NOTES.

The Florex Gardens are well satisfied with the product of their large house. The immense cut of American Beauty has been moved constantly and even now the demand is for more than can be cut. The braces and trusses of the house are being gone over and tightened up so as to make it as rigid as possible. An addition of 30x170 feet is being put to each of the two carnation houses which will double their present capacity.

Wm. McKissick filled a large order of carnations and spring flowers the past week. He says things are moving along well for the season. A crop of particularly fine American Beauty from one of his rose growers is the pride of his establishment at this time.

The Leo Niessen Co., is enjoying a good spring business. American Beauty is selling up close and an immense crop of sweet peas moves off lively. Some splendid cattleyas and lælias were seen here the past week.

E. Reid handles carnations in quantity and sends them out by more than the tens of thousand at one time. An order of 25,000 in one shipment a week ago still left him with a nice stock on hand.

John McIntyre handled a wagon load of lilacs each day last week. His white was very fine and equal to the best inside stock. K.

Boston.

COMPLETE STAGNATION.

A week similar to the one just past is not to be found in the annals of the flower business in the last 20 years and frequently the opinion is voiced that the present season is without precedent. Complete stagnation faces tradesmen who have products to market. Goods of all kinds are delivered to salesmen but there they remain until they are removed to the waste pile, the destination of approximately 50 per cent of each day's receipts. Unheard of prices now secure the cream of the season's favorites. The best of stock only is found salable, mainly because of the cheap rates prevailing. Carnations are rapidly falling behind in quality and sales except to street venders amount to but little worth noting. A very good selection of Killarney rose is available and the demand for roses is confined greatly to this and Richmond. The latter rose is showing the effects of the season and those now seen offer no comparison to the superior stock of the early part of the year. Gladioli, irises and antirrhinums are attractive purchases among a varied assortment of the season's novelties, and an abundance of sweet peas and lily of the valley lead in the class of smaller favorites. An excellent lot of cattleyas is coming in and are the only flowers retaining their normal market value. Five dollars per dozen is the prevailing price and little objection is heard from the buyers who realize the worth of this superb flower when seen in its present condition.

NOTES.

A. Roper's new carnation, Bay State, which, when displayed this winter, met with unanimous approval, is showing up splendidly. This is one of the many new varieties which the best authorities agree has come to stay, possessing those requisites essential in a commercial carnation and which a great majority of the newest varieties lack.

Welch Bros., who do a large shipping business with the most important Canadian cities, report the present season's trade a record breaker. Many new fields have been opened and in the flower business the prospects are very bright for the future.

Thos. F. Galvin is expected home during the week from Europe where he has spent the past month. B.

Massachusetts Horticultural Society.

The following are the awards at the exhibition of the Massachusetts Horticultural society, May 9 and 10, 1908:

Plants.—Calceolarias. Six varieties in pots: James Crosbie, first. Pelargoniums—Six named show or fancy varieties in bloom: William Whitman, first. Tulips—Late single, named varieties, one 8-inch pan of each: William Whitman, first, 12.

Cut Flowers — Tulips — Forty-eight blooms, not less than 12 named varieties: William Whitman, first. Hardy narcissi—Collection of 50 vases of not less than 10 named varieties: Langwater Gardens, first; William Whitman, second. Pansies—Forty-eight blooms, not less than 24 varieties: Mrs. A. W. Blake, first; Mrs. E. M. Gill, second; Mrs. A. W. Blake, third.

Gratuities—Miss Ellen A. Mansfield, antirrhinums; J. T. Butterworth, lily of the valley; Mrs. Frederick Ayer, Spanish iris; Hon. J. R. Leeson, display of orchids; Harvard Botanic Garden, miscellaneous display; Mrs. E. M. Gill, display; William Whitman, display; W. S. Spaulding, collection of flowering plants; Langwater Gardens, vase of Phlox Mme. Lingard. First class certificate of merit: J. T. Butterworth, Cattleya Mossiæ, Mrs. Butterworth; honorable mention, R. and J. Farquhar & Co., display of 50 varieties of tulips; vote of thanks, W. W. Rawson, display of tulips.

A GOOD WEEK.

One of the most satisfactory weeks of the season has just passed. The demand all week was good on most all lines and Saturday wound it up with a clean up. Last Sunday was Mothers' day and the order of the day was to wear a white carnation. The florists did not pay particular attention to it until Saturday when the demand for white carnations was so great they were quickly cleaned out and they soon found it was impossible to obtain any in the city. Roses are moving better than for some time; lilies and smaller flowers are also moving nicely.

NOTES.

Mr. Allers, father-in-law of T. P. Langhans, died at his home in Allegheny, May 6.

Ernest Zieger states that business is keeping up very well with him.

P. J. Demas spent most of the week in New York. J.

Montreal.

WEDDINGS NUMEROUS.

Business the last week consisted mainly in the making of wedding bouquets and wedding decorations. One florist when interviewed said that judging by the number of bouquets made every day, everybody seems to be getting married. The empty benches made by the Easter trade were rapidly filled with bedding plants, chiefly geraniums, of which there will be more grown than ever, as these can always be sold at a good price, $1.50 for the 4-inch size. All other lines of bedding plants are grown this year in the usual quantity except pansies, of which there was always a shortage, and consequently are grown about one-third more than last year.

At the last monthly meeting of the Gardeners' & Florists' Club Prof. Gardener of the MacDonald college, St. Anne de Bellevue, read an interesting paper on "Fumigating With Hydrocyanide Acid Gas." The essayist gave a very detailed description of the use of the same, he also had a glass bottle of potassium cyanide with him which was shown around to

let the members see what the material looks like; several of the members expressed their intention to use this method of fumigation in future. Thos. Pewtress read a paper on "Calanthes," which was well received, he also promised an exhibit of outdoor cut roses for the first meeting in July.

S. S. Bain is dangerously ill with pneumonia in the Victoria hospital. We all wish him a speedy recovery. The greenhouses of the Catholic cemetery are growing this year more bedding plants than ever before. LUCK.

Buffalo.

FUNERAL WORK PLENTIFUL.

Cold and rain have been the conditions the past week and trade suffered accordingly. Stock continues good, with the exception of violets, which are growing poorer in quality each day. Funeral work is about all that kept the florists busy.

NOTES.

The Florists' Club held its regular meeting last Tuesday evening and considerable business was transacted. The essay committee gave the members a treat when Geo. McClure, Jr., read his paper on orchids. It was a fine paper and much appreciated by the growers and store men present. The sports committee outlined their plan for the bowlers and a series of 15 games are to be rolled, when 10 men wil be picked out for final practice, from which the bowling team for the S. A. F. convention will be chosen. The entertainment committee will have something new for next meeting. President Sandiford entered in the individual bowling tournament last week and landed a prize against bowlers from all over this state.

J. Roland Cloudesley, who has managed the Wm. Scott Co.'s store for several years, has started for himself, and will open for business at 585 Main street, formerly occupied by J. H. Rebstock. Roland is a bright, hustling young man and should be succesful; we wish him all success.

It seems strange that the outside public have the pleasure of listening to music from a musical flower man before the B. F. S. have been honored with him, but we expect to have James Walton, of Palmer's, favor us with his presence at a meeting in the near future.

The Wm. F. Kasting Co. has added another large cool room, which is a great improvement and what is wanted for its extensive business.

J. B. Wiese, of the Chippewa Market, is at his store again, after a few weeks' illness.

For Decoration Day
Peonies, all the leading varieties in any quantity. Also plenty of Snowballs and Iris.
JOHN W. McINTYRE,
1601 Ranstead St., PHILADELPHIA.

NEWS NOTES.

PORTLAND, ME.—J. W. Minnott & Sons are starting shortly on the erection of a new greenhouse.

HINSDALE, MASS.—Oro Dudley, of Adams, read an interesting paper on "Horticulture" at the meeting of the Berkshire County and local Granges, May 7.

ROCHESTER, N. Y.—The park board recently voted to lease four acres of land adjacent to Highland park to be used for nursery purposes. It was also decided to erect a cement house in Genesee Valley park at a cost of $150, for picnic purposes. A horse and wagon, not to cost more than $400, for interpark communication, will be bought. Fully 70 band concerts will be enjoyed in the parks this summer, the appropriation being ample.

MANAYUNK, PA.—Wm. Butz, of Easton, who had recently secured a position as a florist with John Albright, at West Laurel Hill, near Pencoyd, was held up by two men in an alley at Jamestown and Apple streets, and robbed of his watch and other valuables. Butz, who had been to Roxborough, asked the men to direct him to his new boarding house, at Pencoyd, as he had lost his way. They took him to the dark alley and in real highwaymen style made him hold up his hands at the point of a revolver.

RICHMOND, VA.—Seven large new greenhouses are being built by Ratcliffe & Tanner in addition to the large number now on their farm near the end of the Northside line. When the new houses are completed this company will have between six and eight acres of glass covering beautiful and rare plants and flowers. Several of the houses will be devoted to the propagation of rare palms and ferns imported from Europe, and orchids. Especial arrangements are being made now for the heavy fall and winter trade in cut flowers, palms, ferns and pot plants of every description. The brilliant Easter display in the stores of the company, 25 West Broad street, has everywhere been conceded to be the finest ever seen here.

CUT FLOWERS OR DESIGNS will be Delivered for the Trade on Wire or Mail Orders in Best Qualities and Prices.

Louisville Notes.

WEATHER HINDERS PLANTING.

Owing to so much rain, very little planting has been done in the way of roses and bedding plants. Potatoes that were planted have rotted; also onion seed, so that onion sets will likely be scarce in this section, and all kinds of garden truck will be late.

Anders Rasmussen bought the greenhouses of Mrs. C. W. Reimers, about 40,000 feet of glass, and will remove them and add them to his plant at New Albany, Ind. Mrs. Reimers, having disposed of her greenhouses, will either sell the ground in lots or build dwelling houses to rent, the land having become too valuable for greenhouse purposes.

Chas. W. Reimers, who sold out his greenhouse establishment a year or so ago and went to California and engaged in the real estate business, has now taken charge of the greenhouses at the reformatory at Jeffersonville, Ind.

The Kentucky Society of Florists is in a flourishing condition and holds regular meetings. At the last meeting Robt. Miller, foreman for Mrs. Kunzman, and Fred L. Schulz, the wholesale florist, read interesting essays.

Wood & Stubbs' new seed store, a three story brick building, is nearing completion. This firm has been in business only a few years, but is now doing a business something near a quarter of a million.

P. G. Reynolds, formerly foreman for Mrs. Hodges, has bought six acres of land, is erecting a number of greenhouses and will grow carnations as a specialty.

Wm. Walker has leased a larger and more commodious store in a better location and will soon move to his new quarters.

Chas. Rayner, president of the Anchorage Rose Co., will go on a visit to relatives in England next month.

Willis Reynolds, formerly with F. Walker & Co., was married May 6.

W.

CHATTANOOGA, TENN.—Outdoor flowers in plenty checked the florists' trade here at Easter but Easter lilies were in good demand according to Mrs. J. W. Drouch.

Lexington, Ky.

The Easter business was just as good as last year, flowering plants especially moving well. The cut flowers, roses, carnations and lilies had the call. Bulbous stock moved slowly, outdoor beds being in full bloom. Spring planting is about to open up and we expect to dispose of large quantities of geraniums, roses, cannas, salvias, etc.

Two houses, for roses and carnations, each 33 by 200 feet, are being added to John A. Keller's plant; a pair of large tubular steam boilers are also being set in place, large enough for future additions. When completed this will be one of the best places in this section.

GLOUSTER, O.—Easter business with us was below the average this year. Trade in bedding plants is opening up fairly good and we look for a good Decoration day trade.

The Seed Trade.

American Seed Trade Association.
Geo. S. Green, Chicago, Pres.; M. H. Duryea, New York, First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-sixth annual convention, June 23 to 25, at Hotel Ponchartrain, Detroit, Mich.

CINCINNATI, O.—J. Charles McCullough and wife are spending a month at Atlantic City.

LOUISVILLE, KY.—Wood & Stubbs' new seed store, a 3-story brick building, is nearing completion.

BEANS.—It is too early to say how far early prospects of overstock proved true, as there is quite a little selling season for these remaining.

FRENCH GROWERS report, April 30, that the crop of Paper White narcissi is not as good as in previous years, owing to lack of spring rains.

WASHINGTON, D. C., May 11.—The appropriation bill which carries the free seed distribution for the coming year passed the senate today.

THE South Jersey Seed Co., of Camden, N. J., is a new concern recently incorporated with a capital of $10,000, the incorporators being, John A. Ballenger, Geo. H. Horner and Oscar B. Redrow.

A PROTEST by a San Francisco firm against paying duty on sessamum seed, on the ground that it was grass seed, and therefore free of duty, was overruled by the board of appraisers, April 28.

CONTINUOUS rains have stopped or seriously delayed planting everywhere. St. Louis gardeners have to put boards between their rows of radishes to walk on in pulling the crop. All low lands are afloat in the west.

PORTLAND, ORE.—The Chas. H. Lilly Co., seedsmen, distributed flower seed packets April 16 in connection with a coupon arrangement with the Telegram, a local newspaper. Several thousand patrons carried away seeds that day.

H. W. FISHER, manager of the seed department of Montgomery Ward & Co., Chicago, will retire June 30 and after a few weeks' vacation, with some other interested parties, proposes to establish a mail order seed business in the same city about September 1.

PARIS, FRANCE, May 1.—The prospects for some of the seed crops, especially of garden beets, turnips and onions, are not of the best. Some of the beets, Crosby's and Detroit, and Icicle radish will fall below contracts and will be high in price again next fall.

A MEETING of the executive committee of the Western Seedsmen's Association will be held at the Auditorium Annex this week, May 16, at 10:30 a. m. Among those expected to attend are H. A. Johns, Mel L. Webster, Henry Windheim, J. E. Northrup and L. L. May.

Braslan Seed Growers' Co.
Growers for the Wholesale Trade Only.
SAN JOSE, CAL.

SENATE BILL 6515, introduced April 6, provides for restrictive legislation against insecticides, Paris green, etc., with many drastic provisions and prison penalties. It is evident from the similarity of many of the paragraphs to those of the pure food law and the proposed seed law that an organized effort is being made to legislate many industries into bureaus under restriction and inspection.

CHICAGO.—J. W. Thorne, of the well known mail order house of Montgomery Ward & Co., says that his firm will not further promote the seed department of the business until such time as it is independent of sources of supply. Practically, this means that the firm is out of the seed business for the present except that it will continue to take care of such orders as may be received.—Visitors: Linnæus Allen, Floral Park, N. Y.; J. Eckstein, of the Whitney-Eckstein Seed Co., Buffalo, N. Y.

MILFORD, CONN.—The Everett B. Clark Seed Co. reports that its usual acreage of various seed crops is all planted, with the exception of corn, on which the firm is now at work. If another cold season is experienced like that of a year ago, and at date of writing, May 6, the weather is more like March than May, the effect upon the corn crop will be even more disastrous on account of the fact that the seed which has to be planted this season is in nine cases out of ten weaker than was planted a year ago. Onions have started fairly well, the acreage being somewhat restricted when compared with that of a year ago.—This concern's acreage in Michigan and Wisconsin is greater than heretofore. This department of its business is growing quite rapidly from year to year. Contracting was much more difficult than ever before, but with the advance in prices and unusually energetic solicitation on the part of the farmers, all its stock has been planted.—Stocks are well cleaned up, peas, beans and corn being practically bare.

Bushnell Celebrates Birthday at Sea.

On Sunday, April 26, David I. Bushnell, of St. Louis, Mo., the popular ex-president of the American Seed Trade Association, celebrated his sixty-second birthday on the S. S. Adriatic, enroute to Europe. The guests at Mr. Bushnell's round table presented him with a "Loving Cup," which, while small, was supplemented by many another glass of pommery, "Nature 1900," in drinking to the health and happiness of their "sixty-two year young" friend.

Mr. Bushnell was in his happiest mood and while a gale was raging, everything was lovely at his table, even the cutting and enjoyment of the special birthday cake which the pastry cook prepared and decorated appropriately by request of Mrs. Burpee.

Mr. Bushnell landed at Cherbourg and proceeded directly to Paris, while Mr. and Mrs. Burpee did not disembark until the final port of Southampton, Eng., was reached, April 30.

Livingston's Pigeon Roost Onion Farm.

The Livingston Seed Co., Columbus, O., purchased 150 acres of land a year ago at Kirkersville, east of the city, for an onion farm, or rather farms, as there are two distinct places. One is a high lying tract of sandy loam, with gravel subsoil, well adapted to onion seed culture; the other consists of fine peat or reclaimed muck soil, being an old pigeon roost swamp, where for many years the wild pigeons roosted by millions. This is unsurpassed for the growth of fine onion bulbs.

These farms are to be used by the firm for the production of high grade onion seed, sets, potato onions, etc. The soil has been ditched and well drained by tile branches and all kinds of vegetables do well there, as well as plants, so that the firm will be enabled to secure very fine produce for its trade. The company is erecting a barn, warehouse and factory for the care and handling of seed and roots. Besides the ground mentioned above 200 acres of tomatoes are to be grown this year for seed that will be washed and seeded and the pulp secured in the factory above noted. The place will be known as Livingston's Pigeon Roost Onion Farm and will be under the management of A. Wilmer Livingston.

Seedsmen's Hearing on Proposed Seed Bill.

In our last issue we gave a number of the opinions of the proposed seed bill, H. R. 13835, as expressed by some of the seedsmen at the public hearing before the Committee on Interstate and Foreign Commerce at Washington, D. C., April 21, and now append summaries of the views of E. V. Hallock and J. C. Vaughan as follows:

E. V. Hallock believed that the Bureau of Plant Industry should notify any individual or firm when its seed packets tested by them were found to be deficient in vitality, asking him, as a criminal is asked before he is hung, if he has any reason why sentence should not be passed. It is strange to state that no seedsman is in control of his product before it reaches his hand. This is not all. When this product is sold by the seedsman and passes into the hands of his customers, it is sown by almost innumerable planters, each one of whom may plant the seed under adverse conditions, not having expert knowledge of the same; climate, drought and flood enter into results attained by perhaps 200,000 customers of one seed firm. The business of the seedsman of 12 months is crowded into three months, the filling of orders amounting to several thousand every day which leaves room for many errors, perhaps more than in any other business that can be systematized and worked out on a basis of 12 months' demand. Think of 300,000 customers planting these seeds, two-thirds of whom are almost entirely inexperienced. Loss of confidence in their seedsman by such customers means ruin to the seedsman. You will easily see that the seedsman works under somewhat more difficult conditions than an ordinary tradesman. First, having no control of the quality of his crop coming in and no control of the crop when it has gone out. He is at the mercy of the people who plant his seeds. Again there is always the possibility of a dishonest man who plants this seed and makes unjust claims for which he asks damages. The words "warranty," "guarantee," and "responsibility" do not mean anything at all unless an amount is expressed after these words. If the purchaser in buying a pound of seed asks for a guarantee of $2.50, or $10.00, or $100, or $600, for his pound of seed, he can have it, let him say what he wants, pay for the insurance and secure his guarantee if he will pay the proper percentage.

J. C. Vaughan protested against what seemed to him the unfair intent and purpose of the act. Because in the importation of foreign grass and clover seeds certain abuses had been found, it was now proposed to legislate the entire seed trade of the United States into a restricted or fraud class, in line with patent medicine frauds. He contended that the seed industry was in itself a benefi-

cent one, and in the main highly reputable. The drastic nature of the law, with excessive fines and prison penalties, was uncalled for in the conduct of the seed business as a whole. There was no evidence that the abuses complained of in imported field seeds or the low tests on some commission box packets were in proportion to the volume of trade done, such as to demand this restrictive legislation, or put the seed industry into the fraud class. While he would be willing to agree to a "weed seed" law, with perhaps something further to regulate the vitality of packet seeds, he would not accept as necessary any such law as illustrated by the general tenor of Bill H. R. 13835 and the accompanying report.

Imports.

During the week ending May 9 imports were received at New York as follows:

J. Roehrs & Co., 184 tubs laurel trees, eight cases plants.

McHutchison & Co., 54 cases plants.

H. F. Darrow, 38 cases plants.

Vaughan's Seed Store, seven cases plants.

Wadley & Smythe, seven cases plants.

J. D. Nagel, one pkg. trees.

To others, 354 pkgs. plants, 111 cases plants, one bdl. plants, 59 tubs laurel trees, 10 cases plants, five boxes lily bulbs, one pkge. rose trees, 1948 bags seed, 50 bags clover seed.

MARKET GARDENS.

Seasonable Suggestions.

Where cold frames and hotbeds are in use for growing tender plants, such as tomatoes, egg plants, cucumbers, etc., it often happens that the plants get so near to the glass that they are easily hurt on cold nights. If to be sold, the least damage seriously interferes with their value. When crowded for covering material, we always use hay or straw, or the manure from the walks, and sprinkle over the glass lightly. A very little will prevent all damage. Plants that have been set out can be carried through a freeze by bending over and covering with earth.

Where no protection can be given, do not hoe or cultivate tender crops until all danger from frost is past, as upon loose land the damage by frost is most severe. When arranging overhead wires for cucumbers and tomatoes, remember the load that these wires are called upon to carry is often enormous. Do not arrange these wires so that the total weight will pull on the end of the house. Sometimes the wires snap, and often the end of the house is racked in. A better plan is to have each short section carry its own load, that is, where the long wires rest on cross supports, they should be held so fast that the cross support will take its part of the load. Greenhouse tomatoes should be suckered every few days to put all the strength into fruit and not into useless growth.

MARKETMAN.

Training Cucumbers.

To the beginner this appears like a difficult subject, but upon closer acquaintance it is quite easy. One has but to study the principles, and when once thoroughly grounded, the rest is easy. Given a sturdy young cucumber vine, full of life and growing under favorable circumstances, after attaining a length of vine of a foot or 18 inches, it will commence to throw laterals or side shoots. Upon close examination it will be found that the first three or four nearest the root are barren. They are intended by nature to be branches. By removing these as fast as they appear the next higher ones will appear and these will be found to be fruitful ones; that is, each little side shoot will have a little cucumber or cluster of them. To prevent these being thrown off by the rapid growth it is necessary to pinch out the tip of these laterals just beyond the small fruit. This can be done in such a manner that there is an eye left for a second lateral to form later on, increasing the fruiting area.

The above is what is known as the single stem method; the same principles hold good for the trellis method. In the former each plant has only one stem, in the latter several. In the trellis system the lower barren shoots are allowed to grow and are trained in their proper places. They will then form fruitful laterals. The main point in the trellis system is to prevent a heavy mass of vines, as that means no fruit. Each branch needs full light and air for fruiting. Too many vines are practically the same as over seeding or over planting—which is always against maximum fruiting.

MARKETMAN.

All seeds offered are grown under my personal supervision on my own grounds of more than 3,000 acres. and are warranted true to name, of strongest growth, finest stocks and best quality.

I ALSO GROW LARGELY SEEDS ON CONTRACT.

List of my novelties in flower seeds for 1908 sent on application.

Egg Plants.

ED. AMERICAN FLORIST:—

I have a small house that I want to put in egg plants. I use hot water heat and have no solid beds. Can I get a crop and how can I prevent red spider? The house is clean at present. I have large plants on hand.

F. C. S.

Egg plants require conditions similar to tomatoes. If anything they are more sensitive to cold, hence the temperature should be kept up constantly. Let 60° be the minimum at any time. They love the sun, so keep the glass clean. They are gross feeders, and in this respect the numerous instructions for feeding tomatoes will apply. In regard to red spider, under that heading one could include the entire greenhouse management. Anything done to encourage the plants retards red spider and, on the other hand, every drawback and neglect encourages the pest. In other words, insects flourish on poorly fed, neglected plants. Very often one can find small greenhouses managed along lines that if the roots are watered all is well. The attendant does not realize that the atmosphere is as important as the soil heat or light. I mean the moisture content of the air. Such a person will water the roots and no more. It is important that the walks, sides of beds, ends of houses, in fact, every inch of surface be sprayed several times each sunny day to provide suitable conditions for the plants. If 30 pounds of water pressure, or more, is at command, you should be able to keep the plants perfectly clean by forcing the water upwards under each leaf at least twice a week, on sunny mornings. If there is no water pressure, you can kill red spider by spraying with a mixture of one ounce naptha soap to one gallon of soft water. Dissolve cold; then add one ounce nicoticide to each gallon and apply to under side of foliage, on cloudy days or in the evening on sunny days.

MARKETMAN.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points May 9 were as follows: New York, cucumbers, No. 1, $2.50 to $4 per box; No. 2, $1.50 to $2 per box; lettuce, 25 cents to 75 cents per dozen; mushrooms, 30 cents to 90 cents per pound; mint, 25 cents to 50 cents per dozen bunches; radishes, $2 to $2.50 per 100 bunches; rhubarb, $1.50 to $2 per 100 bunches. Chicago, cucumbers, 20 cents to 75 cents per dozen; radishes, 10 cents to 35 cents per dozen bunches; mushrooms, 35 cents to 65 cents per pound. Boston, tomatoes, 30 cents to 35 cents per pound; cucumbers, $4.50 to $5 per box. Pittsburg, cucumbers, $4 to $4.50 per box. Cincinnati, cucumbers, 60 cents to 70 cents per dozen; mushrooms, 50 cents to 60 cents per pound. Philadelphia, cucumbers, $1 to $1.50 per dozen.

WHITE MARSH, MD.

FLORISTS have a splendid opportunity of raising Mushrooms by utilizing the waste space under the benches, and then utilizing the waste material of expended mushroom beds in growing flowers. Lambert's Pure Culture MUSHROOM SPAWN, the best spawn in the market, is sold by all leading seedsmen. A fresh sample brick, enough for a trial bed, together with illustrated book on "Mushroom Culture" will be mailed postpaid upon receipt of 40c in postage stamps. Address American Spawn Company, St. Paul, Minn.

LEGAL NOTES.

Dickson's Roses.

From a cable message of May 11 we learn that in the case of Alex. Dickson & Sons, Ltd., versus Alex. Dickson and Sons, the plaintiffs, the well known rose specialists carrying on business in Newtownards, Belfast, Dublin, Blackrock, Ire., and also in Hertfordshire, Eng., have been granted the injunction for which they applied against the defendants, restraining them from selling roses or seeds not grown by the plaintiff company as Dickson's roses or seeds, and from carrying on the business of nurserymen and seedsmen under the style of Alex. Dickson & Sons or any other style in which the name Dickson appears without taking reasonable precautions to clearly distinguish the business carried on by the defendants from that carried on by the plaintiff company. The defendants had to pay the costs.

Calla Cut Flower Co.'s Affairs.

A petition for the appointment of a receiver to wind up the business of the Calla Cut Flower Co., Calla, O. was filed in common pleas court March 31 by C. W. Hendricks. The plaintiff is surety on notes, now due, amounting to $3,100, which he says the defendant company has no money to pay. The Calla Cut Flower Co. was organized in 1905 and has seven greenhouses, covered with about 19,000 square feet of glass. The plaintiff, Hendricks, states that it is in debt to the amount of $6,000, of which $3,100 is now due. He says that the company has no cash on hand; that its assets are insufficient to meet its liabilities; that it cannot secure further money to carry on its business, and that the business cannot be further carried on without loss. Plaintiff therefore asked that the property be sold and the proceeds be used to pay off indebtedness. The company filed answer, acknowledging that the business could not be carried on with profit.

Frank Knauf, Chauncey Clay and J. J. Paulin have been appointed appraisers of the property. Irwin W. Coy, receiver, has taken possession of the greenhouses and other property in Calla and will conduct the business and collect all accounts.

"Pipes Don't Grow on Vines."

At this time of the year the seed stores, with their array of budding stalks and tempting signs in front, are always the center of observation by a large group of persons. Some of these are suburbanites, who have gardens of their own at home and are figuring on making more or less extensive purchases, but most of them belong to that large class of idlers that is a source of constant wonder in a big city—persons who apparently have nothing to do except to kill time in any manner that they can.

One store in Fifth avenue includes among the displays in front, along with rose bushes, barrels of rhubarb root, bulbs and sprouts of every description, some twisted, dead-looking branches, labeled "Dutchman's Pipe."

"Dutchman's pipe, eh?" said one of the little crowd that had assembled about the place, to the man nearest him. "What's that?"

"Say, you're dead easy," answered the other, slowly opening and closing his left eye. "Some people are pretty easy to fool, especially when they've got one of these here college educations. Pipes don't grow on vines. Any child can tell you that. Why, I went to a show once where they talked about 'ham trees' and 'biscuit bushes' and things like that, but everybody knew them fellows was only joking. I tell you, when a man has lived in Chicago a while he gets wise and you can't fool him with any old gag like that. Next thing, I suppose, they'll be advertising 'cigarette vines' and 'tobacco plants.'"

"They say tobacco does grow on plants," said the first man.

"Oh, quit yer kiddin'," said the other. "Didn't I tell you I was wise?"—Chicago Daily News.

GUTHRIE, OKLA.—The $300 spent by the citizens in beautifying the court house, which is being used as temporary state capitol, helps the looks of the building materially. Furrow & Co. planted ferns, hanging and climbing vines all over the terraces of the entrance, with carnations and nasturtiums mixed in the beds. The grounds are being reworked and the grass replanted. Big palms are being placed in the stairways of the building.

The Nursery Trade

American Association of Nurserymen.

J. W. Hill, Des Moines, Ia., President; C. M Hobbs, Bridgeport Ind., Vice-President; George C Seager, Rochester, N. Y., Sec'y
Thirty-third annual convention to be held at Milwaukee, Wis., June 10-12, 1908.

VISITED CHICAGO: P. M. Koster, of Koster & Co., Boskoop, Holland.

CONSIDERABLE damage to fruit crops by frost is reported from Des Moines, Ia., and locality.

DES MOINES, IA.—C. B. Vaile, of the C. B. Vaile Art Co., is making plans to start in the nursery business here early next year.

THE seventh annual convention of the National Nut Growers' Association is booked for Chattanooga, Tenn. The date will probably be the latter part of October.

CORNING, N. Y.—The board of public works has adopted a resolution accepting Denison park free of all incumbrance and in accordance with the plans previously made by Landscape Architect Caparn.

LAFAYETTE, LA.—The Southern Nursery & Nut Co. has about 200 acres of fine land here, devoted principally to pecan nuts and catalpas. Russell, Pabst, Stewart, Vandieman, Schley, Frotscher and Success are the principal varieties of pecans grown.

CONCORD, N. H.—Henry Richardson is superintending a force of men which is setting out 2,000 pine tree seedlings on the waterworks land recently purchased of Chas. H. Farnum. The trees are three-year-old growth, 10 inches in height and all in good healthy condition. Mr. Richardson is to start a nursery just across the road from the water works cottage for the cultivation of pine seedlings.

NIAGARA FALLS, N. Y.—A nursery or receiving ground for the cultivation of trees and plants sent by the government to be used in decorating the banks of the Niagara river under the mills of the lower district, has been installed on Main street, near the old Kelley-MacBean factory and opposite the old Niagara house. A corps of laborers are busily engaged in transplanting elm trees and shrubs of all kinds, in long ridges in the triangular plot of ground owned by the Niagara Falls Hydraulic Power & Manufacturing Co.

AURORA, ILL.—The Aurora Nursery Co. recently purchased 21 acres of land at the corner of Montgomery and Garfield avenues, now occupied by it, from H. H. Evans. The consideration is given as $10,000. In addition the company has leased 17 acres adjoining the property on the east. Plans are now in the hands of architects for the erection of a number of buildings. An office building and tool sheds have already been completed, and work will start soon on a large packing shed, 60x100 feet, two large greenhouses and three storage cellars. Men are now at work draining, and a number of shrubs and fruit trees are being added to the nurseries. The capital stock of the company was recently increased, and this year has proven to be a most prosperous one.

American Association of Nurserymen.

Complete arrangements for getting the nurserymen together in Chicago and for the accommodation of those who may wish to stop over there on the way to the convention have been made. Ben. E. Gage in a recent communication writes as follows: "I have been fortunate in making very good arrangements with the Great Northern hotel for the accommodation of members who wish to stop over in Chicago on their way to the convention. We are getting very good rates and the hotel is centrally located and near the Union depot."

GEO. C. SEAGER, Sec'y.

English Irises.

The numerous species and varieties of hardy irises are indispensable perennials for gardens and garden lovers. A great many of them are easily grown, but where the cultivation of any of them is attended with a little trouble it is well worth the effort to enjoy their lovely flowers.

The English Iris (Iris Xiphioides belong to the bulbosus section of the irises, which includes those lovely gems, the Spanish irises (Iris Xiphium). The name English iris is really a misnomer, as it is never found in a wild state in England, but this name was attached by accident, and it has become firmly established, but the native home of this iris is in the Pyrenees.

The English iris is a splendid subject for gardens. The noble luxuriant blossoms, supported on stout stems, one to two feet tall, with the rich foil of dark green abundant foliage ascending from the base of the stems and upward, render it bewitchingly attractive.

The variety Mont Blanc (some botanists regard this as a species) is one of the favorite kinds, and has large, delicate, white flowers. Duke of York is light bluish purple, with a spot of creamy white in the center, and a group as shown in the picture presents a fine appearance. Leon Tolstoi might be described as a light velvety purple and is a most elegant flower. There are a number of beautiful varieties which can be selected according to taste.

The bulbs should be planted late in the fall in rich, moist, warm soil, about three to four inches deep and about four to five inches apart. When thickly planted the massed effect is much better. They occasionally will do with us fairly well for two years without disturbance, but sometimes the second year will show a decided failure. We always have the best results when we lift the bulbs after they have ripened, dry them, and replant in the fall in a new location. As they are inexpensive, a few additional bulbs should be secured annually.

JOHN DUNBAR.

ENGLISH IRIS DUKE OF YORK.
Growing at Highland Park, Rochester, N. Y.

Chicago to Milwaukee.

The Chicago and Northwestern Railway has completed arrangements for the accommodation of visitors to Milwaukee during the convention of the American Association of Nurserymen, June 10-12, and will run frequent trains between Chicago and Milwaukee as per printed schedule in leading daily papers. This road runs through the most delightful suburbs of the western metropolis and the handsome stations enroute, with elaborate horticultural features, will be a revelation to the many nurserymen and their friends who believe that station adornment and railway gardening are confined to the east.

Tickets from Chicago to Milwaukee and return can be purchased at the city ticket office, 212 Clark street, and at the Wells street station, fare $3.40. All coupon ticket agents issue tickets via the Chicago and Northwestern Railway, and when purchasing such tickets be sure that they read via the Chicago and Northwestern Railway.

The Milwaukee station of the Chicago and Northwestern Railway is very convenient to the Plankinton Hotel, which has been selected as the headquarters of this convention.

DREER'S SEASONABLE SPECIALS

Hardy Phlox.

Hardy Perennial Phlox

We are Headquarters for these. More than one hundred and fifty thousand one year old field grown plants now in pots.

Collection of Choice Standard Phloxes,

Aquillon (Tall). Bright Tyrian Rose with crimson-red eye.

Trtioma Pfitzeri.

HENRY A. DREER, 714 Chestnut St., PHILADELPHIA, PA.

American Assoc. of Park Superintendents.

A meeting of the executive committee of the American Association of Park Superintendents was held at the Genesee Hotel, Buffalo, N. Y., March 21, President Cowell in the chair. Other members of the committee in attendance were Vice-President John Chambers, Secretary-Treasurer F. L. Mulford and Theo. Wirth. Letters were read from G. X. Amrhyn, J. W. Thompson, Jackson Dawson and John Dunbar giving reasons for their inability to be present and expressing regret at their enforced absence. Theo. Wirth was made a proxy for Mr. Amrhyn and the following names for membership were presented and recommended favorably to the next annual meeting: F. W. Barclay, superintendent of parks, Wilkesbarre, Pa., and Daniel H. Ellis, superintendent of parks, Bridgeport, Mich.

A number of reports and statements were then submitted and after a full discussion it was decided to hold the next annual meeting at the Twin Cities, St. Paul and Minneapolis, Minn., headquarters at the West hotel, Minneapolis, August 11-14, with Theo. Wirth, Fred Nussbaumer, President Cowell and Secretary-Treasurer Mulford as a committee on arrangements.

PRELIMINARY PROGRAMME.

The following is the preliminary programme:

August 11, 9:30 a. m.—Business meeting.

August 11, 2 p. m.—Business meeting. Papers and discussions.

August 11, 7 p. m.—Visit to Lake Harriet.

August 12, 8 a. m.—Visit St. Paul park system with a concert at Coma in the evening.

August 13, 9 a. m.—Visit Minneapolis park systems.

August 13, 7 p. m.—Business session. Papers and discussion.

August 14.—Visit to Lake Minnetonka.

Papers were suggested on the following topics: "Concessions," "Oiling and Dust Laying," "Concrete in Park Work," "Park Commissions and Administration." On the return from Minneapolis members of the Society of American Florists can stop at Niagara Falls and attend that meeting.

The committee on Closer Relations with Allied Organizations reported that by meeting near the time of the S. A. F. we had done all we could, while the S. A. F. maintains its avowed attitude of a trade organization.

RESOLUTIONS ON THE DEATH OF R. H. WARDER.

The following resolutions on the death of R. H. Warder were adopted:

Whereas, It has been deemed necessary by the All-Wise Providence to take from our midst Reuben H. Warder, and whereas his life has been devoted to a great extent in the pursuit of horticulture and kindred sciences, being ever an ardent lover of nature and a devoted student of her laws,

Be It Therefore Resolved, That the American Association of Park Superintendents in expressing regret at the loss of a brother and co-worker does hereby cause to be spread upon the records of the organization a copy of these resolutions, and furthermore does cause a copy to be sent to the members of the family of the deceased.

FORT DODGE, IA.—It is announced that the P. L. Larson greenhouse on the corner of Sixteenth street and Central avenue, has been purchased by R. P. Atwell, although the consideration is not made public. Mr. Atwell will assume possession of the same on July 1, and will retain the same working force as is employed at the present time. Mr. and Mrs. Larson expect to spend the summer in traveling and will return to the city in the fall.

Greenhouses and Nurseries, Western Springs, Ill.

AMERICAN EVERBLOOMING HYDRANGEA

(H. Arborescens Sterilis.) Strong plants from pots for planting in nursery during May and June. These plants with us make 2 to 4 feet growth, with abundant bloom, the first season. Price: $8.00 per 100; $75.00 per 1000.

THE E. Y. TEAS CO., Centerville, Ind.

Nurserymen at Milwaukee.

On the way to the Milwaukee Convention you should travel from Chicago via the beautiful north shore route of ***The North-Western Line,*** and thus have an opportunity to enjoy the beauty of a magnificent chain of Chicago's suburbs, with glimpses of splendid landscape gardening and a trip along the shore of beautiful Lake Michigan.

THE NORTH-WESTERN LINE

Twenty-one trains a day between the two cities.

THE BEST OF EVERYTHING.

TICKET OFFICES: 212 Clark St. (Tel. Cent. 721.) and Wells St. Station.

Montreal.

It was shown at the meeting of the Parks and Ferries Committee recently that the sum of at least $45,000 was needed to take care of the parks and squares of the city for the coming summer. An itemized account was presented, showing that out of the sum of $45,000 amounts from $500 to $2,000 would be spent on each of the city parks for routine expenses. There was besides a special account of $24,000 for Mount Royal park.

The project of purchasing the Redpath property, in order to enlarge the boundaries of the mountain park, was discussed. The land was shown to be a natural adjunct to the park. The total area of the land is 583,800 feet. The city's valuation is 25 cents a foot; the total cost for the property would be $145,900. Members of the committee were of the opinion that if the city could raise the funds it would be wise to get the land. There was some discussion over the city purchasing St. Helen's island. It was decided to report to council asking that the purchase of the island be made as soon as possible.

MEMPHIS, TENN.—It is stated that there are still unsatisfied claims against the East End Floral Co. after the property had been sold by the sheriff May 11. The store and greenhouses of the concern have been closed for about a month.

ARBOR VITÆ

(Thuya Occidentalis.)

A splendid stock of 3 to 4 ft. and 4 to 5 ft. trees.

Fort Wayne, Ind.

GERANIUMS.

One of the best things in the market, the **American Beauty** Geranium, a clear bright cerise just about the color of a good Pink Lawson carnation. The habit is very pleasing, rather dwarf and very stocky. It is a common thing to see 4 to 6 large bunches of flowers on a plant in a 3 to 5-in. pot. Clusters average 4 to 5 inches in diameter. It is a very free bloomer; we think it is freer than any we grow and we grow a great many Geraniums. We grow 8 to 10 varieties. Stock of American Beauty is extra fine but limited as to quantity.

We offer you

2-in Pot Plants at		**$ 6.00**	**per 100**
3-in.	" " "	**10.00**	"
4-in.	" " "	**18.00**	"
5-in.	" " "	**25.00**	"

the 4- and 5-in. pots are very stocky and bushy; have 3 to 5 large flowers on now..

STEPHEN CHASE, Nashua, N. H.

Hollywood, Calif.

The Woman's Club of this city held a two days' show April 30 and the following day, being under the management of O. W. Howard, of the firm of Howard & Smith. The attendance was very good and proved a success. Outdoor roses, sweet peas and pelargoniums were in abundance, also a fine display of fruit and vegetables. Among the exhibitors were Howard & Smith, of Los Angeles; E. Rust, nurseryman, Redondo, and about every private gardener around had something to exhibit. Mr. Sturdevant had his display of aquatics, which were exceptionally good. ED.

WINNIPEG, MAN.—Justice Cameron recently issued an order to wind up the affairs of the Rosery Flower & Seed Co. on the application of C. C. Kettles of Pincher Creek, former secretary-treasurer of the company and a creditor for $12,000, appointing T. Harry Webb as provisional liquidator.

MINNEAPOLIS, MINN.—The members of the Inter-Lachen Flower Society were entertained at the home of Mrs. Andreas Ueland on Calhoun boulevard May 1. Park Superintendent Theodore Wirth was to have been present and give a talk on "Gardening Perplexities" and also conduct the round table which opened the subject to the general discussion of the club. His place was taken by Mrs. Ueland, who read Mr. Wirth's paper. The club not only plans to hold another flower show in August but it is using every means to encourage the children as well as the citizens of Linden Hills to beautify the streets and develop artistic gardening. Over 2,000 packets of seeds have been already given out to the children at one cent a packet, and 200 gladiolous bulbs are ready for distribution.

SHIPPENSBURG FLORAL CO. Shippensburg, Pa.

Portland, Ore.

Great preparations are being made for the competitive rose show and festival, which is to be held in this city June 2 to 7. The season is rather backward, but it is expected that plenty of roses will be available for the occasion, which is one of wide interest throughout Oregon, Washington and Idaho.

W. S. Sibson, proprietor of the Sibson Rose Nurseries, has been designated to act as one of the judges at the rose show, which will be held under the auspices of the Portland Rose Society.

FORT WAYNE, IND.—W. J. & M. S. Vesey have rented a down-town store and will open on July 1.

BASSETT & WASHBURN, Greenhouses: HINSDALE, ILL.
Office: 76 Wabash Ave., CHICAGO.

RICHMOND, VA.—Special honor was shown the dead of the Confederate navy in the Memorial day celebration May 9 of the Junior Oakwood Memorial Association. The young ladies had a staunch little boat built, which they covered with flowers and set adrift upon the James, and they asked every river man to aid them by helping to keep the boat in the stream so that it drifted down to the bay, and out to the open sea. Thus the ladies have placed flowers upon the vast deep, the grave of many gallant patriots who gave their lives to the service of their country. Over this little boat, from a slender mast, floated a small Confederate national flag.

DORCHESTER, VA.—John Horsman, of the Colonial Greenhouses, says that the sales of roses and carnations at Easter were 50 per cent higher than those of last year, but pot plant sales were light.

LOUISVILLE, KY.—Robt. Johnson, son of M. Johnson, president of the State Horticultural Society, died in New Mexico, where he had gone in search of health, May 3, at the age of 21.

GEO. A. KUHL,

Wholesale grower of plants at
PEKIN, ILLINOIS

Frank Oechslin
2570-2606 W. Adams St., Chicago.
Formerly Garfield Park Flower Co.

SOUTH BETHLEHEM, PA.—June 17 has been decided upon as the date for holding the 1908 floral show in the market house of the old town. This and other preliminary details were arranged at a recent meeting of the committee appointed by the Industrial Commission of Bethlehem to carry out the plan, projected by the commission at Burgess Conlin's suggestion, of affording the flower-loving citizens of these towns an opportunity to exhibit the products of their flower beds and flower gardens. The date selected for the show is about the time the roses and other early summer flowers are at their best.

GERANIUMS

Good strong stock From 2-in. pots.

WE WANT TO BUY
Your Ferns, Palms, Etc.

If you have anything in this line to offer, write to us TO-DAY. We want to buy these in quantities to use as leaders in our special sales. Only such stock that's ready to retail; we have no greenhouses.

ALPHA FLORAL CO.,
1105 Walnut Street, KANSAS CITY, MO.

Cycas Stems

VAUGHAN'S SEED STORE,
CHICAGO, 84-86 Randolph St.
NEW YORK, 14 Barclay St.

PARKERSBURG, W. VA.—J. W. Dudley & Sons, report good business the past year and Easter trade unusually brisk. The firm's business is steadily increasing every year under the able management of Ernest Hiehle. Twenty thousand chrysanthemums will be grown this season, some of them for the National Flower Show at Chicago this fall. A large violet house will be added this summer.

Vinca Variegata

We have been headquarters for years for extra large 4-inch Vincas, but our plants this year are better than ever; from 15 to 25 vines to a plant; better plants than most florists sell from 6-inch pots; also a few hundred of the green variety. A sample dozen sent for $1.50.

BOSTON FERNS A nice stock of 3 and 4-inch plants, ready for a shift, $6.00 and $12.00 per 100.

Elegantissima and Piersoni,
From 2¼-inch pots, 3c; extra fine stock.

Strong 2-inch pot, **COLEUS,** in 12 best bedding and fancy varieties, $2.00 per 100.

W. W. COLES, Kokomo, Ind.

FOR SALE.

Four large specimens Latania Borbonica Palms, 12-feet high and spread, in large cypress boxes. Also six (6) smaller ones in boxes. Make me an offer. Can be shipped at once by freight.

JOHN RALPH, Saratoga, N. Y.

HEISS, Florist,

112 S. Main St., DAYTON, O.

NORWICH, CONN.—The Spring meeting of the New London County Horticultural Society, held at the Buckingham Memorial, May 4, was well attended and was called to order by Vice President Rev. N. P. Carey, as President Thomas W. Head of New London, was absent. The minutes of the previous meeting were read by Secretary Frank H. Allen and approved. The only other business was the presenting of the name of B. P. Bishop for membership, and he was elected to the roll. Peter Zugra gave a talk on roses.

GERANIUMS.

S. A. Nutt, John Doyle and some pink, 4 in. pots, $7.00 per 100; and mixed varieties.

Begonia Vernon, newest strain, flowers as dark as blood; seeds gathered by myself from specimen plants in Zurich, Switzerland, during my trip to Europe; 4-in. pots, $8.00 per 100; 3-in., $6.00 per 100.

Begonia Erfordi, true; this is one of the best pink varieties known; it is a sight to see a bed of them in bloom; nothing but a mass of flowers. This plant decorates the flower beds of aristocratic people in England, Germany, Switzerland and Paris. Price: 4-in., $8 00 per 100; 3-in., $6.00 per 100.

	Per 100

Everybody Talks About It!

LIKE THE BEE

A Prosperous Florist Is Never Idle.

So is **GODFREY ASCHMANN,** the Philadelphia Hustler.

An immense stock of bedding plants is now ready. Every hole and corner full for immediate shipment.

Ageratum, dwarf, best blue, 4 in., $7.00 per 100; 3-in., $4.00 per 100.

Scarlet Sage or **Salvia,** Clara Bedman or Bonfire. Ours is the true genuine variety so much admired in all the capitals of Europe and America. Deep red, medium tall varieties; free bloomers. Seeds of these famous varieties were gathered by myself in Zurich, Switzerland, the home of the Salvias. Price: 4-in., $8.00 per 100. Have 5,000 of these to offer.

Rose Bushes, imported from Europe last fall, 3 feet high, Paul Neyron, Mrs. John Laing, Magna Charta, Jacqueminot, Hermosa, 6 in. pots, 35c; Baby Rambler, 5½-in., 35c.

Clematis, the true Jackmani, 6-in. pots, 3 feet, 35c to 40c.

Don't Forget We Lead the World in

MOONVINES.

Watch and be careful you don't buy Morning Glories for Moonvines.

We grow only the best varieties, hybrid or **Ipomoea Noctiflora,** for which we have had, for the past 20 years, a world-wide reputation. We ship every season, May and June, 20 000 to 25,000 plants into every state and territory in America, and in Cuba and Mexico. This Moonvine is much earlier than any other variety in existence; blooms freely, with very fragrant, pure white waxy flowers, and as large as a saucer. Price: 4-in. pots, nicely staked up, 30 to 36 inches high, $12.00 per 100; 2½-in. pots, $5 00 per 100.

Kentia Belmoreana, 5¼-in. pots, 20 to 25 in. high, 40c to 50c; 4-in. pots 20-in. high, 35c; 6-in., just received from Europe, **Belmoreana** and **Forsteriana,** $1.00 each.

Araucaria Excelsa Glauca, spring importation, 1907; have only specimen plants left, 7-in. pots, 6 years old, 5 tiers 25, 30 35 to 40 in. high, the same in width $1.50, $1.75, $2.00, $2.50, $3.00 to $4.00 each. **Robusta Compacta,** the same.

Have just received from steamer, May 1, from Antwerp a big consignment of about 5,000 **Araucaria Excelsa,** of all sizes. Plants with 3 tiers, 8 to 10 in. high, 40c; 10, 12 to 14 in., 50c; larger sizes, 60c to 75c.

All goods must travel at purchaser's risk only. Cash with order, please.

GODFREY ASCHMANN, 1012 W. Ontario St., **Philadelphia**

Importer, Wholesale Grower and Shipper of Pot Plants.

CHRYSANTHEMUMS.
